War's Effects on Our Grain Trade

WINNIPEG *Grain Exchange Was First to Investigate Illegitimate Gambling in Wheat in War Time, First to Take Steps to Prevent Prices Going Higher, and First to Find and Apply the Remedy—Interesting Review of the Trade By J. C. Gage*

THE effects of the war upon the grain trade of this continent was the subject of an unusually instructive address of Mr. J. C. Gage, president, Winnipeg Grain Exchange, at the annual meeting of that body. He pointed out that the outstanding feature of the marketing of grain in North America during the years of peace was the development of the grain exchanges. These organizations were due to commercial evolution; they were not created by the governments; they served a necessary economic purpose. The grain exchanges found the way to collect the grain at country points, assemble it in vast quantities at the terminal points, and distribute it among the mills of this continent and the mills of Europe. It was they that developed the system of classification of grain into grades, that developed the use of warehouse receipts, that perfected the system of insurance against fluctuation in prices known as future trading, that made possible the financing of grain by the banks without incurring undue risks, and that in time developed the most complete machinery for taking the grain from the producer and putting it in the hands of the consumer at the lowest possible cost.

But if the machinery of the grain trade was created by commercial evolution in times of peace, it is a machinery capable of being thrown out of gear by such a war as that now being waged, said Mr. Gage. For some time after the outbreak of war the effects upon this machinery were not very marked, but as the war proceeded one result after another followed, until the whole system of marketing grain upon this continent has been revolutionized to a degree which a couple of years ago would have been considered impossible and almost inconceivable.

At an early date after the outbreak of the war the problems of ocean tonnage, marine insurance and ocean freight rates became acute, and also the problem of the international rate of exchange. Naturally the exporting of wheat under these conditions became a most difficult matter, and these were the first effects which the war had upon the grain trade of this continent.

The rising prices of bread in the United Kingdom, as in other European countries, soon forced the British government to consider ways and means of protecting the consumer, and the British government decided to create an agency upon this continent for the purchase of wheat. The result was that a company was named at Winnipeg and authorized to purchase wheat for the United Kingdom. At a later date this company was entrusted with the buying of all the wheat for the Allies in Europe, especially for Great Britain, France and Italy.

When this stage was reached, the exporters of wheat in Canada found themselves deprived for the time being of their business and an important section of the grain trade was thus made to feel the full consequences of the war.

The Wheat Export Company that purchased for the European Allies made use of the machinery of the grain exchanges. It bought for future delivery in the ordinary commercial way, but representing as it did the treasuries of Great Britain, France and Italy, its operations were upon an enormous scale. During the times of peace in which the grain exchanges had been developed and had taken care of the wheat of the continent of North America no company had ever appeared which had behind it such enormous resources, which had furnished to it orders for such tremendous quantities of grain, and which consequently had such a predominating place in the exchange markets. Mr. Gage continued:—

"Buying through the winter and spring months for May and July delivery—and of course they were not the only buyers, as the Canadian mills were doing the same—a situation arose, which, as the month of May approached, brought to a head the accumulating effects of the war upon the grain business of this country. The gatherers of grain at country points had hedged their holdings in the usual way. Much of the grain so hedged did not come up to the contract grades, and the result was that as the month of May approached there was heavy bidding for the contract grades and prices went skyrocketing. Had the holders of May and July stuck out for their pound of flesh, they would have brought about a disaster to the Canadian grain trade, and, as it appeared later, to the grain trade of the whole North American continent, unparalleled in commercial history. To avoid this the Winnipeg Grain Exchange took hold of the situation, and the result was the next profound effect of the war upon the grain trade.

"The rising prices of wheat, accompanied as they were by parallel increases in the cost of flour, produced a clamor amongst the consumers of the country, and as usual this outcry was very largely directed against what is popularly called speculating or gambling in the bread of the people. The Winnipeg Grain Exchange began by instituting a censorship in order to ascertain accurately the extent and character, if any, of illegitimate speculating in wheat. Very little of such business was found by the board of censors, and after the first surprise due to the creation of the board of censors was over, and the first fall of prices that resulted therefrom, prices began to mount skyward again.

No Future Trading.

"The Winnipeg Grain Exchange then decided upon the fateful step that took away the facilities for future trading in wheat in the Winnipeg Exchange, and proceeded to take all the other steps rendered necessary thereby. The last closing price was taken as a basis of closing trades in the clearing house, and after a great deal of trouble the May and July accounts were all cleared as satisfactorily as it was possible to clear them to the various interests involved."

Mr. Gage then recalled the days of the crisis—unique in the history of the Winnipeg Exchange; the censoring; the withdrawal of facilities for future trading; the negotiations with the longs and with the shorts, with the scalpers and the spreaders, and with the agencies that gather the grain throughout the country. On the one hand, he said, the Wheat Export Company met the Exchange in a generous way, and on the other, the agencies which collect the grain in the country guaranteed to sell 90 per cent. of all the wheat they controlled for the balance of the crop year to that company. While many members of the Exchange were financially injured, yet all the members were dominated by the one spirit, the spirit, namely, of give-and-take, and of doing the best in the interest, not of their own particular line of business, but of the country during the period of stress and war. This was the next great effect of the war upon the grain trade. Much of the hedged grain did not come up to the contract grades contributed to the intensity of the crisis, but the major causes of this effect were undoubtedly war causes. Mr. Gage then particularized the war causes.

"To begin with," he said, "there was a loudly proclaimed shortage of the supply of available wheat. This shortage, for some reason or other was emphasized in the speeches of some of the most prominent men in the British Empire and also in the United States. Ministers of the Imperial government, high officials in both countries and hundreds of newspaper editors emphasized the fact that the surplus wheat in Russia was locked up by the war, that the surpluses in such countries as India and Australia were not available through conditions of transportation and that Argentine had no surplus at all. They proclaimed the dependence of the European Allies, so far as wheat is concerned, upon the continent of North America, and they devised ways and means of eliminating waste, of husbanding the resources and of persuading or coercing their peoples to use substitutes for the white bread to which they had become accustomed.

Higher Prices Inevitable.

"Next, there was this imperious need of the allied peoples for our wheat at a time when their men in uniform had been withdrawn from productive work, thus causing a labor shortage in agriculture as in other interests on the one hand, and on the other increasing the normal consumption of bread. The soldiers at the front must be fed and well fed; the workers in the United Kingdom were demanding and receiving higher rates of wages; the ranks of the workers had been increased by thousands and hundreds of thousands of women workers, so that the masses of the people in the United Kingdom had more money to spend than for some years previous.

"Next, the war had affected profoundly the money situation, and in so far as currency had been inflated or increased in any of its forms, higher prices were inevitable.

"Lastly, it must be noted that the concentration of the buying for the European Allies had been only slowly carried out and imperfectly at best. For example, in the Winnipeg market there were some who bought wheat for the Belgian Relief Commission; there were others who bought wheat for France; others again who bought wheat for the United Knigdom, and these were buying in open competition with one another in the Winnipeg market. Further, these were buying not only in competition with one another, but also in competition with Canadian millers and American millers, who themselves were buying wheat in order to fill flour sales to the same Allied governments. It was inevitable that a crisis should develop under such conditions as these, and the only wonder is that it was not worse.

Action of Winnipeg Exchange.

"The action of the Winnipeg Grain Exchange did not commend itself at first to the other grain exchanges of North America; indeed, the tendency in the exchanges of the United States was to question the wisdom of the steps taken in Winnipeg. It soon appeared, however, that the whole grain trade of this continent had been swept within the area of trouble and within a very few days the leading exchanges of the United States were forced to take steps almost identical with those taken at Winnipeg.

"Without the least desire to pose as having led the great exchanges of this continent, we can reflect that our Exchange was the first upon this continent to seriously investigate the question as to whether there was any illegitimate gambling in wheat in war time. It was the first also to take steps to prevent prices going higher still, and it was the first to work out and apply the remedy—and the only remedy within the hands of the Exchange—to the situation.

"By virtue of this fact, the Winnipeg Grain Exchange got into a better position with the general public than it ever had been. Responsible business men in all lines gave expression to their opinion that the Exchange had acted wisely and well in a very difficult crisis, and it dawned upon the public in general that the men engaged in the grain trade might be just as conscientious and just as patriotic as the men engaged in any other line of business in the world. Certainly the action taken by the Exchange contributed largely to the fact that the government at Ottawa was prepared to give a sympathetic hearing to the representatives of the Exchange on the whole matter of the marketing of grain during war time.

As to Government Regulation.

"This brings us to the next great effect of the war upon the grain trade of this continent, namely, the beginning of government regulation of the grain business. Every European country engaged in the war had found it necessary to undertake the regulation of grain supplies, grain distribution and grain prices. The period of state regulation was inaugurated in the warring countries of Europe one after another, and the mounting prices of bread upon this continent and the action of the grain exchanges compelled the governments of the United States and Canada to consider what they could do under the conditions. In the United States a food controller was appointed, Mr. Herbert Hoover, and the Food Control Bill tabled, which has resulted in the creation of the most gigantic wheat monopoly the world has ever seen.

"The United States Grain Corporation will be the only buyer of wheat at the great terminal markets, and will be the only distributor and seller of wheat from those markets to the American mills, the European Allies and the neutral countries. In the United States the exporters were first thrown out of business. Then it was decided to create this great grain monopoly; then prices were fixed by a commission appointed by the President, at which prices the Grain Corporation will buy all the wheat; then future trading was prohibited, and finally the mixing of the the grades of grain at the great terminal markets was made impossible. If we add to this the fact—although this was not due to the war—that the United States government had taken over the matter of the inspection of grain, had standardized the grade, and taken the inspection out of the hands of the different state legislatures, boards of trade and grain exchanges, one can realize the statement that this war has absolutely revolutionized the whole grain business of the United States. Who four years ago could have imagined that as the result of a European war the United States government would purchase all the wheat of the United States; that a government body would fix the prices; that the government would prohibit future trading, and that the government would prevent the mixing of grades, which was the very foundation of the splendid sample markets of the United States? Yet this is what has happened.

Board of Grain Supervisors for Canada.

"In Canada a different course has been followed. The government of Canada took into conference representatives of the producers and also of the trade, and especially of the Grain Exchange. The government heard all that our most experienced members had to say about the marketing of grain, and as a result of these negotiations the government of Canada created a body called the Board of Grain Supervisors for Canada, and clothed it with certain authority by an order-in-council under the Defence of the Realm Act. This Board is not a great buying corporation like that of the United States, on the one hand, and on the other it is not intended to usurp any of the functions proper to the Board of Grain Commissioners. This board is a regulating body, not an operating body. Its primary functions are: First, to regulate the price at which grain shall be bought and sold during the period of its existence; and, second, to regulate the distribution of the grain so that the grain will go to the Canadian people and the Allied powers. It has sometimes been said that the board has power to commandeer all the grain in Canada. It has no such power; it cannot go to the farms, for example, and commandeer the wheat there, and its power to commandeer at elevators is a power to enforce the price it has set. If the owner of the grain that is in an elevator refuses to sell at the price set, the board has power then to take the grain at that price.

Personnel of Board.

"It has sometimes been said that this board is a Grain Exchange body. Five of the eleven members of the board are not members of the Winnipeg Grain Exchange. Of these five, one is the president of the Canadian Council of Agriculture, one is the representative of the unorganized farmers, two represent labor organizations in Eastern Canada, and the fifth represents the remaining body of eastern consumers. Of the six members of the board who are also members of the Winnipeg Grain Exchange, one is the president of the Grain Growers' Grain Company, one is the president of the Wheat Export Company which buys for the Allies, and one represents the flour milling interests. It is a very curious mind that supposes that these three members represent the Winnipeg Grain Exchange on the Board of Grain Supervisors. It is safe to say, indeed, that the Winnipeg Grain Exchange has had but two representatives upon the board.

"The board, in accordance with its authority, has fixed prices upon Canadian wheat. It has also, in conjunction with Mr. Hoover's department, put into effect the regulation of the export of wheat between Canada and the United States. It has prohibited future trading, which is no longer necessary when prices are fixed, and it has organized ways and means for seeing that its decisions and plans for price and distribution are properly carried out.

"The fixing of prices, with the consequent prohibition of future trading, has affected certain sections of the trade and added them to the number of those to whom the war has meant the loss of their business. The outlook for these members of our Exchange at the moment is anything but bright, but I have not heard, up to the present, of any member of this Exchange who has not shown the same spirit of sacrifice that was manifested in the month of May during the crisis the Exchange then passed through. The loss of money is bad, and the loss of a permanent business is still worse, but bad as these things are, every member of the Exchange knows that still greater sacrifices have had to be made by many Canadians, and still greater sacrifices will be made by land and sea throughout the burning area of the war, and the spirit that every member has shown is that if the loss or interruption of business is a necessary thing, and if it proceeds from methods necessary for the defence of the realm, they will carry their burden and will do so without anger and without complaint.

Effect Upon Reciprocity.

"One peculiar effect of the war has been in regard to the free interchange of wheat between Canada and the United States. The Canadian government removed the duty upon wheat. Then by and by, the agencies that collect wheat in Western Canada signed a contract with the Wheat Export Company to sell them at least 90 per cent. of all the wheat they owned or influenced; then the United States undertook to stop the shipment of food supplies from this continent to enemy countries, and they prohibited the export of wheat, as of other foodstuffs, to any country whatever, including Canada, without a permit or license; then it was discovered, in conference between the food controller's department of the United States and the Board of Grain Supervisors for Canada, that it was advisable to regulate shipments across the line by this system of permits; that is to say, that American orders for Canadian wheat must have the approval of the food controller's department at Washington and the Canadian shipments of wheat across the line must have the permission of the Board of Grain Supervisors for Canada. These steps are temporary, they are war measures, and they are designed for good purposes and sufficient reasons, but to the popular mind they are interferences with the sacred pact of reciprocity. A greater interference remains to be mentioned, and that is, that the United States congress has guaranteed a minimum price of $2 per bushel for wheat for the crop of 1918, and has clothed the President with power, should he see fit, to impose a duty upon wheat that might try to slip into the United States, and without right or title, command the same guaranteed minimum. What effect this guaranteed minimum of the United States will have upon wheat growing in Canada during the coming year it is too soon to say."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Mr. Justice Archer fixed October 16 for hearing in the Superior Court, at Montreal, the action in which the Frères des Ecoles Chrétiennes are suing the city of Maisonneuve for $500,000 worth of debentures, being the balance of the price alleged to be due for the properties purchased by the city from the Christian Brothers in 1914 for the purpose of a public park at Maisonneuve.

The city, plaintiffs' declaration states, agreed to purchase the properties in question for the sum of $1,500,000, of which sum $500,000 was to be paid in cash on May 1, 1914, and on the same date $500,000 worth of city of Maisonneuve debentures were to be delivered to plaintiffs, redeemable in 40 years, and in the meantime paying 5 per cent. interest annually. The balance of $500,000 was to be paid in like debentures when the city took possession of the plaintiffs' school building and other accessories, forming part of the property sale, within four years of May 1, 1914.

The city was authorized by special legislation to issue debentures for the acquisition of this property, and the undertaking was carried out up to the date upon which was due the delivery of the balance of debentures worth $500,000. And it is in relation to the payment of these debentures that the present litigation turns.

Plaintiffs claim that as they have carried out their part of the bargain and turned over the property to the city, they have a right, under the agreement, to exact delivery of the debentures, bearing interest as from May 1, 1917. The city has offered to plaintiffs debentures to the value of $308,000 and states that these form the sum total of the amount available for the completion of the transaction; that, having been dispossessed of the balance of the bonds, worth $192,000, which are held by parties in virtue of claims to the title of certain parts of the property purchased, the city cannot be held to deliver more than the debentures offered, and that in the circumstances the plaintiffs cannot recover from the city the surplus of their claim.

The Court must decide if the debenture transfer of the $192,000 from the outstanding balance of purchase price of the property was based on regular procedure.

St. Germain, Guerin and Raymond are the attorneys for the plaintiffs; and Baker and Robitaille represent the city of Maisonneuve.

New Glasgow, N.S.—An issue of $29,000 10-year 5 per cent. bonds has been awarded to W. F. Mahon and Company at 91.121.

Stouffville, Ont.—Tenders will be received up till October 31st for an issue of $24,780 5½ per cent. school debentures. J. Urquhart, clerk, Stouffville, Ont.

Chatham, Ont.—The city has sold to local investors three issues of 6 per cent. debentures, aggregating $131,000. These issues were offered to the public during the first week of the present month, but as no bids were received from bond houses, the municipality sold them over the counter.

Windsor, Ont.—Tenders will be received until to-day, October 19, for the purchase of the following debentures: $46,024 5 per cent. local improvement 20-years; $80,430 5 per cent. local improvement 10-years; $32,178, school, 5½ per cent. 30-years. Tenders must be for each block separately. M. A. Dickinson, acting clerk, Windsor, Ont.

Saskatchewan.—Three Saskatchewan school districts have sold issues aggregating $4,400 to the Canada Landed and National Investment Company, of Winnipeg. Atwater school district has sold $5,500 school debentures to the Great-West Life Assurance Company, and Aylesbury, Sask., has sold $1,000 debentures to W. L. McKinnon and Company.

Montreal, Que.—An offer to float part of the Montreal $6,000,000 loan which falls due December 1, has been made to the board of control by the financial house of Versailles, Vidicaire and Beaulieu. Joseph Versailles, with whom were his partners and Joseph Dupont, of Quebec, stated that he was ready to undertake the floating of $[illegible] or $[illegible] of the loan, and perhaps the whole sum, according to what terms he might obtain from the city. There was a special meeting of the board to consider the matter. The finance department at Ottawa will be consulted regarding the matter.

Saskatchewan.—The following is a list of debenture applications granted by the Local Government Board during the week October [illegible] to 5th, 1917:—

School Districts.—Victoria Plains, $1,000 10-years not ex. 8 per cent. annuity; F. S. Stebbing, Victoria Plains. Prescott, $2,000 10-years 7½ per cent. annuity; W. Travethick, Naisberry. Rolling Ridge, $2,000 10-years not ex. 8 per cent. annuity; W. H. Scott, Imperial.

Rural Telephone Companies.—Bounty, $9,000 15-years not ex. 8 per cent. annuity; Geo. Heron, Bounty. Greenan, $3,000 15-years not ex. 8 per cent. annuity; J. A. Wood, Greenan. Outram, $5,000 15-years not ex. 8 per cent. annuity; S. Memory, Outram. Penzance, $7,000 15-years not ex. 8 per cent. annuity. L. B. Berg, Penzance. Golden Brae, $13,900 15-years not ex. 8 per cent. annuity; L. J. Forcier, Gravelburg.

Towns.—Broadview, $4,700 15-years 7 per cent. annuity; A. Sinclair, Broadview. *Shaunavon, $10,000 30-years 7 per cent. annuity; F. G. Horsey, Shaunavon.

*Rural municipality of Grassey Creek $1,000 20-years 7 per cent. instalment; A. R. Line, Shaunavon.

The following is a list of debentures reported sold through the Local Government Board from October 1st to 5th, 1917:—

School Districts.—Sceptre, $7,000. Aisne, $2,000. Instow, $1,800, Cymric, $2,000, Taelman, $1,200. Franko, $700; Great-West Life Assurance Company, Winnipeg.

Rural Telephone Companies.—Radant, $6,900; W. L. McKinnon and Company, Regina. Riceton, $2,100; Regina Public School Sinking Fund. South Cupar, $5,600; Osler, Hammond and Nanton, Winnipeg. Parkline, $3,500, Kronau, $2,000; W. L. McKinnon and Company, Regina. Wabash, $10,300; Nay and James, Regina. Maple Bush, $10,300; J. A. Thompson, Winnipeg. Harris, $28,400. Sinnet, $3,100; W. L. McKinnon and Company, Regina. Birch Hills, $5,700; Great-West Life Assurance Company, Winnipeg. Ferland, $2,200; W. L. McKinnon and Company, Regina.

*Being sold through the Local Government Board.

BANK CLEARINGS

The following are the bank clearings for the weeks of October 12th, 1916, and October 11th, 1917, respectively, with changes:—

	Week ended Oct. 11, '17.	Week ended Oct. 12, '16.		Changes.
Montreal	$ 88,300,520	$ 70,159,431	+	$18,141,089
Toronto	54,244,116	43,634,612	+	10,609,504
Winnipeg	53,139,177	30,672,482	+	13,466,695
Vancouver	[illegible]	[illegible]	+	2,281,704
Ottawa	5,588,450	[illegible]	+	812,360
Calgary	[illegible]	[illegible]	+	4,565,925
Hamilton	4,214,530	3,243,583	+	970,947
Quebec	[illegible]	[illegible]	—	221,787
Edmonton	2,598,535	2,116,360	+	482,175
Halifax	[illegible]	[illegible]	+	698,160
London	[illegible]	[illegible]	+	256,214
Regina	[illegible]	[illegible]	+	1,701,762
St. John	[illegible]	[illegible]	+	170,770
Victoria	[illegible]	[illegible]	+	175,705
Saskatoon	[illegible]	[illegible]	+	896,417
Moose Jaw	[illegible]	[illegible]	+	504,456
Brandon	[illegible]	[illegible]	+	[illegible]
Lethbridge	[illegible]	[illegible]	+	90,535
Fort William	[illegible]	[illegible]	+	75,007
Brantford	[illegible]	[illegible]	+	718,077
Medicine Hat	[illegible]	[illegible]	+	771,646
New Westminster	[illegible]	[illegible]	+	71,481
Peterborough	[illegible]	[illegible]	+	76,648
Sherbrooke	[illegible]	[illegible]	+	93,921
Kitchener	[illegible]	[illegible]	+	57,828
Totals	$[illegible]	$[illegible]	+	$58,067,201

The Toronto bank clearings for the current week are $64,326,560, compared with $66,301,876 for the same week in 1916, and $[illegible] in 1915.

GREATER DENIAL NECESSARY

To help win the war, greater denial and greater economy is necessary in Canada. The trade statistics show that we continue to import a considerable volume of luxuries. With all the money donated to the Patriotic, Red Cross and other funds—after all, a duty, with all the sums invested in war loans—after all, an excellent investment, we are not feeling the pinch of war as they are doing overseas. A recent dispatch to the Toronto Star by its London correspondent, Mr. F. A. Mackenzie, points out that it is urged by authorities in Great Britain that we should adopt the same severe, self-denying financial measures against imported luxuries which Britain is enforcing so successfully. "England has by strict regulations stopped the importation of almost everything save the absolute necessities for the civil population," said one high authority. "This compels the prosperous classes to limit their purchases, thus giving them unspendable surpluses, which are available for government loans. Canada, by arresting the importation of one article alone—automobiles—and preventing the use of all automobiles for pleasure riding, as England has done, would automatically make many million dollars available for war use.

"One cannot spend upon imported luxuries, and also have money available for war use. Every thousand dollars spent outside the Dominion for unnecessaries is a thousand dollars less for beating the Germans. Money thus saved, and subscribed in the Dominion's war loans or bank advances, can be used by the Imperial authorities to pay for Canadian products and munitions."

Eminent British financial authorities assured Mr. Mackenzie that the real inwardness of the recent marked reduction of Imperial purchases of Canadian products and munitions is solely financial. Britain requires vast quantities more urgently than ever, but is forced to make purchases from countries like the United States, where the cost can be met by loans and advances. Canada has been unable to do this, and her inability is largely due, say the authorities, because she continues to permit large sums to leave the Dominion to pay for imported luxuries. It became necessary this summer to send gold to Canada to meet the balance on Imperial purchases there. These are matters we should consider seriously as the time approaches for subscription to another war loan of $150,000,000.

SOLDIERS' LOANS AND THE STATE

Much of the amount overdue on mortgages payments of soldiers in Western Canada, under moratorium legislation, will be received, but there is a danger that if the war goes on much longer, the accumulated fund will reach a figure that will be somewhat difficult for the debtors to deal with and which possibly may trench upon the margin of security held. This matter was referred to by Mr. Charles P. Johnston, chairman of the British Canadian and General Investment Company, of London, England. No one would for a moment wish that anyone in the actual fighting forces should be worried about financial matters. If the war had lasted only a year or two, no great harm would have been done; but it seems, in view of its prolongation and the impossibility of saying when it will end, as if the result of this legislation would be: first, to protect the soldier at the expense of individuals instead of, as would be the only equitable course, at the expense of the State, and secondly, to pile up an accumulation of debt which the soldier will find very difficult to deal with if, and when, he returns to civil life the individual who helped the soldier with a loan runs great risk of losing his money, as the equity left in the land after the tax collector's demands are satisfied, may be nil. It has proved to be so in some cases. Present legislation, passed at a time when it was not anticipated that the war would last so long, ought to be radically modified, if the confidence of individual investors in mortgage security is to be retained.

Men who go into the fighting line should as far as possible be relieved from all care and anxiety with regard to financial affairs, more especially if they have wives and families dependent upon them. The burden of this relief ought to be borne by the community, and not solely by individuals who chance in the past to have assisted the man who is now a soldier by lending him money to enable him to buy or improve his house or his farm.

A continuance of the present system may in the long run prove a burden instead of a help to the fighting man, and on his return to civil life he may find himself hampered by a load of debt from which he may find it difficult to free himself. The conscription act does not simplify this situation.

UNION GOVERNMENT

The new Union Government is one step forward to what the people of Canada desire,—a government composed of men of both political parties and of men independent of political considerations,—but it is only one step forward. It is a government which will do much to help carry conscription at the next election, because the majority of people, we hope, want conscription, and largely because many Liberals and Conservatives will find it difficult to vote against a Union Government in which both parties are strongly represented. The outstanding feature of this coalition is its political character. With perhaps two exceptions, the cabinet as at present constituted consists of men who have made a mark in professional politics, not in business. Sir Robert Borden, as premier, probably recognizes the necessity for much more modern business methods in the administration of Canada's affairs while at war. He probably recognizes the need for the abolition of government red tape and the throttling of persistent old precedents. He probably endeavored to recognize these facts in the formation of the Union Government, but partisan politics were too strong.

Sir Robert had an extremely difficult task to get any kind of a Union Government, in view of the strength of party politics in war time. While we have a coalition government, it is still striped with politics rather than with business. The desire of the people for the inclusion in the cabinet of some of Canada's big business and technical men, is not met. We have allowed the services of several such of our men to be commandeered by the British government.

PROGRESS OF LIBERTY LOAN

Half the Amount Had Been Subscribed by Wednesday —Daily Average, $208,000,000

United States Treasury officials announced on Wednesday that subscriptions to the Liberty Loan, probably exceed $1,250,000,000, and may reach $1,500,000,000, or half the minimum quota set for the country at the beginning of the campaign.

The second half of the Liberty Loan drive started Tuesday with an appeal from Secretary McAdoo to the Governors of States to join in a National Liberty Loan Day on October 24th, to promote the sale of the bonds in response to the proclamation of the President.

The reports received at the United States Treasury Department on Tuesday indicated a sharp upward turn of the subscription curve. From a total of $399,000,000 on Saturday last the figures went up to $714,000,000 on Tuesday, and the estimates at the Liberty Loan division were that more than $800,000,000 had been subscribed. This means that in two business days the country had taken as many bonds as had been applied for in the preceding 12 days. The figures were based on unofficial and incomplete reports from eight of the twelve Federal Reserve Bank districts, added to official reports from three other districts, known to be less than their present total, according to unofficial advices on Tuesday. They show a grand total of approximately $714,000,000. The $800,000,000 estimate, which is thought to be liberal, therefore, makes allowance for sales in the Minneapolis district, from which no report has been received since the drive started.

The Monetary Times has been informed by the United States Treasury Department that the total subscriptions for the second Liberty Loan actually filed with the several Federal reserve banks and the Treasury Department up to the close of business October 10th, amounted to $325,465,000. While a large number of incorporated banks and trust companies throughout the country had not then reported any subscriptions to the Federal reserve banks, and while the Liberty Loan committees unofficially reported a number of large subscriptions which had not been formally filed, even making due allowance for these unreported amounts, the subscriptions thus far received indicate the necessity for the hardest kind of work on the part of the whole country for the balance of the campaign.

Daily Average, $208,000,000.

The Secretary of the Treasury has requested subscriptions to an amount of $5,000,000,000, in order that allotments might be made up to $4,000,000,000. There are 24 business days during the campaign period, and in order to obtain subscriptions of $5,000,000,000, the average daily subscriptions must amount to over $208,000,000 per day, whereas up to October 10th the average had been only about $36,000,000.

It is being impressed upon the people of the country that this vast undertaking must not be left to the people of great wealth, as no such sum can be subscribed except by the earnest co-operation of all the people of the country. This, by the way, is equally true of the forthcoming Canadian Victory Loan. It is estimated that in the first campaign in the United States there were about 5,000,000 subscribers and with the better organization now available, and the large amount of educational work which has been done, United States treasury officials anticipate at the close of the campaign, subscriptions from at least 10,000,000 people.

The official figures, October 10th, follow:—Boston, $41,-[illegible]; New York, $[illegible]; Philadelphia, $[illegible]; Cleveland, $1,805,000; Richmond, $12,229,000; Atlanta, $1,-[illegible]; Chicago, $[illegible]; St. Louis, $[illegible]; Minneapolis, no report; Kansas City, $1,237,000; Dallas, $1,899,-000; San Francisco, $16,047,000.

Unofficial reports from the West and Central West and Southwest, particularly through the Lakes, Pacific Coast, and Missouri regions, gave high hopes of strong support of the loan among the farmers and small-town residents. Scores of telegrams were received indicating a determination not to let the East carry away honors for subscriptions and make it a city, financiers', and bank sale.

Chicago reports indicate that the official figures represent a far smaller amount than has been actually subscribed. San Francisco's unofficial total at noon Thursday had reached $30,000,000. New England's estimated total was $48,000,000, Massachusetts giving $29,000,000, Rhode Island $7,000,000, Connecticut almost that amount, and the rest was scattering. St. Louis reported that its subscriptions were above $17,000,-000, and New York's was known to be far in excess of the official figures. Cleveland district subscription may run as high as 25 times the official report, messages from local committeemen there declared. Within 15 minutes after the sale opened in Omaha, unofficial reports said, that city had subscribed more than $7,000,000, or about five times the amount reported to the Kansas City bank.

Loan Strong in New York.

Sentiment for the loan is strong in New York, although buying has been slow, and committeemen insist that they will make their maximum quota. Interest in Chicago is quickening, small banks asking for instalment plan payment details, and decision has been reached to make the Grand Prix automobile race prizes Liberty Bonds instead of cash. Business organizations are taking the sale in hand in Philadelphia.

Among the large sales reported were Bell Telephone Company, St. Louis, $5,000,000; Crocker National Bank, San Francisco, $3,000,000; Western Pacific Railway Company, $1,077,000; Studebaker Corporation, Chicago, $1,000,000; United Fruit and United Worsted companies, Boston, $1,000,-000 each.

Campaigning has started in Minnesota and other Northwestern States east of Montana. Work in the far South and Texas is proceeding slowly.

RESTRICTION OF FARM LOANS WITHDRAWN

The United States treasury department informs *The Monetary Times* that as the result of conferences between Secretary McAdoo and representatives of the British treasury, the latter will withdraw its circular of January 11, 1917, which instructed the British mortgage companies to reduce the aggregate of their loans on farm lands in the United States by refusing extensions of loans at reduced rates of interest.

The action by Great Britain in removing this restriction will leave these companies free to renew maturing mortgages on the lands of American farmers. The British mortgage companies have been making loans on farm lands in the United States for many years, reaching, it has been estimated, $100,000,000 at the present time.

The Federal farm loan system is abundantly able to take care of all mortgages that come within the terms of the act. The law limits loans to farmers who are actually engaged in the cultivation of their land and fixes $10,000 as the maximum loan to each individual. In cases where the borrower does not come within the terms of the act, such, for instance, as when he has borrowed more than $10,000, he may negotiate to borrow from United States companies or to renew his mortgage with the British companies.

PERSONAL NOTES

Mr. J. D. Tolchard, assistant secretary of the Toronto Board of Trade, has been granted leave of absence for the period of the war, so that he may join the staff of the British War Mission, Washington, D.C. Mr. Chas. McD. Hay, chairman of the house committee, entertained him to luncheon, and to mark the committee's appreciation of Mr. Tolchard's services, presented him with a handsome wardrobe trunk.

Messrs. Wm. Lyall, J. N. Greenshields, K.C., and H. W. Beauclerk, directors of the Wm. Lyall Shipbuilding Company, recently left Montreal for Vancouver on business in connection with the company's new enterprise there. The company, organized some months ago with a capital stock of $1,000,000, has a number of vessels already under construction in its yards at Vancouver. The directors will be away about three weeks.

Colonel Charles Colquhoun Ballantyne, who has accepted the portfolio of Minister of Marine and Fisheries in the new Union Government, was born at Colquhoun, Ontario. He commenced his business career in Montreal, and while still a young man, became managing director of the Sherwin-Williams Paint Company. In 1911 he participated in the purchase of the entire concern, and since then he has been vice-president as well as general manager of the company. In 1903 he was president of the Montreal branch of the Canadian Manufacturers' Association, and in 1905-6 of the general association. He was appointed to the Montreal Harbor Commission in 1907. Mr. Ballantyne is one of our leading business men and, as harbor commissioner, acquired much experience which will be valuable in successfully carrying his Cabinet portfolio. He contributed an interesting article to *The Monetary Times Annual*, 1916.

Colonel Henry Cockshutt, who is one of the new directors of the Bank of Montreal, is one of the prominent business men of Brantford, Ontario. Born there on July 8th, 1868, he was educated in the public schools there. He is president and managing director of the Cockshutt Plow Company, Limited, with which concern he has been connected since 1884. In 1889-1900 he was mayor ot Brantford. In 1898 he was elected president of the Brantford Board of Trade, and in 1906 president of the Canadian Manufacturers' Association. Colonel Cockshutt is well known in Canadian industrial and financial circles.

Mr. James Henry Ashdown, recently elected a director of the Bank of Montreal, is one of the pioneers of Winnipeg and well known throughout the western provinces as a business man of the highest standing. He is president of the J. H. Ashdown Hardware Company, Limited, with headquarters in Winnipeg and branches in Calgary and Saskatoon; president of the Canadian Fire Insurance Company, vice-president of the Northern Crown Bank, and a director of the Canada Indemnity Company. Born in London, England, on March 31st, 1844, he came to Canada in 1852, and established his present business in 1869. He served as a member of the Winnipeg City Council and then as mayor of Winnipeg in 1907-08. He was a member of the Royal Commission on Transportation in 1906. He has also served as a member of the Board of Commission of Greater Winnipeg Water District. He is president of the Children's Aid Society, ex-president of the Winnipeg Board of Trade, and is on the boards of many other organizations in Winnipeg.

Messrs. A. E. Dyment, Douglas W. Ogilvie and Clark Brown have been elected directors of the Canadian Theatres Company, Limited, at the recent annual meeting. At a subsequent meeting of the directors the following officers and officials were elected:—Douglas W. Ogilvie, president; A. E. Dyment, vice-president; John Pringle, treasurer; C. R. Collyer, secretary.

Mr. Ralph Modjeski, one of the three members of the Board of Engineers of the Quebec Bridge, graduated in 1885 at the Ecole des Ponts Chausses, the Parisian government school, and went to the United States the same year. After working for seven years as assistant engineer with several bridge-building concerns, he entered the employ of a firm of consulting engineers [illegible] associated with the design and erection of the first Memphis bridge. After seven years with the consulting firm, Mr. Modjeski resigned to go into private practice on his own account, and established an office in Chicago in 1903. He designed and erected the Rock Island bridge, the Columbia River bridges on the Pacific Coast, the new Memphis bridge, the Thebes bridge and many others. During his career Mr. Modjeski has designed and erected bridges having a total cost of approximately $30,000,000. Some interesting facts and figures regarding the Quebec Bridge appeared in *The Monetary Times* two weeks ago.

Lieutenant-Colonel A. J. Wilkes, K.C., of Brantford, Ont., and Mr. C. C. Dalton, of Toronto, have been appointed vice-presidents of the Manufacturers' Life Insurance Company, in the place of Mr. R. L. Patterson and Mr. G. P. Scholfield, who died a few months ago.

THREE PROVINCES YIELD 210,000,000 BUSHELS

Mr. A. D. Smithers, chairman of the Grand Trunk board, who has recently made a trip to the West, gives a very promising account of the agricultural conditions there. He states that the crop taken off the western prairies this year is the second largest in the history of western harvests. Thrashing was well on the way to completion, and in Mr. Smithers' judgment the crop will reach 210,000,000 bushels, if not more, for the three prairie provinces. The new president, Mr. Kelley, is also confident that the results will show that the West has had a remarkably prosperous season. "With wheat at $2," said Mr. Smithers, "it should result in as large a cash return to the provinces as the banner year of 1915."

Mr. Smithers also noted an extension of the lumbering business in British Columbia, and made particular reference to the expansion of the industry in Prince Rupert, the Pacific terminal of the Grand Trunk Pacific. Both he and Mr. Kelley were well pleased with the physical condition of the western lines of the system as seen during their inspection. "Considering we have been handicapped by war conditions for the last three years," said Mr. Smithers, "I am agreeably surprised at the way in which our staff have been able to cope with the difficulties of maintenance."

Speaking of increased cost of maintenance and operation Mr. Smithers declared that the railways now have to pay treble the price which ruled before the war for materials, including locomotives, and that the wages bill of the Grand Trunk this year alone has been increased by $4,500,000, and that the coal bill has been swelled by an additional seven to eight million dollars.

Everyone's Help is Needed For Victory Loan

Issue Will Be Made Next Month—Both Large and Small Subscriptions Are Desired—Dominion-Wide Organization is Well in Hand For the Sale of the Bonds.

SMALL subscriptions are an important factor in the success of our war financing. The outstanding feature of the British Victory war loan was the great number of small subscriptions, which helped to swell the loan to record proportions. Our banks have much to do in financing war orders placed here and in carrying the increasing volume of agricultural and industrial production. Financial and other corporations will subscribe liberally to Canada's Victory Loan, 1917, to be issued next month, but it is absolutely necessary that many thousands of subscriptions, ranging from $100 to $25,000, should be received in order to make the loan a real success. Dominion war loan bonds are one of the world's best investments and have a patriotic flavor. A subscription to our Victory Loan is not a sacrifice. It is a duty, and incidentally it will remunerate the subscriber handsomely.

A large number of small subscriptions to the war loan will be more appreciated by the government than a small number of large subscriptions. The allotment of the loan to large subscribers will be cut down, if necessary, by the government so that all the small subscribers may have their full share of bonds.

There are many thousands of people who have from $100 to $5,000 for investment. Their duty is to lend this money to their country. The security of the war bond is excellent, the income yield is high and the bonds are readily saleable at any time, should the holder desire to sell.

Canada's prosperity at this time depends almost entirely upon the war orders being filled here for Great Britain. We must advance substantial credits to Britain so that she may continue these purchases. The funds raised by means of our Victory Loan next month will be used largely in that way. The people of this country are asked to lend their money to finance our share of the war, and more important, to finance Britain's war purchases here. Most of the money will be spent here, Canadian agricultural and industrial activity and prosperity thus being enabled to continue, despite the war.

When the subscriptions lists for our fourth war loan are opened about the middle of November, one of the most complete selling organizations ever devised in this country will commence to canvass the people of the Dominion to buy bonds of Canada's Victory Loan, 1917, as it is officially known. The services of the bond houses, banks, stock brokers, the life insurance companies and practically every other financial group have been enlisted in a widespread organization which will endeavor to make the coming war loan a national one in every sense of the term. A strong effort will be made to reach every possible subscriber throughout the country.

A Dominion executive committee has been appointed as well as provincial committees which will act under the supervision of the Dominion committee. Banking, insurance, publicity and other committees have also been appointed. County organizations are being arranged, teams and captains being allotted to various districts. In short, everything is being done by the finance department, in co-operation with the various organizations whose help it has obtained, to have the loan made a complete success.

It remains for the people of Canada to do their part. Not only are the large corporations and wealthy citizens expected to subscribe the largest amount possible in each case, but the smaller subscriptions, ranging from $100 to $25,000, are also particularly needed. These may possibly be the chief factor in the complete subscription, if not oversubscription, of the loan.

Dominion Executive Committee.

The following is the Dominion executive committee in charge of the war loan campaign, co-operating with the finance department, Ottawa:—

Nova Scotia, G. S. Campbell; New Brunswick, Hon. W. H. Thorne; Prince Edward Island, C. H. B. Longworth; Quebec, J. M. Mackie; Island of Montreal, J. W. McConnell; Quebec Province (outside of Island of Montreal), E. A. McNutt, of the Sun Life Assurance Company, Montreal; Ontario, Mr. G. H. Wood, of Messrs. Wood, Gundy and Company, Toronto; Manitoba, Sir Augustus Nanton, Winnipeg; British Columbia, William Farrell, Vancouver.

The Canadian Bankers' Association has appointed the following committee:

Montreal, C. E. Neill, Royal Bank of Canada; H. B. Mackenzie, Bank of British North America; A. D. Braithwaite, Bank of Montreal; Beaudry Leman, Banque D'Hochelaga; T. E. Merritt, Merchants' Bank; E. C. Pratt, Molsons Bank; H. B. Walker, Canadian Bank of Commerce. Toronto, H. V. F. Jones, Canadian Bank of Commerce; F. D. Boulton, Imperial Bank; Lieut.-Col. J. Cooper Mason, Home Bank; Robert Foss, Dominion Bank; and J. A. McLeod, Bank of Nova Scotia. Co-operating committees will also be appointed for the other provinces.

Publicity Committee is Busy.

The publicity committee of the Dominion executive have opened offices on the third floor of the Dominion Bank Building, Toronto, with F. W. Kerr, of Kerr, Fleming and Company, in charge. It will be the function of this office to supply all the advertising matter required, supplementary to the newspaper advertising, which will include posters, etc. This committee is as follows:—

F. W. Kerr, Kerr, Fleming and Company, Toronto; R. A. Stephenson, Harris, Forbes and Company, Montreal; Murray E. Williams, O'Brien and Williams, Montreal; Rene T. Leclerc, Montreal; T. H. Andison, Dominion Securities Corporation, Toronto; W. N. McIlwraith, Wood, Gundy and Company, Toronto; W. Wilder, Wood, Gundy and Company, Toronto; A. Muirhead, Dominion Securities Corporation, Toronto.

Mr. M. E. Williams, of this committee, in an interview this week, said that the organization to promote the loan is progressing rapidly and that hundreds of the leading business men and financiers all over Canada are deserting their offices and will for the next few weeks devote their time to make the loan a success.

Many unique advertising schemes are being planned, and the effort to get Canadians to subscribe to the loan will result in one of the greatest patriotic compaigns Canada has ever seen.

Mr. Williams says that many of the schemes suggested by J. W. McConnell and E. A. McNutt in connection with the Montreal and Quebec campaigns will be adopted throughout the Dominion.

Mr. E. R. Wood, Toronto, is chairman of a committee which will seek subscriptions from the large corporations and wealthy individuals.

City Treasurer A. K. Bunnell, of Brantford, is chairman of the war loan committee for the county of Brant. This county is being organized by Mr. J. C. Hope, of the Dominion Securities Corporation, under the district management of Mr. W. C. Brent, of Brent, Noxon and Company, Toronto.

For the purposes of the campaign, the province of Quebec, outside of the island of Montreal, has been divided into ten divisions, with two joint chairmen, one French-speaking,

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER
25 West Broadway New York, N.Y.

one English-speaking, at the head of each. The divisions follow county lines. The chairmen have been appointed for the committee for the rest of the province, at the head of which are Mr. E. A. McNutt, and Mr. A. P. Frigon, as joint executives, and they are organizing the campaign in their respective divisions.

The divisional chairmen were entertained at a luncheon recently by Mr. J. M. Mackie, head of the eastern section of the Canadian Bond Dealers' Association, and one of the members of the Dominion executive committee. Hon. Walter G. Mitchell, treasurer of Quebec province, was the principal speaker and assured the war loan workers that they would have the hearty support of himself and his department in the coming campaign. Mr. Mitchell stated that as success for the loan was imperative, it would be generously supported on national lines, and as a matter entirely out of the sphere of party politics. All classes of the province, irrespective of nationality or creed, must unite to provide the Dominion government with the funds for which it is to ask.

Other speakers at the luncheon included Mr. T. Rinfret, A. P. Frigon, E. A. McNutt and J. M. Mackie, with the speeches alternately in French and English.

The divisional chairmen have commenced the work of subdividing their territory and organizing sub-committees which will direct the active selling of the bonds. Similar work is proceeding throughout the Dominion.

The plan of campaign proposed for the war loan was outlined to members of the Montreal Stock Exchange by Mr. J. W. McConnell, as chairman of the committee for the Island of Montreal, and Mr. E. A. McNutt, as chairman of the committee for the rest of the province. Both executives of the campaign in this province appeared before the members at a special meeting held at the close of the afternoon session.

Fraternal Societies to Help.

Sir Thomas White, minister of finance, asked the co-operation of the Canadian fraternal insurance societies in Toronto last week. He urged the necessity for active aid from every man, woman and child in Canada, if the loan was to be successful. Much is apparently expected from the support of the whole of the friendly societies of Canada, and it was recalled at the meeting that these bodies were the most important factor in making Mr. Lloyd George's scheme of compulsory insurance of workers a success some years ago in Great Britain.

A resolution was passed heartily endorsing the loan and pledging the meeting to urge the fraternal insurance societies to invest in the loan all their available funds and also to advise each member to invest as much as possible individually. In addition, it was thought best to circularize, if possible, all the membership of such societies, in which case at least 750,000 persons will be directly appealed to in that way. The available funds of fraternal insurance societies probably amount to about $1,000,000. A small committee was appointed to carry out the detail and to keep in touch with the minister of finance.

A delegation from the Canadian Fire Underwriters' Association, headed by Mr. P. M. Wickham, vice chairman of the association, recently visited Ottawa to meet the minister of finance in connection with the war loan. The association offered its services for the purpose of promoting the success of the issue.

NEW UNION CABINET

The Dominion Cabinet, as now constituted, is as follows: Sir Robert Borden, prime minister and secretary of state for external affairs; Hon. N. W. Rowell, president of the council; Major-General S. C. Mewburn, minister of militia and defence; Hon. F. B. Carvell, minister of public works; Sir Thomas White, minister of finance; Sir Edward Kemp, minister of the overseas military forces; Hon. J. D. Reid, minister of railways and canals; Hon. C. J. Doherty, minister of justice; Hon. Arthur Meighen, minister of the interior; Hon. A. L. Sifton, minister of customs; Sir George Foster, minister of trade and commerce; Hon. T. A. Crerar, agriculture; Hon. J. A. Calder, immigration and colonization; Hon. T. W. Crothers, labor; Hon. Martin Burrell, secretary of state and minister of munitions; Hon. Pierre E. Blondin, postmaster-general; Hon. Albert Sevigny, inland revenue; Hon. C. C. Ballantyne, marine and fisheries; Hon. Frank Cochrane and Sir James Lougheed, without portfolio; Hon. Hugh Guthrie, solicitor-general.

OGILVIE FLOUR MILLING COMPANY

A combination of favorable conditions, together with an unusually capable management and active directorate, allowed the Ogilvie Flour Milling Company to present an excellent report to the shareholders at the annual meeting last week. The financial statement was the best in the company's history and showed net profits of $1,358,847. The company handed a large proportion of this sum to the government as war taxes. The corporation declared dividends and bonus to the common shareholders amounting to $625,000. The war tax provided for before bringing forward net profits amounted to a sum in excess of that. The company's prosperity was therefore shared generously by the government. On this point, Mr. Black, the vice-president, made the following comment:—

"It may interest some to know that our contribution to the business tax this year will exceed the dividends paid to the holders of the common stock of the company, so that while we have done very well for our shareholders, we have also contributed very largely from our success towards the necessities of the government." Further, there was no concentration of the profits distributed in the hands of a few persons. "I would also like to state," adds Mr. Black, "that we have a very large number of shareholders, and that the average individual holding is 35 shares."

The following table compares certain accounts for the past two years:—

	1916.	1917.
Milling profits	......	$ 721,039
Other profits	......	637,808
Net profits	*$774,270	$1,358,847
Preferred dividend	140,000	140,000
Balance	$634,270	$1,218,847
Common dividend	300,000	625,000
Surplus	$334,270	$ 593,847
Previous surplus	512,060	846,330
Total surplus	$846,330	$1,440,177
Contingent account	......	1,250,000
Total profit and loss	$846,330	$ 190,177

*After payment of war tax for two years to August 31, 1916.

After making provision for the dividend on the preferred stock, $1,218,847 was available for distribution on the common stock. This is equal to 48.7 per cent. on the outstanding $2,500,000 stock. The regular 10 per cent. and the extra 15 per cent dividend absorbed $625,000, leaving $593,847 as a net surplus for the year. That, with the previous balance of $846,330 carried forward, would have left a total of $1,440,177 in profit and loss, but the directors set aside $1,250,000 to contingent account—a wise precaution. As a similar amount was taken from surplus profits to start a contingent account in 1914-15, there is now in that account $2,500,000, an amount equal to the common stock capital.

The company's directorate is headed by Mr. Charles R. Hosmer, the well-known financier, as president. Mr. W. A. Black is a very practical vice-president, and Mr. G. A. Morris, an unusually valuable secretary. The other directors and officers are: Directors—Sir Montagu Allan, C.V.O., Mr. Charles Chaput, Mr. George E. Drummond, Sir Crarles Gordon, K.C.B.E., Sir Herbert Holt, K.B., Sir Augustus Nanton, K.B., and Mr. Shirley Ogilvie. Officers—Mr. S. A. McMurtry, treasurer and Mr. W. R. Dean, assistant secretary.

WANT LIABILITY PREMIUMS TAX EXEMPT

British Columbia Insurance Delegation Wait on Provincial Government

"As an old insurance man, I can tell you frankly that your contention is a sound one, and the matter will be considered sometime in October and will be practically decided by the premier, the attorney-general and myself, and I promise you to do all I can to meet your wishes." This was the statement made by the Hon. John Hart, finance minister of British Columbia, to a delegation from the Insurance Federation of British Columbia, consisting of Wm. Thompson, W. Wyllie Johnston, J. H. Watson, A. E. Goodman, secretary of the Federation, and J. R. Shearer, secretary of the Victoria Federation, which waited upon the government recently regarding the surtax on liability insurance companies. The Honorable John Hart, finance minister, and the Honorable J. W. de B. Farris, attorney-general, met the delegation on behalf of the government.

Mr. Johnston, in presenting the case for the Insurance Federation, stated that the delegation represented a large, influential and rapidly growing association of insurance men; that the delegation did not appear before the government in a contentious mood, but wished to place before the government, in a friendly and loyal manner, what appeared to them to be an oversight in the application of the Surtax Act of 1917 to liability insurance companies.

"The above act," continued Mr. Johnston, "imposes a tax on gross premiums written during the years 1915 and 1916, including employers' liability premiums, and we submit that said liability premiums should be exempt from taxation for the following reasons, viz.:—

Assured Must Pay.

"Section 6 of the 'Assessment Act, 1903,' provides for the taxation of corporations; banks being taxed on their property and incomes, and other corporations, such as insurance companies, telegraph, telephone and express companies, gas, water and electric light and power companies, on their gross revenue.

"It is the clear intention of the assessment act to differentiate as between income and gross revenue, so as to allow, where possible, a distribution of the tax amongst the users or consumers of the product or commodity. In such cases the corporations so taxed are enabled to add the tax to the other costs of doing business, and make their rates accordingly.

"We do not object to the imposition of a tax to increase the revenues of the Crown, but only to the distribution of the burden as it applies to insurance companies. The expenses of the country must be met, and insurance companies, like other corporations, realize that when they are taxed they are simply acting as collectors, as it is the assured who eventually must pay.

Received No Compensation.

"By the introduction of the 'Workmen's Compensation Act,' on January 1st, 1917, the companies transacting liability insurance lost this source of premium income. Notwithstanding the fact that the insurance companies had spent a good deal of money in building up an efficient organization to deal with their liability business, they did not ask for, nor did they receive, any compensation when suddenly deprived of this source of income, being also forced at considerable cost to dismantle their agency plants.

"The 'Surtax Act' was passed on May 19th, 1917, and under it the insurance companies are taxed on their 1915 and subsequent gross annual premiums, including liability premiums in connection with which they have no possible chance of recovering the amount from their assured or from reinsuring companies, but must pay the amount out of premiums collected from other branches of their business, such as accident, sickness, automobile, burglary, guarantee, plate glass and marine insurance.

"Many companies transacting the above classes do not write liability insurance, or to such a small extent as to make it a negligible quantity, and we submit that this taxation of back premiums is a serious discrimination. We make no claim for exemption on premiums written for other classes of business, for there no discrimination is shown, all being taxed equally, and rates can be arranged to meet this additional known cost.

"Had a large profit been made in this class of business, the tax might have been paid out of profits, but the experience of the companies for many years past has been far from satisfactory, and the difference between premiums and losses as shown in abstracts and prepared by the department of insurance must not be taken as representing profit. If expenses and unsettled claims be added to current losses, the margin of profit, if any, will be found to be very small. If the liability companies had dismantled their plants and left the country on January 1st, 1917, the government would have had no means of collecting the surtax on business done in previous years, but most of the liability companies carry other lines of insurance and they did not leave the country, and furthermore, if this surtax stands they will be obliged to pay the tax from other sources of revenue, as before mentioned."

The delegation asked that in assessing the companies under this act, consideration should be had for conditions as outlined above, and tax levied on gross premiums less liability premiums for the years 1915 and 1916.

LONDON ANALYSIS OF GRAND TRUNK

Profit Should Pay Year's Dividends on Guaranteed and Preferred Stock

In view of the uncertainty of the situation as regards the Grand Trunk Railway, it would not be surprising if the question of the distribution of profits for 1917 were to be deferred until the accounts for the whole year are made up, by which time it is probable something more definite may be known as to the company's liability in connection with the Grand Trunk Pacific, says the London Statist. A year ago full half-yearly dividends were paid upon the 4 per cent. guaranteed and the 5 per cent. first preference stocks, and for the whole of 1916 those two stocks received their full dividends, as did the 5 per cent. second preference stock. Last year the gross earnings of the Grand Trunk proper were unprecedented, while its subsidiary, the Grand Trunk Western, secured exceptionally good results for the 12 months to June, 1916, which enabled that undertaking to repay some portion of the advances previously made by the parent company. So far as volume of business and gross receipts are concerned, 1917 is even better than last year, gross receipts of the parent line for the seven months to July 31 having been £776,361, or nearly 15 per cent. more than in the corresponding period of 1916. Since the end of July a further expansion of about £70,000 in gross earnings has been reported. But even allowing for no change in gross receipts during the last five months of the year they will amount to £10,600,000 for 1917. Increased wages, dearer fuel and material, and the handling of extra traffic, added £935,000 to the expenses for the seven months, so that net earnings were £158,000 lower; and again assuming no further shrinkage occurs in net receipts in the five months to December 31 next, they will amount to about £2,500,000.

Expenses Outbalanced Receipts.

The Grand Trunk Western Railway in the year to June 30 last, while securing larger gross receipts, had to submit to an extraordinarily large addition to expenses, and as far as can be ascertained, with December, 1916, results estimated, net earnings for the year were about £252,000 smaller than for 1915-16. For that year the net profit of the Western line amounted, roughly, to £200,000, so that it would appear that instead of a credit item of £119,000 as for 1916 the Grand Trunk may have to meet a deficit of about £52,000 this year. Further, the Detroit, Grand Haven and Milwaukee line, towards meeting whose charges the Grand Trunk proper had to contribute £40,239 in 1916, had a shrinkage of £78,000 in net receipts for the seven months to July last, and if no further decline occurs the parent line may have to meet a deficit of £118,000 this year. Assuming interest and other charges, less miscellaneous income, to be on the same basis as for 1916, it is probable, therefore, that for 1917 the profit of the Grand Trunk system will be approximately £794,000. In the remaining months of the year the gross receipts of the Grand Trunk proper and of the Detroit line seem likely to show continued expansion, but it remains to be seen whether further decline in net earnings will occur. Should net receipts show further falling off, the net profit for 1917 will, of course, be even lower than the sum of £794,000 estimated above. The Grand Trunk Western reported a decline of £37,450 in net earnings for July, but unless its fiscal year has been changed to conform with the calendar year in continuation of the practice now fairly generally adopted by railroads of the United States, any fluctuations in its earnings and

OFFICERS OF THE BANK

R. Campbell, General Manager
J. P. Roberts, Supt. B.C. Branches
V. F. Cronyn, Supt. Eastern Branches

profits for the current half-year will not be reflected in the income statement of the Grand Trunk system for 1917.

In order to show the earnings, profits and dividends of the Grand Trunk for the last two years, and the probable profits for 1917 on the assumption that no change occurs on balance in net earnings during the five months to December next, we give the following statement:—

	*1917	1916	1915
Gross receipts	$10,596,000	$9,819,730	$8,292,688
Operating expenses and taxes	8,100,000	7,165,613	6,138,035
Ratio	(75.47)	(72.97)	(74.02)
Net receipts	$ 2,496,000	$2,654,127	$2,154,653
Interest and other charges less miscellaneous income	1,532,000	1,531,815	1,519,912
Grand Trunk Western year to June 30	Dr.52,000	Cr.119,208	Dr.122,177
Detroit, Grand Haven	Dr.118,000	Dr.40,239	Dr.1,880
Net profit	$ 794,000	$1,202,281	$ 510,684
Dividend on 4% guaranteed	....	500,000	500,000
Do [illegible]	......	(4%)	(4%)
Balance	......	$ 702,281	$ 10,684
Dividend on 5% 1st preference	.....	170,842	.....
Balance	.....	$ 531,439	$ 10,684
Dividend on 5% 2nd preference	....	126,420	....
Balance	....	$ 405,019	$ 10,684
Dividend on 4% 3rd preference	Nil.	Nil.	Nil.
Balance	......	$ 405,019	$ 10,684
Reserve fund	......	400,000	......
Brought forward	$ 20,026	15,007	4,323
Carried forward	.....	$ 20,026	$ 15,007

*Estimated on assumption no change occurs in five months to December, 1917.

The estimated profit of £794,000 is just about sufficient to pay the full year's dividends on the 4 per cent. guaranteed and the 5 per cent. first and second preference stocks, but while we cannot pretend to predict what action the directors may take six months hence, it must not be overlooked that they may follow the same procedure as six months ago, and set something aside to reserve for contingencies. The price of the guaranteed stock is now 59. The first preference is quoted at 63½, the second preference at 53, the 4 per cent. third preference at 23½, and the ordinary at 9¾.

MEANING OF CO-INSURANCE

"The property owner who carries a fire insurance policy upon his property with a co-insurance clause attached, agrees that in case of loss he shall receive only a proportion of the amount that the insurance policy bears to the amount of insurance that is stipulated in the co-insurance clause, which may be 50, 60, 70, 80, 90 or 100 per cent. of the value of the insurance, says the Ontario fire marshal, Mr. E. P. Heaton. Therefore, if the insurer is to collect the full amount of any loss, he must at all times keep his property insured for the full amount called for by his co-insurance contract; if he fails to maintain the required amount of insurance, in case of loss the company is only liable for that portion of the loss which is represented by the proportion that the actual insurance bears to the required amount. Thus, if the value of the property is $10,000 and has an 80 per cent. co-insurance clause attached to the policy, the party must then carry $8,000 insurance. Should it be found at the time of loss that he is only insured to the amount of $6,000, he is short $2,000 of the amount he agreed to carry which is one-fourth or 25 per cent.; he must then stand this proportion of the loss. In case such loss should be $5,000, the insurance company would pay the insurer three-quarters or 75 per cent. of $5,000, which would be $3,750 and the assured or co-insurer must stand the other one-quarter, or $1,250. Or, if the loss was only $200, the insurance company would then pay three-quarters, or $150, and the assured must stand the other quarter, or $50."

AGRICULTURE IN MANITOBA

[illegible] holdings in Manitoba increased from 45,606, with an acreage of 12,228,233, to 47,122, with an acreage of 12,976,783, according to recent figures of the census office. As practically none of the new territory annexed to the province by the Extension of Boundaries Act has come under the plough, its area is not here taken into account. The total land area of the province, exclusive of the new addition, is placed at 41,169,098 acres. Of this amount, 12,228,233 acres, or 29.70 per cent., was occupied as farm land in 1911, as compared with 12,976,783, or 31.52 per cent. in 1916. The improved land increased from 6,746,169 acres in 1911 to 7,162,162, being a five-year increase of 415,993 acres, or about 6¼ per cent.

The total area placed under crops in 1911 was 5,161,811 acres, as compared with 4,995,296 and 5,107,755 acres, respectively, in 1915 and 1916. The principal decreases are in the acreages devoted to wheat, flax and hay. The acreage sown to wheat shows a decrease of $295,454 acres from 1911 to 1915, and a further drop of 78,129 acres in 1916. During the same period the flax acreage has fallen off by more than 63,000 acres, the acreages of 1915 and 1916 being only about 20 per cent. of the acreage of 1911.

The enumerator's returns show that only 29,955 acres, or less than three-fifths of 1 per cent. of the land from which a crop was expected failed to give a return in 1915, as against 77,546, or 1.5 per cent. of the sown acreage in 1916. With the exception of oats, the areas affected are too small to make any appreciable difference in the total production.

The total value of the field crops of Manitoba in 1915 was $96,758,433. Of this amount, cereals possessed $89,308,501; grass seed, $31,310; fodder crops, $5,512,262, and hoed crops, $1,906,360, as compared with a total value in 1910 of $45,508,826, comprising $41,835,599 for cereals, $9,660 for seeds, $1,810,833 for fodder crops, and $1,852,734 for hoed crops.

The revival in the sheep industry shown by the census of 1910 is further emphasized by the figures of the recent census, which show an increase of 105.6 per cent. in the last five years. The average number of horses and mules per farm is nearly seven, and their value $1,082.80.

PUBLICATIONS RECEIVED

War.—"Canada in Flanders," by Lord Beaverbrook; the official history of the Canadian Expeditionary Force. Vol. II. With maps and appendix. Ninth edition. Published by Hodder and Stoughton, London, Toronto and New York.

Municipal.—"Shall Municipalities Own Their Utilities." by A. G. Christie, M.E., Associate Professor of Mechanical Engineering, Baltimore, M.D. Reprinted from Industrial Management. A pamphlet discussing public ownership of utilities.

Commerce.—A booklet containing a series of twelve advertisements describing Canada under war conditions, and put out in the "Literary Digest," New York, on behalf of Canadian newspapers, by Smith, Denne and Moore, Limited, Advertising Agency, Lumsden Building, Toronto.

Mortality Statistics.—Reprint No. 400. A pamphlet issued by the New York Public Health Department, dealing with the relation of occupation to mortality. "Occupation and Mortality," by Shirley Wilmotte Wynne, M.D., chief of the division of Statistical Research and William H. Guilfoy, M.D., Registrar of Records, Department of Health, New York. Issued by the United States Public Health Service, Washington.

Farm Loans.—"The Farm Mortgage in Alberta." A booklet illustrating the advantages of farm mortgages in Alberta. This handsome, illustrated brochure points out the advantages to the investor who places his affairs in the hands of the Associated Mortgage Investors. The business, record and organization of the company is discussed with a general explanation of the papers and the benefits derived by the service rendered. The temperature, rainfall and climate of Alberta is given with general information and statistics of the province and a list of prominent institutional investors. The booklet contains a wealth of information and is made doubly interesting by excellent photographs. It is one of the best things of its kind ever issued. "Farm Mortgage in Alberta." Issued by Associated Mortgage Investors Incorporated, Rochester, New York.

"A Talk with a Business Man."

This is the title of a Booklet which every business man should read once at least; reading it twice will certainly convince him of the truth it tries to teach. Before Making Your Will, and before appointing an Executor, let us send you this Booklet for perusal. Mailed to any address on request.

ONTARIO'S FIRE LOSSES

During Eight Months This Year They Totalled Over Seven Million Dollars

The fire loss in Ontario for the first eight months of the year has been as follows, according to figures of Mr. E. P. Heaton, provincial fire marshal:—

Month.	No. of fires.	Loss.	Insurance loss.	Loss not covered by insurance.
January . . .	[illegible]	$ [illegible]	$ [illegible]	$ [illegible]
February	1,020	1,329,369	1,072,959	256,410
March	765	1,144,373	[illegible]	[illegible]
April . ..	[illegible]	[illegible]	[illegible]	202,977
May . . .	[illegible]	[illegible]	[illegible]	289,174
June . ..	[illegible]	515,936	310,742	205,194
July	852	512,391	407,908	104,483
August . ..	931	605,115	394,010	211,105
Totals . ..	6,622	$7,054,550	$5,285,130	$1,769,420

Properties Destroyed.

Here is an interesting statement of the fire marshal, classifying the properties destroyed or damaged by fire in Ontario in August:—

Class of property.	No. of fires.	Amount of loss.	Insurance. loss.	Loss not covered by insurance.
Apartment houses, rooming houses, flats	4	$ 1,603	$ 1,403	$ 200
Barns (farm only)	234	251,763	153,482	98,281
Buildings in course of construction	1	220	....	220
Churches	13	1,627	1,627	....
Clubhouses	2	412	412	..
Coal, coal and wood yards, trestles	1	600	....	600
Cordwood, logs, lumber, bark in woods	4	6,445	6,411	34
Dwellings	95	120,269	75,591	44,678
Elevators and grain warehouses	1	50	....	.
Exhibition buildings, rinks, amusement parks, racetracks	3	1,512	1,150	362
Garages	4	2,471	916	1,555
Automobiles, motor cars, motor trucks	10	1,946	1,540	406
Halls, lodge rooms, assembly halls, fire halls	3	2,728	1,535	1,193
Hotels and boarding-houses	9	8,492	8,390	102
Hotels and boarding-houses (summer only)	..	....	...	. ..
Lumber in mill yards and wholesale and retail yards	4	6,718	4,798	1,920
Mercantile stores	46	33,855	26,011	7,844
Office and bank buildings	5	1,549	1,489	60
Manufacturing and special hazards	32	116,214	71,778	44,436
Prisons, reformatories, gaols, asylums	1	50	50	....
Railway risks — Steam and electric	7	13,757	12,137	1,620
Schools, colleges, hospitals, libraries	8	4,651	2,479	2,172
Steamers, tugs, vessels, dredges, yachts	2	5,350	5,350	. .
Stables, sheds, outhouses (not farm risks)	55	11,683	7,965	3,718
Theatres, moving picture houses	1	7,410	5,820	1,590
Miscellaneous — Such as bridges, thrashing outfits, stone crushers, icehouses, evaporators, mining risks	6	3,740	3,620	120
Total . .	931	$605,115	$394,010	$211,105

Causes of Fires.

Here is another statement, showing the causes of fires [illegible]:—

Cause.	No. of fires.	Amount of loss.	Insurance. loss.	Loss not covered by insurance.
Chimneys, flues, cupolas and stacks, overheated or defective	[illegible]	$ [illegible]	$ [illegible]	$ [illegible]
[illegible]	[illegible]	.	..	. .....
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	3,531	2,751	780

Safety of Principal—Certainty of Interest

A writer in one of our financial journals recently said that real estate mortgages combine the two great essentials of a conservative investment safety of principal and certainty of interest.

To those who have funds for investment only in small sums, this most desirable class of security is not directly available. They may, however, secure all those advantages by investing in the bonds of this corporation, which are based on upwards of thirty-two million dollars of carefully selected first mortgages on improved real estate. These bonds may be had in denominations of one hundred dollars. They are a security in which Executors and Trustees are expressly authorized by law to invest trust funds.

Send for specimen bond, copy of Annual Report and full particulars.

GOVERNMENT BOND BORROWING

English Loan Authorized by Parliament in 1692 Generally Credited with Being Beginning of State Borrowing

The government loan, which is generally regarded as being the precursor of bond issues by governments, and from which the vast system of modern government borrowing is a legitimate development, was made by the English parliament in 1692. Long before that time, as pointed out by the Liberty Loan publicity bureau, the Italian princes had been accustomed to make extensive borrowings from their wealthy subjects, and the French government, under Louis XIV., had borrowed great sums from the French people; large loans to the government of Holland were frequent, and were considered most desirable investments by the frugal and conservative Dutch people. But the English loan authorized by parliament in 1692 is generally credited with being the beginning of the modern system of government bond borrowing.

Borrowings by Sovereign.

From time immemorial kings and rulers had been accustomed to borrow from their subjects, but such loans were private transactions, and the lender often was far from a voluntary creditor. Readers of "Ivanhoe" and of other books dealing with medieval times will recall references to such princely financiering. They were sometimes called "forced loans," or given the euphemistic title of "benevolences." It was the sovereign who owed the debt, not the government or nation, and even his legitimate successor often refused to acknowledge the obligation. The fortunes of the great banking house of Rothschild are said to have originated in loans to princes and rulers.

It is a curious fact that the bill in parliament for the first real government loan, which was a great innovation in public finance, was passed by the House of Commons without a division, and then passed by the House of Lords without any amendment—this in conservative England, conservative in all things, and especially conservative in finance and financial legislation.

National Debt a Blessing.

So successful was this loan, and succeeding government loans by Great Britain and other countries, that there sprang up a large class of financiers and public economists who maintained that a great national debt was a great national blessing While this opinion is not generally entertained, the idea of a government being indebted to its own citizens in large sums of money is regarded as not at all analogous to indebtedness by an individual. The direct personal financial interest each citizen bondholder has in the government is recognized as a valuable national force. For instance, the 5,000,000 holders of Liberty Loan bonds can be counted on as having a keen interest in public affairs and exerting a strong influence for wise and economical legislation and administration.

Valuable Economic Function.

In affording a perfectly safe and marketable security for the investment of individual savings government bonds are credited with performing a very valuable economic function. Authorized as they are, theoretically at least, and generally in practice, for purposes whose use and value extend into the future justifies the existing generation of the body politic in leaving part of the cost of such things to be paid for by their successors.

So far as the United States is concerned, the Liberty Loan of 1917 is not only by far the largest loan that government has ever made but it is peculiarly well adapted to perform a vast national economic service in the way of providing opportunities for investment of the savings of the great body of the people of the United States. The small denominations of some of the bonds and the facilities for paying for them in small monthly or weekly instalments afforded purchasers by banks and employers enable almost any American, even those of small means and small earning capacity, to become a United States bondholder. The same is true of Canadians in regard to the fourth domestic war loan to be issued next month. Every citizen of the Dominion should have a war bond.

MANITOBA'S POPULATION INCREASED 20

That was the Record in Five Years—Interesting Census Figures

The census of Manitoba, taken as of date June 1st, 1916, was the eighth taken under the direction of the Federal government since the province was created out of a portion of the territory acquired by the Dominion government from the Hudson's Bay Company in 1870.

The population of Manitoba as shown by the census of 1916 was 553,860, as compared with 461,630 in 1911, and 365,688 in 1906. From 1911 to 1916, the increase was 92,230, or nearly 20 per cent., as compared with an increase of 95,942, or 26.2 per cent. for the five years, 1906 to 1911. From 1906 to 1916, the increase was 188,172, or 51.5 per cent. in 10 years. It is gratifying to note that despite the extraordinary conditions created by the war, the absolute increase for the five years subsequent to 1911, fell but little below that of the five years prior to 1911—the date of the last decennial census.

The number of persons per square mile in the province (exclusive of the addition made by the extension of boundaries act, 1912), was 8.5 in 1916, as compared with 7.2 per mile in 1911

Dwellings and Families.

In 1906, males outnumbered females by 44,678, in 1911 by 44,482, whereas in 1916, as a result of smaller immigration owing to the war, the excess had dropped to 35,358. In 1906, there were 127 males to every 100 females; in 1911 the proportion was 121 to 100. while in 1916, it had dropped to 114 to 100. From 1906 to 1911, the male population increased by 23.3 per cent. and the female by 29.9 per cent., as compared with an increase of 16.4 and 24.3 per cent. respectively from 1911 to 1916.

In 1916 there were 117,541 families occupying 103,765 dwellings, or 113.3 families to every 100 dwellings, as against 90,056 families occupying 84,769 dwellings in 1911, or 106.3 families per 100 dwellings.

There are in the province four cities, 29 towns and 23 villages. The towns of The Pas, Transcona and Tuxedo appear for the first time as incorporated entities in this census.

Urban Population.

The city population of Manitoba was 195,115 in 1916, as compared with 163,249 in 1911, and 110,786 in 1906 and 53,880 in 1901. From 1911 to 1916 the city population increased by 31,866 or 19.5 per cent., as compared with an increase of 52,463 or 47.3 per cent. in the preceding five years 1906 to 1911. Compared by decades the city population of Manitoba increased by 84,329 or 76.1 per cent. from 1906 to 1916, as against 109,369 or 202.9 per cent. from 1901 to 1911. The town population of Manitoba totalled 35,338 in 1916, 28,335 in 1911, 23,411 in 1906 and 18,530 in 1901. This represents a five-year increase of 7,003 or 24.7 per cent. in the number of dwellers in towns from 1911 to 1916, and a ten-year increase of 11,927 or 50.9 from 1906 to 1916. Seven of the twenty-nine towns show a smaller population in 1916 than in 1911. Three towns—Dauphin, Selkirk and Transcona have a population of 3,000 or over, while seventeen have a population of less than a thousand each. There were seven incorporated villages with a total population of 3,893 in 1906, as compared with nineteen villages in 1911, with a population of 8,781 and twenty-three villages in 1916 with a population of 10,561.

St. Boniface, according to the census records, was the only city in Manitoba with a greater number of females than males. In Winnipeg for every 1,000 males, there were 982 females on June 1st, 1916, as compared with 829 in June, 1911. In the other cities the excess of males over females is not so great.

The female population exceeded the male in the towns of Carberry, Carmen, Killarney, Morden, Neepawa, Oak Lake and Rapid City. Males and females were of equal number in the town of Swan River.

Mr. C. W. Wrightson, deputy chairman of the Yang Tsze Insurance Association, and Mr. Philip Peebles, general manager of the Shanghai Land Investment Company, Limited, both of Shanghai, have been taking a three months vacation in British Columbia. They returned recently to Shanghai.

LIFE INSURANCE COMPANIES' INVESTMENTS IN OUR THREE WAR LOANS

LIFE INSURANCE COMPANY	First War Loan		Second War Loan		Third War Loan		Remarks
	Subscription	Allotment	Subscription	Allotment	Subscription	Allotment	
	$	$	$	$	$	$

SOUTH SHORE SERVICE

The Montreal and Southern Counties Railway has ordered for its south shore service six new passenger cars—three with motors and three of the trailer type. They are being built by the Ottawa Car and Manufacturing Company and will be in service by November 1st. The new cars are 55 feet long by 8 feet 1½ inches in width, have steel underframes and interiors finished with mahogany. They are divided into two sections, the general passenger compartment and smoking compartment and have forced ventilation and hot air heaters. The company also plans to place in service during the coming winter two large wing snow plows. When the Montreal and Southern Counties began operation eight years ago its rolling stock comprised two cars, and it has now nearly three score passenger cars in operation each day in addition to electric locomotives, express cars, milk and produce cars, freight and other equipment, while more than two million passengers are carried each year.

An advisory board of the Royal Trust Company for the province of Nova Scotia has been established at Halifax, composed of Messrs. A. E. Nash, manager of the Bank of Montreal, as chairman, A. Handfield Whitman, managing director of Robin, Jones and Whitman, Limited, and G. McGregor Mitchell, president of Geo. P. Mitchell and Sons, Limited, both of which companies are well known in Halifax.

FEDERAL FARM LOAN ACT

New Credit System Based on "Special Privilege" and "Government Monopoly"

"The [illegible] of the act [illegible] in large measure on the [illegible] Loan Board." This is the opinion of Mr. Kingman Nott Robins, treasurer of the Associated Mortgage Investors, Rochester, and vice-president of the Farm Mortgage Bankers' Association of America, of the United States Loan Mortgage Act. Mr. Robins continues:—

"The new Federal Farm Loan Act is the result of an agitation which has in this case, as in others, demonstrated the underlying differences between two schools of thought in this country. One school, which, in this instance, includes bankers and practical men of affairs generally, has held that whatever deficiencies there have been in the existing machinery of farm finance have been due, not so much to inadequate or incompetent machinery, as to defects in the credit risk itself and in the laws under which the machinery must operate. The other school reflects in its approach to the problem the widespread distrust of business men as a class, and the feeling that additional machinery must be created to serve the farmer.

"Both schools agree that new legislation is desirable, but differ as to what should be its intent and character. The recommendations of the Farm Mortgage Bankers' Association of America quite fairly represent the ideas of the first school in their recommendations of October, 1915, to the joint congressional committee on rural credits. In these recommendations they pointed out the desirability of 'removing the obstacles, legal and otherwise, which prevent the farmer's paper from reaching the investment market generally in such form, on such terms, and from such a source as to make it at least as acceptable in the matter of assured security, convenience of handling, and convertibility as any other investment of equal intrinsic merit.'

Issuing Bonds Against Mortgages.

"To that end the association recommended, 'if constitutional,' federal incorporation and regulation of federal land banks, after the precedent of the National banks, these banks to have the privilege of issuing bonds against mortgages as collateral, and to have a minimum capital stock of $500,000, and provisions in the regulations governing such banks, making their service available only in such states as should make their title, collection and other laws conform to a given standard of safety for the lender and economy and convenience for the borrower.

"This is a very brief summary of the proposals, but indicates the belief of the association that existing agencies would best serve the purpose required if only they were granted proper laws under which to operate and freedom from the many handicaps, chiefly legal, under which they now labor.

"It may be added that in view of the fact that existing agencies have an outstanding investment in farm mortgages, according to current estimates, of $3,500,000,000, there is a fair presumption that they are competent and responsible, and that they are entitled to at least the opportunity to prove their efficiency under proper laws without being put at a disadvantage by government.

"The other school of thought concerned with rural credits has been represented by spokesmen who have advocated everything, from laws simply enabling co-operative borrowing, which are undoubtedly desirable, to unlimited loans of government moneys at 3 per cent. The law is essentially a compromise between the conflicting recommendations, and is now the target of the criticisms of all concerned.

Pros and Cons of the Federal Farm Loan Act.

"Since the machinery provided by the law is not yet in operation, consideration of it must be based on personal opinion and theory, in the light of past experience. With this limitation in mind I have undertaken to classify the principles underlying the provisions of the bill, dividing them into what I may call, for lack of better terms, 'Advantageous' and 'Disadvantageous,' advantage being used in its broadest sense to include both the public interest and the interest of the parties directly concerned.

"I state what I conceive to be the disadvantageous principles first:—

"1. [illegible] the act in its provisions:—

"(a) For the exemption of the securities issued by the federal land banks from all taxation. By this provision the [illegible] differential of as much as 2 per cent. per annum in some states, [illegible] the obligation of any other class in the community. The burden of taxation of which the farmer is thus relieved is obviously shifted to other classes of the population.

"(b) [illegible] the act.

"(c) For the use for an indefinite period of public funds without interest to capitalize the banks.

"(d) For the substitution of the credit of the United States government for farm credit in so far as the unthinking public is led to believe that bonds termed in the act 'instrumentalities of the government of the United States' are actually the obligation of the government, and in so far as the United States government may feel called upon to make good the obligation thus implied, in case of loss on the actual security.

Ignores Economic Law.

"2. Economic law is violated by the provisions for:—

"(a) Restricting the loaning operations of the joint stock banks to arbitrary geographical limits. This ignores a fundamental principle of investment selling, viz.: that an agency manned by men of good reputation in their own community can command much greater confidence than an equally reliable agency in another community. The law, however, forbids the utilization of this principle in the organization of well-managed joint stock banks in the great money markets of the country to loan wherever there is demand for their funds, e.g., California can borrow only through local channels instead of directly from Chicago.

"(b) Fixing the maximum interest rate by statute. The law of supply and demand will control the rate in any event, and a fixed maximum may conceivably render the act inoperative in the communities most in need of increased facilities. The experience of the states with usury laws is evidence of this contention.

"(c) Joint guarantees, putting good, bad and indifferent securities in the same category, penalizing the good for the advantage of the inferior.

"3. The general public is disadvantaged by:—

"(a) The shifting of taxation from the farmer to other classes of the population.

"(b) The dilution of government credit.

"(c) The erection of a new bureaucratic system without civil service or other hindrance to political exploitation.

"(d) The inflationary tendency of the act with regard to land values—a potent element in raising living costs.

Some Further Objections.

"4. The act fails to serve its purpose in the following particulars among others:—

"(a) Restrictions on loaning are such that, according to good authority, only about 52 per cent. of the farmers of the United States can qualify as borrowers.

"(b) This 52 per cent. constitute that element of the farmers already best taken care of by existing agencies—no provision is made for farmers who have not already security worth double the amount of the loan asked for. The landless man, the tenant, and the farmer and farmer's son with small savings, who want to establish themselves on the land, are not served by the new machinery.

"(c) There is no provision for the straight term type of loan now most in vogue with farmers. The amortized loan is compulsory. Experience in the United States has not evidenced a demand among farmers for the amortized loan. They prefer a loan carrying privilege of prepayment in whole or in part, but without mandatory repayments, so that they can pay according to the season. Why should a farmer, who is a business man, and who makes his borrowed money earn him more than the interest he pays, want to be compelled to return his loan in driblets, leaving his chief source of credit, his farm, encumbered meanwhile? Surely the farmer who makes such use of borrowed capital is to be encouraged, and represents a type of farming ability far higher and more to be desired than the farmer who, to save his farm, must get out of debt, because he cannot earn current interest on his investment, whether his investment be his own money or borrowed money.

"To argue that the system is necessary because farmers cannot make their land investment earn adequate interest is

simply to demonstrate that the value of the land is too high. It will not help matters to install a system which provides for the continuance of such inflation.

"(d) There is no adequate provision in the act for extending interest and principal payments in event of failure and for financing slow payments. It is a common experience of farm mortgage bankers operating in the newer regions to advance in poor years, to holders of mortgages in behalf of borrowers, 50 per cent. to 75 per cent. of interest as it falls due, and to carry these payments and principal items as well, sometimes for as much as two years, where they know that the default is due to misfortune and not to negligence or failure.

Special Privilege and Government Monopoly.

"5. The act attempts to create a governmental monopoly of farm credit banking on a foundation of special privilege.

"(a) The provisions under which private enterprise can operate under the act are so discouraging and discriminatory in favor of the federal farm land banks that experienced farm mortgage bankers generally agree that they cannot safely venture to do business under the act, especially as the law specifically forbids the joint conduct by the same management of a private mortgage banking business and a joint stock land bank.

"(b) Owing to the element of special privilege supporting the federal farm loan banks, their efficiency as economical and comprehensive rural credit agencies can never be compared on a fair basis with private agencies. As Mr. George E. Putnam says in the December number of the American Economic Review: 'This action (discrimination between federal land banks and joint stock banks) was in virtual recognition of the superior efficiency of private enterprise when given an equal opportunity. It is inconceivable why the opportunity should have been withheld.'

"Turning to the pleasanter aspect of the subject, we find the following:—

"1. Farm land security is publicly recognized on a basis of its intrinsic worth

"2. Public supervision of farm mortgage banks is provided, putting this form of banking on a plane with commercial banking.

"3. Pressure is brought to bear on the states to enact proper title and collection laws.

"4. Provision is made for a standardized form of security that may command public confidence, and that may be approved by the market for its convenience and known stability.

"5. The act recognizes, although, in our judgment, it does not properly provide for, the right and advantage of co-operative credit arrangements among farmers.

"6. Appraisal of land is to be based on the earning power of the land appraised. Adherence to this principle would do more than any other provision of the act to check inflation of land values, and would operate the more advantageously because of the other provisions of the act encouraging inflation."

PRODUCTION AND EXPORT OF ASBESTOS WERE LESS

The production of asbestos in Canada during 1916 and the first half of 1917, according to returns received by the mines branch, Department of Mines, Ottawa, is shown in the following table. A record of exports and imports, compiled from the customs reports, is also included:—

Sales and shipments.	1916. Tons.	1916. Value.	1917. (1st six months.) Tons.	1917. (1st six months.) Value.
Crude	5,886	$1,866,969	2,686	$1,969,761

VITAL STATISTICS NECESSARY

Canada is much in need of an efficient and uniform system of vital statistics, and the census and statistics office, under the energetic control of Mr. R. H. Coats, the new Dominion statistician, is making a strong effort to remedy existing defects.

"One province," says Mr. Coats, "has no vital statistics at all. In the others, legislation and methods differ in the widest degree. The statistical year is not uniform; only six of the provinces use a common year. The Bertillon, or international, classification of deaths is wholly or partially adopted by seven provinces, but not by the eighth. Still more unsettling, each province has its own separate scheme for the collection, compilation and presentation of these statistics. Take the highly important matter of the form of the death certificate—one of the several that could be cited: of the 24 items which such a certificate should cover, two of the provinces omit 16, another 15, and another 13, whilst the lowest number of omissions is three, and this does not include other items of the 24 which are incomplete in what they call for."

The census and statistics office, of course, takes the decennial census, but it must look to the provinces to collect and compile annual vital statistics. Provincial information is of no value for comparative purposes if all the provinces do not have the same system of compiling and reporting. The efforts of the census and statistics office are therefore directed towards getting all the provinces to adopt one system. It has drawn up a memorandum of vital statistical information and legislation gathered from all over the world and is discussing it with the provinces so that the subject may be viewed from every possible viewpoint. Then, negotiations will be formally opened with the provinces to secure ratification of a plan of compilation that will enable international comparisons as well as meet our own needs. According to this plan the census office will act as an inspecting agency, and will compile the resulting statistics on a national basis.

COBALTCROM IS A NEW DISCOVERY

Widespread interest has been aroused by the announcement of the discovery of a tool steel stated to be equal in durability and hardness to high-speed steel, but of which tungsten, always difficult to obtain, is not a component. "Cobaltcrom," as the new steel is called, is made by adding cobalt to chromium-carbon steel. Thorough tests of the new alloy have been made in a large number of important works in England.

The world's supply of cobalt formerly came from Germany and New Caledonia, but, since the discovery of the rich silver-cobalt ores of Cobalt, Ontario, that province has produced almost the entire world's supply. The ores and concentrates of this district contain from 4 to 10 per cent. cobalt per ton.

During the early days of mining in this district much ore was exported to the United States and treated for its silver contents alone. During the past few years the smelting industry of Ontario has progressed at a rapid rate and can now recover as refined product all of the valuable mineral content of the ore—viz., silver, arsenic, nickel and cobalt. The latter is largely marketed as cobalt oxide, but it is also produced in the metallic form and in the form of salts.

The output of the cobalt products in Canada is largely controlled by the market demand, as the capacity for production is considerable. Cobalt was formerly used for its coloring properties, but in the past few years new uses have been found for it. It has advantages over nickel for electroplating and is used to considerable advantage in the manufacture of high-speed tool steels. Stellite, an alloy of cobalt, chromium and tungsten, has proved to be superior to high-speed steel for many operations and it is claimed that it will allow of increasing the rate of cutting on the lathe from 20 to 50 per cent. and requires less time for sharpening the tools thus increasing the efficiency of shop production.

The increasing importance and use of this metal, in the production of which Canada has a monopoly, again emphasizes the importance of our mineral resources to Canada and the Empire.

Consider the Cost

A FACT not generally understood by those drawing up a will, is that the highly specialized and competent service rendered by a Trusts Corporation costs no more than the uncertain service of an individual trustee.

When you consider that your estate will receive the benefit of experience gained in the management of many estates, your heirs will be assured the utmost protection.

When you make your will, why not insure efficient and economical management of your estate by appointing this Company as Executor and Trustee?

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

ALBERTA MAKING AGRICULTURAL HISTORY

In Five Years, Crop Production Has Increased 453 Per Cent.—Few Non-producing Areas

From 1911 to 1916 the number of farm holdings in Alberta increased from 61,496, with an acreage of 17,751,899 to 67,977 holdings with an acreage of 23,062,767, according to figures of the census office, Ottawa, just issued. The total land area of the province is placed at 161,872,000 acres, of this amount 23,062,767 acres or 14.24 per cent. was occupied as farm land out of a total of 97,000,000 acres estimated as being available for crop production in the province.

During the five years, 1911-1916, the number of farms increased by 10.53 per cent., the land occupied as farms by 29.92 per cent. The average size of farms in 1916 was 339.3 acres as against 288.6 acres in 1911, and 288.4 acres in 1901, and the area of improved land per farm increased from 71 acres to 110 acres during the same period.

The total acreage planted to field crops in 1916 was 5,505,872 acres, as compared with 3,378,362 acres in 1911, being an increase of 2,127,510 acres or more than 62.9 per cent. in five years. In 1911, 93.27 per cent. of land "under crop" was devoted to the production of cereals as against 94.16 per cent. employed for the same purpose in 1916. Flax, only, shows a decrease in acreage, having fallen from 107,273 acres in 1911 to 95,063 acres in 1916. There was an increase in the acreage sown to wheat from 1911 to 1916 of 965,001 acres, and to oats of 902,864 acres, being a five-year gain for the former of 58.8 per cent. and for the latter of 73.9 per cent. The small increase shown in the acreage devoted to hoed crops from 1911 to 1916 is due wholly to an increase of 9,130 acres or 45.4 per cent. in land devoted to potatoes in 1916 over 1911. All the other root crops show a smaller acreage in 1916 than in 1911. The almost total abandonment of the growing of sugar beets in southern Alberta is no doubt largely due to the closing of the sugar factory at Raymond.

Few Non-Producing Areas.

The enumerators' returns show that only 43,678 acres or .92 of one per cent. of the acreage of 4,740,422 planted in Alberta for the harvest of 1915 did not yield a return to the husbandman. In the harvest year 1910, of the total acreage of 2,067,589 it was reported that 265,699 acres failed to produce a harvest. The figures for 1915 are too small to make any appreciable difference in the total production for the harvest year 1915, when yields were expressed in millions of bushels.

Crop Values.

The total value of the field crops of Alberta produced on 67,977 farms in 1915 was $95,586,907 as compared with a total value of $18,015,274 for the crops of 1910 produced on 61,496 farms. The average value of crops per farm in 1915 was $1,406 as compared with $277 in 1910; and the gain made in the value of production in 5 years was $77,571,633 or 435 per cent.

From 1910 to 1915 the acreage devoted to wheat increased by 1,258,275 acres or 143 per cent.; during the same time the yield increased by 57,477,791 bushels or 634 per cent., and the value by $51,649,214 or 774 per cent. nearly. The value of the oat crop increased by 344 per cent., of barley by 303 per cent., and of flax by 494 per cent. in the five years 1910-1915.

The large increase from 1910 to 1915 in the area, production and value of crops used as fodder is no doubt due to the growing importance attached to animal husbandry in Alberta. From 1910 to 1915 the value of fodder crops increased from $1,954,677 to $4,217,182, being a gain of $2,262,505 or 115 per cent. in five years. Hoed crops also show a marked advance in value of production having risen from $1,191,485 to $1,779,836, being an increase of $588,351 or 49 per cent. The following table gives the detailed figures:—

Crops.	1915.	1910.
All crops	**$95,586,907**	**$18,015,274**
Cereals	**89,452,625**	**13,745,110**
Wheat	[illegible]	[illegible]
Barley	4,340,354	1,075,348
Oats	[illegible]	[illegible]
Rye	[illegible]	50,425
Corn	[illegible]	[illegible]
Buckwheat	[illegible]	868
Peas and beans	6,087	3,071
Flax	966,748	162,520
Mixed grains	45,605	17,155
Grass seeds	**21,273**	**2,580**
Fodder crops	**4,217,182**	**1,954,677**
Hay	[illegible]	1,253,982
Alfalfa	[illegible]	71,830
Millet and Hungarian grass	9,928	......
Corn	[illegible]	13,019
Other	2,039,265	615,846
Hoed crops	**1,895,827**	**1,312,907**
Potatoes	1,779,836	1,191,485
Turnips	80,116	44,800
Mangolds	12,169	3,557
Onions	7,792	.....
Sugar beets	5,391	31,160
Other roots	10,523	41,905

The districts of Bow River, Medicine Hat, Lethbridge and Macleod, in the order named, led in the production of wheat, and Bow River, Battle River, Macleod, Red Deer and Medicine Hat in the production of oats. More than one-half of all the flax seed reported for the province was grown in the Medicine Hat district.

The cultivation of potatoes is fairly well distributed over the province, with Edmonton, Red Deer and Victoria leading.

Live Stock on Farms.

In the number of horses and mules there was an increase of 227,035 or 55.8 per cent.; in cattle of 420,365 or 56.8 per cent. which brought the number of cattle, all kinds, at June 1st, 1916, well over the million mark (1,160,097).

Milch cows increased by 87.8 per cent. and other cattle by 49.1 per cent., being an increase for all cattle of 56.8 per cent. Sheep increased by 159,028 or 119 per cent., swine by 366,043 or 153.9 per cent. in the five years 1911-1916. The production of all classes of poultry show increases of from 2.6 per cent. for turkeys to 233.9 per cent. for ducks, or 16.4 per cent. of an increase in all kinds.

The average number of horses and mules per farm in 1916 was 9.3 and their value $1,143 as compared with 6.6 animals per farm in 1911 with an average value of $918. The total value of horses and mules increased from $56,439,741 in 1911 to $77,710,329 in 1916 being a gain of $21,270,588 or more than 36 per cent. in five years. The average price per head for horses in 1916 was less than the average reported in 1911 by $16.09, being $138.62 for the former census as against $122.53 reported in the recent census. The Bow River and Medicine Hat districts report the greatest number of animals and the Calgary district the highest average value per farm.

The average value of milch cows per head in 1911 was $43.13 and the number per farm 2.4 as against 4 per farm in 1916 with an average value per animal of $63.06. The average value of bulls is $102.06, of calves, $18.34, and of other cattle $47.46. The value of cattle increased from $22,670,886 in 1911 to $52,355,728, being a gain of $29,684,862 or nearly 131 per cent. in five years.

Sheep, Swine and Poultry.

The average value, per head, of sheep, on the farm, rose from $5.68 in 1911 to $7.06 in 1916. This represents an increase in value of nearly 25 per cent. in the quinquennium. The number of sheep per farm nearly doubled from 1911 to 1916 and that the number of the sheep in the province on June 1st, 1916, was more than twice as many as there were five years previously.

From 1911 to 1916 the number of swine increased from 237,511 to 603,534, being a gain of 366,023 or 154 per cent. During the same period the value of hogs, on farms, increased from $1,995,421 to $5,298,429. This represents an increased revenue to the farmers of Alberta, from this branch of animal husbandry of $3,303,008 or more than 165 per cent. from 1911 to 1916. In 1911 the average price per head of hogs, of all kinds, was $8.40 as compared with a reported value of $8.78 per head in 1916. This expresses an average increase per animal, on the farm only, of 38 cents, or 4.5 per cent.

Hens and chickens increased from 2,347,433 in 1911 to 2,682,225 in 1916, turkeys from 67,151 to 68,905, geese from 19,653 to 35,243, and ducks from 18,880 to 62,971. The value of all classes of poultry rose from $1,357,183 in 1911 to $1,573,396 in 1916. This represents an enhancement to the rural revenue of the province in 1916 over 1911 of $216,213 or nearly 16 per cent.

Horses were reported on 83 per cent of the farms of Alberta, milch cows on 73 per cent., other cattle on 72 per cent., sheep on 4.6 per cent., swine on 58 per cent., and poultry on 73 per cent. of the farms reporting.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Beauport Village, Que.—October 9—Mr. Achille Goulet's residence destroyed. No insurance carried.

Brantford, Ont.—The Kitchen Overall Company's plant badly damaged. Estimated loss, $50,000.

Campbellford, Ont.—October 10—Northumberland Paper and Electric Company's mills, badly damaged. Loss, partly covered by insurance.

Gananoque, Ont.—October 11—Mr. Chas. McDonald's frame house and contents. Estimated loss, $3,000.

Lakefield, Ont.—October 11—Mr. W. W. Leonard's residence and adjoining sheds destroyed, occupants Mr. and Mrs. Jas. Lond and Mrs. Robt. Alford. Estimated loss, $1,000, partly covered by insurance.

October 13—Mr. F. G. Kendall's cheese factory and house adjoining totally destroyed. Estimated loss, $10,000, covered by insurance. Cause, live coal.

Langley, B.C.—October 2—Mr. W. E. Laking's saw and shingle mill destroyed. Partly covered by insurance.

Mariposa, Ont.—October 8—Mr. Joseph Ryall's barns destroyed. Small insurance carried.

Moncton, N.B.—October 11—Mr. J. Han's barn and contents burned to the ground. Estimated loss, $10,000. Total insurance carried, $5,000.

Peterborough, Ont.—October 10—Peterborough Lumber Company's planing mill destroyed.

St. Thomas, Ont.—October 8—St. Thomas Packing Company's stock pens destroyed and plant badly damaged. Estimated loss, $10,000, covered by insurance.

Toronto, Ont.—October 13—Mr. G. A. Howell's storage and warehouse premises. Estimated loss, $400.

Wellington, Ont.—October 9—Hotel Alexandria and residence of Mr. J. E. Clark adjoining, destroyed. Estimated loss, $15,000, partly covered by insurance.

Westmoreland Point, N.B.—October 8—Mr. C. C. Hewson's barn destroyed, occupant Mr. Smith. Mr. Hewson carried insurance to the amount of $100 on the barn; Mr. Smith was not insured. Cause, children playing with matches.

Winnipeg, Man.—October 10—Mrs. Wm. J. Auger's home destroyed. Total loss, $500.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

North Bay, Ont.—September 23—Stoddard Brothers' premises. The following companies are interested: Liverpool and London and Globe, $2,500; Guardian, $1,500; Nova Scotia, $2,500; St. Lawrence, $2,000; Commercial Union, $1,500; Yorkshire, $1,000; Phenix of Paris, $1,000; Royal, $3,000; total, $15,000. Loss, total.

Picton, Ont.—October 3—Mr. A. Shortt's livery stable destroyed. Estimated damage to stock, $800; to buildings, $1,500. Insurance on stock, $570; on buildings, $1,000, carried in the London, Mutual and Phœnix.

St. Anne de Bellevue, Que.—September 27—Mr. Jas. Morgan's farm buildings. Insurance carried in the following companies: German-American, $10,000; Scottish Union and National, $10,000; Rochester-German, $5,000; Yorkshire, $10,000; total, $35,000. Loss about $15,000.

St. Thomas, Ont.—October 3—Mr. D. L. Shafer's box factory. Estimated damage to stock, $2,143; on buildings, $798; on equipment, $1,577. Insurance carried in the following companies: Monarch, $1,500; Wellington, $500 and $1,000; the Economical, $500; London Mutual, $1,500; Merchants, $1,000.

Thorburn, N.S.—September 21—Mr. J. W. Grant's barn. Estimated damage, $1,200. No insurance carried. Cause, boy lighting matches.

REPORT OF PROCEEDINGS AT THE ANNUAL GENERAL MEETING OF

The British Canadian and General Investment Company, Limited

HELD AT 4 MOORGATE STREET, LONDON, E.C.2, ON THE 19TH SEPTEMBER, 1917.

After expressing his regret at the delay in holding the Meeting, and explaining that this was due to shortness of staff and great pressure of work, all the men formerly in the office being now on Active Service, the Chairman said:—

I trust you will consider the results of the past year's operations satisfactory. They are better than I had ventured to hope for considering all the difficulties both we and our Affiliated Companies have had to face.

Continued enlistment has now affected all our Affiliated Companies in this way: Any man who has joined the Army or Militia is relieved by law during his term of service from the payment of any debts, including interest on mortgages, and consequently these Companies are unable at present to collect a considerable portion of the amounts due to them. Not only does this legislation affect us through our Affiliated Companies but also in a lesser degree, directly, on account of various mortgages which we hold apart from our interest in these Companies, so that our normal income is considerably diminished both by smaller receipts from the companies in question and the non-receipt of interest on some of our own direct investments. You will understand that the unpaid interest remains a debt and a charge upon the property to be redeemed when the war is over, and I have little doubt much of the amount overdue will be received; but there is a danger that if the war goes on much longer the accumulated interest will reach a figure that will be somewhat difficult for the debtors to deal with and which may possibly trench upon the margin of security held. Notwithstanding this, Mr. Mytton reports that the prospects both in Regina and Moose Jaw, in which two Cities most of our Affiliated Companies are situated, are very bright, and he does not seem to have any serious apprehensions as to the future. Still, I think it right to warn you that I shall not be surprised to see a further diminution in our available income during the next year or two, since we are—I think you will agree, wisely—taking no credit in our Accounts for Interest in arrear or accrued. Of course, if the War ends, matters should improve, since Canada as a country is in many ways in a much better and healthier position than was the case a few years ago, and I trust and believe has a great future before her. Certainly the patriotism and resource which she has shown and the courage and devotion of her people displayed on many a hard-fought field, to which we owe so much, deserve and will, I believe, meet with a rich reward in the days which are to come. How long that reward may be delayed neither you nor I can say, but speaking for myself I have little doubt it will come, and with it increased development and prosperity.

After referring to the large reduction in expenses, the Chairman drew attention to the increase of the charges for Income Tax, the proposed increase in American Income Tax, and the imposition of a Canadian Income Tax, and mentioned that in view of the possibility of increased taxation generally and also of the great uncertainty of conditions in all parts of the world the Directors had thought it wise considerably to increase the amount carried forward. Having stated that the Company's contributions to various War Issues amounted to about £70,000, he referred briefly to the absence on War Service of Captain Bury (a Director), the Secretary and other former employés, and also of Brigadier-General Embury, C.M.G., Major Parsons, D.S.O., and Major Macpherson, Directors of the Regina Affiliated Companies, and wished them all God Speed and a safe return.

The Various Resolutions were passed unanimously, and a dividend at the rate of 4½% per annum for the year 1916 declared.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

British-American Tobacco Company, Limited.—A London despatch states that directors of the company were selling, with the consent of the treasury, 1,000,000 ordinary shares of the Imperial Tobacco Company of Canada, Limited, out of the holdings of the company to a well-known London financial house. The object of the sale is to provide additional capital with which to purchase necessary supplies.

Nipissing Mines Company, Limited.—Quotations on the company's stock, when issued, are the same as those for Nipissing Mines Company. Shares of the old company are transferable, share for share, for stock in the new company.

It has been announced by the officials of the company that transfer of the assets from the old company to the new has been completed, in accordance with the resolution adopted by the stockholders at a special meeting, held August 21st, 1917.

Western Power Company of Canada, Limited.—The company reports operating revenues for August, 1917, of $37,376.58, an increase of 16.85 per cent. over the same month last year, and net earnings of $25,827.53, an increase of 6.64 per cent., compared with August, 1916.

The net earnings for the year 1917 to date are $212,731, compared with $161,419 in 1916. For the twelve months ended August, 1917, the net earnings are $330,101.02, an increase of 31.37 per cent. over the twelve months ended August, 1916.

Ætna Explosives Company, Inc.—Receivers of the company were ordered in the federal court at New York not to accept an offer made by the E. I. Du Pont De Nemours Company to purchase the plants of the Ætna corporation for $1,500,000. The court held this amount inadequate.

The Ætna corporation receivers operate ten plants, including one at Prescott, Ont. The plants have an aggregate monthly capacity of 5,000,000 pounds of dynamite, 700,000 kegs of black powder and 3,000,000 blasting caps.

Ford Motor Company of Canada.—The company's profits were $2,322,646 on its capital stock of $7,000,000 in the fiscal year ending July 31st, according to a statement issued at Windsor, Ont. This profit, added to a balance of $1,039,122 at the end of the preceding fiscal year, and a rebate of $18,813 on 1915 taxes, left a balance for the year of $2,445,139 after payment of $935,443 for 1916 and 1917 war taxes. Cash on hand amounting to $2,066,455.93, accounts receivable of $1,307,825.35, $3,859,214.13 in stores accounts, and $5,185,924.50 in plant accounts were included in the total assets of $12,510,130.72.

Winnipeg Electric Company.—The company's earnings for August continue to decline, the net falling off $46,478 and, after paying fixed charges, a deficit of $21,636 is shown for the month.

Figures for August and for the year to date follow:—

August.	1917.	
Net earnings	$506,701	Dec. $291,707
Fixed charges	61,092	Inc. 1,532
	*$21,636	Dec. $ 48,010
January 1st to date:		
Net earnings	$506,701	Dec. $291,707
Fixed charges	401,924	Inc. 17,317
	$14,777	Dec. $309,024

*Deficit.

Quebec Railway Light, Heat and Power Company.—Gross earnings of $1,832,032 in the last fiscal year, compared with $1,731,732 in 1916, were reported at the annual general meeting of the company held at Montreal last week. After adding miscellaneous revenue, the total revenue of the company, as compared with 1916, shows an increase of $94,281. After all allowances were made there remained a net surplus of $200,587. The total surplus account, after provision had been made for obsolete cars on the Montmorency and street railway systems, was $684,572.

J. T. Donohue, Quebec, was elected a director. The board was re-elected.

St. Lawrence Flour Mills Company, Limited.—Net trading profit of the company for the year ended August 31st amounted to $171,071, against $132,497 in 1915-16, and the surplus carried forward to profit and loss account, $87,040, against $72,531.

Earnings on the common stock, as represented in the sum carried forward for the year, were at the rate of 7.25 per cent., against 6 per cent. the previous year. Following a meeting of the directors after the annual meeting recently, it was announced that dividends on the common had been inaugurated at the rate of 5 per cent. per annum. The initial quarterly payment of 1¼ per cent. will be made November 1st.

In addition to the profits tax for 1916, amounting to $9,432, there was appropriated from the year's earnings the sum of $18,680 as a write-off against the balance carried in bond discount account as an asset. Of the original $300,000 issue of bonds, $50,000 has been retired through sinking fund.

Profit and loss figures for two years are compared in the following table:—

	1917.	1916.
Profits	$171,071	$132,497
Less:		
Bond interest	15,693	16,551
Written off	18,680	3,250
Profits tax	9,432	....
Preferred dividend	40,223	40,215
Total deductions	$ 84,030	$59,966
Balance	87,040	72,531
Previous balance	51,116	*21,365
Total profit and loss	$138,156	$51,166

*Deficit.

A reduction from $410,288 to $303,097 in current liabilities within the year is the chief feature of the balance sheet. A bank loan of $139,353 at the end of August, 1916, has been brought down to $69,293. Current assets are substantially what they were a year ago, $734,888, against $756,252. The surplus of current assets is, therefore, $431,791, against $345,964 last year. Comparisons of the balance sheet figures follow:—

Liabilities.

	1917.	1916.
Accounts payable	$ 39,323	$ 44,807
Bonds	250,000	249,750
Accrued interest	2,500	2,685
Preferred stock	575,000	574,500
Common stock	1,200,000	1,200,000
Sundry credits	189,718	222,386
Unclaimed dividend	4,763	3,742
Bank loan	69,293	139,353
Profit and loss account	138,157	51,116
	$2,468,754	$2,488,339

Assets.

	1917.	1916.
Cash	$ 1,579	$ 1,322
Accounts receivable	295,329	310,237
Investments	7,500	7,500
Plants, etc.	533,865	532,087
Equipment	10,500	7,250
Sundry debits	33,734	70,146
Property	1,200,000	1,200,000
Wheat and flour	386,246	359,797
	$2,468,754	$2,488,339

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station, for the week ended October 12, 1917:—

Dominion Reduction Company, 76,900; La Rose Mine, 78,310; McKinley-Darragh-Savage, 170,594; Nipissing Mines, 219,240; Mining Corporation of Canada, 1,015,940; total, 1,560,984 pounds, or 780 tons.

The total shipments since January 1st, 1917, now amount to 27,994,808 pounds, or 13,997 tons.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

THE CONSUMERS' GAS COMPANY OF TORONTO

The Annual general meeting of the Shareholders of the Consumers' Gas Company of Toronto, to receive the report of the Directors, and for the election of the Directors for the coming year, will be held in the Company's Board-room, 17 Toronto Street, Monday, the 29th day of October, 1917, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word: all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

POSITION WANTED.—Experienced Fire Insurance Inspector (Exempt), well acquainted with the Western territory, will be open to accept position in October; tariff companies only. Address Box 111, *The Monetary Times*, Winnipeg.

WANTED, BRANCH MANAGER.—An old, well-established Canadian Life Insurance Company, with Office in Vancouver, is desirous of securing a Branch Manager for the City of Vancouver and surrounding territory. To a man of ability, who can organize, and produce a good volume of first-class business, a splendid future is assured. Applicant, however, must know conditions as they are at the Coast, and possess a first-class connection. He must be a man of integrity. To such a man, a satisfactory contract will be given. Apply, in first instance stating age, experience and salary expected. All replies will be treated as strictly confidential. Box 113, *The Monetary Times*, Toronto.

When You Die

Will your Estate be properly administered?

If you appoint a private Executor, who will replace HIM when HE dies?

The MONTREAL TRUST COMPANY being a Corporation never dies.

Therefore, if you appoint that Company your Executor the proper administration of your Estate will be assured.

Consultations solicited.

Montreal Trust Company

SIR HERBERT S. HOLT, President. A. J. BROWN, K.C., Vice-Pres.
Toronto Office .. Royal Bank Building
J. F. HOBKIRK ... Manager

COMPANIES NOT REPORTING FIRES PROMPTLY

The Ontario fire marshal, Mr. E. P. Heaton, complains of irregularity in the reporting of fires to his office by the fire insurance companies. He says:—

"Since we closed our books on August 20th for the July record we have received belated notices of 27 fires which occurred in the month of June and of 64 fires which occurred in the month of July. Thus 91 fires are necessarily charged against the month of August that properly belong to other months. But that is not the worst. Several companies have failed to send us a single report for the whole year, and we are very reluctantly compelled to advise them that legal action would be instituted against them for this violation of the fire marshal act. Two of these delinquents have now reported in full and the consequences are that three counties (Grey, Leeds and Grenville, Stormont, Dundas and Glengarry) are this month debited with fires which should have been distributed throughout the year.

"One of the most discouraging features of our work lies in the failure of some insurance companies to promptly report fires to us. It is not only discouraging but detrimental to the value of the statistical statements we issue largely for their benefit.

"In giving publicity to this condition in this bulletin, the fire marshal requests that managers of companies now and then enquire of their loss clerks how their duty to this office is being carried out. An enquiry of this nature would do good to those who are negligent, while it would do no harm to those who are giving prompt service; the latter, we are pleased to say, form by far the largest number."

COST OF BREAD IN CANADA

In Ontario, It Cost 4.838 Cents to Make One Pound—Commissioner O'Connor's Report

"Many of the producers of bread throughout Canada have, in the course of the past six months, by means of an educational effort on my part, been induced so to provide that they could make returns as to actual cost of bread production, with the result that I am now able to cite precise costs in the various zones within Canada where, if any variance in cost does exist, the same ought to be apparent," says Mr. W. F. O'Connor, K.C., acting commissioner re cost of living, in an interim report to the government. "For immediate purposes I subjoin a table (No. 1) showing bread costs as of this day, in six Canadian cities extending from east to west. This table is based upon the bread production of one barrel of flour of to-day's price of flour. The bakers usually mix first and second patents, so that the table is prepared upon the basis of to-day's cost of one-half barrel of first patent and one-half barrel of second patent flour. I take into consideration the cost of flour for one pound of bread, the ordinary ingredients, the cost of baking, of delivery, management and depreciation per pound. No other elements, so far as the reports of the bakers show, enter into the production and delivery to a buyer of a pound of bread.

"The formula is based upon a yield of 260 pounds of bread per barrel, that being the yield which experience has shown is ordinarily to be anticipated as realizable from one barrel of flour. This formula when applied to the current price of flour to bakers in car lots or mixed car lots, namely, $11.40 per barrel, for first patent, and $10.90 per barrel for second patent in Ontario, and varied according to price of flour in different sections of Canada, and on the current wholesale price of the various ingredients to bakers, shows a proper cost, as of to-day, per pound of bread, for flour and ingredients of 4.838 cents in Ontario, and approximately 4.88 cents in Montreal and Quebec, 5.1 in the maritime provinces, 4.6 cents in Fort William and the western provinces, and 4.84 cents in Vancouver.

"Manufacturing and delivery costs quite naturally vary in different centres. In Montreal, for instance, the delivery costs run high as compared with those of Ottawa or Toronto. In all probability the greater delivery distances and the hilly nature of the city of Montreal furnish the reason for the variance.

Cost of One Pound of Bread in Various Cities of Canada.

Montreal:—	Cents.
Flour (1 bag of 98 pounds at $11 per barrel, 1 bag of 98 pounds at $11.50 per barrel, average $11.25 per barrel)	4.3300
Ingredients	.4219
Baking	.7846
Delivery	1.2760
Management	.5411
Depreciation	.3300
Total one pound of bread	7.6836

Winnipeg:—	Cents.
Flour (1 bag of 98 pounds at $10.90 per barrel, 1 bag of 98 pounds at $10.40 per barrel, average $10.65 per barrel)	4.0960
Ingredients	.4550
Baking	.7306
Delivery	1.0513
Management	.1867
Depreciation	.3300
Total one pound of bread	6.8526

Vancouver and New Westminster:—	Cents.
Flour (1 bag of 98 pounds at $11.40 per barrel, 1 bag of 98 pounds at $11.90 per barrel, averaging $10.65 per barrel)	4.2960
Ingredients	.6941
Baking	.7404
Delivery	1.4630
Management	.3617
Depreciation	.3300
Total one pound of bread	7.8852

Note:—One barrel of flour makes 260 pounds of bread.

"I further annex a table based on the actual cost of bread in ten cities for the months of July and August. In each case more than sixty per cent. of the total amount of bakers' bread sold in these cities is reported on.

Actual Cost of Bread.

Montreal:—	July, cents.	August, cents.
Flour	3.74	3.91
Ingredients	.458	.422
Baking	.919	.785
Delivery	1.408	1.270
Management	.496	.541
Overhead	.22	.33
Total	7.241	7.264

	July.	August.
Average cost of flour used in baking during month (per barrel).	$9.61	$10.14
Average cost of flour purchased during month (per barrel)	9.20.	10.39

"Certain bakers in their returns added to flour cost additional replacement cost. This, however, was out of line with the other reports, hence is not included. Where overhead costs were omitted they were estimated as .33 cents per pound.

Toronto:—	July, cents.	August, cents.
Flour	4.278	4.527
Ingredients	.3	.307
Baking	.525	.502
Delivery	1.61	.951
Management	.276	.256
Overhead	.174	.304
Total	6.561	6.847

Winnipeg:—	July, cents.	August, cents.
Flour	3.578	3.467
Ingredients	.441	.455
Baking	.827	.731
Delivery	1.125	1.051
Management	.21	.19
Total	6.180	5.89
Average cost of flour used in baking during month (per barrel).	$9.30	$9.02
Average cost of flour purchased during month (per barrel)	9.21	9.09

Vancouver:—	July, cents.	August, cents.
Flour	3.858	4.43
Ingredients	.616	.694
Baking	.887	.741
Delivery	1.51	1.463
Management	.337	.362
Overhead	.304	.33
Total	7.51	8.02
Average cost of flour used in baking during month (per barrel).	$10.09	$11.81

"The cost of a barrel of flour made from wheat at the prices so fixed is as follows:—

	Per barrel.
Ontario, first patent	$11.40
" second patent	10.90
Montreal, first patent	12.50
" second patent	11.00
Halifax, first patent	12.65
" second patent	12.15
Fort William and points west, first patent.	10.90
" " " " " second patent	10.40
Vancouver, first patent	11.40
" second patent	10.98

"The above price is carlots or mixed carlots to bakers and is ten cents cheaper than to the grocers.

(Continued on page 41)

FARMERS NEED LIFE INSURANCE

Should farmers buy life insurance? This question was answered by Mr. M. B. Farr, Regina representative of the Monarch Life Assurance Co., Winnipeg, at the company's recent convention. "The agriculturist," he said, "depends largely upon climatic conditions, and his season's profit may disappear over night. Every farmer runs the danger of a bad year, and it is his duty to protect his dependants. This can only be done by life insurance. A life insurance policy not only creates an immediate estate, but may also serve as security for a loan just at a time when the farmer needs financial assistance. Suppose a farmer should die with his farm and crop mortgaged; what then? His widow has to hire a man of experience and pay his wages, in addition to the interest on loan, etc., before getting anything for herself or children. Had the deceased carried adequate life insurance, the widow and children would have had a much better opportunity of deriving a decent living from the farm. I know of a case where a farmer had a $2,000 twenty-payment life participating policy on which he had paid three years, but decided to drop it. To use his own words: 'I'll be —— if I am going to buy any more automobiles or fat cigars for head office officials.' Eighteen months after, he slipped through the ice while fishing and was drowned. The wife, three children, and a $700 mortgage survived him. The mortgage company commenced foreclosure proceedings, and then the silver lining to the dark cloud appeared. Our own agent, on being told by the widow that her deceased husband had taken out a policy but which had been dropped, asked if he had received any money back, and she said No. To make a long story short, our salesman got a cheque for this widow for approximately $1,900, the policy being still in force under the automatic non-forfeiture condition. She paid off the mortgage and had $1,200 left and a clear titled quarter-section. There is no better argument for life insurance for farmers than this actual example. I have never yet heard of a valid reason why farmers should not buy life insurance."

EMPLOYMENT BUREAU ESTABLISHED IN ONTARIO

The Ontario government has in operation employment bureaus in 53 cities and towns in the province. Already more than 15,000 persons have been given employment through these offshoots of the trade and labor branch of the Department of Public Works. The department hopes to place at least 25,000 workers on the land next year and cordially invites the farmers to register their requirements in regard to labor. Already 6,000 men have responded to the call for labor help in this war time emergency by going out into the fields and helping to save the harvests. Last spring a labor campaign resulted in sending over 4,000 high school boys into the field of agriculture to relieve the strain.

The purpose of the government in establishing a system of employment bureaus is to bring every person seeking employment in touch with every opportunity for employment within the province. The province has been divided into six zones or districts. Zone bureaus have already been established at Ottawa, Hamilton, Toronto and London, and others are shortly to be opened at Fort William and Sudbury.

In each zone, in addition to the zone bureaus there are sub-zone bureaus in the smaller cities, such as Brantford, St. Thomas, Walkerville and Kitchener and farm labor bureaus in every branch office of the Department of Agriculture. The organization is by no means complete, but is being extended as rapidly as possible. It is hoped soon that arrangements will be made whereby post offices will act as branch registration bureaus and become part of the province-wide system of employment bureaus.

These employment bureaus are at the service of every man, woman, boy or girl in the province of Ontario, without charge. The following is the location of Ontario government employment bureaus: Zone bureaus—Toronto, 15 King Street East; Ottawa, 139 Queen Street; Hamilton, 28 Main Street; London, 108 Dundas Street; Fort William (to be opened); Sudbury (to be opened). Sub-zone bureaus—Brantford, 136 Dalhousie Street; St. Thomas, 53 Gladstone Avenue; Kitchener, 55 King Street West; Walkerville, 87 Argyle Rd.

BRITISH CANADIAN & GENERAL INVESTMENT

The profit of the British Canadian and General Investment Company for 1916, after charging debenture interest and income tax, was £6,658. This company, which has its headquarters in London, England, has authorized capital of £448,634, of which $154,097 is issued. Less than £1,000 represents calls in arrear. The company has also £55,000 5 per cent. convertible first debenture stock. Its assets total £223,616, of which £216,627 represents investments at cost or under less reserve.

The revenue for the past year, after charging all working expenses, was £10,968. Adding to this, the balance of £3,644 brought forward, there was available for distribution a total of £14,612. From this had to be deducted taxes of £2,168 and debenture interest of £2,140, leaving a net balance of £10,302. Dividends at the rate of 4½ per cent. per annum for the year, less tax, absorbed £5,339, leaving £4,963 to be carried forward to the next account.

The directors' report noted that the gross revenue for the year was less than in 1915, owing to the continuance of the moratorium in Canada, "which has restricted the collection of interest by the affiliated companies and diminished their revenue. Consequently, but little has been received from those companies by way of dividends, whereas last year a substantial amount was distributed by them. This has, however, been offset by a considerable reduction in expenses, and the total net revenue shows a slight increase. Only interest actually received has been taken into the accounts, no credit being taken for interest accrued or in arrear. Income tax naturally absorbs a considerably larger sum, the charge under this head being some £500 more than last year—an increase of about 35 per cent."

In view of the imposition of a Canadian income tax and of the large increase proposed in the American income tax, the directors considered it advisable substantially to increase the amount carried forward.

Speaking at the company's recent annual meeting, Mr. Charles P. Johnston, chairman, referred to many of the difficulties the company had had to face during the past year. He mentioned particularly how the interests of the British Canadian and General Investment Company and affiliated concerns were affected by moratorium legislation in Canada.

REPORTS and BALANCE SHEET

For year ended August 31st, 1917, presented to the Shareholders at the Sixteenth Annual Meeting, held at Montreal, Quebec, October 11th, 1917.

DIRECTORS' REPORT.

A Balance Sheet showing the Assets and Liabilities of the Company, also Profits for the year is submitted.

The Company's accounts have been audited by Messrs. Creak, Cushing and Hodgson, Chartered Accountants, whose report is presented herewith.

The Company's Pension Fund now amounts to $143,976.74.

The surplus profits for the year with a sum taken from the Profit and Loss Account has been transferred to the Contingent Account, which now stands at $2,500,000.

The Company's properties have been in continuous operation at maximum capacity during the year, which has deferred the usual overhauling; provision has, however, been made for this purpose.

The usual quarterly dividends were paid during the year on the Preferred shares, and four quarterly dividends of 2½% were paid on the Common shares, together with a bonus of 15%, which was paid on the 1st October, 1917.

All of which is respectfully submitted.

(Signed) CHAS. R. HOSMER, President.

VICE-PRESIDENT AND MANAGING DIRECTOR'S ADDRESS.

Addressing the Shareholders present, Mr. W. A. Black, Vice-President and Managing Director, said:—

I am sure the statement presented to you to-day will be considered most satisfactory.

We have passed through a very trying year. The Wheat market was most erratic, and reached a level that had never been previously touched. The quality of the wheat was very irregular, and, to get a satisfactory quality of flour, required more than usual care and consideration, but notwithstanding this, we were able to turn out the largest amount of flour in any year in the history of the business. Our Cereal mills have also been kept running steadily up to capacity, and the grain handled outside of wheat for milling was unusually large and very profitable owing to the steadily advancing markets.

This year we have shown the earnings other than those from flour milling separately, as the profits have been unusually large, and the impression prevails with some that an unduly large profit has been made on flour, which is not the case. It will be noted that nearly half the profits come from sources other than flour.

It may interest some to know that our contribution to the Business Tax this year will exceed the dividends paid to the holders of the Common Stock of the Company so that while we have done well for our shareholders, we have also contributed very largely from our success towards the necessities of the Government. I would also like to state that we have a very large number of shareholders, and that the average individual holding is thirty-five shares.

The demand for flour has been so urgent this year that we have not been able to give our mills the general overhauling that they should receive, but proper depreciation has been made, and the work will be done as soon as business permits.

While our wheat crop this year will not yield as much as we had hoped for at one time, it will be very near the average, and of most superior quality. It will go farther than the wheat of last year, yielding a greater amount of excellent flour.

Our mills are all running full time, and we have sufficient business on our books to keep them going for some time to come.

DIRECTORS AND OFFICERS.

The following gentlemen were elected Directors of the Company for the ensuing year:—

Sir Montagu Allan, C.V.O., Mr. W. A. Black, Mr. Charles Chaput, Mr. George E. Drummond, Sir Charles Gordon, K.C.B.E., Sir Herbert Holt, K.B., Mr. C. R. Hosmer, Sir Augustus Nanton, K.B., Mr. Shirley Ogilvie.

And Messrs. Creak, Cushing and Hodgson were appointed Auditors.

At a subsequent meeting of Directors, the following officers were appointed:—

Mr. C. R. Hosmer, President; Mr. W. A. Black, Vice-President and Managing Director; Mr. S. A. McMurtry, Treasurer; Mr. G. A. Morris, Secretary; Mr. W. R. Dean, Assistant Secretary.

BALANCE STATEMENT, AUGUST 31st, 1917.

ASSETS.

Cash on hand and at Bank		$ 259,071.81
Bills Receivable		617,277.89

We have audited the Books of the Company for the year ending 31st August, 1917, and certify the above to be a correct statement of the affairs of the Company at that date as shown by the Books.

CREAK, CUSHING & HODGSON, C.A.,
Auditors.

AUDITORS' REPORT.

Montreal, October 2nd, 1917.

To the Shareholders of
The Ogilvie Flour Mills Company, Limited,
Montreal.

Gentlemen:

We beg to report that we have audited the Books of the Company in Montreal, Winnipeg, Fort William and Medicine Hat for the year ending 31st August, 1917, verifying the Cash and Bills Receivable on hand, the Bank Accounts, the Investments, and the Accounts Receivable, in respect of which ample provision has been made for all Contingencies.

The Stocks on hand of Wheat, Flour and Supplies are certified as to quantities by the Superintendents of the various Mills, confirmed by the Mill Reports, and are valued on a safe and conservative basis, taking into consideration the abnormally high prices of Wheat and all Grains, and the contingencies of the markets.

Satisfactory provision has been very properly made for depreciation of the Mill Properties and Plants.

(Signed) CREAK, CUSHING & HODGSON, C.A.,
Auditors.

COST OF BREAD IN CANADA

(Continued from page 37)

Cost of a Barrel of Flour.

"The following table shows the cost of a barrel of flour based on the fixed price of wheat, namely, $2.21 at Fort William, as shown by the returns of the largest milling companies in Canada:—

Cost of a barrel of flour, 4.37 bushels, at $2.21 =	$10.23
Approximate cost of manufacture	1.15
Total	$11.37

Note:—The cost of manufacture is calculated as follows:—

Expense	$0.20
Fuel	.02
Interest and exchange	.09
Travelling expenses	.03
Mill wages	.20
Salaries	.13
Insurance and taxes	.06
Bags and barrels	.42
Total ...	$1.15

"In this calculation of the cost of flour allowance is made for the receipts from offals.

"An increase in the retail price of bread has occurred during the month of August and September in nearly all the largest cities of Canada. The reason is obvious. Except in the case of St. John and Winnipeg, the cost to the bakers of the flour used in the month of August was higher than that used in the month of July, despite the drop in the price of flour and the drop in the price of wheat. The reason for this is that the bakers were using contract flour ordered in many cases last fall. The supplies of this contract flour are now practically all exhausted. Toronto, Ottawa, London and Vancouver purchased flour for current use at the current price in August. With the fixed price of wheat will come without doubt a fairly uniform price of flour, which the previous calculation will show to be about $11.40 in Ontario and Quebec for first patent flour. In the event of the fixing of the price of flour some supervision should be exercised to insure that a standard quality is maintained.

"The disproportionate cost of delivery is apparent by the table above. This is particularly striking for Montreal and Vancouver, where the delivery charges exceed by nearly half a cent per pound the average of the ten Canadian cities reported.

"It is estimated that cost of delivering bakers' bread per day is $5,000 in Montreal; $3,000 in Toronto; $1,000 in Winnipeg; $1,200 in Vancouver, and $500 in Ottawa.

"Winnipeg and Calgary are particularly fortunate in having had large supplies of flour purchased by their bakers at a low cost. The public have received the benefit of this.

"The investigation into the milling industry, of which that into bread costs is a subsidiary effort, has covered a period of about six months. It has involved an examination into grain production, grain prices and the production, costs and profits of all the milling companies. The forthcoming report will show the capitalization and gross profits of such companies as well as their profits per barrel. It will deal with their operations (speculative and otherwise) in grain, showing their profits so derived as distinguished from those made upon the production of flour. So far as possible it will distinguish between export and home business. All the companies have made full and frank disclosure, the results of which are almost ready to be shown in tabulated form."

ALLIANCE INSURANCE COMPANY OF PHILADELPHIA

The Alliance Insurance Company of Philadelphia, which recently established a Canadian department, as previously noted in *The Monetary Times*, has already made good progress with its organization here. The company's Canadian department is in charge of Robert Hampson and Son, Limited, the well known general agents, Montreal. Messrs. Hampson have appointed the following agents in this connection:—

St. John, N.B., Messrs. Vroom and Arnold; Moncton, N.B., Mr. Alex. McLellan; Toronto, Ont., Messrs. Parkes, McVittie and Shaw; London, Ont., Messrs. D. Campbell and Sons; Kingston, Ont., Mr. J. S. R. McCann; and Fort William, Ont., Terminal Land and Investment Company, Limited. The work of making agency appointments is still progressing. The Alliance Insurance Company of Philadelphia will pay special attention to fire insurance here, although it writes many other lines as well.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first two weeks of October:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
October 7	$2,966,000	$2,842,000	— $124,000
October 14	3,034,000	3,333,000	+ 299,000

Grand Trunk Railway.

October 7	$1,319,090	$1,342,050	+ $ 22,960
October 14	1,300,095	1,312,505	+ 12,410

Canadian Northern Railway.

October 7	$ 857,400	$ 758,500	— $ 98,900
October 14 .	847,700	960,600	+ 112,900

Gross earnings of the Canadian Northern Railway for the second week of October amounted to $960,600, as compared with $847,700 for the corresponding week of last year, and $758,500 for the preceding seven days of this month. As compared with last year, there was an increase of $112,900 or 13.32 per cent. in favor of the figures for the current period.

Gross earnings of the Canadian Pacific Railway for the second week of October showed a marked increase as compared with the first seven days of the month. For the period ending October 14, the total was $3,333,000, a gain of $491,000 over the preceding week. As compared with last year there was an increase of $299,000, or 9.85 per cent. This contrasts with a falling off of $124,000, or 4.36 per cent., for the week of October 7.

Grand Trunk gross earnings for the second week of the current month stood at $1,312,505, which is $30,545 less than for the week previous. As compared with last year, there was a gain of $12,410, or .954 per cent.

WAR'S END AND LABOR PROBLEMS

Employment Census Should Be Taken—Views of J. S. Dennis, of Canadian Pacific Railway

"Only a superficial consideration of conditions in Canada makes it quite apparent that this problem of caring for our soldiers after the war is one of utmost importance," says Mr. J. S. Dennis, of the Canadian Pacific Railway. "Some of us are wont to belittle these after-the-war problems with the remark that the problems will solve themselves. They point to the fact that more than 1,000,000 volunteer soldiers were absorbed in the Northern United States at the close of the Civil War, without causing any change in the economic conditions. However, a close comparison of Civil War conditions and those which prevail in Canada shows many broad differences.

"The population of the United States at the outbreak of the Civil War was about 31,000,000, of whom something like 11,000,000 lived in the Confederate States. The census figures of that period show that upward of two-thirds of the population in the Northern States was rural, and this proportion also held in the Southern States.

Urban and Rural Population.

"Against this situation we find that Canada's 8,000,000 population is about evenly divided as between urban and rural, while of our 400,000 soldiers recruited to date only 12 per cent. came from the farms and ranches, and, taking it for granted that all of the farmers and ranchers will be reabsorbed on the farms, what will we do with the remaining 88 per cent. of this army of ours? It is interesting to note the occupational proportions of our overseas forces:—

Professions	12,000
Merchants and employers	5,200
Clerical workers	42,000
Manual workers, skilled	128,200
Manual workers, unskilled	53,300
Students	8,400
Farmers	38,300
Ranchers	2,600
	290,000

"The total enlistment since has been increased to about 400,000, but the proportions among the occupations of the recruits apparently remain practically the same.

Canada Needs Farmers.

"What Canada needs above everything else is more farmers. Our consuming population is too large for our producing population. It would be close to Utopian if every one of our returning soldiers could be transplanted at once to our vacant land areas and enrolled on the producing side of our population. But it would be folly to expect that any large number of men who enlisted from professions, trades and clerical positions would be able to make good on farms or will have any desire to go on to the land.

"A recent survey of the labor position in Canada which deals with present conditions and the prospects after the war, indicates a possible demand for about 200,000 more men after the war. It is quite reasonable to suppose that 75 per cent. of the returning soldiers will require employment. It is estimated there are 200,000 munition workers now employed in Canada, and that only one-fourth of this number will be retained in this and similar employment after the war.

Back to Old Positions.

"After the surrender of Lee, the Union army was demobilized at the rate of 300,000 per month. There was for a time a general rejoicing and celebration to welcome the 'Boys in Blue'; then came the stern reality that these men must be provided with means of earning their living. Employment agencies for the returning soldiers were opened in every city and town. Many were received back in their old positions. Farms that remained idle or only partially worked during the war were put under work, providing employment for thousands of returned soldiers. But plans made for the soldiers were mostly local. In some places it was impossible to care for the men properly. In other sections there was a need for more.

"Taking it for granted that it will be possible to return the Canadian army to our shores in large numbers and within a short time after the end of the war, it would seem from the history of the Civil War that it would be more desirable to turn this great body of men back into civil life only in such quantities as the body politic could assimilate.

"Among the most practical plans suggested is that of making a careful census of our overseas forces directly after the war is over, to ascertain the employment requirements for the men upon their return to Canada.

"It is estimated that it would require 400 large transports to bring all of Canada's overseas forces within three months after the close of the war. As this number of large boats would be impossible to secure, it is quite evident that we cannot count upon returning more than a few thousand each month. The mustering out of the Union army consisted for the most part in sending regimental trains back to the place of recruiting—a task requiring only a few days' duration. Canada can hardly count upon the return of all of her men within a year or more after the close of the war.

"How are the men to be handled after they return to Canada? It would seem to be desirable that they be kept in camps or mustering out depots until the proper authorities are satisfied they can be provided with employment. Under such a general scheme, and with their care on this side provided for by proper provincial or sectional depots, there should be a minimum of difficulty in getting the men back into civil life.

Free Homestead Plan Opposed.

"The proposed plan of awarding a free homestead to soldiers, regardless of whether they have any agricultural experience, is fraught with many dangers, as Canada's experience after the South African war demonstrated. Such a plan merely feeds the government land to the hands of speculators, without fulfilling the object of caring for the soldier. Some specially designed plan for co-operative community farming is the only way in which most of the men who lack agricultural education may hope to make a success as farmers. For those desiring to take up farming the government might well afford to maintain them for a year at a sectional camp, even providing for the support of their families, in order that they might be given the instruction necessary to give them a chance to win success from the land.

"All these problems must be studied carefully. The start should be made by the government at once by the appointment of a commission, composed for the most part of civilians—for it must be remembered that the problems of demobilization of a large army of volunteers have to do with industrial, labor and financial problems, and that the military specialists will have completed their tasks and won their laurels when the war is over."

DOMESTIC ELECTRICAL DEVICES AND FIRE RISKS

"A new form of fire peril is coming into prominence as the cause of much destruction and its fires are so directly connected with carelessness that it has been deemed necessary to issue special warning to the people," says the Ontario fire marshal, Mr. E. P. Heaton. "Because of their convenience small electric devices such as pressing irons, curling irons, toasters, electric pads or blankets, electric plate warmers, electric sterilizers and heaters are to be found in almost every community. If these were used with proper care the danger would be negligible, but unfortunately a large proportion of their users do not realize the peril of leaving them in circuit when not in use, in which case, these devices tend to become overheated, whereby they are likely to set fire to anything combustible with which they come in contact. This form of hazard is already assuming large proportions. For example, the actuarial bureau of the National Board of Fire Underwriters of the United States, in one day noted approximately 100 reports of fires from this cause out of a total of 2,000 losses in the day's report and it is estimated that small electric devices are causing fires at the rate of 30,000 or more in the course of a year. It is safe to say that most of these fires are entirely preventable and can be charged to nothing but carelessness on the part of users. Various 'safety' devices have been added by certain manufacturers of these articles and among them are some that are fairly effective, but there is one absolute precaution that should be borne in mind at all times by every user—viz., that of shutting off the current when not personally and continuously supervising the use."

NEW INCORPORATIONS

Iron Mines Corporation at Montreal Has $1,000,000 Authorized Capital

The following were the largest companies incorporated during the past two weeks:—

Goldbanner Mines, Toronto	$2,000,000
Chief Motor Company, Toronto	1,000,000
Canadian Union Iron Mines Corporation, Montreal	1,000,000

The following is a partial list of charters granted during the past two weeks in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Aleza Lake, B.C.—Aleza Lake Mills, Limited, $25,000.

Prince Rupert, B.C.—Empress Social Club, Limited, $10,000.

Davidson, Sask.—Prairie Land Company, Limited, $25,000.

Loverna, Sask.—The Loverna Pool Company, Limited, $2,000.

Nanaimo, B.C.—Western Mercantile Company, Limited, $50,000.

Hall, B.C.—Mankin Lumber and Pole Company, Limited, $100,000.

Shackleton, Sask.—I.O.O.F. Shackleton Lodge No. 155, Limited, $3,000.

Regina, Sask.—The Saskatchewan Collieries Company, Limited, $25,000.

Gravelbourg, Sask.—The Gravelbourg Supply Company, Limited, $20,000.

North Vancouver, B.C.—Wallace Foundry Company, Limited, $75,000.

Moyie, B.C.—Guindon Mining and Milling Company, Limited, $1,000,000.

Markdale, Ont.—Hill Brothers, Limited, $40,000. F. T. Hill, W. Hill, W. H. Hill.

Prince Rupert, B.C.—Graham Island Spruce and Cedar Company, Limited, $40,000.

Kamloops, B.C.—Copper Creek Mining Company, Limited (non-Personal Liability), $200,000.

Gladstone, Man.—The Echo Flour Mills Company, Limited, $250,000. P. Broadfoot, M. Wilson, D. Smith.

Newdale, Man.—C. E. Murphy Company, Limited, $40,000. C. F. Murphy, W. F. Murphy, W. J. Hunter.

Windsor, Ont.—West View Park Land Company, Limited, $40,000. J. A. Giedeman, W. C. Shaub, T. Emery.

Hamilton, Ont.—J. B. Nicholson Company, Limited, $40,000. J. B. Nicholson, J. H. Clappison, W. Nicholson.

Saskatoon, Sask.—Saskatchewan Motors, Limited, $10,000; the Chester Thompson Company, Limited, $20,000.

Cochrane, Ont.—Ontario-Quebec Pulpwood Company, Limited, $40,000. C. M. Garvey, T. Weatherhead, B. E. Lawless.

Niagara Falls, Ont.—The Empire Land Company, Limited, $150,000. J. H. Spence, G. Cooper, L. M. Heal, (Toronto).

Windsor, Ont.—Lasker-Komer Realty Company, Limited, $25,000. C. Laskey (Detroit, U.S.), N. A. Komer, W. H. Morrey.

Moose Jaw, Sask.—Albert Lea Gas and Electric Company, Limited, $75,000; the Naumkeag Clothing Company, Limited, $[illegible]

Actonvale, Que.—La Compagnie d'Aqueduc d'Actonvale, $20,000. O. Maurais (St. Theodore d'Acton), A. Phaneuf, W. Provancal (Montreal).

AND FIRE INSURANCE

You Look for Security

Whether with the intention of taking out insurance or associating yourself with some Company, you look for security.

The latest figures emphasize the unexcelled financial position of this Company.

Business in Force over......	$59,600,000
Assets over................	16,400,000
Net Surplus.................	2,600,000

These are reasons why the Company is known as

"SOLID AS THE CONTINENT"

North American Life Assurance Co.

HEAD OFFICE - TORONTO, ONT.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

A STRONG CANADIAN COMPANY

Paid up Capital - - -	$200,000.00.
Authorized Capital - - -	$1,000,000.00.
Subscribed Capital - -	$1,000,000.00.
Government Deposits - -	$111,000.

A Typical Great-West Life Result

Twenty Payment Life Policy for $5,000 issued 1897. Matures 1917.
Age 35. Premium $168.70. Paid-Up Value at Maturity $8,775.00

OR

Cash Value at Maturity	$4,830.00
Total Premiums Paid	$3,374.00
Excess Return..........	$1,456.00

The Policyholder was protected by $5,000 Insurance during 20 years and at the end of that period the cash value constituted not only a return of all premiums but in addition a splendid surplus. Such remarkable results are worthy of attention.

Ask for rates at your own age, and examples of other maturities.

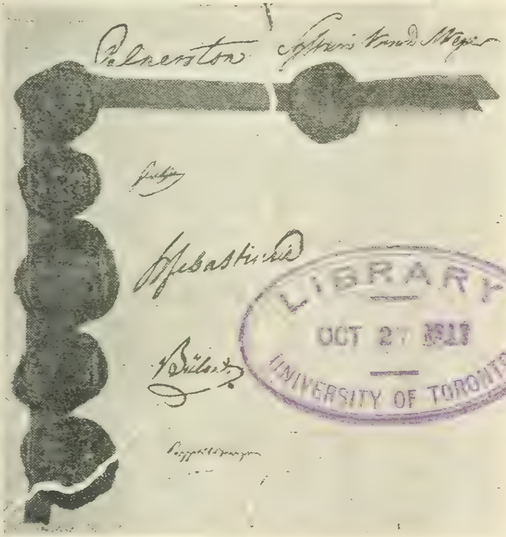
CANADA'S VICTORY LOAN, 1917



Palmerston

LIBRARY
OCT 27 1917
UNIVERSITY OF TORONTO

This Scrap of Paper was the British Government's Bond of good faith to Belgium. Germany tore it up, but Britain never breaks her bond. She and We went to War for it.

THERE is nothing so strong as a Bond It is the strongest obligation in the world. Once made no one should repudiate it. This announcement relates to another Canadian War Loan Bond — Canada's Victory Bond—and is addressed particularly to those who ***invest*** as opposed to those who ***speculate.*** One likes a certainty—the other is willing to take a risk. Everyone who prefers a certainty, while he or she gets a high rate of interest, should read every word on this page and act upon the suggestions made.

A Bond, in Law, is an undertaking on stamped paper, by which those who issue it are ***bound to pay*** sums of money according to the terms of the Bond. When a Bond is issued by the Canadian Government, it means that the Canadian Government undertakes to pay back without discount the amount specified in the Bond—i.e., its face value. It is better than money because it bears interest and it is equally secure. Anyone holding a Victory Loan Bond can be certain that later on he or she can get the full purchase price back ***in cash.*** There is no need to worry about fluctuations of price. You will be able to buy one of these bonds next month.

The interest rate will be substantial, at least equal to and most likely better than the last loan which yielded 5.40 per cent. It is not likely that it will be possible to get this rate of interest on a Government Security of this standard after the War. You will be glad if you invest in these Bonds. Do so to-day. It is an ideal way to save for your children's education or for the purchase of property in the future. Should you, at any time, desire to realize the Bonds, a banker, a bond house representative, or any member of the Stock Exchange will arrange the matter for you.

We must continue to advance credits to Britain for her vast purchases here. We are spending $890,000 every day on war. Britain is spending daily on war purchases in Canada twice that sum. War orders are the chief cause of our prosperity at this time. They will continue only if we help to finance them. Subscribe to Canada's Victory Loan next month for that purpose. Finance our boys in the trenches Help bring the war more quickly to a successful conclusion.

This page is donated by The Monetary Times to Canada's Victory Loan Campaign.

Canada's Economic Future After the War

ALL Nations Will Undergo Economic Struggle—Extension of the Canadian Preferential Tariff System Advocated—League of Nations May Be Constituted to Promote Free Intercourse Between Countries—Professor W. W. Swanson's Views of the War After the War.

THE war has profoundly affected the economic life of every nation in the world, and all signs point to an economic struggle for world supremacy at the termination of hostilities, such as has never before been known. It will be well, therefore, before discussing the economic outlook in Canada to consider the various methods used by the Great Powers to safeguard and strengthen their industrial and commercial interests. This is essential in view of the fact that during the course of the struggle economic instruments have been hammered out that will have a potent effect in controlling and conserving trade at the close of the war. Moreover, these instruments and methods so intimately touch the economic life of Canada and the United States that it is of imperative importance that they be thoroughly examined and appraised in order that measures may be adopted to cope with them effectively, by those who guide the economic life of America." This is the view expressed by Professor W. W. Swanson, Department of Political Economy, University of Saskatchewan, in an interesting article in the quarterly supplement of the Alexander Hamilton Institute, New York.

"It is possible that a League of Nations may be constituted at the termination of hostilities, to bring about some measure of harmony in the economic as well as in the political affairs of the world. If, however, the present alliance of the Western Powers, including the United States, falls apart, bitter trade wars in the future will be inevitable. We shall then return to a condition even worse than that existing before August, 1914, inasmuch as the balance-of-power idea will be superseded by a struggle for individual, national supremacy. It will again be a case of the survival of the fittest; and the struggle for economic as well as political supremacy will be more severe than anything hitherto experienced in the world. It goes without saying that Canada and the United States are equally interested in promoting free intercourse among the nations. Canada's economic life will lack any semblance of stability unless the agricultural products of the nation find a market abroad; and it is equally true that permanent prosperity in the United States depends in very great measure upon the maintenance of its foreign trade. Sane observers hope, therefore, that the peace that terminates the present war will be a real peace as well as a lasting one.

"It is not necessary to emphasize the fact that trade benefits both buyers and sellers alike—that the one class does not, and cannot, gain permanently at the expense of the other. Should the economic programme adopted by the Allies at Paris in the spring of 1915, be actually put into practice, it would be a calamity not only to our present enemies but to the Entente Powers and the United States as well. Everything, therefore, depends upon the nature of the peace that shall be proclaimed. If the leaders of liberal thought and action in Germany should win in the struggle with the forces of reaction, it is not conceivable that the dream of the military caste, who hope to establish political and economic hegemony from the North Sea to the Persian Gulf, will ever become a reality. With the failure of such aspirations, it is safe to predict that the close of this colossal struggle will open up commercial and industrial opportunities to nations enterprising enough to take advantage of them, such as have never been known before. Although the present outlook is dark, nevertheless, it is to be hoped that there will be no war after the war.

"The war has introduced many novel and exceedingly efficient economic methods and practices. In former trade struggles to secure commercial advantages and a place in the sun, each of the old weapons—bounties, subsidized exports, preferential duties and Imperial tariffs—was effective in its own way, and all of them wrought economic changes of considerable magnitude. German export bounties on sugar, for example, destroyed the value of sugar plantations in the British West Indies and in South America; and preferential duties constituted a favorite weapon in the hands of almost every European Power when seeking trade advantages. At the close of the Russo-Japanese war, Germany, by rattling the sword in its scabbard, was able to extort from Russia many heavy tariff concessions. All these methods, however, appear crude and clumsy in the light of developments since the outbreak of the present struggle. Perhaps the most efficient of these new economic weapons is the export monopoly.

"A nation can draw wealth from foreign countries, by making use of the export monopoly, whether the monopoly is one that controls the supply of copper, coal, rubber, cotton, wool, tobacco, potash or what not. It is well known, for example, that a British corporation, working in conjunction with large American interests, has been able to determine tobacco prices in Virginia and other tobacco-growing states. It will thus be seen that international trusts and combines, under the development of this scheme, may be able to get substantial control of the supply of basic products and thus determine their prices.

"It can readily be seen that export monopolies may be used, not only to tax foreign countries, but also to destroy important industries. This may be done by withholding, or materially reducing, supplies for the export trade. Germany has the cheapest and most extensive deposits of potash salts, essential to agriculture in almost every modern agricultural nation. Her coal supplies are imperatively necessary for the industrial needs of Russia, Sweden and the Scandinavian countries in general. The United Kingdom, either through its own resources, or those of its colonies, controls the supply of coal, wool, rubber and many tropical products. The United States holds a dominating position in cotton, copper and oil; Russia holds the same position with regard to grain for European markets. It may be seen at a glance that the Great Powers will be hard hit in any commercial war in which use is made of this weapon. To the small States it virtually means economic extinction.

"All the belligerents during the course of the war have been compelled to exercise strict supervision and control of importations. Already Germany has formulated a plan whereby, at the close of the struggle, its mercantile marine will come under the direct control of the State, and be subsidized heavily by government bounties. This is only a preliminary step in the direction of State socialism in Germany—an economic programme that seems to have been definitely determined upon in that country when hostilities shall have ceased. In any event it seems certain that there will be an intense struggle between the greater European Powers to get control of adequate supplies of the necessaries of life, and the raw materials of industry. Since the outbreak of war the United Kingdom has set up machinery under which imports are controlled by an import board; and even supplies forwarded to neutral European nations are regulated in amount, and final place of sale, by British officials. Holland, Denmark, Norway and Sweden have entered into arrangements with the United Kingdom under which they have set up import boards that work under agreement with the British government. It is scarcely conceivable that these novel, and highly efficient economic instruments, will be discarded at the close of the war. Rather, we may look forward to an era of commercial competition in which import boards will control national imports of copper, coal, steel, cotton, wool, oils, tobacco and a bewildering variety of other commodities used as the raw material for domestic industry. This has an important bearing upon the future economic development of Canada and the United States. It will seriously affect the agricultural interests of this continent, inasmuch as it may be expected that cereals, meats, cotton and wool will be imported by vast purchasing trusts in Germany, France, Italy and the United Kingdom.

Import Board an Economic Necessity.

"One can easily see that a great national purchasing trust will control a vast body of demand, and hence will have much to say in determining prices. An import board may be used effectively to gain concessions from foreign countries, especially as the various boards that have been constituted since the outbreak of war are made up of business men, rather than bureaucrats. The manner in which the railways of the United Kingdom have been operated during the war by a central railway committee, shows what can be done along these lines when custom and routine are ignored, red tape thrown on the scrap heap, and business administration placed in the hands of competent business men. And as a corollary, it may be shown that taxes can be so imposed, under the advice and direction of import boards, as to destroy foreign industries and force other states into a position of economic dependence. It is readily granted that, from the point of view of international wealth and wellbeing, this entire programme is pernicious; but it will be put into effect nevertheless if the terms of peace are not so drawn up as to preclude the possibility of another struggle for world supremacy within a generation.

"The trend of developments, as outlined above, has been keenly observed by business men both in Canada and the United States; and already measures are under way to safeguard the economic interests of this continent. For the present, however, we shall confine ourselves to a brief study of the methods advocated to strengthen and expand the industry and commerce of the Dominion.

"Concerning the economic policy that may be expected to produce the greatest results for the welfare of the nation, there is a sharp contrast between the views of the great agricultural interests of Western Canada and of the financial and manufacturing elements whose stronghold is in the east. Western Canada, naturally enough, has been profoundly influenced in its economic thinking by the radical elements—and especially by the Non-partisan League—in the American West. As yet, however, no progress has been made among the farmers of Canada in carrying through, or even definitely formulating, a similar political programme. The prairie provinces are still divided on the old party lines with the radical elements in the Liberal party in the ascendancy. As one might expect, Western radicals, who are everywhere dominant, strongly support a peace which will establish an era of international goodwill, and are unalterably opposed to future trade wars. It is easy to understand how this should be, in view of the fact that the products of Western farms are marketed almost entirely in Europe, heavy exports going to Germany as well as to the Entente Powers.

Result of Recent Convention.

"The West relies upon domestic reforms and revitalized industry rather than upon tariffs and economic agreements for permanent prosperity. Just what it demands is seen from a glance at the programme drawn up and adopted by the Liberal party at its recent convention held in the city of Winnipeg. The delegates—some eight hundred in number—demanded an immediate, material reduction in the tariff on all British goods; and free trade between the United States and Canada in all foodstuffs and articles in general use on the farm, especially agricultural machinery. The convention favored a federal income tax and a heavily graduated federal inheritance tax. It demanded that the government take over immediately, and operate in the interests of the people, all the railways, telegraph and express companies in the country. The delegates voted in favor of placing all the natural resources of the prairie provinces, now under federal control, in the hands of the various provincial governments, to the end that these might be developed and used in meeting interest and principal upon the war debt. It was insisted, further, that the banking system of the nation be revised in such a way that agricultural credit might be made available to meet the needs of farmers everywhere. It was demanded that combines in restraint of trade be broken up; and that the cold storage plants of the country be placed under public ownership and operation

"Part of this programme has already been carried out by the federal government. The Dominion has recently imposed a sharply graduated federal income tax, and has announced its intention of securing five-sixths of the $60,000,000 common stock of the Canadian Northern Railway still remaining in the hands of private interests. It will be recalled that the Dominion has for several years been a junior partner in this enterprise, having secured $40,000,000 of the common stock in return for cash grants to the railroad.

Conscription of Wealth.

"As might be expected, the manufacturers, the banks and the big commercial institutions protest against the carrying out of much of this programme. They point out that Canada's national debt now approximates $1,000,000,000—a huge debt for a people with a population only a little in excess of 7,000,000. It is true that the natural resources of the Dominion are amazing, both in their extent and in their richness, but capital is imperatively necessary for their development. Not less than $3,000,000,000 has been invested in Canada by the United Kingdom and the United States, the interest and principal of which must be met by productive enterprise. The capitalist maintains that capital has already been sufficiently taxed under the excess profits tax; and that it will be fatal to the future prosperity of the nation to serve notice on foreign investors that capital is to be discriminated against in favor of labor and of the agricultural class. Leaders of finance and industry protest that this is class legislation, and that it virtually amounts to what the radicals have been demanding—conscription of wealth. The phrase, "conscription of wealth," so generally and so vaguely used, means simply the conscription of income and nothing more. In that particular the leaders of Canadian industry and finance are quite correct when they criticize the various taxes that have been imposed as confiscatory in nature. But to this the radicals of the country reply that the term does not frighten them; that the war must be financed either out of income or by borrowing, and that the former is the right financial practice.

Heavy Taxation Unjustified.

"It will be seen, therefore, that the same arguments are advanced in the United States as in Canada against heavy taxation of corporate and personal incomes during the course of the war. Western radicals reply to the above somewhat as follows: Objections to heavy war taxation implies distrust of the spirit and staying powers of the common people as well as of the rich—a distrust entirely unjustified in view of the immense effort put forth by the United Kingdom and France in financing the war. The fact that 420,000 men have freely volunteered in Canada to fight the battle of democracy in Europe shows that the common people will stand want and deprivation, inasmuch as they are willing to sacrifice comforts and luxuries, and even life itself, in the struggle for freedom. Western radicals assert that the average man will not protest against heavy taxation, laid upon consumption, provided that war-born industries share their profits with the government to meet the requirements of war. They further contend that few new industries are launched in war time, and that the capital fund will be quite great enough to take care of replacements and betterments, as well as of essential new equipment.

"The counter proposals of the business interests and notably of the manufacturers, of Canada," said Mr. Swanson in conclusion, "may be briefly set forth. They look forward to the organization of the Empire along Imperial lines, both for political and economic purposes, at the close of hostilities. They advocate the extension of the Canadian preferential tariff system, under which the United Kingdom will afford a free market, or preferential treatment, for Canadian agricultural and manufactured products in return for similar concessions by the Dominion. It is hoped and believed that the programme adopted by the Allies at Paris in 1915 will be put into effect; and that under its terms Canadian products will receive preferential treatment in France, Italy and Russia. It is expected that the United States will also enter this economic alliance. Thus the conservative and financial elements in Canada's public life would depend mainly upon the tariff as an instrument for stimulating trade and commerce, and for finding the funds to take care of the principal and interest of the war debt. Under the stimulus of a protective tariff it is hoped that capital will be attracted from abroad for the exploitation and development of the natural resources of the country.

"In addition, the manufacturers support the project of establishing a Canadian trade corporation, or great financial bank, for supporting and increasing the foreign trade of the country at the close of the war. This corporation would be modeled along the lines of the British trade corporation; and would gather data upon trade opportunities everywhere throughout the world, as well as establish agents abroad for the promotion of Canada's trade."

PENSION REGULATIONS AMENDED

Sir Thomas White, minister of finance, this week announced increases in soldiers' pensions. He stated that the pension regulations applying to members of the Canadian expeditionary forces had been amended by an order-in-council approved by his excellency the governor-general. The amendments provide for an increase in pensions and allowances to, and in respect of, soldiers and sailors holding the lower ranks up to and including the rank of sub-lieutenant in the Canadian navy and lieutenant in the Canadian expeditionary forces. In his official statement he said in part:—

"The most important changes provide for increases in pensions and allowances. These changes will be considered as having come into force on the first day of April, 1917, and in this way all pensioners will be entitled to an extra cheque covering the difference between the pension paid since April 1st and the date on which the adjustment is made.

"The changes will affect the pensions of soldiers and sailors, and their children, their orphan children, their widows and children, their dependent parents, and their younger brothers and sisters. The total increase in the amount payable by Canada for pensions and allowances will be approximately 40 per cent. At the present time the annual expenditure involved is about five million dollars a year. With the increases now authorized Canada's outlay for pensions will be over seven million dollars during the fiscal year.

"A second change provides that disabilities shall be divided into twenty classes instead of six classes. In the future disabled men will be certain to receive a pension based directly on the percentage of the disability which they suffer.

"A third is the authorization of an annual allowance for a married, disabled pensioner. Up to the present time the unmarried man received the same pension for disability as the married man."

The Canadian Export Paper Company, which has been in charge of the export of Laurentide, Abitibi and other mills and has dealt only in newsprint and pulp, has taken the agency of a number of other paper mills in Canada, such as the Provincial Paper Mills and the Howard Smith Paper Mills, makers of book and writing papers, of medium and fine grades, and will push these in connection with the sale of the other two lines.

OUR VICTORY LOAN: $150,000,000 Loan Should Be Twice Subscribed

"THE reason that a very large sum of money is needed in Canada is that we must do our share in carrying on the war and financing our own commerce, and that there is no other country under the sun but Canada to which we may at present look for our requirements." This statement was made by Mr. A. E. Ames, chairman of the Dominion executive of the Victory War Loan campaign, in an address to the Toronto Insurance Institute. "Great Britain had borrowed tremendous sums from her own people for war financing. She has had not only her own enormous expense for maintenance of the army and navy, but has had to make enormous loans to her allies. In addition to what she has borrowed from her own people, the exigencies of war have been such that she has had to borrow on a huge scale in the United States—that country having agreed to loan to Great Britain and its overseas allies a total of $3,000,000,000 under stipulation that the money must be spent in the United States. To make this loan and to provide for her own heavy expenditures on her army and navy, (including, of course, munitions and supplies), the United States is testing her own financial resources to the straining point; though, fortunately for civilization, the United States had become so rich during the last few years that her pockets are well filled. But although Canada has borrowed from the Americans, as before indicated, that borrowing market is shut to us entirely for an indefinite period.

SIR THOMAS WHITE

Canada's Finance Minister, who will appeal next month for a War Loan of at least $150,000,000

"Canada, therefore, cannot, if she would still wish to, hold longer to the financial coat tails of any other nation, and must instead do her own financing. If we were not in a position to do this the future would look very black for us. In the midst of the gloom which the war has cast about us there is, however, one most satisfactory condition, namely, that Canada is richer, not only in her standing because of the vital help which her soldiers have rendered in the fighting, but is richer in material possessions.

"Her experience in this regard has falsified all prophecies made before the war. At that period it would have been incredible and was undreamed of that, after three years of war, deposits in the banks would be $450,000,000 more than before the war commenced, and that during that time Canadians would have absorbed, in addition, $300,000,000 of Dominion government securities, and that, despite the fact of the government having borrowed such enormous sums of money, the wealth of the country has become so much greater that Canadians, as a whole, have a bigger surplus over their debts than ever before.

"It is seen, therefore, that we need to get the money in Canada because we have nowhere else to get it, and that it is needed for our expenditures in connection with the war and for giving credits to Great Britain for the buying of our grain and dairy products and other foodstuffs. The question of exchange is more or less complicated, and it may be sufficient if it is mentioned only that there is no question but that Great Britain cannot continue to buy from Canada, practically except as we arrange that she buy from us on credit; that is to say, Canada as a whole will have to furnish [illegible] Great Britain [illegible] from our farmers and our manufacturers.

"Business in Canada prior to the opening of the war was very dull, and we should have had a very serious business depression following upon the stunning influence of war if there had not been placed in Canada a volume of war orders running into many millions.

"It is stated that the volume of war orders placed in Canada by Great Britain and the allies, of which, of course, the bulk has been by Great Britain, was over one billion dollars up to the end of last year, and will exceed one billion five hundred million dollars by the end of this year. It will be readily understood that the scale of expenditure by Great Britain and the allies is greater than ever, and, so far as Canada's commercial interest in that phase is concerned, we have only ourselves to look to to ensure that the great business activity that has prevailed during the last two years throughout Canada shall not be brought to a sudden halt, thereby dislocating all industries and creating at once a condition of stagnation and distress.

MR A. E. AMES

Chairman, Dominion Executive Committee of the Victory Loan Campaign

"The necessity of procuring a very large sum of money for the Dominion government should, therefore, be apparent to every class of the community—the farmer, to whom outside world prices for his crop would be of no interest if money were not available to finance the purchase of it; he would be in the same position in that regard as the Russian farmer with plenty of wheat but with no means of access to the world's markets, and to the Argentina farmer whose price for grain is so very much lower than that on the Northern Atlantic, because of the scarcity of ships and the prohibitive freight charge for any produce with a long carry. The necessity for raising a great loan should be clear, also, to the manufacturer and every other class in Canada, because of the reasons previously stated or inferred. Heretofore producers have not had to consider world finance in marketing. The thing has been done for them. Whether it was done in normal times by magic or otherwise did not occur to them. In this period of crisis, the problem of how our produce and manufactures can be financed should become our personal concern.

"The finance minister has had from time to time to borrow, temporarily, from the Canadian banks many millions of dollars. These advances he has, so far, been able to repay from time to time through proceeds of loans and through revenues. The finance department now owes a very large sum to the banks, and it is necessary that the Loan provide, not simply sufficient to pay for costs of the war and for credits for Great Britain for purchasing our produce and munitions, but, also, to pay off the Canadian banks. The finance department must keep itself sound with the Canadian banks, so that it can rightly ask and require from them temporary advances in very large amounts, to be again recouped them out of revenues and loans. While, therefore, it is essential that the objective of $150,000,000, which will, perhaps, be indicated in the official prospectus, should be raised, it is also most important that, while the Dominion-wide organization which is looking after the Loan is in being, the utmost effort should be made to supply the government with a full $300,000,000."

DEPRECIATION IN SECURITIES

Since the commencement of war between the United States and Germany, there has been a heavy depreciation in the quoted values of securities generally, including those of the highest grade which have heretofore found a ready market in competition with government issues. In many cases prices have shrunk to figures which are manifestly far below the prices which would prevail under any normal conditions. This shrinkage or marking down of values is partly due to the efforts of investors to sell other high-class securities for reinvestment in government bonds.

In view of all conditions, the United States Comptroller of the Currency has instructed national bank examiners that they need not at this time require national banks holding high-grade bonds of unquestioned intrinsic value and merit to charge such investments down to present abnormal figures; but an intelligent and conservative discretion will be exercised as to the prices at which national banks can safely and reasonably be permitted to carry such high-class securities, and as to what proportion of the depreciation should be charged off in any six months period. After the outbreak of the European war in 1914, the Comptroller of the Currency instructed national bank examiners that national banks need not be required to charge down the values of their high-grade bonds to meet the abnormal and sacrifice quotations which for a while were being made on the outside markets (the stock exchanges being closed) on securities which at that time were being thrown overboard regardless of real worth.

That office also endeavored to prevent the sacrifice by national banks, while the exchanges were closed and there was no general market for securities, of bonds and shares held as collateral for customers' loans.

The policy pursued proved fortunate at that time. After the first pressure was over and money conditions relaxed, the security market was re-established; the grave losses which were threatened by the temporary shrinkage in values were averted, and borrowers from banks were enabled to meet their obligations without the sacrifice of their collateral.

ECONOMY, CREDITS, PROSPERITY

The minister of finance announced last week that the financing of the exportable surplus of the Canadian wheat crop of this year has been satisfactorily arranged. This announcement follows the conference recently held at Ottawa between Lord Reading, representing the Imperial government, the Dominion government and the executive officers of the Canadian Bankers' Association. Since this conference the matter has been under further negotiation with Lord Reading through the minister of finance, resulting in the official statement noted above.

The amount involved is over $350,000,000 and the satisfactory arrangement which has been made for its financing is of great importance to the western farmer who is thus assured of the price fixed for his grain. The transaction will also be of advantage to the whole of Canada because of its relation to general business conditions throughout the entire Dominion.

The Monetary Times understands that credits of $100,000,000 have been arranged by the Dominion government for wheat purchases by Great Britain to the end of the current year. Further advances will be made later.

Such transactions depend entirely upon our ability to finance them. Great Britain has purchased $925,000,000 of munitions in this country since the war started. At the end of the year, the total will be $1,000,000,000. In addition, she is buying ships, flour, oats, cheese, wheat, sugar, hay, cotton and woollen goods, leather and rubber goods, iron and steel manufactures, and so on, for war purposes. She is spending more than $2,000,000 with us daily. We must help to finance these purchases, otherwise they will cease. If this vast buying movement ceases, our prosperity will be immediately halted. In war time, our industrial and agricultural activities depend on war orders. Canada's Victory Loan, to be issued next month, must be heavily oversubscribed in order to help finance our share of the war and to establish credits here for Great Britain.

BONDS AS BUSINESS INSURANCE

Among large and long-established business firms there come times when credit is necessary but difficult to obtain. Even with the best sort of management, the small organization has greater difficulty in meeting these periods of business depression than the larger ones, though to both the task of borrowing money or getting credit during a slack time presents a cause of worry if it does not quite result in a failure.

Real estate can be mortgaged, chattel mortgages can be placed on store or factory furnishings and machinery. Money can be borrowed on stock on hand. Though helpful, all of these methods take time and are costly because all of them involve legal services of some sort and by none of them can the merchant ever get over 75 per cent. of the full value of the collateral he puts up. Often he gets less than 75 per cent.

There is one sort of collateral on which a man can always borrow from his bank, and that is sound bonds. Government, municipal, railroad, public utility, and industrial bonds, if they are high-grade issues, are always taken by banks for from 80 to 90 per cent. of their value.

Of all classes of bonds, Canadian government issues have the highest rating. Backed by a nation which has never repudiated a debt since its organization in 1867, a nation with excellent prospects and vast undeveloped resources, these bonds are the best investment ever offered.

The merchant who buys Canadian Victory Loan bonds is taking out business insurance. He is insuring against future periods of depression. Slack times do not cause the alarm in a business concern which has a safety-deposit box well filled with sound bonds that it causes to the man who boasts that he puts all his funds back into his business. A man may make 8, 10, or more per cent. on the money he invests in his business and then lose it all because he did not have the foresight to take less income on a part of his capital in order to insure his business against future needs.

The war bonds being issued by the Canadian government meet the needs of the man investing for business insurance, just as they do those of anyone seeking a very high-grade security.

The merchant buying these bonds can do it without financially grippling himself in the least. Payment of these bonds can be made in instalments over several months. By taking a certain percentage of his profits each week to invest thus in Canada's Victory Loan bonds the effect upon his business is beneficial rather than detrimental.

Aside from the patriotic motives that will actuate those who buy these bonds are all these reasons that make these bonds the best investment offered to the Canadian people. The subscription lists of our Victory Loan will be opened next month.

GERMAN DIPLOMACY

According to the exposures by the American State Department, of conspiracies between the German foreign office and German Ambassador Bernstorff, in the United States, it was proposed to destroy the Canadian Pacific Railway at several points "with a view to complete and protracted interruption of its traffic." That was merely one of the plots conceived by the cut-throats and brigands who hold sway at Berlin. It is now clear that the German diplomatic service throughout the world has been working as an organized band of conspirators whose cunning, hypocrisy and deeds dwarf those of the most famous criminals.

For many years before the war, every courtesy had been extended to German representatives in Canada. Several influential Germans resided here and undoubtedly had access to information which has since proved valuable in their plots against property and people in this country. About two years before the war, a German count spent over three months in Canada, ostensibly to obtain information for inclusion in a special Canadian issue of a German periodical. His three months' labors here were represented by a small, illustrated journal, for the preparation of which three weeks would have been ample. He was granted favors throughout the country, the railways especially granting him every facility to write his "stories." Now we learn that the Canadian Pacific was to have been destroyed at important points! There may not be any connection between the visit of this energetic Count and the Bernstorff-Foreign Office conspiracy but the circumstantial evidence is strong.

It is this underworld of diplomacy, sired by Prussian militarism, that we are out to destroy and as the German Foreign Office said of the Canadian Pacific Railway, "with a view to complete and protracted interruption of its traffic."

MINING CORPORATION OF CANADA

A net profit of $1,850,831.55 is reported by the Mining Corporation of Canada, Limited in its annual report. Of this total $570,625 was paid in dividends and $1,280,206.55 was carried to surplus. A comparative statement of liquid assets shows a decided improvement in that respect. The following figures represent those totalled respectively on December 31, 1916, and on September 9, 1917: Cash in banks, $840,367.70, $1,338,117.78; ore in transit, on hand, moneys due by smelters, accounts receivable, $894,512.10, $1,214,853.27; British, Canadian and French war loans, $943,043.41, $1,037,623.26; call and demand loans on bonds and stocks, $60,037.80, $103,045.52; profit and loss account, $2,447,582.65, $3,519,768.15. In addition to the surplus shown by the profit and loss account as at September 9, 1917, two dividends and bonuses, totalling $[illegible], have been paid since the new year. The following are directors for the ensing year: Sir Henry Pellatt, J. P. Watson, W. R. P. Parker, G. M. Clark, D'Arcy Weatherbe, Lieut. Graeme Watson, Capt. R. E. G. Van Cutsem.

PULP AND PAPER COMPANY'S DIVIDEND

The management of the Riordon Pulp and Paper Company has declared a dividend of 10 per cent. by its subsidiary, the Ticonderoga Pulp and Paper Company, of Ticonderoga, N.Y. It is payable December 1 to shareholders of record on November 30. This dividend is the second at the same rate declared by Ticonderoga this year. The previous 10 per cent. was paid on June 15. This subsidiary company was obtained by the Riordon company in November, 1916.

ADDRESS:
THE MANAGER, BOND DEPARTMENT,
TORONTO 62

PERSONAL NOTES

Sir Edmund Osler is chairman of the Toronto Honorary War Loan Committee.

Mr. J. F. Weston, managing director of the Imperial Life Assurance Company, Toronto, will address the Ottawa Life Underwriters' Association next week regarding the coming war loan.

Mr. W. Welch, who for seven years has been agency manager of the Northern Life Assurance at Saskatoon, died suddenly last week. Mr. Welch was highly respected in the insurance field.

Mr. Henry P. Borden.

Mr. H. P. Borden is the most recently appointed member of the Board of Engineers for the Quebec Bridge. He was assistant engineer of the Commission from the time of its inception in 1908, and rendered such valuable assistance that Colonel Monsarrat and Mr. Modjeski advocated his appointment by the government in February, 1916, to fill the vacancy caused by the death of Mr. Schneider. While assistant engineer, Mr. Borden wrote a considerable number of articles on the Quebec bridge for The Canadian Engineer and other technical papers. He is a graduate of McGill University, having obtained his degree in 1902. After [illegible] years spent with the Canadian Pacific Railway as architectural engineer, he was for three years assistant chief engineer of the structural department of the Montreal Locomotive Works. He then rejoined the Canadian Pacific Railway as assistant engineer of the bridge department, resigning that position to join the Commission under Mr. Vautelet.

Mr. E. F. Hebden, managing director of the Merchants' Bank of Canada, Mr. D. A. Macarow, general manager of the same institution, and Mr. F. W. Blackwell, vice-president, are touring the Western provinces. Other members of the party are: A. B. Evans, of the National Drug Company; Geo. L. Cains, of Greenshields, Limited; F. Howard Wilson, paper manufacturer; Andrew A. Allan, of the Allan Steamship Line, all directors of the Bank; and E. A. Fox, private secretary to the general manager.

Hon. J. D. Hazen, former Canadian Commissioner of Naval Service and Marine and Fisheries, has been chosen as commissioner to represent the Canadian government at Washington. At present the British ambassador handles all Canada's diplomatic business for the United States. Formerly, communications between Washington and Ottawa had to go by way of London. Recently, the channel of communication has been made more direct, but is still through the British embassy. Affairs between Canada and the United States have so increased in numbers and importance since war began and especially since the United States entered, that it is now proposed to carry out the long discussed plan of naming a Canadian commissioner for Washington. Mr. Hazen will be associated with the British ambassador but will have considerable opportunity for independent initiative, it is explained. He was premier of New Brunswick, is a lawyer by training, was with Prime Minister Borden at the last Imperial Conference in London, and has had much business with Washington over fishery sealing and marine matters.

Mr. T. H. Purdom, K.C., president of the Northern Life Assurance Company, London, Ont., is making a [illegible] trip in Western Canada, calling on the company's branches. He will go as far as Prince Rupert, B.C.

Mr. F. C. T. O'Hara, deputy minister of trade and commerce, left Ottawa for Washington on Tuesday. He will confer with the United States Priority Committee in regard to steel and other exports from the United States to Canada.

Mr. J. H. Hughes, for many years with the Northern Life, formerly at Brandon, and latterly at Winnipeg, has been appointed the company's agency manager at Regina. Mr. Hughes reports encouraging conditions in the capital city of Saskatchewan.

Sir John Aird, general manager of the Canadian Bank of Commerce, was in Winnipeg this week conferring with Mr. Vere C. Brown, superintendent of Western branches. He will attend a conference of the executive committee of the Canadian Bankers' Association, who will meet Sir Thomas White to-day.

Mr. Ambrose Monell has resigned as president and director of the International Nickel Company to assist the government in a military capacity. Mr. W. A. Bostwick has been elected president of the company to succeed Mr. Monell, and Mr. R. C. Stanley, the general superintendent to the company's Orford works, has been elected a director of the company.

QUEBEC RAILWAY LIGHT, HEAT AND POWER

A very satisfactory financial statement of the Quebec Railway Light, Heat and Power Company was submitted to the shareholders at the recent annual meeting. The company's fiscal year ended on June 30th last, and for that period gross earnings from operation for the year were $1,832,031 as compared with $1,731,732 in 1916, an increase of $100,299. After adding miscellaneous income of $230,850, there is a total revenue from all sources of $2,062,882, being an increase of $94,281. The operating and maintenance expenses were $1,155,969, as compared with $1,029,750 in 1916, an increase of $126,218. The fixed charges and taxes amount to $706,326, leaving a net surplus of $200,587. After making provision for obsolete cars on Montmorency and city street railway divisions, discount account, etc., there remains a total at credit of surplus account to June 30th of $684,572.

Sir Rodolphe Forget, M.P., in addressing the shareholders, stated that the properties and plant of the company and its various subsidiary companies have been maintained in the same high state of efficiency as heretofore, as evidence of which there was expended $226,366 during the year on maintenance accounts. During the year there was expended $302,663 on capital account.

The company's assets totalled $23,671,346, made up as follows: Investments, stocks, bonds and interests in other corporations, $19,193,017; treasury bonds, $1,611,600; advanced to controlled companies for construction, etc., $1,581,655; general construction, etc., $528,820; cash on hand and in banks, $127,072; accounts and bills receivable, $437,250; stores and supplies on hand, $[illegible]; and prepaid expenses, etc., $21,054.

Its chief liabilities are capital stock and bonds. These accounts stood as follows on June 30th last:—

Capital stock		$[illegible]	
Less Unissued		500	
			$ 9,999,500
Bonds		14,600,000	
Less bonds in escrow to redeem bonds of controlled companies	$[illegible]		
Less cancelled	144,000		
		3,803,000	
			10,707,000

Sir Rodolphe Forget, M.P., who is the well-known president of the company, has the active assistance of Mr. Lorne C. Webster as vice-president. The other directors are: Messrs. Chas. A. Lavigne, L. J. Tarte, Arthur Pichard, Paul Galibert, L. G. Morin and Chas. Donohue. Mr. W. J. Lynch is general manager of the company, and to his practical knowledge the company's good results are largely due. Mr. Arthur [illegible] is the company's secretary.

Established in 1836. Incorporated by Royal Charter in 1840.

How Canada's Victory Loan Will Be Sold

Outline of the Widespread National Campaign which Must Sell at Least $150,000,000 of War Bonds to the People of the Dominion—Big Subscriptions of Previous Loans Must be Repeated, and Thousands of New Investors Obtained.

THE character of the national organization for Canada's Victory Loan was outlined by Mr. A. E. Ames at a meeting of the Insurance Institute of Toronto on Tuesday. Mr. Ames, who is chairman of the Dominion executive committee in connection with the loan, recalled that in the three former war loans made in Canada the competitive method was in use. "There was a scramble on the part of all bond sellers," he said, "to procure subscriptions through their individual firms. Of course, the feature of competition in business is valuable and should apply in all businesses, except such natural monopolies as public utilities; but I suppose that practically all of us would admit, that we might dislike to be considered socialists, that if there were any feasible way, consistently with our poor human nature, to provide for an equal distribution and maintenance of wealth and business generally, that would be the basis which might result in the greatest amount of comfort and happiness for the people as a whole. As yet, at all events, we are not so highly civilized as to be able to employ such methods in the conduct of all of our affairs, but it has appeared quite clearly that this co-operative principle is one for which the magnitude of the task before us and the circumstances associated with it alike are peculiarly fitted. In this connection it is, perhaps, safe to say that everyone actively associated with the organization has come to feel, even if all did not at first, that the principle of co-operation in this regard entirely outweighs and overrides that of competition.

Will Prevent Duplication.

"This will involve relief, especially to officers of insurance companies, and to all others who are in the class of obvious investors. While, therefore, during this campaign there must be a considerable distribution of unproductive literature, yet this will be spread over a very wide surface, and well-known investors will not be subjected to the receipt of, say, 26 different prospectuses and canvassing by 26 different people.

"The minister of finance, after most careful survey of the whole situation, reached the conclusion that general organization work and co-operation throughout the provinces should be in the hands of a Dominion executive committee, composed of working people used to the distribution of securities, and having, in their experience, a good start toward solution of such problems as would have to be dealt with prior to and during the progress of the campaign. The Dominion executive is, therefore, composed of a group which, for convenience of operation, are men resident in the cities of Toronto and Montreal, with the exception of Sir Augustus Nanton, resident in Winnipeg, and who is a most valuable member of the committee. The Dominion executive meets daily, and is in constant touch in a consultory, advisory and helpful capacity with all other committees.

Many Important Committees.

"To co-operate with this Dominion executive and to do everything in their power to help towards the success of the campaign, there have been appointed co-operative committees for the Dominion and for the provinces by the Bankers' Association, the Life Assurance Companies' Association, and the Mortgage Loan Association, in the membership of which latter are included trust, life and loan companies. The Fire Underwriters, as you know, have no Dominion-wide organization, but the Ontario and Quebec associations appointed, some little time ago, committees to co-operate in those provinces, and other fire underwriters' committees have been or are being formed in other provinces to give their support.

"Other committees of Dominion-wide scope are as follows:

"The Dominion special subscription committee, under the chairmanship of Mr. E. R. Wood, with whom are associated a number of partners and expert salesmen in bond and stock [illegible] houses, and a few others specially qualified for the task. This task relates to the larger buyers of bonds, in so far as they are known, and the hope is that members of this committee may be able to procure from the list of investors of $25,000 and over the fullest possible purchase of bonds. Upon these subscriptions, which, roughly, and without sufficient data for making an estimate, the guess is that they may amount to one-half the total subscription, there will be no commission paid by the finance department. The work of this committee is, therefore, of great importance, and is being undertaken with such discretion, energy and knowledge that its success is confidently predicted.

"The Dominion finance committee, under the chairmanship of Mr. J. H. Gundy, who is also vice-chairman of the Dominion Executive, has charge of the apportioning and disbursing of funds amongst the various provinces necessary for organization and incidental expenses.

Publicity and Business Committees.

"The Dominion publicity committee, of which Mr. R. A. Stephenson, of Montreal, is chairman, has charge of the preparation and distribution of advertising matter and prospectuses throughout the Dominion. The advertising matter will consist of newspaper advertising, posters, and a number of other devices which it would be a pity to mention to you now, because of taking away from you the freshness of them as they first come out. It may, perhaps, whet your appetite to know—particularly the appetites of those of you fortunate enough to have young children as an excuse for attending the shows, that there will be a scenario relating to the loan for the moving picture houses.

"The Dominion business committee, under the chairmanship of Mr. W. S. Hodgens, has charge of the preparation of forms and records and other matters which are being relegated to them from time to time, this committee constituting a valuable factor in the organization.

"The Canadian Press Association have offered their services to the finance minister and are prepared to do invaluable service through their reading columns during the campaign. It is hoped that any sacrifice there may be in connection with this service will be minimized by the growing news value of the incidents relating to the loan, through the inspiration arising from the knowledge that thousands of people in the cities, towns and villages will be working actively, intensely and continuously for the success of the loan. Mr. J. H. Woods, of Calgary, president of the Press Association, is personally, with Mr. Imrie, the manager, in charge of this work, Mr. Woods having moved to Toronto for the purpose, to stay until the close of the campaign.

Provincial Organization Committees.

"In an organization, which to be effective, must be complete, the question of comparison of importance of various factors does not arise. Too great importance, however, cannot be attached to the work of the provincial organization committees. In every province there is a separate provincial organization, through which the whole province is being organized down to the last detail. The chairmen for these provincial organization committees have been selected with great care and are considered most suitable for the tasks they have, in co-operation with the other members of their committees. These chairmen are: Mr. William Farrell, Vancouver, for British Columbia; in Alberta, Hon. C. R. Mitchell, provincial treasurer, is honorary chairman, and Mr. William Toole, Calgary, chairman for Southern Alberta, and Mr. James Ramsey, Edmonton, chairman for Northern Alberta; Sir Augustus Nanton, Winnipeg, for Manitoba; Mr. G. H. Wood, Toronto, chairman for Ontario; Mr. J. M. Mackie, Montreal (who is also vice-chairman of the Dominion Executive), for Quebec, with Mr. J. W. McConnell, chairman for the Island of Montreal, and Messrs. A. P. Frigon and E. A. Macnutt for the rest of the province; Mr. C. H. B. Longworth, Charlottetown, for Prince Edward Island; Hon. Senator W. H. Thorne, St. John, for New Brunswick, and Mr. Geo. S. Campbell, Halifax, for Nova Scotia.

"In connection with a number of provinces and cities there will be influential honorary committees, who will be of con-

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER
25 West Broadway New York, N.Y.

siderable use by the influence of their names and help where called upon in different directions.

"All of these provincial committees have their own subcommittees, such as special subscriptions, publicity and business committees, whose activities are connected with work throughout the province, and in greater or less degree in co-operation with the Dominion committees of the same character. Each province is divided into a number of districts, and at the head of each of these districts is the strongest man qualified for the position that could be obtained. There will be a special committee in charge of each of the cities and of each of the counties, the idea being to canvass as completely as possible people living in every part of Canada, including those on the farms and those in the factories.

"Objectives are being arranged through consultation with the provincial committees for every province in the Dominion. It is hoped to arrive quickly at objectives which will satisfy every province not only as to its own amount, but, also, as to the objectives for all the other provinces, having regard, so far as possible, not only to what has been procured for previous loans, but also to current conditions in the provinces as varied from what they were relatively in previous years.

Relation of Committees.

"The relation between the Dominion executive and other Dominion committees and the provincial organization committees is one which naturally requires a large stock of patience and consideration. The situation is necessarily somewhat delicate. The attitude of the Dominion executive committee which they have tried to make apparent to the officers of the provincial committees is that of a clearing house of information and method. Obviously, it has been necessary for the finance minister to institute a general basis of campaign throughout the Dominion, but, equally obviously, there is considerable room for elasticity. The last thing, therefore, which any Dominion committee would wish to do is to interfere with any of the prerogatives and the initiative of the provincial committees. We feel, however, that our relation to the campaign is service to the whole situation, through conference with the finance minister as to various features regarding the loan and the campaign, upon the one hand, and through being of any assistance we can to the provincial committees. It will be readily understood that, this being the first time that anything of the magnitude of this organization has been got together in Canada in short order, there is a multiplicity of questions requiring solution, even though broad principles of policy have already been established and recognized.

Co-operation to Achieve Object.

"All the committees, however, are in the throes of organization and getting themselves fit for an intense campaign. Everybody is, so to speak, 'on his toes' with concentrated energy looking to do his best. It is a situation, therefore, where no one having a naturally short disposition can afford to humour it until the close of the books, and where everyone must bring into play all the active and latent sweetness of disposition of which he is possessed. We count upon this, are sure that it will not detract from forcefulness, and are getting evidence of it such as, possibly, might not have been expected from such a large body of keen, active men of independent habits of thought. The whole campaign is based upon the sinking of individuality and complete co-operation to achieve the one vital object.

"Sir Thomas White, minister of finance, has thrown himself into the campaign with great energy and helpfulness. His experience, his initiative, his speeches and availability for conference will be great factors in the loan's success.

"There will grow up with the loan a great deal of healthy rivalry. Provinces which have been given an objective which their committees feel may not fully gauge their relative importance to other provinces will no doubt furnish some surprises in their total purchases of bonds. There will be rivalries amongst cities and towns in the same class within each province, and with cities and towns of the same class in other provinces. For instance, Toronto and Montreal have already developed a friendly feud, and I hope there will be plenty of fuel to keep the feud alive until the books close. Hamilton and Ottawa should keep their eyes upon each other; Calgary and Edmonton are furnished with a fair battle-ground to fight out the question of supremacy; Saskatoon will want Regina to take notice of its success; Victoria will no doubt wish to test whether it may not furnish a greater response per head than Vancouver, while Halifax and St. John, and Sherbrooke and Three Rivers will have an admirable chance to pay off old scores.

Two Hundred Thousand Subscribers.

"It is felt that the character of bonds and the dependence of Canada for its prosperity upon the investments of her own people will cause a cumulative and, finally, a tremendous demand for the issue, and whereas, as mentioned at the first part of these remarks, there were just over 40,000 purchasers of the last Canadian domestic loan for $150,000,000, it is hoped there will be over 200,000 buyers of bonds on this occasion. It will take a larger number of subscribers than that to bring Canada into line with the proportion of subscribers to their government loans in the United States and in Great Britain. This fact will be pressed home to the people of Canada during the campaign, and we do not think that Canadians who are quite able to approximate the record of these two countries will care to be found to be less enlightened.

"When this new loan was first mooted the idea was received somewhat coldly by practically everyone. It was felt that the previous loans had pretty well taken up the investing powers of the big institutions and individuals, who would not be able to subscribe as liberally again. The next stage was that it was felt that the big subscriptions must be replaced by finding a great many new buyers. Still later, however, as the task was confronted, the vital importance of it realized and the great amount of money really available in Canada recognized, it was felt that, not only should a very great number of new, smaller subscriptions be secured, but that the number of middle-sized subscriptions should be enlarged and, also, that the volume of big subscriptions should be repeated. It is greatly to be desired that the pressure from the organization which has been brought into being will combine with a growing realization of the necessities and privileges of the situation to secure a success of which Canada will be proud and which will encourage Great Britain and our allies and somewhat discourage the common enemy.

Higher Percentage in Bonds.

"A feature that will be brought home to Canadians during the campaign is that, whereas during the last few years it has been the feeling amongst investors that their investments should be varied and only a certain proportion be held in government bonds, the percentage which Dominion government bonds hold to their total investments will need to be considerably increased, just because circumstances are such as to require it.

"This is everybody's campaign. Offers to aid have come from every direction. One of the provincial chairmen has written that he has yet to learn of anyone who will shirk any help that is asked of him. The Boy Scouts have proffered their services, which will no doubt be used, and while there has to be a general plan for such a campaign, and there are some directions of individual or institutional effort which would be impracticable through conflicting with the necessities of the organization, yet there are a thousand ways in which the general scheme may be assisted, and it will be the endeavor of those who have anything to do with the direction of the campaign to employ to the utmost all useful effort."

Dominion Marble Quarries For Sale

Extensive quarries, etc., of above company, fully equipped and ready to operate, consisting of some 185 acres, located at South Stukely, on the main line of the Canadian Pacific Railway to Sherbrooke, Province of Quebec, Canada, will be sold at auction to the highest bidder on the 28th day of November, 1917, at the office of Fraser Bros., Auctioneers, 453 St. James Street, Montreal. Full particulars of this well-known property, as well as conditions of sale, may be obtained by application to

UNIFORM PROVINCIAL INSURANCE LAWS

Provincial Insurance Superintendents May Meet at Winnipeg to Discuss This Matter

Uniformity of provincial insurance legislation is the topic of a suggested conference of the provincial insurance superintendents. The proposal is contained in a letter of Mr. A. E. Ham and Mr. A. E. Fisher, insurance superintendents respectively of Manitoba and Saskatchewan. It is addressed to the insurance officials of the other seven provinces and suggests that the meeting shall be held in Winnipeg. The letter, in part, reads as follows:—

"That there should be uniformity in our various provincial insurance laws regarding contracts of insurance is the opinion of all who are interested in the business of insurance. The advantage of such uniformity, not only to the companies, but to the insurance public as well, is very patent.

"Undoubtedly, each superintendent has been approached by the insurance interests with reference to this matter, and we all appreciate, not only the advantage of uniformity, but the necessity of such a condition as well. The main reason why there is not uniformity in our laws of insurance contracts is primarily due to the fact that the insurance department of one province is not aware of the nature of legislation which is contemplated by some other department.

Action by Western Men.

"The western superintendents have, on several occasions, met and discussed various matters pertaining to uniformity of the insurance laws of the west, and to some measure, have been successful in obtaining uniform statutory fire and hail conditions in Manitoba, Saskatchewan and Alberta, and many other minor sections of their acts have been made uniform.

"We have, for example, the American Insurance Commissioners who meet once a year for the purpose of discussing insurance conditions that arise in the United States. You are well aware of the fact that at these meetings, or conventions as they are called, conference bills are prepared and drafted which, in turn, are presented to the legislatures of the various states, with the result that uniformity of contract laws and other insurance regulations have been secured.

Health and Accident Contracts.

"At the present time the casualty managers are asking for the standardization of health and accident contracts. The superintendent of insurance at Ottawa in the new insurance act for 1917, has inserted certain indefinite conditions that must form part of every contract, but it nevertheless remains for the provinces themselves to standardize.

"The western superintendents have been dealing with this matter, and have gathered considerable data, which would be presented at a meeting to be held at a later date.

"Appreciating the advisability of uniformity throughout the provinces, we would be pleased if you would bring this memorandum to the attention of the minister in charge of your department with a view of obtaining his permission for your attendance at that meeting. We would suggest that the first meeting be held in Winnipeg as, owing to its geographical position, it is the most convenient place for the superintendents to meet."

BUY AND SELL IN TRADING-ROOM

The Fort William and Port Arthur grain exchange are now doing all their purchasing and selling in the trading-room, instead of privately as heretofore. Half-hour quotations are posted and all facilities have been provided for the use of the members. The first car of grain consigned to the local sample market was sold by the Bole Grain Company at a premium of 2¼ cents over the grade price.

Three Winnipeg grain men were admitted as members of the exchange on October 16th. The membership totals 172, and seats are selling at $400. The membership has been limited to two hundred. The exchange will invest $5,000 in the next Canadian war loan and $[illegible] in the Saskatchewan Greater Production loan.

FINANCING THE WAR

Canada Must Play Her Part by Economy and Conservation of Natural Resources

Weighty as are the blows which have been dealt the [illegible] in the national effort to strengthen the battle line. In the production of supplies for this purpose, nature has been more than usually helpful, and has favoured us with good weather for harvesting and thrashing. It is, therefore, possible to increase the assistance we have been giving to the United Kingdom and to our allies in carrying the growing burden of the war, as the exportable surplus of this year's crops is very much greater, and our facilities for producing essential war material have become more efficient than they were a year ago. In the fiscal year ending 31st March last, we supplied the United Kingdom with merchandise amounting in value to $742,000,000, by far the larger part of our total exports of $1,151,000,000, and for the five months ended August her purchases from us were on a still larger scale. Last year, according to the government estimates, the value of our field products was $820,000,000, while present indications are that this year the value will be $1,100,000,000, which will account for the increase in our exportable surplus. For the same five months, the exports of manufactured goods had a value of $289,716,536 as compared with $153,022,063 in the corresponding period a year ago. These, too, were to a large extent exported to the United Kingdom.

Relieve Financial Strain.

After three years of stress and strain, the United Kingdom has regulated her imports in such a drastic manner that only the most essential are now admitted. We should consider it a privilege to be in a position to supply so great a volume of these essential imports and should exercise it to the fullest extent in such a manner as to relieve, as far as possible, the strain upon the financial resources of the Imperial authorities. This can be done by extending further credit, the measure of which is not determined by the banks, or by the government, but by the sacrifices of luxuries and non-essentials which Canadians as a whole are prepared to make, and by their readiness to place at the disposal of the government the savings thereby effected. It does not indicate either a high or sincere resolve to render the utmost aid in winning the war if we live as in time of peace, demanding our customary enjoyments and conducting our affairs so as to oblige our allies to draw upon their stores of gold in order to pay for their purchases from us. Failure to put at the disposal of the government every possible dollar will add substantially to the difficulty of financing our part in the war and the sale of our crops.

Britain's Gold Resources not Inexhaustible.

The gold resources of the United Kingdom available to meet the enormous balances against her are not inexhaustible. Since the outbreak of the war they have been subjected to an extraordinary drain, as is indicated by the gold movement to the United States, which for the 12 months ended June last reached $977,176,026, of which $950,000,000 came from British sources. This large sum did not suffice to meet her adverse balances in the United States and to protect exchange, and as is so well known, it was necessary to arrange very large credits for this purpose.

Her adverse balances in Canada are proportionately large. Our total exports of merchandise in the last three fiscal years amounted to $2,419,953,679, and imports to $1,808,485,635, the difference being $611,468,044, which is about equal to the total of our obligations abroad during the same period for current interest and other indebtedness. Trade balances alone, therefore, would not necessitate abnormal gold shipments, and the moderate increase in the holdings of the metal in Canada may be attributed to borrowing in the United States. As that country is now engaged in the war, and is faced with no small problem in financing its preparations, borrowing there is becoming more difficult, as is made evident by the terms of the last Canadian loan. It remains for Canada to turn to her own resources, which have not yet been drawn upon to the extent of causing her people to make any financial sacrifice.—Candian Bank of Commerce monthly letter.

CANADA AND MARINE INSURANCE

London Comment on Our Marine Insurance Association —Impossible to Make a "Lloyd's" in Canada

The Yorkshire Post publishes a paragraph which has puzzled shipping circles in London. It is as follows:—

"After an agitation which has been carried on for many years a marine insurance organization on the lines of Lloyd's is to be established in Canada. This new body is to be known as the Canadian Board of Marine Underwriters, it will appoint agents all over the world, and deal with legislation affecting insurance interests, arrange codes, and issue policies. The board will, naturally, become a real power in the insurance world, and not only will there, it is hoped, be friendly co-operation with the parent body, but a real effort will be made to reduce the charges for St. Lawrence traffic, now that, by better lighting and buoying, and the appointment of more efficient pilots, navigation on that river has been made safer than it was."

Written Under a Misapprehension.

The statements made in London seemed so confused that a representative of The Canadian Gazette called upon a well-known member of Lloyd's to ask his opinion. He said that he had no idea of what movement there might be in Canada with regard to marine insurance, but that whatever it was, this paragraph was evidently written under a misapprehension. Lloyd's was a corporation, but as such it did no business. The business was done by the individual members of the corporation who were in competition for that business. In this respect Lloyd's was like the stock exchange or corn exchange. Members of Lloyd's were required, before being made members, to deposit money with the corporation according to the amount of business they intended to undertake.

"Lloyd's" in Canada Impossible.

Lloyd's was the result of long years of business in London, and the member could not see how it was possible to make a Lloyd's in Canada. The writer of the paragraph evidently seemed to think that it was itself an insurance corporation doing business itself. He himself did not think there was room for such a Canadian corporation even if it were feasible. The United States had companies which they called "Lloyd's," but they were merely marine insurance companies. Over 50 per cent. of the United States ships were insured at Lloyd's in London. As to the St. Lawrence rates, these were not arbitrarily fixed. Rates were worked out on the law of averages. The improvements made in the St. Lawrence route would necessarily lower the rates as time went on and the effect of the improvements became patent.

There was recently organized, as a branch of the Montreal board of trade, an association known as the Canadian Board of Marine Underwriters, whose special aim is to secure beneficial interchange of views upon, and consideration of matters pertaining to, the general conduct of marine insurance.

WAR BOND QUERY

Are Dominion war bonds subject to taxation by the Toronto assessment department? The question came up in the Court of Revision last week, when Mr. Robert L. Fraser appealed against the assessment on his income.

"I cannot see how we can possibly charge for Dominion war bonds," observed Commissioner Ardagh, reviewing an advertisement of the Dominion government to the effect that its war bonds would not be subject to taxation by the Dominion government.

"That does not apply to us," declared a representative of the assessment department, who contended that the Dominion government's guarantee did not cover provincial taxation.

Judgment was reserved. A higher court will probably decide the question.

The tax exemption clause in the war loan prospectuses reads as follows:

"The issue will be exempt from taxes—including any income tax—imposed in pursuance of legislation enacted by the parliament of Canada."

ESTIMATES OF OUR GRAIN CROPS

Quality, Yield and Condition of Grain, Root and Fodder Crops

The estimates of the yield per acre of wheat, oats, barley and flax are somewhat lower than those reported at the end of August, and the reduction applies to all the provinces, according to the returns of the census office, Ottawa, for the end of September. The later returns, being based to a larger extent upon thrashing results, appear to indicate that the first estimates, based upon the appearance of the crops in the field, were too high. The total yield of wheat for Canada is now provisionally estimated at 231,730,200 bushels, the average yield per acre being 15¾ bushels, as compared with 16¾ bushels reported a month ago, and with 17 bushels the yield of 1916. Of oats the total yield is 393,570,000 bushels, as compared with 410,211,000 bushels in 1916, the average yield per acre being 29½ bushels in 1917, as compared with 37.30 bushels in 1916.

Barley and Rye Yields.

Barley yields 51,684,000 bushels, as compared with 42,770,000 bushels in 1916, the average per acre being 21½ bushels, as compared with 23.72 bushels in 1916. The yield of rye is 4,239,800 bushels, which is slightly more than the quantity returned a month ago; the yield per acre is 20 bushels, as against 19 bushels in 1916. For the three prairie provinces the yields are as follows: Wheat, 209,794,200 bushels; oats, 237,925,000 bushels; rye, 2,534,000 bushels; barley, 36,727,000 bushels; flaxseed, 6,747,000 bushels. The total yields of the remaining grain crops, now reported for the first time this year, are as follows: Peas, 2,786,600 bushels from 151,030 acres, an average of 18½ bushels per acre; beans, 635,700 bushels from 43,000 acres, average 14¾ bushels per acre; buckwheat, 7,189,000 bushels from 336,400 acres, or 12¾ bushels per acre; mixed grains, 15,741,000 bushels from 469,140 acres, 33½ bushels per acre; and corn for husking 6,193,000 bushels from 173,600 acres, an average of 35¾ bushels per acre.

Figures High in Ontario.

Correspondents were asked to report on the quality of the grain crops at the time of harvest, as measured against a standard of 100, representing grain well headed, well filled, well saved and unaffected to any appreciable extent by frost, rust, smut, etc. The average results for the whole of Canada are as follows: Fall wheat, 76; spring wheat, 72; all wheat, 73; oats, 74; barley, 75; rye, 79; peas, 69; beans, 71; buckwheat, 63; mixed grains, 79; flax, 67; corn for husking, 67. The figures are generally high for Ontario, wheat being 80, oats 92 and barley 89. In Quebec wheat is 67 and oats are 74. In the prairie provinces wheat is 75 in Manitoba, 70 in Saskatchewan and 75 in Alberta. Oats are 62 in Manitoba, 57 in Saskatchewan and 56 in Alberta.

The condition of root and fodder crops, measured against a standard of 100 as representing a full crop, was, on September 30, as follows: Potatoes, 64; turnips, 72; mangolds, carrots, etc., 77; sugar beets, 76; corn for fodder, 72; and alfalfa, 81. The condition of the potato crop by provinces was on September 30 as follows: Prince Edward Island, 81; Nova Scotia, 77; New Brunswick, 57; Quebec, 47; Ontario, 81; Manitoba, 69; Saskatchewan, 71; Alberta, 89; and British Columbia, 70.

VESSEL "TENTO" LAUNCHED IN TORONTO

The Polson shipbuilding yards last week launched their eighth vessel turned out this year at Toronto. The "Tento" is an ocean-going cargo steamer, built purely for carrying ocean freight. Its principal dimensions are as follows: Length, 261 feet; breadth, 43 feet 6 inches; depth, 23 feet; deadweight capacity, 3,500 tons; mean draught, 19 feet 6 inches. The ship is of the single-deck type, built on the deep frame principle, with cellular double bottom all fore and aft, and peak tanks; four watertight bulkheads, two masts, six steam winches—one at each mast and derrick; steam and hand steering gear, electric light, evaporating outfit. The propelling machinery consists of triple expansion engines.

COLD STORAGE INVESTIGATION

Sir Joseph Flavelle Explains His Historic Remark, "To Hell With the Profits"

Sir Joseph Flavelle, at the resumed government inquiry at Toronto on the cold storage business in Canada this week, made the following statements:—

When he made his famous remark about profits going to "the hell where they belong," he meant only profits that were made by munition manufacturers who skimped expenditures on their plants, thus making delivery of orders slow. He is a poorer man than before the war—that is, in a sense of disbursement of money. He does not know how much richer he is—but the Davies Company stock is more valuable. He had not made a penny on munitions, directly or indirectly. He knew of no transaction in his 25 years with the Davies Company about which he would be embarrassed to answer questions. He accepted responsibility for the post-curing process. It was not a matter of morals. He had not personally secured any preferences for the Davies Company in the matter of war contracts. If Canadians used more of the rougher cuts of bacon the price would be lower. The Davies Company and the Harris Abattoir Company were in a rivalry that was not natural, and they would merge in the near future. He had offered his firm's services to Henry Denney, the War Office bacon buyer, the day after war was declared. His young men in the Davies Company had done a good stroke of business in beating American competition. Munition manufacturers were entitled to a fair profit, and Canada owed a debt of gratitude to them.

Referring especially to the shell manufacturers, he said:—

"When I returned from England last December I was asked to wait over in place of going to Ottawa because there was a meeting of manufacturers called for the following day. I should think there were several hundred manufacturers present at the meeting, men who were engaged in the enterprise of producing munitions. Sir Charles Gordon, as vice-president of the board, was chairman of the meeting. After listening to the discussion, I was asked if I would speak at the meeting. I had come from the front where I had seen the conditions and been very deeply impressed by them. I had been sitting in London more or less continually for six weeks with a group of men in the ministry of munitions, who were responsible for framing the programme for the production of ammunition, and the share which we would have in Canada in the production of the ammunition was the matter which brought me into conference with these gentlemen.

Statement Slightly Changed.

"When I addressed the meeting I told them what I had seen at the front; of the conditions which I had found in London; of the promises which I had made on behalf of the Canadian manufacturer of the munitions which he would produce, and that I had made the promise based upon positive cables from Ottawa that the manufacturers had agreed to do so. I pointed out to them that at the moment we were behind, greatly behind, in the delivery of the munitions which we had promised; that I was concerned to learn from the meeting that we had together that some were hesitating to expend the necessary money to carry out the contract which they had undertaken to carry out, and that in consequence there was a possibility of the delivery of munitions not fulfilling, and I said: If it is profits in relation to what I have seen and what I have told you, then your profits ought to go to the hell to which they belong.

Would Say the Same To-day.

"And, Sir, I would say just the same to-day if it became a question as to whether a manufacturer would carry out his obligation to complete his munitions in accordance with his contract, or whether he would hesitate to make the necessary expenditure because he hesitated about the profit that he had. I would say exactly the same thing to-day, and having said that, Sir, may I also say this, because I would not have in my official relationship to the manufacturers any wrong done them: This country owes an obligation to the manufacturers of Canada in the production of munitions that very few realize. They all have the right to make a profit on the production of munitions, for they had the courage to expend exceeding fifty millions of dollars in plant to produce them. If it had not been for the courage and resource and purpose of the manufacturers of Canada in making their expenditures for the purpose of producing munitions, if they had not done so, we would not have as worthily fulfilled the duty which we have so honestly and worthily fulfilled.

Profits Proper and Natural.

"In place of the chairman of the munitions board believing the manufacturers of Canada should not have a profit on the production of munitions, he has sincerely and earnestly believed from the first that it was a proper and natural thing, and if they did not make a profit they could not have the courage to put in the necessary plant, and the munitions could not be produced. I appreciate that you should have given me an opportunity of making this explanation, because it has been associated all over the Dominion with the profits of the William Davies Company, and the insincerity of the president of the William Davies Company, who in one official capacity could say nobody else should have profits, and in his own capacity he thought he should have a good deal of profit. There is no difference between the William Davies Company and the president of the William Davies Company. It is a common situation in either case.

Old-Fashioned Business.

"Twenty-five years ago I came into the William Davies Company. I found it an old-fashioned business in which integrity and good conducts were paramount. I have lived in that business for 25 years. I believe the standards that we found when we took over the business have been maintained. I know of no transaction—I can recall no transaction—during those 25 years, that under the most searching examination to get the truth of the transaction, that I would have the least embarrassment in answering any questions that might be asked me. We have sought to secure accurate knowledge of administration; we have never sought any advantage of combination or association with others, by combination with others, by attempting to control by reason of having any relation with other corporations.

"We have tried to do our business well," said Mr. Flavelle in conclusion. "We thought we had won the confidence of the great body of the community. I think we deserved it, and I would personally like to bear tribute to the body of officers of the company who have grown up in it, and I believe have decently and faithfully carried out the spirit that was passed on to them by the original William Davies Company, when they came into occupation of the works of that company."

ANNUAL MEETING OF GRAND TRUNK PACIFIC

In reviewing the results for the past year at the annual meeting of the Grand Trunk Pacific Railway Company at Montreal, the chairman, Mr. Alfred W. Smithers, said it was gratifying to note an improvement, although much remains to be accomplished before the property could be on a self-sustaining basis. This condition, however, could only be the natural result of constructing lines of transportation through hitherto unsettled and undeveloped country, and was the history of all other transportation lines. It was, therefore, encouraging to note marked improvement in these conditions from year to year, as the advent of the railway had made possible the discovery and opening of almost unlimited natural resources. Notwithstanding the stopping of foreign immigration during the war, a very considerable immigration from the United States, well equipped financially for farming and other pursuits, continued to go into the new country, and, in addition to the increased acreage taken up, a number of lumber mills along the Fraser River, in British Columbia, had been built to supply the increasing demand for lumber on the prairies, all of which made traffic for the railway.

Mr. Smithers presided, and the following directors and officers were elected for the ensuing year: Directors—Alfred W. Smithers, Sir H. M. Jackson, John A. Clutton-Brock, Sir Wm. Lawrence Young, Howard G. Kelley, E. J. Chamberlin, W. H. Ardley, Frank Scott, W. H. Biggar, Hon. P. Dandurand, Wm. Molson MacPherson, J. E. Dalrymple, Peter McAra and J. B. Fraser. Officers—Howard G. Kelley, president; W. P. Hinton, vice-president and general manager; W. H. Biggar, vice-president and general counsel; J. E. Dalrymple, vice-president; Frank Scott, vice-president and treasurer; Henry Phillips, secretary; W. H. Ardley, comptroller.

Canada's Victory War Loan Must Succeed

Each Citizen's Help is Needed—Selling Organization is Nearly Complete—Funds to be Spent Here—Canadian Activities Depend Upon the Result of the Victory Loan.

THE oversubscription of our war loans are well-made silver bullets in the hide of Prussian militarism, autocracy and barbarism. The oversubscription of Canada's Victory Loan, 1917, will be another such bullet. Canada is willing to manufacture these bullets until peace is brought to the Empire and its Allies. The success of our war loans is a further indication of our resolve to fight the war to a conclusive finish. It is one of a hundred similar incidents occurring every day in the Motherland and in the outposts of the Empire.

While Germany is tangled in all sorts of financial difficulties, with the future dark and foreboding, and defeat looming in the distance, the British Empire is raising, with comparative ease, hundreds of millions for the conduct of the war.

The silver bullet is scoring heavily. The material at hand for its making is still sufficient to give the Hun an additional shiver. The coming Victory Loan will be our fourth war loan. The first, second and third were oversubscribed. The fourth must be made an overwhelming success.

The proceeds of the Victory Loan, to be issued next month, will be used for war purposes only and will be spent entirely in Canada. The full subscription of the loan will enable us to establish credits here for Great Britain so that she may continue her purchases of at least $2,000,000 a day in this country. She is spending here approximately $1,000,000 a day for munitions alone. In addition, she is buying vast quantities of general war supplies, including our agricultural products. The full subscription of our Victory Loan will allow these purchases to continue.

We must oversubscribe the loan to finance our boys in the trenches, to bring the war more speedily to a successful conclusion, and to maintain the present prosperous conditions in Canada. For this loan more than any of the previous issues, the help of the small investor is needed. Subscriptions of $50, $100, $1,000, $5,000 and $10,000 may easily be those responsible for the success or failure of the loan. Only the combined efforts of every citizen can make this loan the success it must be made.

WAR BONDS MUST BE BOUGHT

No Right to be More Careful With Dollars Than of Men at the Front

"You ask me what I think the most important financial question of the day, and I have no hesitation in saying that the necessity for economy and saving and making a success of Canada's Victory Loan, is by all odds the most important financial question before the people." This statement was made in an interview with *The Monetary Times* this week by Mr. J. P. Bell, general manager of the Bank of Hamilton, Hamilton.

Only 1 in 200.

"It has been said that only 1 in 200 of our population has invested in Canadian war loans to date, whereas in England 1 in 8 of the population, and in the United States 1 in 25 invested in the last war loan. It has been well said that nothing could be more cruel, more wasteful, or more inhumane than to wage war half-heartedly. Let each citizen in this country ask himself if he is waging this war with all the intensity of his being, and whether he has any right to be more careful of his dollars than of the young men of this country who have so nobly gone to do their part.

"It should not be necessary to put any special emphasis on the safety of the investment afforded by the Canadian Victory Loan. It has behind it the individual promise of the purchaser and of every other citizen of Canada, and is better secured than if issued against bags of gold stored in burglar proof vaults.

Credits Must be Advanced.

"From a purely selfish point of view it should commend itself, as it is known that the orders for shells and supplies of all kinds are not falling off because they have a sufficient quantity of them in Britain, but because the credit must be created to pay for them; and if we will lend the Canadian government the money they will in turn spend it here, and all will reap the benefit directly or indirectly.

"May I express the hope that every citizen will take a share of the new Victory Loan, even if it is only a $50 bond which he can pay for in instalments during the coming months, and thus fulfil to some extent his obligations to his country."

NATIONAL BOND-SELLING ORGANIZATION

Arrangements Nearly Completed—Manitoba and Saskatchewan Committees—Dividends in Victory Loan?

The final touches are being given the widespread organization which next month will sell the bonds of Canada's Victory Loan. A strong effort will be made to see that every home and every business in the country is a holder of these Victory bonds. On previous occasions, the lowest denomination was $100. The Victory bonds will probably be purchaseable in denominations of as low as $50.

The Canadian Bankers' Association has appointed eastern committees at Montreal, Quebec, Halifax, St. John and Charlottetown, and central and western committees at Toronto, Winnipeg, Regina, Calgary, Edmonton, Vancouver and Victoria to co-operate with the Dominion executive war loan committee. The members of these bankers' committees are as follow:—

Eastern Canada.—Montreal—C. E. Neill, general manager, Royal Bank, chairman; H. B. Mackenzie, general manager, Bank of British North America; E. C. Pratt, general manager, Molsons Bank; Beaudry Leman, general manager, La Banque d'Hochelaga; A. D. Braithwaite, assistant general manager, Bank of Montreal; T. E. Merrett, Merchants Bank.

Quebec—N. Lavoie, general manager, Nationale, chairman; F. W. Smith, Union Bank; A. J. Welch, Royal Bank; W. M. Bancroft, Bank of Montreal; W. G. Hinds, Merchants' Bank; P. B. Dumoulin, Molsons Bank; H. Collette, Hochelaga Bank.

Halifax—D. MacGillivray, Canadian Bank of Commerce, chairman; F. St. C. Harris, Royal Bank; H. A. Fleming, Bank of Nova Scotia; Frank Hope, Bank of British North America; A. E. Nash, Bank of Montreal.

St. John—A. C. Skelton, Bank of British North America, chairman; J. M. Christie, Bank of Commerce; F. J. Shreve, Merchants' Bank; W. J. Ambrose, Bank of Montreal; R. H. Anderson, Bank of Nova Scotia.

Charlottetown—H. W. Binning, Bank of Nova Scotia, chairman; E. G. Coombs, Bank of Montreal; A. W. Hyndman, Royal Bank; G. W. Harrison, Bank of Commerce.

Central and Western Canada.—Toronto—H. V. F. Jones, assistant general manager, Bank of Commerce, chairman; J.

1918 - Monetary Times Annual - 1918

EVERY year the MONETARY TIMES ANNUAL is endorsed by the principal business men and financiers of Canada as an indispensable work of reference. Its value in this regard has been demonstrated over and over again until to-day it is to be found in all well-conducted financial, insurance and commercial offices in the country.

Year by year there is an ever-increasing demand for the Annual.

In order to adequately care for the 1918 Annual in this respect we have plans which insure a wider and more valuable distribution of the issue than of any previously sent out.

In spite of these larger plans and the fact that the cost of production of such an issue has gone up considerably the advertising rates will remain the same as in previous years.

There are some very desirable positions available. In order to secure one of these it is advisable that you write us as early as possible.

Read what a few of Canada's leading men of affairs have to say concerning the Monetary Times Annual.

"It had been my intention to quote some of the trade and financial statistics, but having recently had opportunity of studying, to some extent, the splendid review published by *The Monetary Times* on January 5th, I shall follow the precedent of some former presidents and omit these statistical statements."—ARTHUR HEWITT, ESQ., in presidential address before the members of the Toronto Board of Trade, January, 1917.

"There is a great deal of valuable information in your Annual which we find very useful to refer to from time to time."—MESSRS. OSLER, HAMMOND & NANTON, Winnipeg.

"I would like to bear testimony to the excellence of your Annual Number. It is a splendid contribution to Canadian war-time finance—a magnificent example of that new spirit which has taken possession of Canada since the beginning of the war."—R. E. ARMSTRONG, Secretary, St. John Board of Trade.

"A great many thanks for the most interesting and valuable Finance and Trade Review which *The Monetary Times* have just published. I shall keep it by me for reference during the coming year as I know it will prove of great value on many occasions."—H. V. F. JONES, Assistant General Manager, Canadian Bank of Commerce.

"Allow me to congratulate you on the 1917 Annual, which seems to me by far the most interesting and complete that you have ever issued. You are establishing a record that is enviable."—KINGMAN NOTT ROBINS, Treasurer, Associated Investors, Rochester, N.Y.

"The volume is a veritable vade mecum of financial and commercial information to which one will refer every now and again with the utmost confidence and satisfaction."—S. R. PARSONS, President, Canadian Manufacturers' Association.

"Without doubt the issue is the best Canadian financial publication that I have ever had an opportunity of looking over. There is a surprisingly large amount of information in this volume, much more so than is usually in a financial journal."—W. A. MACKENZIE, Toronto.

"I read the office copy which came in a few days ago, and wish to congratulate you upon the enormously valuable review of finance, development, etc., in Canada during 1916."—JAMES WHITE, Assistant to Chairman, Commission of Conservation, Ottawa.

"I received copy of *The Monetary Times Annual* for 1917, and I must congratulate you very much on this splendid issue. It certainly contains a world of information to any Canadian, and in this regard I have placed it in my private library for further reference. This is the most interesting issue that I have ever seen turned out by any financial newspaper, and I can assure you I appreciate it very much."—E. F. HUTCHINGS, Great West Saddlery Company, Winnipeg, Man.

"I have been greatly interested in your Annual Number this year, which I believe to be quite the best you have ever issued. Certainly there has been more meat for myself in this number than in any previous one."—A. L. CROSSIN, President, Western Canada Mortgage Association, Winnipeg.

The Monetary Times of Canada

Head Office: 62 Church St., TORONTO

C. Mason, acting general manager, Home Bank; C. A. R[illegible], Dominion Bank; J. A. McLeod, assistant general manager, Bank of Nova Scotia; G. D. Boulton, Imperial Bank.

Winnipeg—H. B. Shaw, general manager, Union Bank of Canada, chairman; R. Campbell, general manager, Northern Crown Bank; F. L. Patton, Dominion Bank; V. C. Brown, Bank of Commerce; F. W. Ross, Bank of Nova Scotia; F. H. Reid, Home Bank; E. P. Winslow, Bank of Montreal; J. A. Wood, Bank of Toronto.

Calgary—C. G. K. Nourse, Bank of Commerce, chairman; W. H. Barker, Merchants' Bank; W. Matthew, Bank of Hamilton; F. D. Patterson, Standard Bank; C. R. Latimer, Bank of Toronto.

Regina—R. J. Williams, Bank of British North America, chairman; S. P. Newcomb, Bank of Ottawa; R. M. Gemmell, Bank of Nova Scotia; W. S. Grey, Dominion Bank; A. B. Netherby, Royal Bank.

Edmonton—G. R. F. Kirkpatrick, Imperial Bank, chairman; J. F. McMillan, Royal Bank; H. H. Richards, Northern Crown; F. Pike, Merchants' Bank; J. J. Anderson, Union Bank of Canada.

Victoria—D. Doig, Bank of British North America, chairman; W. H. Hargraves, Canadian Bank of Commerce; A. Montizambert, Bank of Montreal; A. C. Fraser, Merchants' Bank; H. H. Rowley, Union Bank of Canada.

Vancouver—G. V. Holt, Canadian Bank of Commerce, chairman; W. T. Gwyn, Dominion Bank; W. H. Hogg, Bank of Montreal; S. G. Dobson, Royal Bank; J. M. Lay, Imperial Bank; T. B. Phepoe, Molsons Bank; J. F. Harper, Bank of Hamilton.

Saskatchewan and Manitoba Organizations.

Hon. C. A. Dunning, provincial treasurer of Saskatchewan, has been appointed chairman of the Saskatchewan provincial committee for the Victory Loan. The other members are: Vice-chairman, Mr. D. M. Balfour; secretary, Mr. S. W. Harris; treasurer, Mr. H. W. Givings; Messrs. Arthur Hitchcock and J. H. Kern, Moose Jaw; J. O. Hettle and A. H. Williamson, Saskatoon; G. E. Cork, John Rogers and G. H. Bradshaw, Regina.

The Manitoba organization has been completed. Outside of Winnipeg there are ten divisions, each under the care of an experienced bond salesman. The city of Winnipeg will be attended to by the general committee. The bond men who will have charge of the special districts are Messrs. J. A. Thompson, A. N. Strang, T. R. Billett, W. H. Gardner, G. M. Black, William Jennings O'Neill, George J. Seale, Robert McKay, John E. Botterell and D. I. Rossini. They will have charge of Manitoba districts as follows:—

Mr. Thompson will have charge of the areas tributary to the towns of Melita, Deloraine, Hartney, Boissevain and Baldur.

Mr. Strang will have charge of the areas tributary to the towns of Virden, Reston, Rivers, Souris, Brandon, Carberry and Glenboro.

Mr. Billett the following towns: Miniota, Russell, Birtle, Shoal Lake, Hamiota, Rapid City and Minnedosa.

Mr. Gardner the following towns: Roblin, Swan River, Minitonas, Gilbert Plains, Grand View, Dauphin and Winnipegosis.

Mr. Black the following towns: Swan Lake, Polit Mound, Manitou, Morden, Miami, Roland, Plum Coulee, Winkler, Altona and Gretna.

Mr. O'Neill the following towns: Letellier, Emerson, Steinbach, Lorette, La Broquerie, Stuartburn and Sprague.

Mr. Seale the following towns: Holland, Treherne, Carman, Elm Creek, Morris, Sanford, Headingly and Rosser.

Mr. McKay the following towns: Neepawa, McCreary, Ochre River, St. Rose du Lac, Arden, Gladstone and McGregor.

Mr. Botterell the following towns: Selkirk, Brokenhead, Oak Bank and Whitemouth.

Mr. Rossini the following towns: Portage la Prairie, Stonewall, Lundar and Gimli.

Pay Dividends in Bonds.

Mayor C. N. Clendening has been appointed chairman of the committee for Niagara Falls, Ont., in the campaign.

Mr. Gordon M. McGregor, vice-president and managing director of the Ford Motor Company of Canada, is chairman of the Victory Loan committee for Windsor and adjacent border cities. Mr. William F. Gregory, of Leamington, will organize the rural portions of Essex County.

The Vancouver Mining Exchange members, at a recent meeting, pledged themselves to render whatever assistance they could toward making the loan a success.

The sinking fund trustees of Winnipeg, will probably take $500,000 worth of the new bonds. Of the first loan, the sinking fund trustees purchased $500,000; of the second issue, $107,500; of the third, $449,000. The city power department has also purchased about $300,000.

A suggestion has been made that large Canadian corporations should declare their dividends in Victory Loan bonds. Many United States corporations took similar action, paying dividends with Anglo-French bonds.

NATIONAL SERVICE TO HELP LOAN CAMPAIGN

Mr. C. W. Peterson, secretary of the National Service Board, returned to Ottawa on Monday from Toronto, where he consulted the Central Dominion Loan Committee, with the object of co-ordinating the efforts of the National Service organization, which now has charge of the sale of war savinge certificates, and the work of the Victory Loan Committee.

The National Service organization will help the loan campaign. Recently the National Service Board has opened an office in Toronto, with an official and field staff in charge, with a view to working out a co-operative plan in industrial establishments, whereby war savings certificates could be purchased by employees on the instalment plan. During the first few weeks 27 large industrial establishments in Toronto district were canvassed by the National Service staff, and 6,500 men and women were induced to purchase war savings certificates, amounting to $195,000. The present effort is an experiment, but it has proved so successful that it is planned to have a Dominion-wide organization. The propaganda has the double object of raising money for war purposes and the promotion of thrift.

LIFE INSURANCE MEN TO HELP WAR LOAN

The Canadian life insurance companies are co-operating with the finance minister in organizing for the Victory Loan campaign. The chief committee is composed of the president of each of the Canadian life insurance companies, the resident officers of the British and other companies, and the executive officers of the Life Underwriters' Association, with the president, vice-president and secretary of the Life Officers' Association (Mr. D. E. Kilgour).

The following is the executive committee: Messrs. C. H. Carpenter, A. J. Meiklejohn, John A. Tory, A. Homer Vipond, J. F. Weston, A. B. Wood, J. B. McKechnie, E. J. MacIver and H. H. Kay.

Other committees are being formed in the provinces. Mr. D. E. Kilgour is now in Western Canada to co-operate in the work of organization. The life insurance salesmen will assist in selling the loan.

CHAMBLY COUNTY FIRES FIRST WAR LOAN GUN

The first public meeting in Canada's Victory War Loan campaign, for at least $150,000,000, was held last Saturday under the auspices of the South Shore Board of Trade, Chambly County, Quebec Province. Among the speakers were Mr. J. H. Rainville and Hon. Walter Mitchell, provincial treasurer of Quebec. Various speakers first explained, in English and French, the reasons for issuing the loan. Hon. Walter Mitchell said that any man who fails at this time failed in his duty to Canada and to his king. We all had our "bit" to do, and there was more than one way in which to do it. The man who went to the front, and in many cases made the supreme sacrifice does his "bit," but what were the others doing? The soldier sacrificed all, the others were being asked to invest in gold bonds that would bring in 5½ per cent. The investment was a good one, and if every man in Canada had followed the example of France and England each one would be better off to-day. If the campaign educated the people to save, it would be doing more than raise the loan.

Mr. Mitchell also spoke of the necessity of greater production, for it must not be forgotten that there were 24,000,000

No moneys on deposit; No Bonds or Debentures issued

The clause in the Company's Charter enabling it to include in its activities the acceptance of moneys on deposit and the issue of Bonds and Debentures was, at the special request of the original Directorate, struck out.

Sole liability to the public represented by Guaranteed Mortgage Investments to an amount not exceeding the paid-up Capital of the Company, and secured in each instance by improved Farm and City Property to the value of more than double the amount of the mortgage investment.

Head Office .. Winnipeg

men to-day who were consumers, when before they had been producers.

The provincial treasurer believed that there was too much waste, the ministers of agriculture of all the countries declaring that production must increase and consumption lessen. According to the latest returns there were deposits of $1,392,000,000 in the Canadian banks. When war broke out there were only $1,018,000,000. The cash in circulation now was $338,000,000, or an average of $42.25 for every man, woman and child in Canada based on a population of 8,000,000, and Mr. Mitchell felt that the Victory Loan could well be subscribed by the people in the fight for civilization.

Mr. J. T. Hackett, K.C., said that it was the first time Canada needed money and had to look to her own people for assistance. Was the country to look in vain? It was not a sacrifice that was being asked, but an opportunity that was being given the people. The United States was raising money at 3½ per cent., free from taxation, and Canadians were to be paid 5½ per cent. also free of taxation.

The following officers and committee were then unanimously chosen for Chambly County: Joint chairmen, Messrs. L. E. Brais, F. J. McClure; committee—J. H. Rainville, Dr. E. M. Desaulniers, M.L.A., Mayors Gordon, Thurber, Hardy, Chalmers; Brusselle, of Chambly parish; Bergevin, Chambly Canton; Leonard, St. Bruno; Trudeau, St. Brazile; Ducharme, Chambly Basin; Bare, St. Hubert; and Messrs. John Smillie, Wayland, Williams, J. S. V. Dupras, H. J. Cross, Edmond Desalniers, Reginald Dore, C. T. Hedlar, W. P. Powell, A. F. Stratton, A. Benoit, B. Bernard, L. E. Kingston, V. Pigeon, Jos. Horsfall, L. Betournay, P. M. Wickham, E. F. Racey, J. H. Bartholomew, Chas. Roy, J. P. Lamarre, J. P. Hudson, T. M. Taylor, C. F. Bristol and Yvon Lamarre, with power to add to their number.

ATIKOKAN IRON COMPANY

The Port Arthur city council suggests the operation of the plant of the Atikokan Iron Company under government control, and a communication will be sent to Sir George E. Foster to that effect. A letter will also be written to the Atikokan Iron Company executive, saying that the city of Port Arthur is not satisfied with "the very abbreviated statement furnished," and that the council would like to know where the original amount of $700,000 was pledged and for what purpose. The council also desires to obtain a detailed statement of bills payable to the banks for $612,900, how the special loan of $75,000 was used, and how accounts payable, amounting to $11,201, were expended.

SEPTEMBER COBALT SHIPMENTS

The following are the Cobalt ore shipments for the month of September, 1917:—

	Tons.
National Mines	27
Cobalt Silver Queen	25
Right-of-Way Mines	51.5
O'Brien Mine	32

La Rose Mines	130.5
Dominion Reduction Company	387.5
Total	2,330.5

Results of the British government's new system of continuous borrowing through the short-term national war bonds have so far exceeded expectations. Sales have averaged upwards of £20,000,000 per week.

PROGRESS OF LIBERTY LOAN

Over $1,000,000,000 Worth of Bonds Officially Reported Sold—Some Big Subscriptions

More than a billion dollars' worth of Liberty Loan bonds have been officially reported as having been sold. The official returns show that sales have aggregated $1,008,686,000.

Unofficial returns indicate that not less than $1,715,000,000 worth of the bonds had been sold to October 19th. The estimate of an unofficial character crediting the people and banks with having bought $1,700,000,000 is declared by treasury officials to be conservative, and they assert: "There is every reason to believe that the figure is larger."

The figures for sales up to the close of business October 19, and the unofficial estimates of subscriptions to that date, were given out at the treasury department as follows:—

City.	Official.	Unofficial.
Boston	$ 115,300,000	$ 150,000,000
New York	460,742,000	605,000,000
Philadelphia	30,528,000	120,000,000
Cleveland	115,250,000	125,000,000
Richmond	41,586,000	90,000,000
Atlanta	9,428,000	20,000,000
Chicago	122,597,000	325,000,000
St. Louis	11,956,000	100,000,000
Minneapolis	40,500,000	50,000,000
Kansas City	8,871,000	60,000,000
Dallas	7,753,000	15,000,000
San Francisco	44,175,000	55,000,000
Total	$1,008,686,000	$1,715,000,000

Some Big Subscriptions

Kuhn, Loeb and Company, New York, subscribed for their own account, $10,000,000. The Prudential Insurance Company, of Newark, took $2,500,000 additional. The Louisville and Nashville Railway Company subscribed for a total of $6,000,000, of which $3,000,000 was credited to the New York district.

Other big subscriptions are: New Jersey Zinc Company, $1,000,000; Public Bank of New York, $1,000,000; Empire Trust Company, for itself and customers, $1,000,000; Continental Insurance Company, $1,000,000; Lincoln Trust Company, for itself and clients, $570,000; Miller and Company, $500,000; American Beet Sugar Company, $200,000; New York Cotton Exchange, $100,000; J. K. Rice, Jr., and Company, $100,000; J. K. Rice, Jr., for personal account, $100,000; Pittsburg and West Virginia Railroad Company, $250,000; Tokio Marine Insurance Company, $50,000; Emigrant Industrial Savings Bank, $1,000,000 (additional); Captain J. R. De Lamar, $1,000,000; William B. Joyce, $1,000,000; Charles P. Sanford, $1,000,000; Cities Service Company, jointly with H. L. Doherty, $1,000,000; Union Dime Savings Bank, $500,000; West Virginia Pulp Company, $500,000; Spencer, Trask and Company, $500,000 (additional); and J. S. Bache and Company, $500,000.

The subscription lists close to-morrow, Saturday, October 27th.

PARTLY COVERED BY INSURANCE!

The following extract from the Trail News of October 12th throws light on the problem of "How to combat the high cost of dressing":—

"Monday noon the dwelling of Mike Malich, about two miles north of Trail, was burned. It was a total loss, and Mike and seven children lost everything except the clothes on their backs, being partly covered by insurance."

A car of No. 1 northern wheat was received in Winnipeg on Wednesday of last week weighing 129,000 pounds, and containing 2,150 bushels, with no dockage. The net proceeds of the car, less freight and commission, was $4,458.10. The weight of the wheat per measured bushel was 65 pounds. The car was loaded by Mr. George H. Hummell, of Nokomis, Sask.

INSURANCE BUSINESS REVIEWED

Great Activity in Life Insurance—Mr. H. C. Cox Addresses Insurance Institute

"Until the line of demarkation between head office and field is done away with, until the main or ultimate objects of one department are without question the objects of all other departments, until then close and successful co-operation is impossible." This was the opinion expressed by Mr. H. C. Cox, president of the Canada Life Assurance Company, Toronto, at a meeting of the Insurance Institute of Toronto on Tuesday.

"During the past year," he continued, "the fire and accident companies have been still further solving the problems presented by the war, and, taking everything into consideration, have been very successful in conserving their losses and in maintaining a good volume of business. The government measure for compensation to injured workmen has been beneficial to the business, if anything, and it has never been anticipated that the regular accident business would be anything but advanced by the introduction of legislation to protect the employee. As in the case of government schemes for life insurance and annuities, the effect has, on the whole, strengthened the presentation by the companies and called attention by government sanction and endorsation, to the sound principle of insurance generally.

"The life insurance field has of late been active to a degree almost disconcerting. Our present machinery has been able to respond to the increased demand for life insurance protection only because of a general feeling of loyal and enthusiastic co-operation by one and all to make the most of the present opportunity. Men in the field and at head office have responded to an unusual degree, and realizing the value to the state of a good harvest of applications, have spared no effort to gather together the small sums from far and near which in their aggregate represent large premium income and increased assets for investment in national loans and sterling enterprises.

Attention to Detail Necessary.

"It is quite within the probabilities that before many years have passed, many of the younger members of this body will be engaged in executive work of increasing importance to the general business of insurance. The building process going on in our various institutions calls for the utmost care, and dedication of ability to the solution of the problems of the hour.

"Men connected with the insurance business become accustomed to thinking in millions, but this to the cautious executive only emphasizes the need for attention to detail. By that I do not mean to suggest that a man with large responsibilities should attempt to handle detail, but it is his duty to see that the detail is properly handled. It is the aggregation of smaller tasks performed by others which makes it possible for any man to hold a big job, and unless those small tasks are in capable hands, the whole structure may suffer. The ability to appoint the right men, therefore, to undertake the various departments of a business, in itself demonstrates the power of the executive. We are apt to stand in awe of big business ventures, but as we draw closer to them and realize that the largest business in the country is only the expression of the work of many men variously engaged, we realize that what appeared very large to us may be dissected, and brought down to a basis of understanding.

Just Dealing Between all Grades.

"All through a great organization are men, even to the remotest part of the field, who are accomplishing every day those difficult tasks of soliciting, or business management, which in the aggregate represents our success.

"In building an organization which is to be loyal and steadfast, we have only one standard, and that, I believe, has been recognized by most executives—a recognition of the principle of just dealing with and between the men of all grades who comprise the institution.

"It is inconceivable in these times that any one should imagine a different viewpoint as between a head office and an agency force, for example. It is unquestionably true that any apparent difference of viewpoint should be the immediate objective or the point of attack by those forces for good management which exist in every institution.

"Viewing the many organizations at work around us, particularly in the realm of finance, one becomes more and more impressed with the spirit of co-operation everywhere apparent. Business houses and company managements which not many years ago might have appeared separated by immense distances from participation in any joint effort, have come together in these times of union for the common good, and have demonstrated what may be done by united effort to reach a common goal.

"There are many such organizations in Canada, some connected with the insurance business, such as this institute, the Life Officers' Association and the Life Underwriters' Associations in various parts of the country, and they have done much to raise the standard of business ethics. We have, as an outcome of the great war, some temporary organizations of all classes of business men, which have arisen out of the need for patriotic endeavor. The most recent, and perhaps the greatest of these—at least judged by the task before it—is the Association of Bond Brokers. They have in hand the perfecting of an organization which will reach from coast to coast, devoted to the task of raising a Dominion government loan of $150,000,000."

SAY TAX ON FIRE PREMIUMS UNFAIR

"When the Ontario government founded the fire marshal's department," says Industrial Canada, the organ of the Canadian Manufacturers' Association, "it was decided that the cost of the department should be borne by the insurance companies, and, to that end, a provision was inserted in the bill, levying a tax of not exceeding one-third of 1 per cent. of fire insurance premiums collected in Ontario. Apparently the insurance companies complained that they were being unfairly treated for an amendment was hastily added to the bill, imposing a tax of 1 per cent. on all losses collectable from unlicensed insurance companies. This tax must, of course, be paid by the individual or firm whose property is destroyed by fire, since the unlicensed companies, being outside Canadian jurisdiction, cannot be taxed. It needs no argument to show how absurdly unjust it is to make a man pay a heavy tax immediately after suffering a loss, to reinstate which he requires all his resources. In actual operation the tax has proved to be even more unfair than was at first apparent, and is now frankly discriminatory. The sums received on account of fire losses alone were found practically sufficient to pay for the upkeep of the fire marshal's department, as a result of which a rebate of 80 per cent. has been made to the insurance companies. No rebate whatever has been made to the individual taxpayers, so that 80 per cent. of the cost of the fire marshal's department is now borne by a few unfortunate fire victims, while the balance is distributed amongst about a hundred or more wealthy insurance companies. And this is in spite of the fact that the fire marshal's Act expressly provides that the insurance companies be taxed for the purpose of maintaining the department."

SASKATCHEWAN'S FARM LOAN BONDS

Provincial Government Issues a Financial Catechism for Investors

The Saskatchewan treasury department has issued two leaflets in connection with the Saskatchewan farm loan debentures. The first of these is in the nature of a prospectus, with a form of application for bonds attached, and the other explains very clearly the nature of the investment, with full information as to its purpose and all details of the project. An endeavor has been made to present the facts in simple language, free from legal and financial phraseology. It was deemed advisable to adopt the question and answer style of presenting the subject, dealing as far as possible with all the questions that would be likely to arise in the mind of the person who is considering an investment.

Government Bond or Debenture.

Question.—What is a government bond or debenture?

Answer.—A government bond or debenture is a promise by the government, on behalf of the whole people, to pay a certain sum of money at a stated time, and to pay interest on it at certain fixed intervals before the principal sum is due. The whole of the resources of the province are behind such a security, and it constitutes the safest investment the government or anyone in the province can offer.

Question.—Why should this particular issue be purchased by Saskatchewan's citizens more than any other?

Answer.—This particular debenture issue is designed to accomplish two definite ends:—

1. That those citizens who have money to invest, even for a short space of time and in small amounts, shall receive in interest more nearly what their money is worth.

2. That those farmers who must borrow on mortgage to develop the agricultural resources of the province shall be able to do so at a rate of interest lower than in the past and more nearly what the money is worth.

Question.—How can it be possible to pay the lender more and at the same time charge the borrower less?

Answer.—By reason of the fact that by this method wealth produced in Saskatchewan is kept at home working to build up this community and to develop its resources instead of becoming merged in the intricate and costly financial system of the whole country. Also to the fact that this is not a scheme for profit-making on the part of any corporation or individual, but an honest attempt on the part of the government of the province to improve the economic status of its people.

Rate of Interest.

Question.—What rate of interest will the government pay the investor?

Answer.—Five per cent., which is a higher rate than can be obtained on any security which is as gilt-edged, and which at the same time offers conveniences for repayment on notice.

Question.—I notice these debentures are not payable by the government for ten years. Suppose I invest $500 and then have a poor crop next year or the year after and need the money?

Answer.—All you need to do in that case is to give the provincial treasurer three months' notice that you want your money and it will be forthcoming in full.

Question.—How often will I receive interest?

Answer.—Every six months.

Question.—How do I collect the interest

Answer.—Attached to every debenture are interest coupons, one for each six-monthly interest date. Close to the date of the payment of the coupon, which is printed on each one, just cut the coupon off and take it to your bank, where you will receive its full value.

Question.—How much or how little can I invest?

Answer.—The smallest debenture is for $20. Others are for $100, $500 and $1,000. You can buy as many or as few of each as you desire.

Question.—What is the money to be used for?

Answer.—The money will be advanced by the provincial treasurer to the Saskatchewan Farm Loan Board, who in turn will loan it to farmers, receiving mortgages on farm lands as security.

Question.—Will I have to look to the farmers who ultimately borrow the money for repayment of the debentures purchased by me?

Answer.—No. The government will repay you at any time on three months' notice and will pay you interest every six months.

Question.—How should I go about buying these debentures?

Answer.—Just fill out the form attached to the prospectus enclosed herewith and attach your cheque (which must be accepted by the bank), post-office order, money order or express order, for the amount you wish to invest, and send by registered mail to the provincial treasurer, loan office, legislative buildings, Regina. But if you prefer, go to any branch of the Union Bank of Canada or Northern Crown Bank, or to the secretary-treasurer of your town, village, or rural municipality, who will receive on behalf of the provincial treasurer the money for the purchase of the debenture and in exchange give you an interim receipt, which carefully keep, as the same will secure you pending the issue from the treasury department of your debenture.

Possible Loss of Bonds.

Question.—If I buy several $20 and $100 debentures, can I later exchange them for a debenture or debentures of larger denomination if I desire to do so?

Answer.—Yes. Your debentures may be sent by registered mail to the treasury department, who will issue you such debentures of higher denomination as you may require. But if you do not like to risk sending these debentures through the mail you may write the provincial treasurer that you require to exchange your debentures, and also mention at the same time at which branch of the Union Bank or Northern Crown Bank you wish the exchange to be made, and when. Upon the receipt of your communication the treasury department will forward such debentures as you may require to the bank mentioned, where the exchange can be properly made by you.

Question.—How can I protect myself against loss of debentures?

Answer.—The provincial treasurer will be pleased to register the $500 debentures and the $1,000 debentures. This means that the back of the debenture will bear your name. A register is kept in the treasury department of the debentures registered so that in case of loss no other person may present these debentures for payment. This registration provision refers only to the principal sum of the debentures and not to the coupons attached to the same.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 19th, 1917:—

Nipissing Mining Company, 75,080; Temiskaming Mining Company, 64,085; Dominion Reduction Company, 87,400; Mining Corporation of Canada, 372,140;. Total, 598,705 pounds, or 299 tons. The total shipments since January 1st, 1917, now amount to 28,593.513 pounds, or 14,296 tons.

CANADIAN TRADE INCREASES

For the first six months, ended September, of the current fiscal year the total trade of the Dominion amounted to $1,347,781,936, as compared with $1,148,859,412, an increase of approximately $200,000,000. For the month of September Canada's trade reached the large figure of $193,803,517. For September, 1916, it was $161,767,951.

For the six months period free goods were imported to the value of $250,836.205. and dutiable goods to the value of $299,089.013. Imports totalled $549,925,223, apart from coin and bullion, as against $390.965,243. Duty collected for the six months amounted to $88,280.620, as compared with $70,102,854 for the same period last year.

Domestic goods to the value of $767,091.657 were exported during the six months. Last year for a similar period the value of domestic exports was $536,722,671. The total value of domestic manufactured goods exported for the six months was $345.960.399. as compared with $190.823.240 in a similar period last year. Agricultural products (domestic) exported during the six months period reached a total of $260.654.060. as compared with $206.141.326 last year. Domestic animals exported were valued at $83.002.705. as against $53.382.886 last year.

Quebec, 1st September, 1917.

Correct (Signed) H. K. TENNENT, Comptroller.

The President and Shareholders,
of the Quebec Railway, Light, Heat and Power Co., Ltd., Quebec.

Gentlemen:—

We certify that the foregoing Statement in our opinion is drawn up so as to exhibit correctly the position of your Company as shown by the books of account, vouchers, records and documents examined by us.

The value of stores and supplies on hand have been substantiated by Inventories certified to by your officials.

The cash on hand, trust funds, monies on deposit, have been verified by personal inspection of certificates.

The disbursements as shown by the books have been supported by satisfactory vouchers.

The Investments, Stocks, Bonds and Interest in other corporations includes Stocks and Bonds of the Quebec and Saguenay Railway. The interest due and unpaid on these Bonds is included in the Accounts Receivable.

The above securities, together with the Treasury Bonds which have been placed as collateral against advances to the Company, have been verified by certificates received from the parties with whom they are pledged.

In the Profit and Loss Account no depreciation has been provided for on the permanent assets of the Subsidiary Companies.

Respectfully submitted,

Montreal, 1st September, 1917. (Signed) P. S. ROSS & SONS, Chartered Accountants.

RECENT FIRES

Winnipeg, Man.—October 18—Mr. S. Camilla's store damaged. Estimated loss, $500. Cause, fire from kitchen stove.

NEW CANADIAN WAR CABINET

Union Cabinet Comprises Twenty-three Members—Reconstruction and Development Committees

The Union Cabinet as it now stands comprises twenty-three members, including the solicitor-general, Hugh Guthrie. In addition there are now two parliamentary under-secretaries, namely, Messrs. Hugh Clark, for external affairs, and F. B. McCurdy, for militia and defence. A third parliamentary under-secretary for the department of labor is to be appointed, according to Premier Borden's announcement of Tuesday. He will probably be David A. Carey, of Toronto.

The new Cabinet is as follows:—

Sir Robert Borden, premier and secretary of state for external affairs.

Hon. Newton W. Rowell, president of the council.

Sir James Lougheed, government leader in the Senate and chairman of the military hospitals commission.

Hon. Martin Burrell, secretary of state.

Hon. Arthur Sifton, customs.

Hon. Arthur Meighen, interior.

Hon. J. A. Calder, immigration and colonization.

Hon. T. A. Crerar, agriculture.

Sir George Foster, trade and commerce.

Sir Thomas White, finance minister.

Hon. John D. Reid, railways and canals.

Hon. Thomas W. Crothers, labor.

Sir Edward Kemp, militia and defence overseas.

Hon. S. C. Mewburn, militia and defence in Canada.

Hon. C. J. Doherty, justice.

Hon. C. C. Ballantyne, marine and fisheries and naval service.

Hon. Albert Sevigny, inland revenue.

Hon. P. E. Blondin, postmaster-general.

Hon. F. B. Carvell, public works.

Without portfolio—Hon. Frank Cochrane, Hon. A. K. Maclean, Hon. Gideon Robertson.

Solicitor-general, Hon. Hugh Guthrie.

Canada's War Cabinet.

The War Cabinet—technically known as the war committee of the Cabinet Council—will have the prime minister as its president, and Hon. N. W. Rowell as its vice-president. The other committee, which will be known as the reconstruction and development committee, will also have the prime minister as its president. Hon. A. K. Maclean, minister without portfolio, will be vice-president.

The personnel of the committees follows:

War Cabinet—Chairman, Sir Robert Borden.

Vice-chairman, Hon. N. W. Rowell, president of the privy council.

Major-General Mewburn, minister of militia and defence.

Sir Thomas White, minister of finance.

Hon. C. C. Ballantyne, minister of marine and fisheries and naval service.

Hon. C. J. Doherty, minister of justice.

Hon. F. B. Carvell, minister of public works.

Hon. A. L. Sifton, minister of customs.

Hon. P. E. Blondin, postmaster-general.

Sir Edward Kemp, minister of overseas military forces.

Reconstruction Committee.

Reconstruction and Development Committee—Chairman, Sir Robert Borden.

Vice-chairman, Hon. A. K. Maclean.

Sir George Foster, minister of trade and commerce.

Sir Thomas White, minister of finance.

Hon. J. D. Reid, minister of railways and canals.

Hon. J. A. Calder, minister of immigration and colonization.

Hon. Arthur Meighen, minister of the interior.

Hon. T. A. Crerar, minister of agriculture.

Sir James Lougheed, chairman of the military hospitals commission.

Hon. Senator Robertson, minister without portfolio.

Each committee, it will be observed, consists of ten members.

The duties of the war committee, which will exist during the progress of the war, and until after demobilization, are [illegible] recommendations to the prime minister.

Sir Robert Borden, in his recommendations, observes that the constitution of such a committee of the Cabinet is advisable "for the purpose of co-ordinating the efforts of the several departments of the government for the prosecution of the war, for insuring the maximum of effort with the minimum of expenditure, and generally for the purpose of throwing the full power of Canada into the national endeavor."

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word: all other condensed advertisements, 4c per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance. 50 per cent extra if charged.

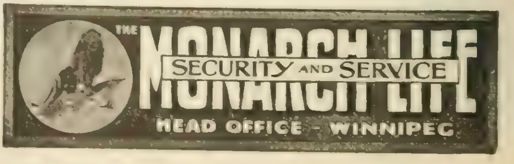
THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

POSITION WANTED.—Experienced Fire Insurance Inspector (Exempt), well acquainted with the Western territory, will be open to accept position in October; tariff companies only. Address Box 111, *The Monetary Times*, Winnipeg.

WANTED, BRANCH MANAGER.—An old, well-established Canadian Life Insurance Company, with Office in Vancouver, is desirous of securing a Branch Manager for the City of Vancouver and surrounding territory. To a man of ability, who can organize, and produce a good volume of first-class business, a splendid future is assured. Applicant, however, must know conditions as they are at the Coast, and possess a first-class connection. He must be a man of integrity. To such a man, a satisfactory contract will be given. Apply, in first instance stating age, experience and salary expected. All replies will be treated as strictly confidential. Box [illegible], *The Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

POSITION WANTED.—Experienced Fire Insurance Man wants position as Special Agent for Western Provinces for some good Company. Has personal business. Best references as to character and ability. Correspondence confidential. Box 115, *The Monetary Times*, Toronto.



THE MONARCH LIFE
SECURITY AND SERVICE
HEAD OFFICE - WINNIPEG

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

THE CONSUMERS' GAS COMPANY OF TORONTO

The Annual general meeting of the Shareholders of the Consumers' Gas Company of Toronto, to receive the report of the Directors, and for the election of the Directors for the coming year, will be held in the Company's Board-room, 17 Toronto Street, Monday, the 29th day of October, 1917, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of Ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of November next to Shareholders of record at the close of business on the 15th day of October.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 2nd October, 1917.

ILLINOIS TRACTION COMPANY

NOTICE OF DIVIDEND No. 19.

By order of the Board.
GEO. M. MATTIS,
Treasurer.

Champaign, Ill.

UNION BANK OF CANADA

DIVIDEND No. 123.

NOTICE is hereby given that a Dividend at the rate of 8% per annum, together with a bonus of 1%, upon the Paid-up Capital Stock of the UNION BANK OF CANADA, has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after Saturday, the 1st day of December, 1917, to shareholders of record at the close of business on the 15th day of November next.

The Transfer Books will be closed from the 16th to the 30th day of November, 1917, both days inclusive.

By order of the Board.
H. B. SHAW,
General Manager.

Winnipeg, October 18th, 1917.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 123.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Saturday, 1st December, 1917. The Transfer Books of the Bank will be closed from the 16th to the 30th November next, both days inclusive.

By order of the Board.
JOHN AIRD,
General Manager.

Toronto, 19th October, 1917.

THE RIORDON PULP & PAPER COMPANY LIMITED

COMMON STOCK DIVIDEND No. 7.

Notice is hereby given that a quarterly dividend of 1½%, being at the rate of 6% per annum, and a bonus dividend of 1%, be declared on he Common Stock of the Company for the third quarter of the year, payable November 15th, 1917, to shareholders of record at the close of business on November 8th, 1917.

By order of the Board
F. B. WHITTET,
Secretary-Treasurer.

Montreal, October 23rd, 1917.

The total assets of the Royal Bank of Canada during September increased $1,858,419 to $302,997,175. When the Quebec Bank was absorbed, the total assets of the Royal had reached $275,000,000. Total deposits at the end of September were $24,150,216, a gain of about a million dollars during the month. Loans and discounts contracted about $1,200,000 in September, and concurrently with that and the increase in deposits, there was some expansion in liquid assets as represented in call loans. In Canada the expansion amounted to about $400,000 outside of Canada to about 3¾ millions.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Reference was made in *The Monetary Times* last week to the action in which the Christian Brothers sued the city of Maisonneuve for $500,000 worth of debentures, being the balance of the price alleged to be due for the properties purchased by the city from the Christian Brothers in 1914 for the purpose of a public park at Maisonneuve.

As the result of an understanding between the parties, Mr. Justice Archer, on Thursday last week agreed to render judgment on the action "at the demand of the plaintiffs." Until then, therefore, the case stands adjourned.

Mr. W. A. Baker, K.C., who appeared for the city of Maisonneuve, stated that at the coming session of the legislature, Maisonneuve intended to ask for an extension of its borrowing powers which would enable them to pay to the Christian Brothers the amount owing to complete the transaction in question.

Mr. P. St. Germain, K.C., for the plaintiffs, said he had no objection to the postponement, as it would not prejudice the claim in any way.

Maisonneuve agreed to purchase this property for $1,500,000, of which sum $500,000 was paid in cash on the date of sale, May 1, 1914. On the same date $500,000 worth of city of Maisonneuve debentures were delivered to plaintiffs, the balance of $500,000 being payable in like debentures within four years of the date last named. This part of the agreement, however, had not been carried out, and on that default the present action was based. The city had offered debentures to the value of $308,000, which formed the sum total of the amount Maisonneuve had available to complete the transaction. The balance of the bonds, worth $192,000, had been transferred to others in virtue of claims to the title of certain parts of the property purchased, and the question at issue, according to the pleas, turned on the regularity of the transfer of the debentures to the value of $192,000.

North Cowichan, B.C.—The council has decided to repurchase $15,000 of the issue of $50,000 of bonds five years ago. The bonds were originally sold at 94, yielding 7 per cent.

Ottawa, Ont.—An increase of $1,776,297 in the city's assessment, and an increase of 988 in population over 1916 figures are shown in the report completed by Mr. F. H. Veale, assessment commissioner. The total assessment of the city is given at $11,472,000, and the population as 101,549.

Brantford, Ont.—The ratepayers will vote at the next municipal election on a by-law authorizing the issue of debentures to the value of $40,000 for the construction of the St. Paul Avenue subway. The Grand Trunk Railway system has been ordered by the Dominion Railway Commission to pay $7,000 toward the cost of such a subway. In the event of the ratification of the by-law by the people, the construction of the subway will be postponed until after the war and undertaken then as a measure to afford employment to returned men.

Saskatchewan.—Many subdivisions are being restored to acreage in territory surrounding our cities and larger towns, reports Mr. J. N. Bayne, deputy minister of municipal affairs. The fact that councils are now allowed to compromise or accept a reasonable amount of taxes on such subdivisions is hastening their return to the category of farm lands, from which, in many cases, they should never have been taken. It is well that each municipality should do what it can to encourage elimination of the useless subdivision, which too often is only holding back agricultural production.

Saskatchewan.—The tax sale provided for under the arrears of taxes act, with which each municipal secretary-treasurer is familiar, calls for an annual sale, and throughout the province wherever arrears have accumulated against land, the latter is being sold on account of the taxes. The person who wishes to buy these lands has a direct advantage, for if the land is redeemed before the period of redemption expires he is entitled to 10 per cent. interest on all taxes which he pays for each year concerned, and if the owner does not redeem, the property vests in the tax purchaser in due course. However, the prosperity now so common in Saskatchewan is resulting in a general clearing of arrears of taxes, so that comparatively few areas, particularly in the rural districts, will be actually sold. It is always to the advantage of the taxpayer when he clears his taxes in the same year in which they are imposed.

Saskatchewan.—The following is a list of debenture applications granted by the Local Government Board from October 8th to 13th, 1917:—

School Districts.—Prussia, $5,500 20-years not ex. 8 per cent. annuity; A. M. Brown, Prussia. Hill and Hollow, $2,000 10-years not ex. 8 per cent. annuity; E. Berdan, Dahlby. Vantage, $2,300 10-years not ex. 8 per cent. annuity; J. M. Bright, Vantage. Liberator, $2,000 10-years not ex. 8 per cent. annuity; E. N. Grandall, Radville.

Rural Telephone Companies.—Woodend, $2,800 15-years not ex. 8 per cent. annuity; J. R. Palmer, Estevan. Lake Johnston, $800 15-years not ex. 8 per cent. annuity; F. E. Crosby, Expanse. Stranraer, $15,800 15-years not ex. 8 per cent. annuity; C. W. Rowbotham, Stranraer. Shallow Lake, $200 15-years not ex. 8 per cent. annuity; H. J. Veal, Marchwell. Unity, $36,400 15-years not ex. 8 per cent. annuity; T. C. Frost, Unity. McDonald Hills, $15,000 15-years not ex. 8 per cent. annuity; W. Grant, Dysart. Hawarden, $2,200 15-years not ex. 8 per cent. annuity; M. J. Brown, Hawarden.

The following is a list of debentures reported sold from October 8th to 13th, 1917:—

School Districts.—Sully, $1,600; Great-West Life Assurance Company, Winnipeg. Wolseley, $2,300; Robt. Cann, Wolseley.

Rural Telephone Companies.—Coleville, $1,000; Wood, Gundy and Company, Saskatoon. Bresaylor, $10,500; Mr. Thomas, Bresaylor. Carnoustie, $2,000; H. O'Hara and Company, Toronto. Ethelton, $2,300; Union Bank of Canada. Gregherd, $7,000, Spring Valley, $5,200, Quill Lake, $3,700, Alsask, $21,500; W. L. McKinnon and Company, Regina. Fondlater, $6,000; Victoria Loan and Savings Company, Lindsay, Ont.

Village.—Riverhurst, $2,550; W. L. McKinnon and Company, Regina.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first three weeks of October:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
October 7	$2,966,000	$2,842,000	— $124,000
October 14	3,034,000	3,333,000	+ 299,000
October 21	2,932.000	3,429,000	+ 497,000

Grand Trunk Railway.

October 7	$1,319,090	$1,342,050	+ $ 22,960
October 14	1,300,095	1,312,505	+ 12,410
October 21	1,200,044	1,254,304	+ 54,260

Canadian Northern Railway.

October 7	$ 857,400	$ 758,500	— $ 98,900
October 14 .	847,700	960,600	+ 112,900
October 21	839,700	872,300	+ 32,600

For the third week of October gross earnings of the three principal Canadian railways were slightly less than the total for the preceding week. Both the Grand Trunk and Canadian Northern reported decreases, but the Canadian Pacific aggregate for the third week was the largest thus far this month.

The Grand Trunk figures for the week ended October 21st stood at $1,254.304, which is an increase of $54,260, or 4.52 per cent. over the corresponding period of 1916. As compared with the second week of the current month, there was a decrease of approximately $68,000.

The Canadian Northern earnings totalled $872,300 for the seven days, contrasting favorably with the $839,700 for the same week of last year, but falling behind the second week's record of $960,600.

Canadian Pacific gross figures have shown steady improvement since the beginning of the month. The third week's earnings were reported at $3,429,000, which is $497,000, or 16.95 per cent. larger than for the same week of 1916, and $96.000 in excess of the week of October 14th.

BRITISH COLUMBIA CITY MAKES HEADWAY

"New Westminster's industrial progress is not spectacular, but it is gratifying. The shell making plants are continuing, having been assured of orders to carry them to the spring, owing to the satisfactory nature of their work." This is the opinion of Mr. J. D. Cunningham, sub-editor of the British Columbian, New Westminster, in a letter to The *Monetary Times*. He adds that whether or not the Imperial Munitions Board places any more contracts for wooden steamers on the Pacific coast, the Poplar Island shipyard will remain a permanent industry here. If there are any further orders from the board, a share of them will go there. These declarations were made at a New Westminster board of trade meeting by Mr. H. M. Fullerton, secretary-treasurer of the New Westminster Construction and Engineering Company.

Reporting on the progress of the four vessels under order, Mr. Fullerton said that the first is at the stage of being fitted with the steel keelsons; the stern of the second has been fitted, this being the most difficult and important part of construction. The keel of the third is laid, and the frames, all cut, lying on the ground, so that she should be in frame within ten days. The keel of the fourth will be laid on the ways, which are already prepared, within a week.

The yard is now getting all the lumber it wants in good time, since the mills are getting logs of the required size. Mr. Fullerton expressed appreciation of the efforts made by all the sawmills on the Fraser to keep them supplied with wanted materials, mentioning particularly the Small-Bucklin Lumber Company, the Brunette mills, the big plant at Fraser Mills and a sawmill at Ladner.

[illegible] 275 [illegible], and so far the company has had no labor difficulties.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Kerr Lake Mining Company.—Notices have been sent to stockholders asking assent to dissolution of the company and formation of a new one under the laws of Canada with the same capitalization of 600,000 shares of $5 par. Stockholders of the old company will receive share for share in the new Canadian corporation.

Bank of Montreal.—The directors have declared the regular quarterly dividend of 2½ per cent., together with a bonus of 1 per cent., payable December 1 to shareholders of record October 31. This is the regular bonus declared at the end of the year. A bonus of 1 per cent. is also declared in the quarter ending June 30, making a total of 12 per cent. for the year.

Consolidated Mining and Smelting Company.—Ore receipts at the Trail Smelter from October 8 to October 14, 1917, show 6,959 tons from the company's mines, and from other mines 3,085 tons. As compared with the preceding week the above total shows a falling off of 1,133 tons. The total output from October 1, 1917, to date from the company's mines is 15,050 tons, and from other mines 7,588 tons.

Quebec Railway Light, Heat and Power Company.—The financial statement of the company showed gross earnings of $1,832,031 for the year ending June 30th last, as compared with $1,731,732 a year ago, which is an increase of $100,299. Operating expenses, however, were $1,155,969, an increase of $126,218.

The profit and loss account compares as follows:—

	1917.	1916.
Gross earnings	$1,832,031	$1,731,732
Miscellaneous income	230,850	236,868
	$2,062,882	$1,968,601
Operating expenses	$1,155,969	$1,029,750
Fixed charges, tax	706,326	723,447
Surplus for year	200,587	215,403
Total surplus	$ 684,572	$ 562,902

The balance sheet shows little change from last year. Accounts receivable are about $140,000 higher, while accounts payable are almost $200,000 greater. Cash on hand drops $40,000, while stores were $15,000 higher.

The balance sheet compares with 1916 as follows:—

Assets.

	1917.	1916.
Stocks, etc.	$19,193,017	$19,181,389
Treasury bonds	1,611,600	1,742,700
Advanced to contingent companies	1,581,665	1,165,251
General construction	528,820	528,413
Cash	127,072	167,456

Surplus	684,572	562,902
	$23,671,346	$23,250,257

J. T. Donohue, of Quebec, was elected a director to fill an existing vacancy.

Nova Scotia Steel Company.—The third payment on the company's $5,000,000 common stock issue at par fell due Tuesday, October 16th and the fourth and final payment will be due November 15. The directors stated at the time of the announcement of the issue in June that with the new stock fully paid they would proceed to declare a stock dividend of 20 per cent. to holders of record November 20. At 78¾ for the shares of the original $7,500,000 stock, the price equivalent of the entire issue of $15,000,000, when the stock dividend is declared, would be about 65½.

Ontario National Brick Company.—That proceedings are pending for the winding up of the company, is evidenced by the publication of a notice calling a meeting of the bondholders November 29, to consider what action they should take under the circumstances. The amount of bonds outstanding is $1,250,000, dated December 1, 1912, and due in 1952. There was also issued $2,000,000 of common stock. A number of interests in the National Brick Company, of Laprairie, were the promoters of the company, the brick industry at that time being in a prosperous condition. The brick business declined afterwards. No bond interest has been paid since December, 1914.

Russell Motor Car Company.—Net profits of the company for the year ended July 31, 1917, amounted to $643,590, after making full allowance for war profits tax, writing machinery, etc., off from $903,093 to $346,009, increasing plant and investment reserve from $514,616 to $881,388 and otherwise providing for contingencies. The profit and loss account, compared with last year, follows:—

Profit and Loss.

	1916.	1917.
Balance forward	*$703,363	*$204,009
Trading profits	499,354	643,590
Balance forward	*204,009	47,580

*Loss.

The year was started with an adverse balance of $204,009, and with a bank advance of $646,077, and finished with a favorable balance of $439,580 and a bank advance of only $126,486. Accounts receivable amount to the substantial sum of $1,705,081, while accounts payable, including provision for war tax, are $1,502,606. Allowing for the dividends, which are shown as a liability incurred, the company has a balance of $47,580 to carry forward into its next year. All these figures are set forth in the following schedule which illustrates the progress made in the last two or three years:—

Assets.

	1916.	1917.
Cash on hand	$ 4,118	$ 19,383
Accounts receivable	409,335	1,705,081
Investments in other companies	1,366,915	1,322,351
Stock on hand	846,287	1,426,449
Realty	34,003	310,177
Machinery, etc.	903,093	346,009
Less depreciation	162,454	163,315
	$3,401,290	$4,066,137

Liabilities.

	1916.	1917.
Bank advances	$ 646,077	$ 126,486
Accounts payable	428,520	1,502,606
Dividends declared	. .	392,000
Contingent account	16,075	16,075
Plant reserve	514,616	881,388
Capital	2,000,000	2,000,000
	$3,605,288	$4,918,556

The report of the directors states that the demand for bicycles and skates was active, but business was limited by the inability of the factory to deliver goods. The munitions business was by far the largest department of the company's

Penniless Old Men

You know many of them—men who in their prime made plenty of money, but who spent as freely as they earned. Old age finds them in a sorry plight.

You can escape their bitter experience if you will. A few dollars saved each year and invested in an Imperial Endowment will provide for your comfort in old age. Or it will take care of your family should death call you early.

Write for a free copy of our very interesting booklet entitled "Penniless Old Men." Address:

6

operations, who successfully undertook large contracts for the manufacture of time fuses, graze fuses and 9.2 shells. Since the close of the last fiscal year the contract for 9.2 shells has been completed, and the equipment is now being remodelled and rearranged to take care of an important order for 6-inch shells. Indications are, however, that the manufacture of fuses will be discontinued, as further quantities of these are no longer being procured in Canada.

Dominion Bridge Company.—The directors at the final dividend meeting for the company's current year declared the regular 2½ per cent. distribution. For the first quarter of the year the company paid 2 per cent. in dividend with a 2 per cent. bonus. The bonus was dropped in the second quarter, but the dividend was increased from 8 per cent. to 10 per cent. The total distribution out of the year's profits will, therefore, be 11½ per cent., against 20 per cent. in 1916, 8¾ per cent. for 1915 and 7¼ per cent. for 1914. The year closes on the 31st of this month and the results to be reported are likely to be satisfactory. The profits from the Quebec bridge, it is said, will not be shown. Dividend is payable November 15 to shareholders of record October 31.

Capo Breton Electric Company, Limited.—The company reports for the 12 months ended August 31st, 1917, the following:—

	Aug. 31, 1917.	Aug. 31, 1916.	Increase.
Gross earnings	$437,604	$385,278	$52,325
Operating expenses and taxes	226,661	225,931	40,729
Net earnings	$170,943	$159,346	$11,596
Interest charges	63,358	63,155	202
Balance	$107,585	$ 96,191	$11,393
Sinking fund requirements	15,360	15,377	*17
Balance (for reserves, replacements and dividends)	$ 92,225	$ 80,814	$11,411

---

*Decrease.

Sarnia, Ont.—Sarnia Orange Association, Limited, $40,000. R. Kenny, R. E. Lescur, C. Hoppe.

Ottawa, Ont.—M. J. O'Brien, Limited, $20,000,000. M. J. O'Brien, J. L. Murray, H. A. Jordan.

Quebec, Que.—The Warwick Machine Company, Limited, $100,000. J. F. Julien, S. Fleury, J. A. Boulé.

Woodstock, Ont.—Potato Producers Company, Limited, $50,000. R. J. Graham, G. K. Graham, J. Bone.

Arnprior, Ont.—The Arnprior Cabinet Company, Limited, $100,000. D. O'Connell, E. Barry, R. J. Simpson.

Calgary, Alta.—Great West Tractor Company, Limited, $700,000. T. M. Tweedie, R. M. Spankie, I. Kirwan.

Point Aux Trembles, Que.—Morin Packing Company, Limited, $49,000. J. A. Morin, J. Morin, J. L. Morin.

Cranbrook, B.C.—Bowness Export Company, Limited, $40,000. A. C. Bowness, H. L. Bowness, L. B. Blaine.

Gravenhurst, Ont.—The Doe Lake Telephone Company, Limited, $2,170. C. Laycock, F. Hammond, A. D. Hays.

Spruce Falls, Ont.—Spruce Falls Pulp and Paper, Limited, $3,500,000. T. H. Barton, C. M. Garvey, T. M. Weatherhead.

Three Rivers, Que.—La Manufacture de Seaux et Boites de Trois Rivieres, Limited, $99,000. L. Gilbert, O. Gilbert, L. Trudel.

Calgary, Alta.—The Western Empire Resources Company, Limited, $50,000; the Lodestar Development Company, Limited, $50,000.

Oakville, Ont.—The Aluminum Ware Manufacturing Company, Limited, $100,000. M. H. Mairs, W. C. Davidson, M. J. Falmsley.

Sault Ste. Marie, Ont.—The Fruit Producers Company, of Beamsville, Ont., Limited, $40,000. C. A. McKane, W. B. Moorhouse, C. N. Smith.

Winnipeg, Man.—The Western Mining and Development Company, Limited, $25,000. H. Rosenberg, R. Andre, K. Jampol; the Magnet Metal Company, Limited, $5,000. G. A. Maclean, H. R. Eade, G. M. Larson; Port Nelson Fish Company, Limited, $100,000. A. M. Bergseth, C. P. Guthrie, G. Hancock.

Toronto, Ont.—Crane Braid Manufacturing Company, Limited, $40,000. L. G. McAndless, R. J. Haffey, C. Seccombe; Ignition Repair and Supply Company, Limited, $40,000. L. J. Pashler, B. T. McAvoy, M. Punshon van der Voort; the Leader Printing Company, Limited, $25,000. W. L. Leader, G. E. Leader, J. W. Curren; Multipost Company of Canada, Limited, $40,000. D. B. Menzies, J. A. Ryan, A. J. Hodgins; Rockwood Oil and Gas Company, Limited, $1,000,000. L. P. Millard, W. A. Brodie, F. E. Moore; Vandorf Brick Works, Limited, $40,000. F. Regan, E. Murphy, T. J. Lawrence; Woolstox, Limited, $40,000. J. C. Derrett, W. H. Ford, H. Goldstein.

Montreal, Que.—Thos. Webster, Limited, $20,000. T. W. Webster, C. Currie, D. I. Webster; Lands and Buildings, Limited, $1,000,000. W. Jerry, L. Kent, A. Leonard; Select Realties, Limited, $20,000. F. G. Bush, G. R. Drennan, G. A. Coughlin; Atlas Export Company, Limited, $100,000. W. McBain, G. F. Macdonnell, E. M. Macdonnell; Hoyle Industrial Company, Limited, $250,000. W. K. McKeown, L. C. Herdman, G. E. Chart; the Universal Trade of Canadian Products Company, Limited, $100,000. L. Desmarais, P. Gendron, A. Gaillardy; Anglo-American Shipping Company, Limited, $20,000; G. V. Cousins, A. H. Elder, S. Vineberg; Ucan Specialties (of Canada), Limited, $100,000. S. W. Jacobs, G. Gauthier, Papineau Couture, L. Fitch.

EQUITABLE LIFE MUTUALIZATION CASE

Judge Ward Rogers and Learned Hand, sitting at the United States Circuit Court of Appeals in New York on Tuesday heard arguments on the appeal taken by the Royal Trust Company, of Montreal, as trustee and executive of the estate of the late Sir Wm. VanHorne and other minority stockholders as plaintiffs in a suit over the mutualization of the Equitable Life Assurance Society, as referred to in *The Monetary Times* issue of September 28th.

The appeal is from the decision of Judge Hough, of the United States District Court in denying a temporary injunction to restrain the officers and directors, policyholders and the state superintendent of insurance from proceeding with the proposed plan of mutualization.

Henry Deforest Baldwin made arguments for plaintiffs and Chas. Evans Hughes presented the arguments for the Equitable Society.

Mr. Baldwin maintained that the present plan was intended to keep control of the resources of the Equitable Society, amounting to nearly $600,000,000, in the hands of the present board of directors. The plan is objected to by minority stockholders on the ground that there is discrimination against minority stock.

BANK CLEARINGS

The following are the bank clearings for the weeks of October 19th, 1916, and October 20th, 1917, respectively, with changes:—

	Week ended Oct. 20, '17.	Week ended Oct. 19, '16.		Changes.

Directions for Employers

Who Purpose Claiming Exemption for Class One Men in their Employ

THE following course is recommended for employers who have in their employ any number of men bachelors and widowers without children (not otherwise excepted) who were 20 years old on the 13th October, 1917, and whose 34th birthday did not occur before January 1st, 1917, and who propose claiming exemption for any of these men, to continue in work which is deemed to be in the National interest:

First, it will simplify matters for you and for the exemption tribunals if you instruct Class One men in your employ to go up for medical examination at the nearest Medical Board Centre.

Only Class One men, who upon medical examination are placed in Category A are liable for immediate service under the Act. Class One men placed in Categories B, C or E satisfy immediate requirements if they attach their medical report to their claim for exemption.

Employer's Statement and Schedule

Second, prepare a full statement of the total number of your employees, grouping them according to their respective occupations and qualifications and stating the number in each group. Indicate the possibility or otherwise of replacing the labour of Class One men with the labour of those unavailable for military service, or outside the statutory class called up; the extent to which the withdrawal of men in the statutory class would affect the business, the reason for considering that the carrying on of the business is in the National interest, and such other facts and circumstances as may appear to be relevant.

Append to this general statement and classification, a schedule of the names, ages and occupations of all men in Class One, indicating as to those who have been medically examined, the medical Category in which they have been placed, noting against each name whether or not you propose to claim exemption on behalf of the man.

Where exemption is claimed employer should state his opinion whether such exemption should be conditional on the man's continuing to follow his present occupation and whether it would suffice if exemption were granted for one, two or more months, as the case may be.

A copy of both statement and schedule should be prepared for each man for whom the employer is applying for exemption.

Forms for Exemption

These forms may be obtained on request from any Post Master, who will transmit the forms when filled in, to the Registrar.

Claims for exemption must be made not later than November 10th.

North American Life Assurance Co.
HEAD OFFICE - TORONTO, ONT.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

Borrow and Buy

Your Boy in France Does Not Offer a *Tenth* of His Life To His Country

HE OFFERS HIS ALL. When he goes over the top of the trench, out into the hell-on-earth of No Man's Land, he offers the magnificent sacrifice of ***everything*** he has and ***everything*** he is. He does this that you, your wife and your children may live in security.

The need for argument on buying Government bonds has passed. There can be no argument when you are simply asked to lend your money on the best security in the world at a substantial interest rate to ***avert bloodshed and suffering.***

You have made up your minds. You are going to buy Canada's Victory Loan Bonds.

BUT HOW MANY BONDS?

Your boy gives his ALL. Will you lend fifty dollars when you can lend five hundred? Will you lend five hundred when you can borrow enough to lend ten thousand?

Go to your bank to-day and put every dollar you can borrow, *at work saving that boy's life.*

DELAY COSTS LIVES—THE LIVES OF OUR OWN SONS AND BROTHERS

Canada's Victory Loan, 1917

September Bank Statement Reflects Crop Movement

CIRCULATION *Increased 9 Per Cent.—Current Loans in Canada Total $752,000,000—Total Deposits are $1,417,000,000; Savings Deposits are Now Only $36,000,000 Short of a Billion Dollars.*

	September, 1916.	August, 1917.	September, 1917.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	**$454,148,049**	**$439,995,259**	**$451,749,532**	**— 0.65**	**+ 2.50**
Deposits after notice	**816,374,171**	**952,591,821**	**965,393,541**	**+17.13**	**+ 1.46**
Current loans in Canada	**752,545,756**	**836,429,670**	**855,306,953**	**+13.06**	**+ 2.26**
Current loans elsewhere	**69,949,215**	**87,082,847**	**87,265,325**	**+26.08**	**+ .20**
Loans to municipalities	**38,708,745**	**43,940,176**	**42,721,563**	**+10.50**	**— 2.03**
Call loans in Canada	**88,145,851**	**71,204,351**	**72,421,187**	**—18.18**	**+ 1.40**
Call loans elsewhere	**173,877,586**	**176,610,625**	**166,480,004**	**— 4.04**	**— 5.60**
Circulation	**135,438,550**	**162,696,039**	**178,139,958**	**+31.8**	**+ 9.18**

THE above are the changes in the principal accounts of the Canadian banks at the end of September. The savings deposits at $965,000,000, note circulation at $177,500,000 and total assets at $2,126,000,000 are new high levels. The statement, in the rise in circulation, in current loans, and in other accounts, reflects the beginning of crop financing.

Domestic deposits for the past thirteen months are as follow:—

	Deposits payable on demand.	Deposits payable after notice.
1916—September	$454,148,049	$816,374,171
October	489,230,234	814,297,404
November	450,277,454	836,593,260
December	458,208,417	845,006,717
1917—January	427,308,526	864,163,344
February	430,331,801	880,456,637
March	448,151,528	888,765,698
April	471,312,285	874,948,724
May	443,839,847	892,562,657
June	449,689,670	900,510,552
July	450,840,356	929,442,340
August	443,317,275	806,774,687
September	451,749,532	965,393,541

Demand deposits were 2.50 per cent. higher in September than in August and at the end of September exceeded $451,000,000. That total is higher than at any time since last April. Deposits payable after notice, usually regarded as savings, total $965,000,000, only $36,000,000 short of a billion. This is the highest level this account has attained and is a gratifying record in view of the war loan offering on September 12th.

The course of the deposits account during the past five years is shown in the following table:—

September.	On demand.	After notice.	Total.
1913	$381,737,513	$621,249,585	$1,002,987,098
1914	348,284,206	658,401,501	1,006,685,707
1915	350,315,280	702,339,851	1,052,655,131
1916	454,148,049	816,374,171	1,270,522,220
1917	451,749,532	965,393,541	1,417,143,073

Total deposits at the end of September were $1,480,000,000, an increase during the year of $148,000,000. Total deposits are $416,000,000 greater than four years ago. The expansion in the deposits accounts during the past few months has been stimulated by the export movement of grain and other agricultural produce held through the winter months. By September, stocks had been cleared out and the country started on a new harvest. The influence of the current harvest, in view of the rapid movement of grain, is likely to be reflected in the near future in the savings deposits account of the bank statements during the remainder of the year. It is necessary that ample funds should be provided for the establishments of credits for British purchases here. The increase of $16,000,000 in savings deposits during September last is satisfactory in that regard. In July the increase was $30,000,000 and in August $23,000,000.

The trend of the bank loans for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1916—September	$752,545,756	$88,145,851
October	774,928,222	90,412,023
November	813,791,947	89,395,370
December	820,378,557	82,569,983
1917—January	806,470,147	70,737,064
February	813,302,717	78,686,535
March	843,054,466	76,478,708
April	880,523,807	82,737,417
May	844,890,580	78,514,708
June	839,355,782	76,085,220
July	829,560,700	71,376,788
August	836,429,670	71,204,351
September	855,306,953	72,421,187

Current loans in Canada were higher at the end of September than in any month since April last. With one exception (April) the September total is the largest of any

Of the deposit in Central Gold Reserves $18,210,000 is in gold coin; the balance is in Dominion Notes.

during the past thirteen months. This record, together with the rise of about $12,000,000 in circulation, are the first signs of the crop financing. Circulation has continued to increase during the past few months. The crop movement, high commodity prices, high wages and activity in business have all contributed in the continued appreciation in circulation. The increase in September was $21,000,000 or over 9 per cent. As additional cover for the excess issue, the banks' deposits of gold and Dominion notes in the Central Gold Reserve increased $11,500,000, establishing new high figures at $64,870,000.

The following table shows the course of the principal loan accounts during recent years:—

September	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1913	$866,251,630	$46,402,913	$70,047,291	$86,639,411
1914	820,514,921	41,347,231	70,063,414	89,521,589
1915	771,098,757	49,147,877	71,578,886	135,108,412
1916	752,545,750	60,040,215	88,145,851	173,877,586
1917	855,300,953	87,265,325	72,421,187	166,480,004

Current loans in Canada were larger in September last than in any September since that of 1913. Call loans in Canada, at $72,000,000, were at about the average levels. Current loans abroad increased slightly during

Dominion Government--Sept., 1917

T. C. BOVILLE, *Deputy Minister of Finance.*

the month and were 26 per cent. greater than a year ago. There was a decrease of $11,000,000 or 5.60 per cent. in call loans abroad, chiefly at New York. This fact seems to indicate that the banks are drawing upon their external reserve to provide for the needs of business here. That such a movement was in progress was indicated in the reversal of the New York exchange rate to Canada's favor during the month.

The course of call loans abroad for the period beginning two months before the declaration of war is of interest and is shown in the following table, compiled by *The Monetary Times*:—

	1914.	1915.	1916.	1917.
January .	....	$ 85,796,641	$134,248,552	$155,747,476
February .	....	89,890,982	139,138,651	162,344,556
March ..	.. .	101,938,685	141,889,989	161,616,735

The September bank statement reflects industrial and agricultural activity and prosperity.

SECOND LIBERTY LOAN STRIKING SUCCESS

Three Billions Asked For, Five Billions Subscribed—Money Market Outlook

The second Liberty Loan has passed the $5,000,000,000 mark. A last-day drive, on October 28, of great proportions throughout the nation brought in more than $1,000,000,000, and carried the total several hundred million dollars beyond the maximum sum for which treasury officials had hoped.

Federal reserve banks were struggling last week under an avalanche of last-minute subscriptions to form some idea of the grand total. Secretary of the Treasury McAdoo has announced that the loan was an overwhelming success.

Heavy Oversubscription.

The New York Post, commenting on the result, says: "The immense success of the second Liberty Loan—for, in spite of what has been said of the 'five-billion goal,' the fact remains that only $3,000,000,000 was definitely asked for by the treasury, and that everything in excess of that is oversubscription—adds a highly interesting chapter to the story of war finance. Both the 50 per cent. oversubscribed war loan of June and this month's achievement will always remain outstanding landmarks in the present war's history.

"That no European loan during the war has been oversubscribed at all is well enough known. The more interesting fact in the present situation is that the response to this loan has far exceeded the largest applications for any war loan, unless the British government's record of £988,706,000 cash subscriptions to last January's loan (in American values, roughly, $4,943,500,000) should be shown to be the exception. For that test we must wait until the full returns of our own loan are in.

Three Important Inferences.

"The three important inferences which will be drawn from our second war loan are that the available wealth and resources of this country have not been overrated; that the people's patriotism and readiness to sustain their government have been greatly underrated, and that the people as a whole have had a useful and very necessary lesson in sound investment of their money. Of still greater political and international significance, perhaps, is the certainty that this financial achievement puts the seal on our new position as the leader in world finance."

Money Market Outlook.

Discussing the money market outlook, the same paper says: "With the Liberty Loan subscription about to close, and with a far larger amount of capital than before involved in the applications, our banking community has already begun figuring upon the immediate prospects of the money market. What will probably be the Federal Reserve operations pending instalment payments on the loan? Will the sudden stiffening in money rates that followed the close of the canvass of the first loan in June last be repeated? In replying to these queries, our bankers express varying views. Some contend that the incentive for holding rates down would vanish, now that the loan has been placed; that possibilities of new corporate financing which has been held in abeyance since the beginning of the Liberty bond campaign would in themselves make for an ultra-cautious policy on the part of lenders for the remainder of the year.

Does Not Mean Easy Money.

"This argument does not agree with the analysis of the situation by other large financial interests, who have made a close study of conditions in a country-wide sense. It is their impression that, while no agreement has been entered into by banks, it will be found that a far more liberal use of the discounting privileges offered by the Federal Reserve banks is being made than was witnessed after the loan of June.

"That this policy will be adopted in New York particularly, is a firm conviction of those who have conferred on the subject. With stabilization of rates in that market, concern as to what might take place at other centres would be minimized—and that, according to the views held in Philadelphia, is the paramount concern. This does not mean easy money; but it does indicate that rates closely approximating current quotations will prevail until the end of 1917."

FOOD CONTROLLER'S ACTIVITIES

Summary of the Work Undertaken by Hon. W. J. Hanna

The question has been asked: "What is Canada's food controller doing?" To answer this completely is not practicable here, but following is a list of some of the Food Controller's activities:—

Regulation restricting the use of beef and bacon and requiring substitutes for white bread in public eating houses. Large saving of beef and bacon and a considerable saving of white flour effected. Campaign inaugurated to encourage the use of fish, for better transportation of fish, and to increase production. Plans developed, in co-operation with provincial governments, for utilization of inland waters as source of fish supply.

Must Organize to Conserve Food.

Organization in each province to induce people to conserve food and to decrease their consumption of foods needed by the allies. A committee is dealing with the potato situation to ensure satisfactory distribution and to encourage consumption and to save bread. Milk conditions are being studied by food experts of the leading Canadian cities to see what may be done to reduce the cost to civilians. Situation is dependent largely upon evaporated milk demands. Other questions related to the milk supply are under consideration. Important information already obtained by committee.

Profits of millers have been limited to a maximum average of 25 cents on the milling of sufficient wheat to make a barrel of flour of 196 pounds and the offals produced in connection with such milling. Arrangements have been made for the milling in Canada of three standard grades of flour, representing the highest extraction of the wheat that will make a wholesome loaf. The food controller has secured power to require returns and any information desired from wholesale dealers in food.

Regulate Profits of Wholesalers.

Profits of wholesale dealers in fruit and vegetables are to be kept within a reasonable percentage. Dining car menus simplified with a view to food saving, the railway companies having taken action at the suggestion of the food controller.

Profits in the wholesale fruit trade in Western Canada and general conditions of the trade are being investigated by representatives of the food controller who are still in the west. Food Controller is assisting in supplying Western Canada's demand for apples with Nova Scotia crop, which usually goes to Great Britain, but this year lacks a market overseas. Gasoline shortage averted in both Atlantic and Pacific fishing industries by prompt action of the fish committee of the food controller's office.

Complicated situations which have arisen in connection with the importation of corn and sugar being dealt with.

Hold Food Control Conferences.

Conferences have been held by Mr. Hanna with Lord Northcliffe and representatives of the United States food administration with a view to an understanding between the food control organizations of Canada and the United States and the allies' buyers in America.

Questions in regard to allocation of certain important food supplies are being worked out.

Educational campaign has been instituted covering all provinces. This work will be rapidly developed. Pledge card campaign undertaken in Ontario in co-operation with the provincial organization of resources committee. Similar campaigns are being prepared in other provinces. Arrangements made in co-operation with the department of marine and fisheries, to enable marketing as far east as Winnipeg of certain varieties of Pacific food fish at reasonable prices.

Representations made to British government in order to secure supply of linen netting for gill nets needed by Canadian fishermen. Active assistance of prominent business men enlisted in work of food control organization. Steps have been decided upon, in co-operation with the department of agriculture, to establish exchange depots to encourage the saving of calves by facilitating distribution. Efforts will be made to encourage increased production of live-stock in Canada.

INCREASED RAILROAD RATES

A despatch from Washington last week announced that the Interstate Commerce Commission had given the Pennsylvania Railroad permission to file without formal hearing increased commodity rates on iron and steel from points in eastern trunk line territory to destinations in West Virginia, Pennsylvania and Ohio. This is an important ruling and means virtual approval of the higher rates

A number of increases have been approved on commodity rates in the United States since the 15 per cent. rate decision, the general plan being to adjust domestic rates on iron and steel on the same basis as the export rates, which were increased some time ago. It is understood that the new rates will mean a considerable increase in revenue, which in connection with the indication of the commission's favorable attitude toward higher rates, relieves railroad officials of much anxiety—in the United States.

What about Canada? We must be prepared to bear also a substantial increase in railway rates. It is not a matter of the relative merits of railroad operation by government or corporations. Were the government to own and operate all our railroads to-morrow, they would find it absolutely necessary to increase rates. The only alternative would be the creation of deficits which the taxpayers would carry, and that would be only another way of paying the increase necessary in railway rates.

Railroad transportation is one of the few commodities in this country which has been compelled to maintain prewar prices, despite the substantially increased cost of labor, materials, and other things which the railroad corporations have to buy. The Grand Trunk System, for example, is doing at present an immense volume of business. It is using its equipment to the limit, and is getting little or nothing for it. For the present calendar year the company's gross earnings will be the greatest in the history of the company, and its net earnings (owing to increased costs) will be practically the lowest on record. There are in England thousands of debenture holders who are dependent on their investments in the Grand Trunk for their maintenance, and their cause is just.

What the railways ask for is such an increase in rates as will enable them to go on and to cover a portion of the extra expense to which they have been put owing to the changes due to the war.

VICTORY BONDS AND THE FARMERS

In purchasing Victory Loan Bonds the farmers of Canada will be furnishing the means to their best customers to purchase the products of their farms. Much of the proceeds of the Victory Loan, both the amount used by the Canadian government and the amount advanced to Britain as credits, will be expended in purchasing food and supplies for their armies from the farmers of the country. There are other reasons, however, that make the Victory Loan bonds especially desirable investments for farmers.

A safe investment is particularly suited to a farmer because he is in most instances at a distance from bond markets and not in position either to know of or immediately act upon information of matters affecting the value of bonds. The Victory Loan bonds are invincibly secure, backed as they are by the resources of Canada and the faith and credit of a people who have always respected their obligations, and they are of stable value and liable to little or no fluctuations in market value.

The farmer is a busy man and often has neither the time nor the opportunity to study the question of finance and bond values. The Victory Loan bonds being bonds about which there can be no question, he can therefore rest assured that he has made no error in judgment when he puts his money into them.

OUR WHEAT FOR AMERICAN MILLS

There are few buyers of Canadian wheat this season, but the few are purchasing every available bushel at a substantial price. The British Purchasing Commission and the Canadian and American millers are the three principal, if not the only buyers, of our crop. The United States and Canada are working actively and harmoniously in the best interests of the Allies, against a common enemy. Arrangements have been made, for example, between the United States food administration and the Canadian food controller by which large supplies of Canadian wheat will be shipped via the Lakes to eastern United States mills, and the flour mills in that section will be immediately started running at full capacity. The previous arrangements by which milling in the Minneapolis and northwest sections was reduced from 100 per cent. capacity to 60 per cent. capacity in order to allow the lake movement of wheat from the Northwest to eastern mills has, therefore, been removed, and the Minneapolis and Northwest mills generally are now working at full capacity.

The price of Canadian government purchases of Canadian wheat has been fixed at the same price as American wheat, and the introduction of Canadian wheat into the American mills will at once relieve the pressure on flour supplies in the eastern section of the United States. The price of government purchases of wheat will not be altered. The price was arrived at by a commission appointed by the President, and the direction of the President to the food administration was that the price should be adhered to by the food administration without alteration.

There will, therefore, be no alteration in the price of the 1917 harvest except if peace should intervene and, under the law, the food administration come to an end. In such an event the large quantities of wheat now inaccessible in Australia and India would be available to the world's markets and the maintenance of the present price of wheat would be highly unlikely.

STOCK EXCHANGE AND WAR LOAN

The fixing of minimum prices by the Montreal and Toronto stock exchanges this week was the right thing to do. The stock exchange, while an excellent institution, is exceedingly sensitive. The world's events send its spirits up and down as the mercury in the thermometer. The stock exchange view is usually that of the immediate. Fluctuations are largely based upon what happened yesterday, what is happening to-day and what will happen to-morrow. It seldom takes a long-range view. Ultimate achievements are its short suit and it does not always get a clear perspective.

There was no good reason why the cause of Canada's Victory Loan, the most important matter to-day, should suffer from the sensitive feelings of the stock market. That was why Wall Street indications of a possible financial panic, were checked here. Financial panics seldom have a reasonable basis.

All that is represented by the subscription of the war loan affects the very existence of the stock exchanges. Our stock brokers are engaged in helping to make the Victory Loan an overwhelming success. One eye on the ticker and one eye on the loan is an embarrassing feat. Financial panics have no business here. Limitations have therefore been placed on the ticker's activities. Our stock brokers now have both eyes on the war loan.

OCTOBER MUNICIPAL BOND SALES

Victory Loan Activities Account for Low Volume of Sales During Past Month

The municipal bond sales in Canada for October as compiled by *The Monetary Times* were $398,771, compared with $440,068 in September and $1,361,665 for October of last year. The preparations of the Victory Loan sale shortly, and the monopoly of the money markets by war loans generally, account for the low amount of sales last month.

Comparing the record of October, 1916, with that of the month just ended, the bond sales are as follow:—

Sold in	Oct., 1917.	Oct., 1916.
Canada	$398,771	$1,361,665
United States	......	....
	$398,771	$1,361,665

The municipal bond sales in Canada for the first ten months of the year, according to *The Monetary Times*' bond record, were as follow:—

	1914.	1915.	1916.	1917.
January	$ 1,053,137	$ 1,784,047	$ 1,090,441	$ [illegible]
February	5,005,330	3,047,011	1,411,000	458,874
March	5,123,170	[illegible]	2,027,741	220,013
April	2,847,053	[illegible]	1,070,852	1,182,074
May	6,400,755	3,404,281	2,040,000	1,375,030
June	4,017,857	2,305,744	[illegible]	[illegible]
July	2,180,758	[illegible]	1,521,525	[illegible]
August	395,395	1,087,415	853,447	[illegible]
September	585,050	2,768,484	960,435	440,268
October	2,874,872	1,245,874	1,361,665	398,771
Totals	$32,924,289	$28,587,629	$17,725,298	$16,148,523

There were no Canadian bond sales in the United States in August, September or October. Sales for the first ten months of 1914, 1915, 1916 and 1917, were as follow:—

	1914.	1915.	1916.	1917.
January	......	$ 340,000	$ 3,183,215	$2,285,000
February	$ 50,000	6,471,000	899,500	485,725
March	18,000	6,543,947	595,000	95,000
April	25,000	7,100,825	2,158,306	1,563,200
May	1,750,000	600,000	7,219,000	......
June	2,100,000	......	3,393,243	80,000
July	1,130,000	890,000	3,631,200	1,030,000
August	35,000	750,000	97,300	......
September	90,000	6,748,342	200,000	......
October	......	1,589,000	......	...
Totals	$5,198,000	$31,033,114	$21,285,564	$5.538,925

The following are the details of sales in Canada during October:—

Ontario.

ADDRESS:

THE MANAGER, BOND DEPARTMENT,
TORONTO 62

PERSONAL NOTES

MR. GEORGE W. GOODALL, western manager of *The Monetary Times*, is now visiting the prairie provinces and British Columbia.

MR. J. M. MACKIE, vice-chairman of the Dominion executive committee of Canada's Victory Loan campaign, in a statement to *The Monetary Times* this week, said: "It is most gratifying to see the whole-hearted manner in which prominent business men of all our commercial centres are helping in this Victory Loan campaign."

MR. E. R. WOOD, Toronto, is one of the most strenuous workers in the cause of Canada's Victory Loan. As chairman of the special subscriptions committee and a member of the Dominion executive committee of the loan campaign, he has been constantly in touch with the various committees of other cities to further the best interests of the loan. In Montreal to-day, Ottawa to-morrow, Hamilton the next day, Toronto the following day, at conferences and committees, interviewing the heads of large corporations, he is working by far the greater portion of each day's 24 hours in connection with the Loan. To the lot of the special subscriptions committee, of which he is chairman, will fall the task of accounting for the large subscriptions, individual and corporate, to the Loan. They will total a substantial amount, probably half the sum asked for by the finance minister. Mr. Wood is one of the most respected and best liked financial leaders of the country. He has a free and easy manner which begets confidence and brings hard work, in a willing manner, from his staff. While his interests are widespread, many board meetings will be without his counsel until the Victory Loan has been made a success. He is president of the Central Canada Loan and Savings Company, and of the Dominion Securities Corporation. He is also vice-president of the National Trust Company, and a director of the Canada Life Assurance Company, Canadian Bank of Commerce, Western Assurance Company, British America Assurance Company, Dominion Steel Corporation, Massey-Harris Company, Toronto Power Company, Toronto Railway Company, Shawinigan Water and Power Company, Mexican Light and Power Company, and Mexico Tramways Company. He is also a member of the Imperial Munitions Board, Ottawa. He has been associated with the Central Canada Loan and Savings Company since 1884, being elected president in 1914. As a public-spirited citizen he has obtained a splendid reputation. He is chairman of board of governors of the Grace Hospital, Toronto, regent of the Victoria University, a director and past-president of the Central Y.M.C.A., Toronto, and president of the Y.M.C.A. International Convention in Toronto in 1910. He is active in Red Cross and other patriotic work.

THE MCGAW DWYER, LIMITED, has taken over the business of McGaw Grain and Lumsden Elevator Company, Toronto. The officers of the new company are: W. E. McGaw, president and general manager; W. H. Dwyer, of the W. H. Dwyer Company, Ottawa, vice-president; other directors are H. D. Dwyer, Montreal; Irving De Lamater, of Fort William; Henry Ritz, Gretna, Man.; J. J. Stevenson, Richlea, Sask.; Otto Ritz, Winnipeg. Mr. N. T. Barker is treasurer, and Mr. O. Ritz, secretary. The new company will do a general grain and elevator business.

MR. GEORGE W. GANONG, lieutenant-governor of the province of New Brunswick, died at his home this week. Mr. Ganong was appointed lieutenant-governor last June. He [illegible] N.B., in the House of Commons [illegible].

COLONEL [illegible] EDYE, chief commissioner of the Trust and Loan Company of Canada, is returning to England, after twenty years' residence in Canada, with the intention of retiring at the expiration of the six months' leave of absence. For some time this step has been desired by Colonel Edye, on account of the unsatisfactory condition of his health, but it has been postponed owing to the necessity of keeping in close touch with financial changes during the war. Those who follow the annual reports of the Trust and Loan Company of Canada know how greatly the business of the company has expanded during the period in which Colonel Edye has been connected with it and will appreciate the regret with which the directors consented to accept his resignation. Colonel Edye leaves office with a splendid reputation as a financial executive and as a keen student of Canadian affairs.

BANK CLEARINGS

The following are the bank clearings for the weeks of October 26, 1916, and October 27th, 1917, respectively, with changes:

OCTOBER FIRE LOSSES

Total was Smallest of the Year — Twenty-three Deaths Last Month

The Monetary Times' estimate of Canada's fire loss during October is $704,605, as compared with the September loss of $1,301,700 and $1,077,815 for October of last year. The following is the estimate of the October losses:—

Fires exceeding $10,000 ...	$492,700
Small fires reported	120,000
Estimates for all unreported fires	91,905
	$704,605

The Monetary Times' record of the first ten months of the past four years shows the following monthly losses:—

	1914.	1915.	1916.	1917.
January ..	$ 2,796,312	$ 1,249,886	$ 1,649,217	$ 1,918,660
February .	2,920,749	1,019,556	3,275,600	2,009,953
March ..	2,660,666	1,031,696	1,406,501	2,050,650
April	1,916,235	1,403,747	1,460,437	1,317,714
May	1,935,516	881,855	1,850,205	1,163,110
June .. .	1,267,416	1,157,156	494,557	1,184,627
July	2,033,139	773,269	3,039,634	1,101,734
August ..	2,921,379	403,693	1,057,109	1,230,183
September ...	1,356,281	1,116,109	981,703	1,301,700
October	1,326,565	1,290,325	1,077,815	704,605
Totals ..	$21,134,258	$10,987,292	$16,232,778	$13,982,936

The fires reported in October at which the losses amounted to $10,000 and over were:—

Brantford, Ont., October 15, Kitchen Overall Company's plant, $13,000.

Moncton, N.B., October 11, barn, $10,000.

Wellington, Ont., October 9, Hotel Alexandria, $15,000.

Cornwall, Ont., October 19, Montreal and Cornwall Navigation steamer, $2,500.

Hastings, Ont., October 23, Hastings Tanning Company's plant, $200,000.

Maryfield, Sask., October 12, Saskatchewan Co-Operative Company's elevator, $10,000.

New Waterford, N.S., October 23, store, $10,000.

Sydney Mines, October 24, Nova Scotia Steel and Coal Company's property, $15,000.

Isle Perrot, Que., October 26, Canadian Explosive Company's plant, $200,000.

Toronto, Ont., October 24, Aberdeen Chambers, $16,000.

Among the reported causes in October were: Spark from engine, 1; incendiarism, 2; smoking in bed, 1; gasoline and oils uniting, 1; defective chimney, 3; spark from chimney, 2; spark from emery wheel, 1; children playing with matches, 3; overheated fire box, 1; live coal, 1.

The structures damaged or destroyed last month included: boat house, 1; barns, 7; dwelling houses, 20; shacks, 2; hotels, 3; factories, 3; saw and grist mill, 1; paper mill, 1; livery barn, 1; stable, 1; stores, 2; barber shop, 1; foundry, 1; tanning plant, 1; elevator, 1; car, 1; residential section, 1; plumbing shop, 1; synagogue, 1.

The fires at which fatalities occurred were:—

Montreal, Que., Oct. 3	Playing with matches	1
Fillmore, Ont., Oct. 3	Fighting bush fire	6
Montreal, Que., Oct. 9	Playing with matches	1
Sarnia, Ont., Oct. 4	Ignited clothing	1
Tillsonburg, Ont., Oct. 5 ..	Trapped in burning silo	1
East Angus, Que., Oct. 12 ..	Trapped in burning house ..	1
Toronto, Ont., Oct. 16	Playing with matches	1
Little Shemogue, N.B., Oct. 16	Playing with fire	1
St. Stephens, N.B., Oct. 19	Trapped in burning house ..	1
Toronto, Ont., Oct. 17	Burns from oil stove	1
Le Pas, Man., Oct 16 .. .	Lighting fire with gasoline	2
Toronto, Ont., Oct. 23 ...	Explosion of oil stove	1
Toronto, Ont., Oct. 25 ...	Ignited clothing	1
Estevan, Sask., Oct. 24	Trapped in burning house ..	1
Avonlea, Sask., Oct. 12	Burns from exploded kerosene can	1
Kerrimuir, Alta., Oct. 25 .	Overturned lantern	1
Montreal, Que., Oct. 24 ..	Exploded oil lamp	1
	Total	23

Loss of child life this month is again high, one third of the fatalities being children either playing with matches or fire; quite a few adult cases arise from exploded oil stoves. This year to date 171 lives have been lost in fires.

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the first ten months of 1917, as compared with previous returns:—

	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.
January ..	27	27	27	14	26	3	10	21
February ..	15	12	11	21	18	11	23	19
March ..	20	[illegible]	24	22	27	23	23	20
April ...	7	[illegible]	15	11	22	14	6	15
May .	15	[illegible]	[illegible]	[illegible]	8	5	14	12
June .	52	[illegible]	[illegible]	[illegible]	12	2	6	9
July	15	110	9	9	8	13	268	19
August ..	11	22	16	20	[illegible]	14	30	12
September	[illegible]	[illegible]	[illegible]	27	[illegible]	27	6	21
October ..	16	17	21	15	9	7	39	23
Totals ..	218	280	153	199	242	119	425	171

In *The Monetary Times'* fire record for September, the loss at the Toronto Hydro-Electric Company's premises at Toronto, Ont., which occurred on September 27, was not included. The property loss was about $200,000, with $57,500 insurance. The addition of this loss increases the September total to $1,301,700.

PUBLICATIONS RECEIVED

Transportation.—Intermediate Manual of Railroads, giving revised statements of important companies. Issued for the new fiscal period in accordance with the requirements of the Interstate Commerce Commission. Issued by Poor's Manual Company, 80 Lafayette Street, New York. Price, $7.50.

Municipal.—The Toronto Annual is a useful and compact manual, and will prove a boon to either stranger or citizen. It is a complete guide to the city. It gives its financial, industrial and agricultural statistics and public buildings, amusement and residential sections, with a list of the principal reliable boarding-houses and cafés (an invaluable aid to the stranger). To the investor it offers a summary of the natural resources of Ontario. By a careful study of these he may form an estimate of the field for investment and industrial enterprise. A list of dividend days on the Toronto stock exchange is also given.

The Toronto Annual. Heaton's Annual Publishing Company, 32 Church Street, Toronto.

Agriculture.—That the permanent prosperity and ultimate success of an agricultural country is dependent not so much on its production of wheat, but rather on its advantages for the cheap production of farm products of higher value and in more concentrated form, is a creed that has not usually received much recognition as applied to Western Canada at the hands of either the government publicity departments or those of volunteer organizations. This, however, has always been the firm conviction of the Edmonton board of trade. "If," says Mr. F. T. Fisher in a letter to *The Monetary Times*, "we can produce a fair share of the beef, butter, hams, bacon and such like that are wanted—and we believe we can produce these to better advantage than any other portion of this continent—we care not who grows the wheat. We know that our land, which at present can be bought at considerably below the price of land in districts where conditions tend to exclusive wheat-growing, will constantly increase in intrinsic value under mixed farming, while land devoted to grain farming only must constantly deteriorate, no matter what the price may be. We feel confident that eventually the highest-priced farm land in Canada will be found in those districts which can produce beef, pork and milk at lowest cost." It was with these views in mind that a pamphlet, entitled "The Edmonton District, Central Alberta," just off the press, was prepared. There are two rather radical departures from the publicity material ordinarily put out regarding western agricultural resources. Of the 44 pages in the pamphlet only about half a page is devoted to wheat-growing, and only about similar space is allotted to the subject of free land. The pamphlet is free to anyone sufficiently interested to write and ask for it. It is a splendid little publication, and on original lines.

"The Edmonton District, Central Alberta." F. T. Fisher, secretary, Board of Trade, Edmonton.

Saskatchewan.—The local government board will receive bids up to Tuesday, November 6th, 1917, for the purchase of the following debentures:—

School Districts.—Haverhill, $400 10-years 7 per cent. instalment; Muriel, $1,900 10-years 7 per cent. annuity; Twin Hill, $2,000, 10-years 7 per cent. annuity; Vantage, $2,300 10-years 7 per cent. annuity; Prussia, $5,500 20-years 7 per cent. annuity; Sand Hill, $1,200 10-years 7 per cent. annuity; St. Jean Baptiste, $1,000 10-years 7 per cent. instalment; Claudia, $1,200 5-years 7 per cent. annuity.

Rural Telephone Companies.—Hafford, $13,200 15-years 7½ per cent. annuity; Avon Hill, $6,500 15-years 7½ per cent. annuity.

A separate bid must be made for each debenture tendered on, and the board reserves the right to accept the bid for any one or more of such debentures, the highest or any bid not necessarily accepted. To amount of bids will be added accrued interest. Bids for Regina funds and delivery, shall be made on a 7 per cent. basis in connection with the school district debentures, and a 7½ per cent. basis in connection with the rural telephone company debentures. Bids must be addressed to the secretary, the local government board, legislative buildings, Regina, Sask.

Saskatchewan.—The following is a list of debenture applications granted by the local government board from October 15th to 19th:—

School Districts.—Twin Hill, $2,000 10-years not ex. 8 per cent. annuity; W. M. German, Biggar. Westland, $1,800 10-years not ex. 8 per cent. annuity; J. Walker, Rapdan. Six-Mile Lake, $1,800 10-years not ex. 8 per cent. annuity; D. R. Hooper, Battleford.

Rural Telephone Companies.—Hilldrop, $5,500 15-years not ex. 8 per cent. annuity; W. A. Benson, Hilldrop. Mellow Lake, $1,000 15-years not ex. 8 per cent. annuity; A. G. Dixon, Swift Current. Flaata, $3,000 15-years not ex. 8 per cent. annuity; R. C. Marriott, Flaata. Longlaketon, $200 15-years not ex. 8 per cent. annuity; S. W. Arneill, Silton. Quill Plains, $2,800 15-years not ex. 8 per cent. annuity; A. E. Gregory, Watson. Springside, $4,800 15-years not ex. 8 per cent. annuity; W. W. Evans, Springside.

Village.—Estuary, $2,000 7-years, interest at 8 per cent. instalment. R. H. Street, Estuary.

The following is a list of debentures reported sold from October 15th to 19th, 1917:

School Districts.—Rose, $2,000, Fairyland, $1,900, Purple Hills, $2,100, South Trail, $1,200, East Butte, $1,600, Garrett, $2,000, Equity, $2,000, St. Cunigunda, $1,800; Goldman and Company, Regina. Semans, $10,000; Nay and James, Regina. Henderson, $1,600; Great-West Life Insurance Company. Belle Butte, $1,900; C. M. Gripton, St. Catharines. Kinistino, $8,000; Bond and Debenture Corporation, Winnipeg. Duval, $7,000; Nay and James, Regina.

Rural Telephone Companies.—Troy, $500; Saskatchewan Life Insurance Company, Regina. Bresaylor, $10,500; Mr. Thomas, Bresaylor. Hubbard, $6,000; Nay and James, Regina. Mair, $2,000, Wolfe, $8,000; Goldman and Company, Regina. Adams, $1,000; C. W. J. Burnett, Regina. Luseland East, $9,800, Luseland West, $10,000; Nay and James, Regina. Red Jacket, $200; D. McDougal, Moosimin. Wartime, $1,700; Wood, Gundy and Company, Saskatoon. Bredenbury South, $7,000; J. A. Thompson, Winnipeg. Third Meridian, $1,200, town of Davidson (sinking funds). Lakeside, $4,000, Union Bank of Canada.

[illegible] Ralston, $7,991; W. L. McKinnon and Company.

The following certificate has been issued by the municipal department of the province of British Columbia: Fernie, B.C.—By-law No. 174, sewers, $14,000. Interest, 5½ per cent.; repayable in equal annual instalments of principal and interest, $963.28 yearly for 30 years, and debentures 1 to 28 thereunder. Date of certificate, October 19th, 1917.

BRITISH COLUMBIA'S INSURANCE SUPERINTENDENT

Mr. H. G. Garrett, the new superintendent of insurance for British Columbia, was born in England in May, 1880, and educated at St. Paul's School, London, and University College, Oxford. In 1900 he was admitted a solicitor in England, and since coming to Canada in 1908, qualified in British Columbia as barrister and solicitor. He was appointed registrar of joint-stock companies for British Columbia on August 1st, 1912, and on October 1st, 1917, was appointed also superintendent of insurance.

H. G. GARRETT,
Appointed Insurance Superintendent, British Columbia.

Mr. George T. Holloway, the eminent metallurgist, who as nominee of the British Government, served as chairman of the Ontario Nickel Commission, is dead. A cablegram received at the Ontario department of lands, forests and mines this week stated that Mr. Holloway had died in London October 24th.

Mr. William B. Ellison, of Ellison and Ellison, Manhattan, N.Y., has specialized in New York for 30 years in the law of insurance. He is a member of the Bar of that city. He was called to the Ontario Bar in August, 1880, and graduated from the office of the then firm of Rose, MacDonald, Merritt & Coatsworth. He is a frequent contributor to financial and insurance journals.

Hon. F. B. Carvell, in an interview at Ottawa on Wednesday, indicated a policy of retrenchment in public works expenditures involving not only abstention on the part of the government from undertaking new projects, but also reduction of disbursements upon works already under construction. The government, he explained, required the money for war purposes and may discontinue work upon the improvement of Toronto harbor from the present until after the war.

OPEN ACCOUNT MORTGAGE

It Is Being Given a Trial in Western Canada--Long and Short Term Credit Combined

What is known as the open account mortgage has been introduced in the western provinces by the Trust and Loan Company of Canada. This form of mortgage combines long and short-term credit facilities. The discussions at the meetings of the joint committee of commerce and agriculture, composed of business men and members of the council of agriculture, seemed to disclose a loaning field amongst the better class of farmers which had not been reached by either the loan companies or the banks, it being claimed that the former were lending for too long and the latter for too short periods. Dissatisfaction was also expressed regarding various other matters which the companies could not remedy without discarding the form of mortgage that had been in general use for many years.

Practically the only remedy suggested was loaning on the amortization plan. This, however, would not do, as the companies have been desirous of making such loans, but the farmers would not accept them. While it is an excellent plan for people with a more or less fixed income, those engaged in an enterprise so hazardous as farming require something more elastic, because it is more difficult at times for a farmer to pay $80 than $800 in a more favorable season.

"We are all desirous of improving the relations between borrowers and lenders and most anxious to remove every cause of friction," said Mr. Joseph Campbell, commissioner at Winnipeg of the Trust and Loan Company of Canada, in an interview with *The Monetary Times*. "I, therefore, tried to work out a plan by which borrowed capital would be available for those farmers who were not being served by either class of financial institution and I also kept in view the several matters complained of.

Money When He Wants It.

"An ideal plan might be one which would enable the borrower to have money when and as long as he wanted it, with the privilege of repaying any portion thereof and stopping interest, and of redrawing from time to time if required without delay and without any additional cost.

"Under the old form of mortgage this could not be done, for the reason that payments made on account void the mortgage to that extent and the money could not be re-advanced without taking a new mortgage. We have been able to overcome this difficulty, however, by merely granting a line of credit, allowing the borrower to help himself within the limit of that credit, interest to be charged either annually or half-yearly on the maximum monthly balance (borrowers drawing at the beginning and repaying at the end of the month would pay interest only for the time they had the money). The mortgage is not made for a specific sum, but is a continuing security for the balance at debit of the mortgagor's account not exceeding the amount of the credit granted, and it is provided that the balance may be increased as well as diminished from time to time. No specific date is mentioned for payment of the principal, which never becomes due until twelve months after demand is made by the company (unless the mortgagor makes default in the performance of the covenants), while the borrower has the privilege of paying the whole sum or any part thereof at any time without notice or bonus.

Long and Short-Term Credit Combined.

"The mortgage is also designed to meet the case of a borrower who requires, say, half of the credit as a more or less permanent loan and the balance on open account. In such cases the permanent portion could be paid at any time by giving twelve months' notice, the open account portion without notice and either, or both, sums could be re-advanced as often as required without expense of any sort.

"In the event of the borrower giving a second mortgage or having a judgment registered against his lands, we could not make any further advances after receiving actual notice of such encumbrances, but the position of the parties under the new mortgage would then be practically the same as though the old form had been used.

"It seems to me that this plan meets the requirements of the investment field in 'No Man's Land,' between the loan companies and the banks. Now let us see to what extent the various items complained of may be remedied by adopting this plan:—

"(1) Rate of interest.—The rate is of minor importance compared with the annual interest charge. For example, a man requiring money for, say, five months and no longer, would do better to borrow for that period at seven per cent. or eight per cent., than to borrow for a year at five per cent.

"(2) Cost of loans.—The original cost of either mortgage is the same, but under this plan the money may be advanced as many times as desired on the original mortgage without additional expense.

"(3) Delay in making advances.—Delay in making the original advance is sometimes unavoidable, but there need be no delay in making subsequent advances beyond the time required to write a cheque or draft.

"(4) Cost of renewal.—The necessity for renewal is eliminated altogether and consequently the trouble and expense.

"(5) Arbitrary period of loan.—The duration of the loan is a matter almost entirely in the hands of the borrower.

"(6) Excessive bonuses charged for accepting prepayment.—Bonuses are eliminated altogether on the open account, and the permanent portion may be paid off by giving notice in lieu of bonus.

"(7) Difficulty in obtaining loans for an indefinite period to buy cattle and hold them until they could be marketed advantageously.—This is covered by enabling the borrower to draw the amount required for any purpose and allowing him to repay from time to time as he may desire.

"(8) That the practice of making interest and other bills payable about November 1st interfered with the holding of grain.—Under the new plan the interest would be charged to the account as an advance and the balance of the credit could be used to pay other bills, thereby enabling the borrower to sell the grain at his convenience and he would be under no obligation to anybody for an extension of time.

"(9) That the borrower is not given a copy of the mortgage.—A copy of the mortgage will be provided, and if there is a considerable demand for loans on this plan, we propose to furnish a pass-book, which will be posted as often as desired, and a small book of drafts, payable at par at any branch of the Union Bank of Canada.

"I believe the objections from the investor's point of view are largely theoretical, and that the law of average will take care of the apparent difficulties. A company operating over a large area would probably find that the unexpected demands from one set of borrowers would absorb the unexpected repayments from others, and as there is no expense incident to the transfer, and it makes no difference to the company who pays the interest so long as the money is earning, there is no need to charge a bonus; whereas, under the old plan, we cannot afford to accept prepayment without a bonus, as the cost of reinvesting the money usually amounts to a greater sum than the bonus charged—a waste and loss to both borrower and lender.

"After arranging for funds to try out and before introducing this plan, I discussed it fully with several representatives of mortgage companies, who suggested that the Trust and Loan Company of Canada try the experiment, and if we found a considerable demand, other companies could adopt the plan. It is not our intention to discard the old mortgage, or to push the new, as we realize that most people are slow to change from those things to which they have been accustomed. We, therefore, offer both plans and let our borrowers choose the one that suits them better."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 27th, 1917:—

Penn-Canadian Mine, 61,727; National Mines, 47,299; McKinley-Darragh-Savage Mines, 85,375; Kerr Lake Mine, 60,065; Hudson Bay Mines, 65,574; O'Brien Mine, 65,000; Dominion Reduction Company, 88,000; La Rose Mine, 65,960; Buffalo Mine, 175,715; Mining Corporation of Canada, 503,640. Total, 1,218,355 pounds, or 609 tons.

The total shipments since January 1st, 1917, now amount to 20,811,808 pounds, or [illegible] tons.

BANK OF MONTREAL, 100 YEARS OLD

In 1817 City Governor Loaned British Garrison Sentinel to Stand Guard at Bank

To-morrow, November 3rd, the Bank of Montreal, one of the oldest Canadian banks, and one of the world's largest and strongest financial institutions, celebrates its hundredth anniversary. In that period, the Bank of Montreal has built up an enviable reputation, and stands to-day as one of the great pillars of the British Empire's remarkable financial structure. Twice as old as the Dominion of Canada, the Bank of Montreal has seen practically all the history of present-day Canada in the making. It had its share in the upbuilding of these British dominions in the troubled times when Upper and Lower Canada were separate provinces. It played its part in the great enterprises that preceded and followed Confederation. Its history, in brief, is the history of the Dominion, and it is probable that no other single factor wielded a greater influence upon the upbuilding of Canada financially and commercially. It has seen the population of Montreal grow from 20,000 to 750,000, and that of Canada from 400,000 to 7,500,000.

One Hundred Years Ago.

One hundred years ago British North America consisted of the two Canadas, now Quebec and Ontario, and the three Maritime Provinces. Lower Canada was almost entirely French, and British immigrants were regarded with enmity and suspicion. The war of 1812 had been successfully passed, but the agitation that resulted in the rebellion of 1837 was already in the air.

This much may be said of economic conditions. Quebec exported timber, and Montreal furs. Manufactured products were largely imported. Domestic trade was carried on mostly by barter and exchange. Shopkeepers who bought from the merchants were compelled to give long credit to the settlers and the latter almost invariably made payment in farm products. Roads were bad and few, distances between settlements were great, and the voyage from England often took three months to accomplish. The country was too poor to afford the luxury of a gold or silver circulating medium, and the various kinds of money in circulation, including English, French, American and even Spanish and Portuguese coins, made the exchange problem complicated and unsatisfactory.

Deficiency of Specie.

It is probable that the deficiency of specie and the loss and difficulties attending exchange through the use of these varieties of money brought about the earliest attempts to found a bank in Lower Canada. Prior to 1817 there had been two unsuccessful attempts to establish banks. In that year nine Montreal merchants got together, and launched what was then known as the "Montreal Bank." The articles of association were signed June 23, 1817.

Under these articles the capital stock of the company was to be £250,000 divided into 5,000 shares of £50 each. Directors were to be elected when £5,000 had been paid in, and business begun when £25,000 had been paid in on account of stock subscription. The first meeting of stockholders was held August 7, 1817, when directors were elected as follows: John Gray, who became president, Thomas A. Turner, who became vice-president, John Forsyth, George Garden, George Moffat, Horatio Gates, Frederick W. Ermatinger, John McTavish, Austin Cuvillier, James Leslie, Hiram Nichols, George Platt and Zabdill Thayer.

In Old Montreal.

At that period St. Paul Street was the business and residential centre of Montreal. The new bank secured the use of a residence on St. Paul Street, occupied by Robert Armour, paying a rental of £150 a year. Robert Griffin was appointed cashier of the bank at a salary of £300 per annum, and given a staff of six, including a porter. Plates for printing bills were ordered from Hartford, Conn., and also a rolling press. The first £1 bill carried a cut of the local prison, the most modern building in the city. There being as yet no police force in Montreal, the governor of the city was asked to station a sentinel at the bank from the local British garrison. It is interesting to note that the directors fixed days of discounts for Tuesdays and Fridays, days still reserved for the semi-weekly board meetings of the bank. On November 3, 1817, the bank opened its doors for business.

From the beginning the directors embarked on the agency system which has done so much to make the Canadian banking machine the most elastic in the world. The first agencies were opened in Quebec, Kingston and York, and although the Upper Canada agencies were later closed for a time, due to adverse legislation by the legislature of that colony, they were promptly reopened when the ban was removed. No doubt the motive of the directors in opening these early branches was to promote free circulation of the bank's bills. Some idea of the courage required to open and maintain distant agencies at that time, may be gathered from a brief description of the transportation difficulties of the day. Stage coaches over all but impassible roads formed the chief method of travel, although in summer steamboats operated on the St. Lawrence, making the round trip from Montreal to Quebec in ten days. One of the bank's early presidents, the Hon. John Molson, had a steamboat on the St. Lawrence as early as 1809, eight years after the first practicable steamboat was built on the Clyde. The despatch of money was arduous and risky and despite great precaution the wrought-iron chests, in which money in transit was stored, were broken into and looted.

The first charter of the bank was granted by the legislature of Lower Canada, May 22, 1822. It thus appears that for nearly five years the institution had been conducted without duly constituted authority. The fact had been recognized, however, by the governor of the colony, who left the bank undisturbed, believing that restriction would result in more harm than good. Under this charter the name "Bank of Montreal" was adopted. The charter was to run until June 1, 1831.

Personnel of Bank.

Although it is impossible in a brief sketch to deal at length with the men who have made the Bank of Montreal, no man was better qualified to guide the institution through the trying times following 1912 than the president, Sir Vincent Meredith. His policy is cautious, constructive and progressive. The latest chapter in the history of the bank is that since the declaration of war. In many ways the Bank of Montreal has made its usefulness to Canada apparent in that era of changed financial conditions. With England at war, the source of capital became the United States, and here again the staff of the bank produced a man, whose training in London and New York had fitted him for the moment. What Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, has been able to do for this country in New York borrowing, since the outbreak of war, is a story that may be told at another time.

CANADIAN RAILWAYS WAR BOARD

An association has been formed by lines corresponding to the railways war board of the United States with the object of securing greater co-operation, not only between the railroads themselves, but also between the railways and the public.

The new board will be known as the Canadian Railway Association for National Defence, and will have general authority to formulate in detail a policy of operation for all or any of the railways for the co-ordinating of industrial activities toward the prosecution of the war and for rendering the most efficient possible service to the national cause.

At the suggestion of the Canadian government, the presidents of the Canadian Pacific (Lord Shaughnessy), the Grand Trunk (Howard G. Kelley), and the Canadian Northern (Sir William Mackenzie), and Alfred Smith, of the United States railroads, have formed themselves an executive committee. By the direction of this committee the administrative board was named as follows: U. E. Gillen, Grand Trunk, chairman; C. A. Hayes, Canadian government railways; D. B. Hanna, Canadian Northern; E. D. Bronner, Michigan Central; J. H. Walsh, Quebec Central; Sir George Bury, Canadian Pacific Railway; and F. F. Backus, Toronto, Hamilton and Brantford.

A car service committee, consisting of the following, has been named: W. A. Kingsland, Canadian Northern Railway; W. M. Ripley, Canadian government railways; A. E. Locke Toronto, Hamilton and Buffalo; J. E. Duval, Grand Trunk; A. Halton, Canadian Pacific Railway; and W. A. Griffin, Temiskaming and Northern Ontario.

Sub-committees reporting to the administrative committee will be established in each province, and these will be added to from time to time. The head office of the association will be in Montreal.

Is It Fair to Make Your Friend Your Executor?

Perhaps you feel you honor him with your trust. You certainly burden him with a great responsibility. Few individuals can spare the time and few have the ability or experience to properly carry on the duties of Executor of an Estate. Our thirty-five years' experience in the care and management of Estates and Trusts is evidence of our worthiness to be appointed your Executor. Write for our Booklet "A Talk with a Business Man."

Going Overseas?

To those going overseas, whether in a military or civil capacity, to do their bit, or to those who contemplate spending the Winter away from home, and who may need a strong, reliable corporation to look after their affairs in their absence, we offer the suggestion that they leave a Power of Attorney in our favor. It will relieve them of all the details and worries incidental to looking after their Estates. Compared with the relief afforded and the service rendered, the charge would be small and the satisfaction great. Interviews invited; correspondence solicited. All business treated as strictly confidential.

The Standard Trusts Company
346 MAIN STREET - - WINNIPEG

GREATER WINNIPEG WATER DISTRICT

Interim Financial Statement Submitted to June 30th Last

Interim financial statements of the Greater Winnipeg Water District have just been issued and afford a birdseye view of the district's operations from its inception to June 30th, 1917. The general form of the accounts was approved by a representative of the Manitoba Public Utilities Commission during conference held in September, 1915. The following is a condensed statement of expenditures:—

		June 30th, 1917.
Aqueduct construction		$4,933,059.63
Constructional railway	$1,414,636.45	
Constructional railway equipment, rolling stock, etc.	187,292.29	
		1,601,928.74
Constructional telephone system		32,747.13
Falcon River dyke and diversion		134,571.47
Reinforced concrete pressure pipe line		276,148.28
Red River crossing		3,650.14
Screening plant (gravel pit No. 1) construction		67,723.11
Government pit (gravel pit No. 2) construction		4,596.69
Rock crushing plant construction		16,052.86
Buildings		81,218.50
Preliminary expenditures on future construction:		
Intake	$ 859.82	
Cast iron transmission mains	1,773.12	
		2,632.94
Materials, supplies and equipment on hand		65,962.43
Charter and organization expenses		15,507.12
Preliminary field surveys and location		93,093.50
Discount on inscribed stock, temporary debentures and other financial charges		180,036.05
Colonization expenditure		1,923.26
Expenditures subject to allocation:		
Administration	$ 21,020.54	
Engineering	38.41	
Interest	147,206.20	
Lands	2,618.88	
		170,884.03
		$7,682,335.88

There are certain expenditures subject to allocation at the end of the year amounting in all to $170,884.03. For various reasons it is more convenient and accurate to allocate these expenditures yearly rather than half-yearly, and as in previous years the board have adopted this plan in preparing these interim statements. This particularly applies to the statements of operation accounts—namely, constructional railway, telephone, the two gravel pits, the rock crushing plant and buildings operation account. In these accounts no depreciation on fixed assets is included, and this is in accordance with an understanding with the Public Utilities Commission.

Statement of Liabilities.

The following is a statement of the liabilities of the Greater Winnipeg Water District at June 30th, 1917:—

			June 30th, 1917.
4½% inscribed stock (£263,052 0s. 0d.)			$1,283,112.83
5% five-year temporary debentures			3,500,000.00
			$4,783,112.83
Interest on above, accrued, not due			44,246.69
			$4,827,350.52
Bank of Montreal, bills payable, secured by treasury bills		$1,720,000.00	
Bank of Montreal overdraft		163,781.07	
			1,883,781.07
Sundry creditors:			
June pay roll		$ 20,001.03	
Accounts payable		356,355.02	
Contractors' holdbacks	$478,882.63		
Contractors' penalties	69,470.00		
		548,352.63	
Unpresented interest coupons		39,000.00	
			972,708.68
Tender deposit			50.00
Insurance fund, Winnipeg Aqueduct Construction Company bond bonus			25,000.00
			$7,708,989.27
Deductions:			
Balance at bankers, coupon account	$ 39,000.00		
Commissioners' Trust Fund	500.00		
Sundry petty cash funds	320.00		
			39,820.00
			$7,669,169.27
Departmental operation accounts in suspense:			
Railway	$33,163.67		
Building operations	8,664.05		
Cement handling	7,025.32		
		$ 48,853.04	
Gravel Pit No. 1	$ 2,475.38		
Gravel Pit No. 2	1,357.83		
Rock crushing plant	28,864.69		
Cordwood	2,988.53		
		35,686.43	
			13,166.61
			$7,682,335.88

Bank of Montreal Paid.

As to the liabilities of 4½ per cent. inscribed stock, $1,283,112, and 5 per cent. five-year temporary debentures, $3,500,000 the amount of these securities is the same as in the previous report, no further sales of these forms of security having been made up to June 30th last.

Since June 30th, sales of nearly $4,000,000 5 per cent. five-year temporary debentures have been effected, and from the proceeds thereof the liability of $1,883,781 to the Bank of Montreal has been fully paid.

In the Board's opinion, the colonization expenditures of $1,923.26 are ultra vires of the district's powers, but the Board are informed that steps will be taken at the earliest possible moment to have these expenditures legalized. The city of Winnipeg, and certain other of the municipalities comprising the district, have passed resolutions approving the same.

EXCHANGE AND CANADIAN GOLD SHIPMENTS

A New York despatch states that a delegation of prominent Canadian bankers has visited Washington, where they were in conference with the treasury department as to the question of the United States government allowing gold to be shipped across the border to satisfy the pressing Canadian exchange situation. Their representations were regarded favorably by the treasury department and the Federal Reserve Board, and a certain amount of gold will be allowed to be shipped into Canada during the coming months under permit of the Federal Reserve Board.

Among the Canadian bankers who attended the conference were: Sir Vincent Meredith, president of the Bank of Montreal; Sir Edmund Walker, president, and Sir John Aird, general manager of the Canadian Bank of Commerce; and E. L. Pease, managing director of the Royal Bank of Canada. They returned to Canada from Washington and New York this week.

New York exchange at Montreal has lately displayed weakness, the quotation at the end of last week going to $8.125 discount per $1.000. At the present time the rate is under ½ of 1 per cent. discount.

The fall in Canadian exchange on New York is not unnatural at this season, due to the sale of grain bills in this market, giving an accumulation of Canadian funds here. Ordinarily the movement would be satisfied by gold exports, but the existing embargo is accentuating the situation.

In spite of the war and the interior demand for funds, Canadian banks still carry large balances outside of the Dominion. The combined statement of the charter banks at the end of September showed that these institutions had call loans outside of the Dominion of $166.480,000, and current loans outside of $87,265,000. Most of these funds are in the United States.

Now that efforts to lift the embargo on gold shipments have been successful, Canadian bankers expect a recovery to more normal conditions in the Canadian exchange market.

The Maximum of Security

Real Estate Mortgages afford investors the maximum of security. More than twenty-eight million dollars of this Corporation's investments are in first mortgages on carefully selected improved real estate securities. It is in these that the funds entrusted to our care by our Debenture-holders are invested, thus assuring

Safety of Principal and Certainty of Interest.

That the conservative investor of small means may be afforded the advantages of this most desirable security, we issue our debentures in sums of one hundred dollars and upwards. Don't wait till you have accumulated more money. If you have a hundred dollars to invest write us for particulars.

Canada's Victory Loan Will Soon Be Issued

On November 12th, the Subscription Lists Will Be Opened—Why the Bonds Are An Excellent Investment.

ASIDE from the patriotic phase, the Canadian Victory war bond is an excellent investment. Dominion government bonds, in point of merit, rank ahead of all other Canadian issues. Our credit is good. No one in Canada or, for that matter, anywhere else, doubts the stability of the borrower. Canada will be able to meet the interest on its war loans, past, present and future, without and difficulty. Our shores are free from the invader and, thanks to the British navy, are likely to be. While the Dominion is prosecuting its share of the war vigorously, those who are staying at home are seeing that greater production is achieved from the soil and from natural resources. However pessimistic the passing phases of the Great War may be inclined occasionally to make us, no one who analyzes the available facts, can doubt ultimate victory or fail to have well-seasoned optimism in the future of this Dominion, of the British Empire and of their securities.

The proceeds of the Victory Loan will be used only for war purposes. The funds will finance war requirements in Canada and they will be used as credits for Great Britain to buy our hay, oats, wheat, bacon meats, butter, lumber, minerals, chemicals, iron and steel products, manufactures and farm produce of all kinds. Britain desires also to continue purchases of shells and ships here. We must finance those purchases. The Victory Loan appeal is one which cannot be ignored by any citizen in Canada.

ORGANIZATION IS GOING WELL

The task of organizing the Dominion-wide campaign for the Victory War Loan, the subscription lists for which will open on November 12th, is proceeding satisfactorily. Honorary and administrative committees have been or are being formed for every province, city and county of Canada, from Halifax to Dawson City. During the three weeks in which the issue will be before the public every citizen will have the loan continually drawn to his attention through the medium of advertising and other publicity agencies, and by direct canvass.

The minister of finance will send a personal letter to every household in the Dominion enclosing a prospectus and information as to the loan and its purpose. For the past six weeks the minister has been continuously engaged in conference with representative bodies and with the various committees which have been appointed in the work connected with this organization. He is much gratified at the enthusiastic response which he has received from all who have been asked to actively co-operate. The treasurers of the several provincial governments are all taking a keen and active interest in promoting the success of the issue.

Devoting all his time to organizing the Victory Loan, the minister of finance has been compelled to decline invitations to speak at conventions and political gatherings, and it is doubtful whether he will be able to take any active part in the forthcoming election campaign.

The minister proposes specially to request all candidates in the elections to make particular appeal on behalf of the Victory War Loan in their campaign speeches.

VICTORY LOAN PUBLICITY

The Victory Loan committee of Montreal will send through the mail to every automobile owner on the Island of Montreal stickers about six inches square, which owners are requested to paste on their windshields while the campaign is on. Each sticker will be accompanied with small gum strips to attach it to the windshield.

Every prominent business firm on the island will receive a series of window posters. The recipients are asked to display these with great prominence in their windows and to leave them exposed during the progress of the whirlwind canvass about to be put under way in every city and hamlet in the Dominion.

Stamp stickers about an inch and a half square will be forwarded to every leading store, bank, insurance company, trust company and industrial institution, which are asked to attach them freely to all letter heads and parcels sent out by the firms in question. The letter head is preferred to the envelope, the envelope being usually thrown away, whereas the letter itself is preserved and receives further attention.

Sandwich boards will be delivered to all banks, which will greatly assist the efforts of the committee if they will see that they are carefully displayed in front of their buildings during the day, taking them in at night.

WAR LOAN: TORONTO COMMITTEES

The members of the executive committee of the Toronto Honorary War Loan Committee are: Messrs. J. W. Mitchell, chairman; H. R. Tudhope, vice-chairman; G. A. Warburton, secretary; D. H. Pettes, assistant secretary; T. Bradshaw, W. P. Gundy, W. N. McIlwraith, Col. W. K. McNaught, W. C. Noxon, F. G. Osler, H. M. Peacock, W. E. Rundle, John A. Tory, A. F. White, E. G. Wills and G. H. Wood.

The members of the Canvassers' Names Committee are: Messrs. H. B. Housser, J. W. Gilmour and W. C. MacNeill.

The members of the Publicity Committee are: W. P. Gundy, chairman; J. Allan Ross, vice-chairman; E. L. Ruddy, vice-chairman; F. T. Stanford, secretary; W. H. Alderson, A. R. Auld, Ralph Connable, R. S. Coryell, J. H. Daly and J. E. Ganong.

The members of the Industrial Groups Committee are: Col. W. K. McNaught (chairman), Major L. L. Anthes, S. Frank Beer, D. A. Campbell, S. H. Chapman, G. B. Clarke, W. C. Coulter, John F. Ellis, P. W. Ellis, R. D. Fairbairn, Thomas Findley, Geo. Brigden, Sam Harris, John Hillock, T. F. Monypenny, H. Jeffrey, W. Laidlaw, Jas. Lister, R. F. McIntyre, John Miller, J. P. Murray, F. B. Mutton, H. Neilson, Hon. Col. Senator Frederic Nicholls, S. R. Parsons, J. A. Riordon, Thomas Roden, Frank Rolph, H. D. Scully, Frank W. Stone, J. H. Sythes and John Westren.

STOCK EXCHANGES FIX MINIMUM PRICES

The Montreal Stock Exchange officials decided to delay the opening of trading on Tuesday morning, in view of the sensitive condition of the stock market, until some decision could be reached regarding the fixing of prices. The Toronto Stock Exchange officials were not made aware of this until 20 minutes after trading opened. Meanwhile, several leading issues had been sold at moderately lower rates, compared with the close on the previous night. Operations were at once suspended at the request of the Montreal Exchange, until both parties resolved to fix the minimum prices at Monday night's market close, until further notice. By 11 o'clock both ex-

Canada is Now a Creditor Nation

Help Her to Maintain this Position
By Subscribing for Large Blocks of

Canada's Victory Bonds

It is for you, manufacturers and merchants, to give the lead to those whose daily lives you influence, by subscribing for a substantial block of Canada's Victory Bonds.

The simple fact is, Canada must have more money to carry on her part in the war and extend credit to Great Britain and our Allies.

This Canada must do if our industrial, commercial and agricultural activity is to be maintained.

Since Canada can no longer borrow abroad, the money must be secured here.

Fortunately the money is here. It only remains to get the hundreds of thousands of people with savings to realize what it means to Canada—to them—to you—to insure the success of the Loan.

By subscribing for Canada's Victory Bonds yourself, and tactfully explaining their merits to your employees—you can insure the Bond issue becoming an overwhelming popular success. This Canada relies upon you and every other manufacturer and merchant to do.

So surely as Canada's Soldiers in the Front line trenches are fighting for Freedom, so in a lesser degree do they fight who lend their money to support Canada's Armies in the field.

Money fights to-day, and it is the bounden duty of every Canadian to back Canada's part in the war by buying Canada's Victory Bonds.

Decide now that your concern will take a big block of Canada's Victory Bonds and that your whole establishment will be organized in support of the Loan.

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

90

changes were operating again, and from then until noon business was light.

Mr. Purvis McDougall, chairman of the Montreal Stock Exchange, stated that the reason for the creation of minimum prices again, the second time since the war started, was associated with the desire of the brokers to go out and help to the fullest extent in making the forthcoming war loan a success. The brokers were not only willing but anxious to do this, but in the unsettled state of the market, due largely to the adverse influences of Wall Street, it was obvious that brokers would be held more closely to their offices than ever, owing to the fears of what might develop during their absence.

IMPORTANT CONFERENCE ON VICTORY LOAN

Satisfactory conferences were held last week between the executive of the Canadian Bankers' Association and Sir Thomas White, minister of finance, respecting the Victory War Loan. Many matters of Imperial and Dominion finance were considered, and arrangements were made for the active participation by the banks, through all their branches, in the loan campaign. The prospectus for the loan will be issued on November 12. Those present at the conference were: Messrs. E. L. Pease, Sir Frederick Williams-Taylor, C. A. Bogert, H. A. Richardson and H. V. F. Jones (representing Sir John Aird).

PERE MARQUETTE TO BUY VICTORY LOAN BONDS

President Alfred, of the Pere Marquette Railroad, who was at St. Thomas, Ont., on Tuesday, on an official inspection of the company's lines in Canada, stated that the company had under consideration a scheme for the purchase of Victory Loan bonds, these to be sold to employees in Canada, and made payable in twelve monthly instalments, a plan now being worked in the United States. The company will purchase $181,000 worth of bonds on its own account.

PERTH COUNTY LOAN OBJECTIVE

The Victory Loan objective for Perth County, Ontario, has been placed at $1,065,000, of which Stratford is expected to subscribe $300,000, St. Mary's $150,000, Listowel $50,000, Mitchell (with Fullarton township) $70,000, Milverton (with Mornington township) $75,000, and the other townships proportionately. The total desired is considerably less than three per cent. of the assessment of the county.

KEEP FUNDS AT HOME FOR VICTORY LOAN

It has been brought to the attention of the finance minister that large sums of Canadian money are being diverted to the purchase of government and other securities now held outside of Canada. It is, in his view, vitally necessary in the national interest that all funds available for investment, should be conserved for the purposes of subscription to Canada's Victory Loan, the list for which will be opened on November 12th, and close on December 1st. "I earnestdy trust," said the minister on Tuesday, "that the Canadian people, at this time, will refrain from making such outside purchases and reserve their money for the new issue."

SOREL COUNTY, QUEBEC, WILL HELP

Sorel County, Quebec, has endorsed the Victory Loan at a meeting held in Richelieu, and a committee for that county was appointed as follows:—Messrs. J. B. T. Lafreniere, honorary chairman for the county; A. C. Trempe and H. H. Sheppard, active chairmen; J. W. Martel, secretary. Committee—P. J. A. Cardin, M. L. Peloquin, E. A. D. Morgan, C. J. C. Wurtele, C. O. Paradis, P. A. Lavallee, W. H. Finlay, Alf. Beauchemin, V. Bourgeois, P. C. Lemoine, J. B. A. Falardeau, A. Langlois, W. A. Sheppard, J. O. Pouliot, F. Hurtubise, J. F. Moreault, A. L. Currie, George Roy, L. P. Tremblay, J. B. Brosseau and M. J. A. Giroux.

The manufacturers of Sorel will present the matter to their employees, and have promised to assist them in every way necessary to insure subscriptions to the loan from every employee.

WHAT WILL THE LOAN BE?

Little by little, the details of the Victory Loan offering are taking definite shape. An announcement from Ottawa this week stated the subscription lists would be opened on November 12th and would remain open three weeks, until Saturday, December 1st.

No official intimation has been given of the issue price, but two speakers at the Chambly County, Quebec, loan campaign meeting, mentioned as income of 5½ per cent. from the bonds. The yields on the previous loans were 5.42 per cent., 5.30 per cent. and 5.40 per cent. respectively.

While the amount of the loan has not been announced, it will probably be for at least $150,000,000.

Judging by the substantial buying of the old war loans, the market expects all or part of the Victory Loan to be offered in bonds, maturing in 20 years or more, so that the holders of the other three loans may convert if they so desire.

WHY THE VICTORY LOAN IS AN EXCELLENT INVESTMENT

1. **Security of principal.**—The wealth of Canada is back of the bonds issued by the government. Since the present organization of the Dominion in 1867 no debts have ever been repudiated. The money borrowed has always been repaid.

2. **Security of income.**—The return upon the principal invested is the income or interest. The interest on these bonds is a part of the government's expense. Should the power of our government fail, not even cash would be of value, so high is Canada's standing.

3. **Fair income return.**—The income will probably be about 5½ per cent., which for such high-grade security is an excellent return. In addition the bonds are likely to bear the privilege of convertibility into a higher rate of interest if the government has to borrow more money at a higher rate.

4. **Marketability.**—The Canadian war loan bonds are active in the open market. Those offered for sale find a purchaser more quickly than any other securities. Bond houses and banks handle them as readily as cash. These bonds can be sold at any time throughout the country.

5. **Value as collateral.**—They have the greatest value as collateral of any security, because the credit of the Canadian government ranks with that of the leading nations. Banks or individuals will readily loan money on such security.

6. **Tax exemption.**—The government bonds of our Victory Loan, to be issued next month, will probably be exempt from federal income tax, as was the case with the three war loans issued previously.

7. **Freedom from care.**—Bonds can be registered in the name of the holder and the interest thereon will be sent them every six months direct from the government.

8. **Acceptable duration.**—The period of time over which a loan continues will be in the case of the Victory loan bonds of great advantage. Both long and short-term bonds are likely to be offered.

9. **Acceptable denomination.**—The bonds will be issued in denominations to meet the requirements of small and large investors.

10. **Potential appreciation.**—There is every reason to believe that Canada's Victory Loan bonds will increase in value after the war is over, to judge by the fact that in the past war bonds did increase in value at the close of the war. In the event of the war ending within a short time these bonds would increase in value because of certain tax exemptions. Therefore people of wealth will want to invest in them and small holders will probably be able to sell at a profit. In the event of the continuation of the war over a long period a higher rate of interest will have to be paid, and this maintains the value of the bond.

LIFE INSURANCE MEN WILL HELP

The minister of finance, Sir Thomas White, has requested the life insurance companies to co-operate in the marketing of the Victory Loan. In this they will work in conjunction with the Bond Dealers' Association and the Victory Loan Committee. The life underwriters' organization is as follows:—

1. Advisory committee for the entire Dominion made up of (a) all ranking officers of Canadian life insurance companies; (b) chief agent or director of the principal American and British companies; (c) the officers of the Life Underwriters' Association of Canada as now constituted; (d) a select few men not coming under any of these heads but who are on the executive of Canada: Messrs. D. E. Kilgour, secretary Life Officers' Association, John A. Tory, C. H. Carpenter, of Toronto; and Messrs. A. B. Wood, J. C. Tory, A. J. Meiklejohn, A. H. Vipond and Geo. E. Williams, of Montreal.

2. Provincial advisory committee for each province to work in connection with the Provincial Bond Committee or the Victory Loan Committee.

In harmony with the resolution passed at the Life Officers' Association meeting held on October 11th, the following provincial committees were appointed:—

British Columbia—Vancouver—W. J. Twiss, Mutual Life; Stanley Henderson, Imperial Life; F. B. Deacon, Manufacturers' Life; F. W. Marsh, Canada Life; J. A. Johnson, Great-West Life; H. Farrant, Confederation Life; and J. H. Fahay, Metropolitan Life.

Alberta—Calgary—P. J. Laney, Metropolitan Life; P. A. Wintemute, Manufacturers' Life; C. P. McQueen, Great-West Life; and W. Ardern, Imperial Life.

Edmonton—W. W. Hutton, Sun Life; A. MacBeth, Dominion Life; H. E. W. Phair, Canada Life; and B. F. Ogilvie, Prudential.

Saskatchewan—Regina—A. F. Harwood, Sun Life; E. S. Miller, Imperial Life; C. A. Hughes, Prudential; H. M. Bing, Manufacturers' Life; and R. G. McCuish, Canada Life.

While no request was made to appoint a committee at Saskatoon it was felt that the purpose of organization would be better met by doing so, and the following names were provisionally suggested: G. W. Clarke, London and Lancashire Life; R. M. Curry, Mutual Life; C. P. Frinkling, North American Life; and L. Winnell, Metropolitan Life.

Manitoba—C. C. Ferguson, Great-West Life; C. W. Strathy, North American Life; H. T. Clarke, Metropolitan Life; D. J. Scott, Sun Life; F. P. Hayden, Great-West Life; J. W. W. Stewart, Monarch Life; E. H. Bissett, Mutual Life; and J. G. Stephenson, London Life.

Ontario—S. C. Tweed, Mutual Life, Waterloo; F. Halstead, Dominion Life; T. G. McConkey, Canada Life, Toronto; E. E. Reid, London Life, London; R. Junkin, Manufacturers' Life, Toronto; E. J. Harvey, North American Life, Toronto; G. H. Hunt, Imperial Life, Toronto; J. T. Boyd, Confederation Life, Toronto; and S. W. Sheppard, Prudential.

Quebec—Montreal—A. H. Vipond, New York Life; A. J. Meiklejohn, Confederation Life; J. C. Stanton, Sun Life; J. C. Tory, Sun Life; C. A. Butler, Great-West Life; G. E. Williams, North American Life; E. J. L'Esperance, Imperial Life; E. A. Champagne, Standard Life; and A. G. Rowley, Metropolitan Life.

Nova Scotia—J. L. McDuff, Mutual Life, Halifax; J. T. Wilson, Canada Life, Halifax; H. S. Crosby, North American Life, Halifax; C. W. Durrant, Dominion Life, Halifax; P. J. Quinn, Confederation Life; and W. N. Alves, Prudential Life, Halifax.

New Brunswick—St. John—E. R. Machum, Manufacturers' Life; F. S. Farris, Excelsior Life; C. S. Everett, North American Life; G. W. Parker, Confederation Life; J. McQueen, Canada Life; G. W. Merritt, Great-West Life; and Fred. McLeam, Metropolitan Life.

Prince Edward Island—Charlottetown—J. O. Hyndman, Great-West Life; J. O. Arsenault, Mutual Life; A. J. Irving, Sun Life; and J. K. Ross, North American Life.

There will be appointed in each province an advisory committee of three life underwriters to work with the bond committee. These will be appointed by the provincial committees. All the men who are to be sent out to sell bonds are supposed to come through this committee so that no one company's organization will be disrupted.

The Manufacturers' Life Assurance Company, Toronto, is making arrangements to allow its staff to subscribe to the Victory Loan and pay for the bonds over a long instalment period.

FOR CANADIAN NORTHERN STOCK, $10,000,000

That is Maximum Fixed by Draft Order-in-Council—Canadian Pacific Railway Offer

According to the draft order-in-council providing for the appointment and work of the arbitrators dealing with the government's purchase of the Canadian Northern stock, the maximum price which may be paid for the $60,000,000 par value is fixed at $10,000,000.

The clause dealing with the price limitation is as follows: Should the value so determined be the sum of $10,000,000 or more, the price shall be $10,000,000. Should the value so determined be less than $10,000,000 the price shall be the value less than $10,000,000 so determined.

The order-in-council is drawn up, and now awaits ratification by the cabinet. There will be a full meeting of the cabinet towards the end of this week, and it is expected the order-in-council will then be formally passed. The board of arbitration, under Sir William Meredith, will at once investigate the physical value of the system and the country's cash equity in the stock.

The arbitrators are Sir William Meredith, for the Dominion government and Mr. Wallace Nesbitt, K.C., for the Canadian Northern Railway. A third arbitrator has yet to be appointed.

Canadian Pacific Railway Offer.

Commenting on the price to be paid for the stock, the Wall Street Journal said on Monday: "Although the Smith-Acworth-Drayton Commission reported to the Dominion government (A. H. Smith dissenting) that on the basis of the 10,000-mile transcontinental system, and that on a 'going concern' basis the value of the property was less than the amount of its debts, the Canadian government has practically decided to pay Mackenzie and Mann $15,000,000 for their 60 per cent. of the stock.

"That is the price at which the controlling interest (the other 40 per cent. is owned by the Dominion government) was offered to the Canadian Pacific. When the Canadian Pacific management went to the government for its approval of the purchase, the response of the government was, 'We will take it ourselves.' Under the Canadian Pacific purchase act, which has not yet passed parliament, arbitrators are to be appointed to determine and report the fair value of the stock. But the preceding negotiations between Mackenzie and Mann and the Canadian Pacific people have virtually fixed the price."

Wall Street's Comment.

Discussing the Drayton-Acworth proposals for government ownership of railways in Canada, the same journal says: "The entire deficit, of course, amounting to something around $5,500,000, will have to be borne by the Dominion government, except for the minor part supported by the province of British Columbia, but as the nation was already obligated for interest in a sum not far from the amount of the deficit, it will not greatly increase its annual budget in taking over the road. It has already put $25,000,000 into the road in the way of loans.

"The Dominion is prepared to pay $15,000,000 for the stock control, provide $50,000,000 or more for equipment, when it can be obtained from the manufacturers, leave its $25,000,000 loans standing for an indefinite time and make up the operating deficit as long as it continues. The reason for assuming this heavy burden for only one of the Canadian railroads in difficulties, at a time when war is already taking a heavy toll in taxes and loans, is not primarily a taste for government ownership. Nor is it to protect the public service, which might have been assured in other ways. The reason is simply that Canada is determined that the title to her railways shall remain at home. The leaders in public life in the Dominion are convinced that any other solution of its railway problem would entail a control held not only outside of Canada, but outside the Empire."

OUR INLAND REVENUE RETURNS

Income from inland revenue during September totalled $2,385,820.17, as compared with $2,237,619.95 during September of last year. Tobacco brought in $1,004,572, and cigars, $64,499, spirits $920,168, malt liquor $4,753, malt $142,056. The total from excise alone was $2,250,336.74.

WAR COSTS $160,000,000 DAILY

By August, 1918, Total Cost Will Be $155,600,000,000—Cost of Other Wars

The cost of the war to date has exceeded $100,000,000,000, and the daily expenditure are now in the neighborhood of $160,000,000 for all the belligerents, compared with $52,600,000 in the first five months of the conflict. These results have been obtained by a compilation of loans and expenditures made by the Mechanics' and Metals' National Bank of New York from data obtained from various authoritative sources. In a pamphlet just issued the bank states that an estimate based on current expenditures, including those of the United States, indicate that if the war goes through the fourth year to August 1st, 1918, the total military cost will be $155,600,000,000, and the daily outlay will average $170,000,000.

By Next August.

"This calculation means," says the pamphlet, "that there will have been laid out for military purposes, if the war does not end before next August, a sum greater than the developed wealth of any single nation of the world, other than the United States. It means that for war there has already been expended an amount three times as large as the total indebtedness of every nation in the world, as that indebtedness stood in 1914; four times as large as all the deposits of the banks of the United States? ten times as large as the value of all United States agricultural products in a given year; twelve times as large as the value of America's annual foreign trade; one thousand times as large as the amount of the annual American gold output.

Each Month Adds $5,000,000,000.

"It means that the war has already required a sum that would have extended the railroad mileage of the United States to several times its present length, and that, besides, would have carried steamship lines to every corner of the earth, and for every month over which hostilities continue to progress $5,000,000,000 are added to the cost. This means that there is required of the world every month an amount of money double that expended during the entire Russo-Japanese War, which lasted eighteen months. It means that the Boer War is being concentrated into every eight days of this war. It means that the Franco-Prussian War is being fought over and over again, its entire cost being compressed each time into a space of three weeks. It means that the American Civil War—hitherto the greatest contest in world history—is being duplicated with such intensity that a counterpart of the four-year struggle between the north and south is reproduced every fifty days."

Cost of Other Wars.

The bank states that the sum of money expended since the middle of 1914 has been greater than the combined money expenditure of all other wars in the history of the world. The Napoleonic wars cost no more than $6,250,000,000. The combined direct cost of the six greatest military struggles in the 125 years preceding the present war was no greater than $25,000,000,000.

Great Britain's outlay, the pamphlet says, is the largest of the nations, being $35,000,000 a day and $39,000,000 when loans and advances to allies are considered. The direct expense of the United States is $29,400,000 daily, and $40,360,000, including loans. Germany's outlay is $27,200,000 and that of France $20,200,000 a day. Including loans, the United States disbursed $3,500,000,000 from August 1st, 1914, to the same date this year in war expenditures. Great Britain's gross expenditure in that period was $25,800,000,000; that of Germany $22,100,000,000, and that of France $17,400,000,000.

Cost Per Capita.

In the following table the cost of the war per capita of population in each of the leading countries is shown:—

	Daily war cost. (cents).	Daily income. (cents).
United States	28	105
Great Britain	74	70
France	50	51
Russia	10	11
Italy	22	32
Entente allies	27	48
Germany	40	44
Austria-Hungary	21	29
Central allies	31	39
Total all	29	45

Figures of War Loans.

In the process of financing the war the several nations in the three years ended August 1st last borrowed $80,000,000,000, the bank says, of which the Entente Allies accounted for $52,000,000,000. This year Great Britain, France, Russia, Italy and the United States will disburse $3,000,000,000 interest on their national debts, against $708,300,000 in 1913, the last full year before the war began. Germany and Austria will pay out $1,700,000,000 compared with $365,000,000 in 1913. The per capita debt of France in three years has risen from $162 to $530, and Germany's has advanced from $76 to $356. The per capita debt of Great Britain in the same time has grown from $74 to $304.

FINAL PROCLAMATION ISSUED

Couched in the stately language of British officialdom, the governor-general's proclamation calling out the first class under the Military Service Act, published in all the daily newspapers on October 13th, has made a deep impression on the country. It has served notice from coast to coast that all those in the first class must report for service on or before November 10th, if application for exemption has not been made in their behalf by that date. The first class includes all male British subjects between the ages of 20 and 34, inclusive, who were unmarried on July 6th, 1917, or are widowers without children. For some time the way has been prepared for speedy response to the call by the sessions of medical boards throughout the country.

LIMIT COAL EXPORTS TO CANADA

The United States fuel administration is limiting coal exports to Canada. Control of shipments will be exercised through the issuance by the fuel administration of special permits to shippers, who will be allowed to forward cargoes up to the amounts prescribed by the fuel administration without obtaining special export licenses.

The plan is to hold Canada, during the rest of the year, to supplies not exceeding 10 per cent. more coal than was received last year. This arrangement is based on a 10 per cent. increase in production in the United States this year, and permits the Dominion to share equally with the States of the Union. Permits for shipment will be granted only to shippers who sent coal to Canada last year.

TO CONTROL SUGAR

Following the arrival in New York of Sir Joseph White-Todd and Mr. John V. Drake, Sr., representing Great Britain and the other Allied nations of Europe, the International Sugar Commission will be in operation in conjunction with Mr. Geo. M. Rolph and the two representatives of the United States sugar interests. The arrangement is that this commission will purchase for Great Britain, the United States, Canada and the other Allies all the raw sugar available. Canada will have a representative in New York who can communicate with the international commission in regard to Canadian requirements, and the Canadian refiners will appoint an allocating committee, who will divide up between them the raw sugar imported into Canada to supply the refineries.

By this means it is hoped to stabilize the price of raw sugar from Cuba and other points, the supply of which is not at present equal to the requirements of the United States and Canada. But the situation will be somewhat relieved when the beet crop and the Louisiana crop come on the market of the United States. So far as the sugar supply for Canada is concerned, arrangements have been made to meet all reasonable demands. The food controller is taking steps to see that speculation or hoarding does not occur.

Individual vs. Corporation Management

INTEGRITY, responsibility, good judgment regarding investments, knowledge of the law respecting trusteeship, executive ability—and these sustained without interruption — are necessary under modern conditions before a trustee can be considered wholly competent.

All of these qualifications can be rarely found in a friend or individual.

THE STERLING TRUSTS CORPORATION possesses all of these essential qualifications of a competent trustee, including assured existence throughout generations of beneficiaries.

The Company will afford complete protection to your estate if appointed executor and trustee under your will.

Our officers will be glad to confer with you in regard to the making of your will or the management of your estate.

HELPING TO WIN THE WAR

"Our problem is to keep enough men in the firing line, to take care of them, to make all the munitions for the Allies that we can, and to pay the interest on our foreign indebtedness so that Canada shall bear her part in the war as nearly as possible out of her own resources. If we can do more than this, every dollar we can invest in the British treasury obligations issued in payment for the munitions we have supplied is, in effect, so much of an offset to our own war indebtedness. So if any man, rich or poor, withstands his desire to spend his money on something he can do without, whether he puts his savings into a war bond or into a bank, he has by that act helped to win the war."—Sir Edmund Walker.

SYSTEMATIC INVESTMENT PLAN

Messrs. J. M. Robinson and Sons, members of the Montreal stock exchange, are recommending a systematic investment plan to the investor and trader, large or small, as the most conservative, satisfactory and successful method of accumulating a competency. Having all the advantages accruing to the "margin operator," without the liability of margin calls, the plan is, for many, preferable to a marginal arrangement. Under its terms a speculative purchase, with the idea of selling at a profit, is more conservatively conducted.

Any securities having a ready market, including active unlisted stocks, may be purchased under this plan; stocks so bought may be sold out at any time (even on the day of purchase) without any restriction. The opportunity is thus afforded for saving, investing and speculating. To sum up, this plan permits the purchase and sale of securities at opportune times; the purchase without making full payment at once; the sale at any time at the discretion of the client.

REPORT OF THE MOLSONS BANK

The year's earnings of The Molsons Bank after the usual deductions were 15.30 per cent. on the capital of $4,000,000, and 6.98 per cent. on the combined capital and reserve. The bank paid $40,000, or 9⅓ per cent. of the amount of its dividend of $440,000 in the form of circulation tax. Of the remaining profits, $75,000 was written off for depreciation of security holdings, and the profit and loss account was increased to $151,826.

The following statement shows the principal figures of the past two years, and the deposits of the same:—

	1917.	1916.
Profit and loss from previous year.....	$127,619	$ 61,300
Net profits	615,514	582,356
	$743,134	$643,656
Dividend	440,000	440,000
Pension fund . .	21,308	21,036
Patriotic and relief	15,000	15,000
Tax on circulation	40,000	40,000
Depreciation . .	75,000	.
	$591,308	$516,036
Profit and loss	151,826	127,619
	$743,134	$643,656

Non-interest bearing deposits were $6,845,000, an increase of some $400,000, and interest bearing deposits were $41,572,000, an increase of $2,284,000. The annual meeting will be held on November 5th next.

The statement shows an increase in total assets from $52,000,000 in 1915 to $60,000,000 in 1916, and to $65,780,000 in 1917. The assets held in the form of coin and Dominion notes, were $4,524,000 in 1915, $5,435,000 in 1916, and $6,334,000 in 1917. Readily available assets increased from $17,403,000 in 1915 to $24,186,000 in 1916, and [illegible] in 1917. The quick assets were on September 29th 50.16 per cent. of the liabilities to the public, the largest increases being in government securities, of which the market value to the banks holding these securities at the end of the year being $5,208,000. Net profits increased from $556,000 in 1915 to $582,000 in 1916, and to $615,514 in 1917.

MANUFACTURER SAYS NO MONEY IN NEWSPRINT

Because some of the newsprint manufacturers are reported not to have exerted themselves to furnish their product to Canadian publishers at the price fixed by the government, and in some cases have refused to ship paper, Commissioner Pringle, at the newsprint inquiry at Ottawa on Monday, stated that the government might very well assume control of the newsprint paper industry for the duration of the war in order that the publishers would be assured of a steady and adequate supply of paper.

So far, statements of eleven companies have been considered by the commissioner, and he has found to date that the average cost of producing newsprint at these plants, exclusive of any provision for contingency, but including all incidentals and 10 per cent. interest on common stock, is $57.50 per ton.

Preliminary to the submission of statements on Monday there was discussion between Mr. Geoffrey Clarkson, the investigating commission's accountant, and the lawyers present on behalf of the paper manufacturers as to whether 10 per cent. on common stock was a sufficient return. The accountant has put this item in at this figure in all the statements, and, despite all the contention to the opposite, would not budge, saying it was up to the manufacturers to argue to the contrary.

While the E. B. Eddy plant was under consideration, Mr. J. F. Orde, K.C., the legal representative, stated that Mr. George H. Millen was seriously thinking of giving up the manufacture of newsprint because there was no money in it.

LABOR LEGISLATION IN CANADA

In 1916 laws in the field of labor legislation were passed by the Canadian government and by the legislatures of all the provinces except Prince Edward Island. The outstanding feature was the enactment of workmen's compensation laws in the provinces of Manitoba and British Columbia, following the passage of compensation statutes in Ontario in 1914 and in Nova Scotia in 1915. In the autumn of 1915 the British Columbia government appointed a commission to investigate the subject of workmens compensation, which reported favorably in time for the passage of the act at the next session of the legislature. The enactment of modern compensation laws by four provinces brings Canada fairly well in line with the rapid development of legislation of this kind throughout the world. Another measure of first importance is the Trades and Labor Branch Act of Ontario, which establishes a new unit for the administration of all labor legislation other than the Workmen's Compensation Act. Progress of the movement for fair wages in government contracts is evidenced by the establishment of a permanent fair wage board in Manitoba and by provision for the insertion of fair wage clauses in contracts given by the board of highway commissioners and the department of public works in Saskatchewan, and by the shipping credit commission in British Columbia. As to other wages legislation, amending acts were passed by different provinces dealing with mechanics' liens and the garnishment and non-payment of wages. The time of payment of wages of certain classes of employees received attention in Ontario and Nova Scotia. A number of laws were passed dealing with the examination and licensing of workmen, chiefly stationary engineers, and elevator operators in Manitoba, traction engineers in Saskatchewan, and coal miners in British Columbia. With regard to the regulation and inspection of factories, the federal government postponed the enforcement of certain sections of the White Phosphorus Matches Act, and the provinces of Alberta and Saskatchewan passed almost identical fire prevention laws, dealing incidentally with the prevention of fires in industrial establishments. There were only two enactments bearing on the employment of women and children—an amendment to the Manitoba Shops Regulation Act regulating the hours for children, young persons and women in shops, and directing employers to provide seats for female employees, and an amendment to the New Brunswick Factories Act, which also provides seats for female employees. In British Columbia and Saskatchewan legislation on holidays and rest days [illegible]. Vocational training was the subject of legislation in Ontario only, where a new Adolescent School Attendance Act was passed. An interesting review of labor legislation in Canada has just been published by the department of labor, Ottawa.

COCKSHUTT PLOW COMPANY, LIMITED

Report of Proceedings at the Annual General Meeting

The Sixth Annual Meeting of the Shareholders was held at the Head Office of the Company, Brantford, on Wednesday, October 10 at twelve o'clock. The Annual Report and Statements for the year ended June 30, 1917, and which had previously been mailed to Shareholders, was adopted.

The President, Col. H. Cockshutt, reviewing the year's operations, said: "Your Directors feel gratified that the year's work has shown as good results as the statement indicates. We have had many difficulties to contend with and great care has had to be exercised to obtain results. The year's output could have been greatly increased had we been able to secure the necessary material and efficient labor. We received many orders which we were unable to accept. There has been a great increase in orders for Tractor Plows and we have been able to handle a good portion of this business. Our Export Trade has also shown a marked increase. For the coming year we have very good prospects of doing an increased business and, if we are not hampered unduly by the difficulties before referred to, I look forward to a satisfactory year.

"We told you last year that we had not made munitions as our Plant had not the proper equipment for that work. We believe we have acted wisely in this respect as now we see our own trade coming back steadily and the outlook is excellent. The call for increased production from the land means that the proper implements to obtain this increase are necessarily a part of the proposition. We have sold large numbers of Tractor Plows to the Imperial Government and also the Government of Ontario. These plows are being used by these Governments in their efforts to increase food production."

Mr. George Wedlake, First Vice-President, who seconded the motion for the adoption of the report said: "We have had the same difficulty this year to contend with as last on account of the scarcity of men and material. The situation at the present time, however, is somewhat easier, in regard to labor. The demand for our products during last year was the greatest in the Company's history, but the factory output was restricted for the reason given above. Shipments have increased approximately 50% this year over shipments for the same period last year. I might mention the fact that during last year we gave preference in the factory to the goods required for the English Trade. We recognized that Great Britain, on account of the Submarine Menace, is confronted with the serious problem of procuring sufficient foods for her needs and we have done everything in our power to make the Greater Production Campaign a success in the Mother Country. The present business outlook is good although the much higher prices that will prevail next year may restrict buying to some extent. However, stocks of low-cost raw material are exhausted and prices of implements have now to be charged in accordance with the high prices paid for material and labor. Our plant has been kept in good condition for operation. Our product, in design and workmanship, is of the highest standard as evidenced by the demand from all parts of the trade. The volume of business next year will be in accordance with the number of men available and the material that can be procured."

Mr. George Drummond, Second Vice-President, spoke briefly and referred to the strenuous manufacturing conditions of the year just closed and congratulated the Shareholders on the position of the affairs of the Company. He referred to the honor conferred on the President, who was recently called to a seat on the Board of the Bank of Montreal.

Mr. E. A. Mott, Western Canada Sales Manager of the Company, spoke of conditions in that territory. He said: "It is very encouraging to note the continued marked improvement in general conditions throughout Western Canada. Our business on the whole has been quite a satisfactory one. The volume of sales would have been considerably larger if the factory output could have been increased. The Company's product throughout the West enjoys a splendid reputation. We have been able, due to improved financial conditions, to further materially reduce our outstanding accounts during the year. Our cash collections have exceeded our sales by nearly 100%. The general trade outlook for the Western Provinces this year is quite encouraging and our volume of sales will probably be bounded only by our ability to produce the goods in our factories."

A by-law was passed at this meeting changing the number of Directors from nine to seven, and the following Directors were elected: Col. H. Cockshutt, George Wedlake, George E. Drummond, E. A. Mott, G. K. Wedlake, Sir Augustus Nanton and F. Perry. All acts and proceedings of the Directors during the year were ratified, approved of and confirmed. A dividend of 1% on the preferred capital stock of the Company was declared at the last meeting of the Directors. This dividend is payable November 1 to all Shareholders on record September 29, 1917.

LOOK TO THE FIRST CLASS

Preparations have been rushed to take care of the first men called up under the Military Service Act, since all indications point to a heavy response at the very first. It requires a huge organization throughout the country to take care of the operation of the act.

The governor-general's proclamation was printed in all the newspapers of the country on October 13th, calling up the first class. This includes all male British subjects between the ages of 20 and 34 who were unmarried on July 6th, 1917, or are widowers without children. All such men must report for service on or before November 10th next if application for exemption has not been made in their behalf before that date.

Since, by this time, the country has been fully informed as to each man's duty under the Military Service Act, and knows the severe penalties provided for those who try to evade the law, a speedy formation of the required reinforcements to the number of 100,000 is expected from the first class called.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

Rate in New York for sterling demand, $4.75 3-16.
Bank of England rate, 5 per cent.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

CANADA CEMENT COMPANY, LIMITED

FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 19th October, 1917.

Mr. G. D. Finlayson, superintendent of insurance for the Dominion, spoke to the Montreal Life Underwriters' Association last week on "Progress of Life Insurance in Canada for the Last Fifty Years and Prospects for the Future." He reviewed the progress of the life insurance business during the last half century, quoting figures to show the large increase throughout the country generally. The total amount of life insurance in force slightly exceeded the amount of money in the banks, he said. Mr. E. E. Duckworth, the newly appointed superintendent of insurance for the province of Quebec; Mr. J. T. Lachance, president, and Mr. W. J. Delaney, secretary of the Quebec Association, were present as guests.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

WANTED, BRANCH MANAGER.—An old, well-established Canadian Life Insurance Company, with Office in Vancouver, is desirous of securing a Branch Manager for the City of Vancouver and surrounding territory. To a man of ability, who can organize, and produce a good volume of first-class business, a splendid future is assured. Applicant, however, must know conditions as they are at the Coast, and possess a first-class connection. He must be a man of integrity. To such a man, a satisfactory contract will be given. Apply, in first instance stating age, experience and salary expected. All replies will be treated as strictly confidential. Box 113, *The Monetary Times*, Toronto.

POSITION WANTED.—Experienced Fire Insurance Man wants position as Special Agent for Western Provinces for some good Company. Has personal business. Best references as to character and ability. Correspondence confidential. Box 1377, Vancouver, B.C.

POSITION WANTED.—Experienced Fire Insurance Man (returned Overseas Officer, now discharged), well acquainted with the whole country, nine years office experience and eight years experience as Inspector with Tariff Companies, wants inside position such as office manager, chief clerk, etc. Best of references. Box 117, *The Monetary Times*, Toronto, Ont.

FOOD CONTROLLER AND BREAKFAST CEREALS

The food controller, Hon. W. J. Hanna, has authorized the date for disposing of small packaged cereals until December 1st for manufacturers and wholesalers and January 1st for the retailers. After these dates it will be unlawful to offer for sale any of the well-known cereal breakfast foods in less than 20-pound packages. The following figures indicate how the trade will be affected:—

Cereal manufacturers affected in Canada	60
Estimated capitalization	$ 25,000,000
Kindred trades affected, estimated capital	100,000,000
Workmen affected in Canada, directly	800
Men affected in Canada, directly	8,000
Toronto wholesalers affected	15
Spent annually in advertising patent breakfast foods	Millions
Spent daily on patent breakfast foods in Toronto $	10,000

The food controller will meet on Saturday manufacturers, wholesalers and retailers who are interested in the recent order-in-council respecting cereals.

Mr. J. M. Godfrey, of Port Credit and Toronto, explained the Victory Loan and urged all present to invest to the extent of their ability at the Win-the-War Convention held at Essex, Ont., on October 24th.

NEW INCORPORATIONS

No Company Chartered This Week Reaches Over $1,000,000 Capital

The following were the largest companies incorporated last week:—

Sino-North American Company, Limited, Montreal, Que.	$1,000,000
Canadian Maritime Company, Limited, Montreal, Que.	1,000,000
Guindon Mining and Milling Company, Limited, Moyie, B.C.	1,000,000
North Canada Exploration Company, Limited, Winnipeg, Man.	1,000,000

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Hall, B.C.—Mankin Lumber and Pole Company, Limited, $100,000.

Prince Rupert, B.C.—Empress Social Club, Limited, $10,000.

Victoria, B.C.—Amy Turner Shipping Company, Limited, $60,000.

Dome Creek, B.C.—Dome Creek Lumber Company, Limited, $15,000.

Moyie, B.C.—Guindon Mining and Milling Company, Limited, $1,000,000.

Village of St. Anne, Man.—Ste. Anne Trading Company, Limited, $5,000; T. B. Molloy, M. Molloy, J. H. Bourgouin.

Montreal, Que.—Canadian Maritime Company, Limited, $1,000,000; W. K. McKeown, L. C. Herdman, G. E. Chart. Sino-North American Company, Limited, $1,000,000; W. R. Shanks, F. G. Bush, H. W. Jackson. Dominion Umbrella Factory, Limited, $20,000; Messrs. A. R. McMaster, A. Angers.

Toronto, Ont.—Canadian Tie and Lumber Company, Limited, $150,000; W. A. Case, J. B. Taylor, M. Smith. Heating Specialty Company, Limited, $50,000; J. Parrish, S. Egan, W. A. Ross. W. G. Wood, Limited, $100,000; W. G. Wood, H. H. Davis, E. H. Brower. Northern Central Coal Company, Limited, $50,000; R. C. Jennings, J. C. Keenan, J. Jennings.

Winnipeg, Man.—The Grain Growers' Guide, Limited, $40,000; T. A. Crerar, J. Kennedy, G. F. Chipman. North Canada Exploration Company, Limited, $1,000,000; A. D. Sproule, J. Morrison, J. E. Ward. Winerals and Cathcart, Limited, $50,000; H. H. Winerals, G. E. Cathcart, P. R. Babcock. The Whitemouth Brick Company, Limited, $5,000; J. W. Mitchell, B. B. Smith, F. Toole.

Vancouver, B.C.—New York Outfitting Company, Dresswell on Easy Terms, Limited, $20,000. Dicks, Limited, $15,000. The Anyox Drug Company, Limited, $10,000. Dairy Machinery Company, Limited, $10,000. Canadian Kill Glare Lens Company, Limited, $30,000. Wallace Foundry Company, Limited, $75,000 Daily Province Real Estate Association, Limited, $250,000. Pacific Agencies, Limited, $10,000. Motherhood Medical Company, Limited, $200,000. Walsh Construction Company, Limited, $25,000. Smith Dollar Timber Company, Limited, $50,000. British Columbia Hotels, Limited, $30,000. Kamloops Silver Mines (non-personal liability), $200,000. Lock Financial Company, Limited, $10,000. North Canada Lumber Company, Limited, $10,000. Transpacific Navigation Company, Limited, $100,000. Wonder Pup and Engine Company, Limited, $25,000. Business Accessories Sales Company, Limited, $25,000. Pacific Equipment Company, Limited, $10,000. Brandram-Henderson of British Columbia, Limited, $10,000. St. Joseph Gold Mines, Limited (non-personal liability), $100,000. Progress Publishing Company, Limited, $15,000.

Mr. F. C. T. O'Hara, deputy minister of trade and commerce, Ottawa, after a visit to Washington, in regard to iron and steel supplies, urges rigid economy with metals in Canada.

Preston, Ont.—October 19—Clare Brothers & Company's brick register room. Estimated damage to stock $250, on building $500,

St. George's Beauce, Que.—October 22—Mr. V. Dionne's drug store, and M. M. Morrisette and Frere's general store. Insurance carried as follows:—On Dionne's: Sherbrooke & Stanstead, $2,000; Mount Royal, $500; Norwich Union, $1,-000; Royal, $1,000; Phœnix of London, $2.600. On M. M. Morrisette and Frere's general store:—North British & Mercantile, $1.000; Liverpool & London & Globe, $1,000; Guardian, $1,000; Union of England, $1.000; Mount Royal, $1.000; Royal, $3.000. Loss about total.

St. Thomas, Ont.—October 8—The St. Thomas Packing Company's cattle sheds and part of main building. Estimated loss on stock, $700; on buildings, $4,000.

Toronto, Ont.—October 23—Sun Insurance office building destroyed. Estimated damage on building, $2.000. Insurance on building, $20,000, carried in the Sun Insurance Company.

RAILROAD EARNINGS IN SEPTEMBER

The three principal Canadian railways reported decreases in net earnings for the month of September. The largest decrease was that of the Grand Trunk Railway, the net earnings for last month being $643,808, or 42.4 per cent. off from the corresponding period in 1916. The earnings in September this year were $874,245, as against $1,518,053 in 1916.

The Canadian Northern Railway's decrease amounted to $306.700, the respective net earnings being $425.900 in 1917 and $732,600 in 1916, or a falling off of 41.89 per cent.

The net earnings of the Canadian Pacific Railway for the month of September totalled $3.747,150, a falling off as compared with 1916 of $1,382,808, or 26.94 per cent. The net earnings for the three roads, with comparisons, are as follow:—

	1917.	1916.	Decrease.	%
Canadian Pacific Railway	$3.747.150	$5,129.958	$1,382.808	26.94
Canadian Northern Railway	425,900	732,600	306,700	41.89
Grand Trunk Railway	874,245	1,518,053	643,808	42.4
Total	$5,047,295	$7,380,611	$2,333,316	31.6

CONSUMERS' GAS COMPANY'S REPORT

By dint of excellent management, the Consumers' Gas Company, Toronto, managed during its latest fiscal year to increase the net earnings above the high record of 1914. This was in spite of the greatly increased cost of operating expenses. For the year ended September 30th, the net expenses, after operating and taxes, was $953,306, [illegible] result, even in view of the fact that larger capital was employed. The company's capital on September 30th amounted to $5,360,700 and the reserve fund to $3,525,833.

There was an increase of [illegible] from the sale of gas and an almost corresponding increase in operating expenses. There are more gas customers in Toronto than water customers, and there was an average increase of nearly fourteen new meters per working day for the past year. In the last ten years the output of gas has more than doubled.

How the results of the past two years' operations compare is shown in the following table:—

	1916.	1917.
Gross earnings	$3,637,806	$4,296,349
Operating expenses	2,589,899	3,189,864
Taxes	128,330	153,179
	$2,718,229	$3,343,043
Net earnings	919,577	953,306
Other income	....	25,000
Gross income	$ 919,577	$ 978,306
Interest	50,998	46,271
Balance for dividends	$ 868,579	$ 932,035
Per cent. earned	17.79	18.80
Dividends paid	488,200	495,740
Surplus for year	$ 380,379	$ 436,294
	1914.	1915.
Gross earnings	$3,577,982	$3,440,008
Operating expenses	2,533,663	2,439,151
Taxes	99,370	135,468
	$2,633,033	$2,574,619
Net earnings	944,949	865,388
Gross income	$ 944,949	$ 865,388
Interest	32,080	47,381
Balance for dividends	$ 912,869	$ 818,007
Per cent. earned	18.70	16.75
Dividends paid	483,337	488,200
Surplus for year	$ 429,532	$ 329,807

Mr. A. W. Austin, president, stated at the annual meeting that he saw no reason why the regular dividends should not continue as in the past. He also noted that the company's stock has been affected by the war less than most industrials.

The Consumers' Gas Company is one of the most public-spirited and best-managed corporations on this continent. For many years the company has given excellent service at a low cost. This policy, despite war conditions, has been continued under the capable management of Mr. Arthur Hewitt, general manager, who is [illegible] by a splendid organization and active directorate, headed by president A. W. Austin and vice-president W. Francis, K.C.

FORD MOTOR COMPANY OF CANADA

Handling a volume of business aggregating $23,690,632 during the fiscal year ended July 31st, the Ford Motor Company of Canada shows an increase of $8,532,000 over its operations the preceding year, according to reports submitted to the company's stockholders at their annual meeting.

Analysis of the year's business shows domestic trade amounting to approximately $18,000,000 in cars and $1,422,000 in parts, with foreign business of $2,000,000 in cars and $614,000 in parts. The sale of parts for the company's cars, it was pointed out, is rapidly assuming large proportions, and for the current fiscal year it is estimated that branch of the business will amount to about $6,000,000.

The company's production during the year ending July 31st was 50,827 pleasure cars, compared with 32,646 the year before, an increase of 18,181. No trucks were included in the output. For the current fiscal year the company's output is estimated at 60,000 cars and 10,000 motor trucks. The increase in production is made possible by important additions to the plant and facilities in Ford during the year, involving large expenditures as follows: Addition to machine shop, $389,000; new machinery for machine shop, $352,000; electrical equipment, $110,000; addition to factory, $86,000.

The stockholders were informed that with the additions made during the year just ended the company will require no further extension of plant and equipment during the present fiscal period, except for additional machinery for the manufacture of parts, cost of which is estimated at about $350,000.

Outlining the programme for the present year, Mr. G. M. McGregor, first vice-president, treasurer and general manager, explained that, unless some unforeseen obstacle arises, such as inability to get labor, coal or materials, realization of the production scheduled for the year is certain. Mr. McGregor announced that no action will be taken by the company at present in the matter of distributing a further dividend in stock, unsettled conditions created by the war having made it appear desirable to conserve resources.

Commenting on the fact that many inquiries have been received, asking if it would be the maker in Canada of the Henry Ford tractor, Mr. McGregor submitted to the stockholders a statement from the firm's attorneys which said careful study of the company's agreement with Henry Ford disclosed nothing in the agreement that conveys to the company any rights as regards the tractor.

The directors and officers of the company were re-elected as follows: Henry Ford, president; G. M. McGregor, first vice-president, treasurer and general manager; James Couzens, second vice-president; F. L. Klingensmith, third vice-president; W. R. Campbell, secretary. The company now operates eight branches in Canada: Toronto, Winnipeg, Montreal, St. John, N.B., Vancouver, London, Calgary, Saskatoon, and one in Melbourne, Australia.

SIXTY-NINTH ANNUAL REPORT OF THE

CONSUMERS' GAS COMPANY OF TORONTO

YEAR ENDING 30TH SEPTEMBER, 1917

In presenting to the Shareholders the Sixty-Ninth Annual Report, the Directors have much satisfaction in being able to state that the Company's business has continued to increase, and that its affairs are in a prosperous condition.

There has been an unprecedented demand for gas during the year, and notwithstanding the many difficulties which have arisen because of labor shortage, transportation complications, the high cost of raw materials, increased taxation, and other unusual conditions, the extraordinary demand for gas has been fully met, and this without any large capital expenditures having been undertaken.

Regard being had to the strenuous conditions, financial and otherwise, existing by reason of the war, it will be obvious that the Company has met these conditions successfully, and that to the advantage of the Shareholders on the one hand, securing to them the continued strong and good standing of the Company, and on the other hand, showing to the consumers the successful efforts that have been made to meet their requirements.

To meet these unusual conditions, has necessitated vigilant care on the part of the Directors, and has involved the closest application to the Company's affairs, on the part of the General Manager, the Secretary, the Superintendents and other officials of the Company, all of whom have proved themselves equal to their responsibilities.

It will be observed that the increase from the sale of gas, has been $519,750.10, and that there has been a very closely corresponding increase in operating expenses; the cost of coal, oil, and other raw materials, and labor, having been very much higher than in the preceding year.

A gratifying feature of the year's operations, has been the development of the sale of gas, in large quantities, for industrial purposes. The higher prices of coal and oil have resulted in the very general adoption of gas as fuel, by industrial concerns, and there is good prospect of this branch of the Company's business being still further extended.

The Company has also been called upon to supply very large quantities of gas to the Military Hospitals, Camps and Depots, and the service which the Company has been able to render, has proved most satisfactory to the military authorities.

On the 21st of May, nine thousand, five hundred and seventy four (9,574) shares of new capital stock, having a par value of four hundred and seventy-eight thousand, seven hundred dollars ($478,700.00), were allotted and accepted at a premium of fifty per cent., the amount realized amounting to seven hundred and eighteen thousand and fifty dollars ($718,050.00). Up to the 30th of September four hundred and sixty-six thousand and thirty-five dollars ($466,035.00) had been paid in. The balance outstanding, two hundred and fifty-two thousand and fifteen dollars ($252,015.00) will fall due for payment at intervals during the current financial year.

Your Directors desire to place on record their deep regret at the death on the 10th of August of their honored colleague, Sir Wm. Mortimer Clark, K.C., W.S., LL.D., who for many years rendered valuable service to the Company as a Director.

The vacancy in the Directorate caused by the death of Sir Mortimer Clark, has been filled by the election by the Board of Lt.-Col. J. F. Michie.

Your Directors refer with pride to the fact that three hundred and ninety-three of the Company's men—40%—have voluntarily enlisted for active military service. Thirty-five of this number have made the supreme sacrifice. To the families of those who have fallen, your Directors extend their sincere sympathy.

The Shareholders are asked to confirm the following subscriptions and special allowances, made by the Directors during the past year:—

December, 1916	British Sailors' Relief Fund	$1,000.00
January, 1917	Toronto and York County Patriotic Fund	5,000.00
May, 1917	The Toronto Military Service Fund of the National Y.M.C.A.	500.00
October, 1917	British Red Cross Fund	2,000.00
	Payments to wives and families of men enlisted for active military service overseas	25,662.50

The following statement for the past, as compared with the preceding year, shows:—

	Meters.	Gas Sales.
Year ending 30th September, 1917	108,719	$3,007,423.89
" " " " 1916	104,541	2,487,673.79
Increase	4,178	$519,750.10

All of which is respectfully submitted.

A. W. AUSTIN, President.

President's remarks in moving the adoption of the Sixty-Ninth Annual Report.

In moving the adoption of the report for last year, I spoke of our statement as being very satisfactory. This year, I have pleasure in stating that it is even more satisfactory. Referring to it as a whole, I think we have every reason to be gratified.

The ever increasing volume of business demonstrates the great field for gas. Already there are more gas customers in the city than water customers. Our statement shows an average increase of nearly fourteen new meters per working day, for the year; and in the last ten years, the output of gas has much more than doubled. No other gas company is doing so large a business on so small invested capital. As I have stated before, our shareholders have nothing to fear from electric or other competition; we have our own field of usefulness. I can see no reason why our regular dividends should not continue as in the past, and I am pleased to see that our stock has been affected by the war, less than most industrials.

To take care of the large increase in business has been a severe tax on our employees who, under trying conditions (when I may say over a third have gone to the war), have shown great courage and devotion to duty.

We made no mistake when we enlarged our plant a few years ago, to provide for making oil gas as well as coal gas, as on account of the great shortage of coal, oil has come to our rescue quite frequently.

We made our contracts for coal and oil supplies in good season, as usual, but owing to miners' strikes, shortage of cars, and embargoes placed on coal coming into Canada, we have had a very anxious time. It is unfortunate that we have to go outside our own country for coal, and large quantities of oil. Surely our government should learn a lesson from shortages in these most important commodities of late, and set aside a certain sum each year to make tests for oil, coal and natural gas. Our experience since the war started shows the wisdom of such a policy.

We are deeply grateful to some of the coal mining companies in the United States, who have made special efforts to provide us with a supply, even when the demand in their own country was very pressing, some of their gas companies having to shut down for want of coal. Of course the high standing of our company, and happy relations of the past made them anxious to hold our business, and also, they wished to assist an allied country.

In some few sections of the city, where the population has grown very rapidly, we find our mains hardly large enough for the demands upon them, at the time of "peak" loads. We must ask customers in these districts to be patient, as in these war times, it is next to impossible to obtain new pipes, or men to lay them. I am sure they will understand the heavy strain upon us, under war conditions.

I may mention a strange fact. This year, as there has been little or no undermining of our mains, through the operations of others, we have less wastage of gas than ever before.

STATEMENT SHOWING PROFIT

A. W. AUSTIN,
President.

ARTHUR HEWITT,
General Manager.

We beg to report the completion of the audit of the books and vouchers of the Consumers' Gas Company of Toronto, for the year ending 30th September, 1917, and certify to their correctness.

(Signed) W. E. SAMPSON,
EDMOND GUNN, F.C.A.,
Auditors.

Toronto, 18th October, 1917.

The following gentlemen were elected Directors for the ensuing year:—A. W. Austin, A. H. Campbell, Wellington Francis, K.C., F. LeM. Grasett, M.D., John Hoskin, K.C., LL.D., D.C.L., H. Langlois, Thos. Long, Lieut.-Col. J. F. Michie, Sir Edmund Osler, M.P.

At a meeting held subsequently Mr. A. W. Austin and Mr. Wellington Francis, K.C., were unanimously re-elected President and Vice-President, respectively.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Asbestos Corporation of Canada.—This company has reopened the old Fraser mine in Broughton township and is installing a mill.

Winnipeg Electric Railway Company.—In our issue of October 19th the August net earnings read: $506,701; decrease, $291,707. This was an error. The line should read: $30,457; decrease, $46,478.

Nova Scotia Steel and Coal Company.—The $5,000,000 new common stock of Nova Scotia Steel and Coal Company, the final payment on which falls due in November, was listed on the Montreal stock exchange last week.

Acadia Sugar Refining Company.—A circular has been sent out by the company, signed by Mr. D. R. Turnbull, its secretary, announcing a meeting to consider a possible sale, or, on the other hand, a reorganization of the company.

Duluth-Superior Traction Company.—Gross passenger earnings in the third week of the month totalled $31,444, an increase of $3,670 over the same period of a year ago, when earnings totalled $27,774, the increase amounting to 13.2 per cent. In the previous week of the month earnings amounted to $30,868, and in the first week totalled $30,367. Earnings for the year to date show an increase of 15.3 per cent. over the same period of a year ago.

Montreal and Southern Counties Railway.—The annual meeting of the board was held at the head office, McGill Street, Montreal, last week, Howard G. Kelly presiding. The following officers were appointed: Howard G. Kelly, president; Frank Scott, vice-president and treasurer; J. E. Dalrymple, vice-president; W. H. Biggar, general counsel; James A. Yates, secretary; W. H. Ardley, comptroller; W. B. Powell, general manager. The directors elected were: Howard G. Kelly, Frank Scott, J. E. Dalrymple, W. H. Biggar, W. H. Ardley and J. A. Yates.

Twin City Rapid Transit Company.—The statement of the company for September shows gross earnings at $849,506, as compared with $854,747 for the same month in 1916. There is a noted falling off in net, which is at $292,750 for the current month, as compared with $349,937 for the corresponding month a year ago. For the first nine months of 1917 the gross revenue amounted to $7,732,106, comparing with $7,594,988 a year ago. The net income is $2,627,245 thus far this year, as contrasted with $2,902,211 for the first nine months of 1916.

Canada Copper Corporation, Limited.—The company's Greenwood, B.C., September smelter output of 537,229 pounds established a new high record for several years. The smelter was closed in July and part of August as a result of coke shortage incident to the strike in the Crow's Nest Pass coal fields.

A contract has been made with the West Kootenay Power and Light Company to supply electric power to the mines and new concentrator under construction at Copper Mountain, in the Simalkameen district, B.C.

Niagara Falls and Canadian Power Company.—The combined income account of the two companies for the quarter ended September 30th, 1917, follows:—

	1917.	1916.
Operating revenue	$845,199	$774,312
Amortization and operating taxes	315,705	213,160
Net operating revenue	$529,494	$561,152
Non-operating revenue	44,100	38,910
Net income	$573,594	$600,062
Interest, etc.	249,285	248,935
Surplus	324,309	$351,127

Russell Motor Car Company.—It was stated at the annual meeting that war orders received from the United States government would necessitate the erection of a plant in the United States and the possible incorporation of an American subsidiary. The company intended to acquire property in Buffalo, for which they were now negotiating, in order the better to fill their United States government war orders. Officers and directors of the company for the ensuing year are: President, Lloyd Harris; vice-president, T. A. Russell; A. E. Ames, E. B. Ryckman, J. N. Shenstone, C. R. Burt and H. D. Scully.

Consolidated Mining and Smelting Company.—Mr. J. J. Warren, referring to a despatch from Nelson, which said that the company has put an embargo on lead ores containing over 4 per cent. zinc, said that Sir Joseph Flavelle, chairman of the Imperial Munitions Board, has agreed to purchase the surplus lead production of the company until March 1st, 1918. The embargo will, therefore, be lifted and normal shipments of lead ore accepted.

Mr. Warren said that the company is in the market for all the high-grade zinc and copper ores that can be purchased, as the company's entire output of these metals is sold for months ahead. The new electrolytic zinc plant of the company is working very satisfactorily, turning out over fifty tons of zinc per day.

Regarding the strike of coal miners at Fernie, the company has a large stock of coal and coke on hand, and that its operations would not be interrupted by a temporary cessation of coal mining, and he thought that the present difficulty would be speedily adjusted.

Nova Scotia Steel Company.—The question has been many times asked whether the company could properly be classed as a dividend payer. In June it declared a dividend of $2.50 per share on the then $7,500,000 common. This dividend was payable the middle of July. No official statement regarding further dividends was made at that time, and none has been since forthcoming. Meantime the stock has sagged down to 80, and gives no hint in its price level of sustained dividend action.

It may be stated, however, that it is quite possible that Nova Scotia Steel will distribute $5 per share a year regularly on its common. Inasmuch as a dividend of 20 per cent in stock is payable November 20th this means that the present holder of 100 shares of common will on that date own 120 shares. The $5 dividend on this 120 shares will be equivalent to $6 per share on the present stock. In other words, $5 per share on the $15,000,000 common outstanding November 20th would be equal to $6 per share on the present $12,500,000 common. The above is the view of a Boston despatch.

Coniagas Mines.—President Leonard, in reviewing operations during the past year, states that, while the annual report to be published in December will show that prosperity has been enjoyed during the fiscal year to the end of October 31st, the directors consider it advisable to conserve funds instead of paying a dividend on November 1st next. During the year the company has paid two quarterly dividends of 5 per cent. and one of 2½ per cent., making a total of 12½ per cent., or $500,000. He predicts a production from the mine for the year of about 1,250,000 ounces of silver, which is less than previous years on account of the decrease in the production of high-grade ore. The company has brought large quantities of ore from other mines, so that the quantity at the smelter now amounts to materially over 2,000,000 ounces of silver in process of reduction and refining. It is expected to realize on much of this silver at profitable prices.

Additional reasons for conserving cash arise from the company's Porcupine investments, where it has purchased the Anberite claims for $150,000, on which a $10,000 payment has been made, and the Wardens-McDonald claims for $22,100, and has spent $70,000 in developing these, which expenditure for the year will probably amount to $150,000 during the coming year. In addition, there is also falling due two years' war tax of undetermined amount.

1918 - Monetary Times Annual - 1918

EVERY year the MONETARY TIMES ANNUAL is endorsed by the principal business men and financiers of Canada as an indispensable work of reference. Its value in this regard has been demonstrated over and over again until to-day it is to be found in all well-conducted financial, insurance and commercial offices in the country.

Year by year there is an ever-increasing demand for the Annual.

In order to adequately care for the 1918 Annual in this respect we have plans which insure a wider and more valuable distribution of the issue than of any previously sent out.

In spite of these larger plans and the fact that the cost of production of such an issue has gone up considerably the advertising rates will remain the same as in previous years.

There are some very desirable positions available. In order to secure one of these it is advisable that you write us as early as possible.

Read what a few of Canada's leading men of affairs have to say concerning the Monetary Times Annual.

"It had been my intention to quote some of the trade and financial statistics, but having recently had opportunity of studying, to some extent, the splendid review published by *The Monetary Times* on January 5th, I shall follow the precedent of some former presidents and omit these statistical statements."—ARTHUR HEWITT, ESQ., in presidential address before the members of the Toronto Board of Trade, January, 1917.

"There is a great deal of valuable information in your Annual which we find very useful to refer to from time to time."—MESSRS. OSLER, HAMMOND & NANTON, Winnipeg.

"I would like to bear testimony to the excellence of your Annual Number. It is a splendid contribution to Canadian war-time finance—a magnificent example of that new spirit which has taken possession of Canada since the beginning of the war."—R. E. ARMSTRONG, Secretary, St. John Board of Trade.

"A great many thanks for the most interesting and valuable Finance and Trade Review which *The Monetary Times* have just published. I shall keep it by me for reference during the coming year as I know it will prove of great value on many occasions."—H. V. F. JONES, Assistant General Manager, Canadian Bank of Commerce.

"Allow me to congratulate you on the 1917 Annual, which seems to me by far the most interesting and complete that you have ever issued. You are establishing a record that is enviable."—KINGMAN NOTT ROBINS, Treasurer, Associated Investors, Rochester, N.Y.

"The volume is a veritable vade mecum of financial and commercial information to which one will refer every now and again with the utmost confidence and satisfaction."—S. R. PARSONS, President, Canadian Manufacturers' Association.

"Without doubt the issue is the best Canadian financial publication that I have ever had an opportunity of looking over. There is a surprisingly large amount of information in this volume, much more so than is usually in a financial journal."—W. A. MACKENZIE, Toronto.

"I read the office copy which came in a few days ago, and wish to congratulate you upon the enormously valuable review of finance, development, etc., in Canada during 1916."—JAMES WHITE, Assistant to Chairman, Commission of Conservation, Ottawa.

"I received copy of *The Monetary Times Annual* for 1917, and I must congratulate you very much on this splendid issue. It certainly contains a world of information to any Canadian, and in this regard I have placed it in my private library for further reference. This is the most interesting issue that I have ever seen turned out by any financial newspaper, and I can assure you I appreciate it very much."—E. F. HUTCHINGS, Great West Saddlery Company, Winnipeg, Man.

"I have been greatly interested in your Annual Number this year, which I believe to be quite the best you have ever issued. Certainly there has been more meat for myself in this number than in any previous one."—A. L. CROSSIN, President, Western Canada Mortgage Association, Winnipeg.

You Look for Security

Whether with the intention of taking out insurance or associating yourself with some Company, you look for security.

The latest figures emphasize the unexcelled financial position of this Company.

Business in Force over......$59,600,000
Assets over................ 16,400,000
Net Surplus................ 2,600,000

These are reasons why the Company is known as

"SOLID AS THE CONTINENT"

North American Life Assurance Co.
HEAD OFFICE - TORONTO, ONT.

SIMPLICITY FIRST

is about as important in your life assurance as "Safety First," because a contract that is not simple to understand may not be safe for your particular purpose.

The life assurance policy of the future must be an attractive and exactly worded contract, but above all CLEAR and SIMPLE — the new policy standard as set by

The Sovereign Life Assurance Co. of Winnipeg

Guardian Assurance Company Limited - Established 1821.

Assets exceed Thirty-Five Million Dollars

ARMSTRONG & DeWITT, General Agents,
6 Wellington Street East - Toronto

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

The Mutual Life Assurance Co. of Canada

TO SALARIED MEN

Send for the pamphlet "Our Savings" issued by The Great-West Life Assurance Company.

It shows that a suitable Life Policy offers the surest way of providing a competence for old age—while at the same time assuring the comfort of dependent ones—should untimely death occur.

Ask a Great-West Policyholder what he thinks of his policy.

Some 65,000 Policyholders have shown that they consider The Great-West Policies the best available.

Patriotism and Common Sense

THE lists will open on November 12th for the subscription of $150,000,000 of Victory War Loan Bonds, the most attractive investment ever offered to the people of Canada.

Business is good. The Government and our Allies are spending nearly $3,000,000 a day in this country. Much of this large sum is paid for labor. We have filled in Canada war orders valued at $1,500,000,000. Our factories and farms are working overtime. We are prosperous, determined to win the war, and to establish credits to finance Britain's vast purchases here. Prosperity can be maintained, the war more nearly won and credits advanced, by making Canada's Victory Loan an overwhelming success.

Double Your Intended Subscription and Make It a Real Victory Loan!

This page has been donated by The Monetary Times to the Victory Loan campaign.

Canada's Victory Loan Bonds Best Offered Here

THREE *Maturities, High Yield, Long Period For Payment, Low Denominations, Tax Free, Convertible — Analysis of the Prospectus—How It Compares With Our Other War Loan Offerings.*

THE Victory Loan bonds are the most attractive investment ever offered in this country. While patriotism is expected to ensure the substantial oversubscription of the loan, judged solely from the investment viewpoint, the bonds are so attractive that a heavy oversubscription should result. Sir Thomas White remarked in the House at Ottawa on February 1st, last, that the patriotic aspect of a war loan creates a certain atmosphere which is favorable, "but your loan," he said "must conform with market conditions or, even if immediately successful, it will go to a discount later on. In other words, it must conform with the prevailing financial conditions applicable to that class of security; otherwise, investors will subscribe for it under patriotic impulse, hold it for a little while, and then sell it out and buy something more attractive. I am quite clear that your loan must be such as, in the estimation of the investing public, makes it a desirable investment at the time when it is put out."

The finance minister has lived up to this utterance, for the loan will appeal to every class of investor as one of the best offerings ever made to them.

How the issue differs from our previous war loans is a matter of considerable interest. In the Victory Loan, denominations are, for the first time, as low as $50. Previously the lowest denomination was $100. The $50 bonds should attract the subscription of a large number of factory and office workers.

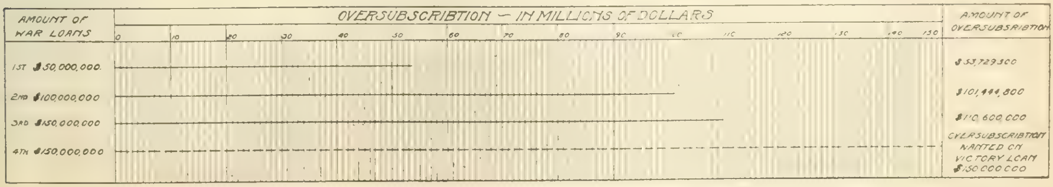
The three previous loans have been issued in 5 per cent. bonds at discounts of 97½, 97½ and 96 respectively. The Victory Loan is in 5½ per cent. bonds, issued at par. This is the first of our war loans to be issued at that price.

The method of paying for the bonds is also more attractive than in the former issues. The subscribers to the first, second and third loans paid 10 per cent. upon application for their bonds. This time they are asked upon application merely to deposit a cheque or an undertaking to pay cash for 10 per cent. of the amount of their application. This cheque or undertaking does not fall due until December 1st. From that date subscribers have five months in which to pay the balance of 90 per cent.—10 per cent on January 2nd, 1918, and 20 per cent. on each of the following dates: February 1st, March 1st, April 1st and May 1st, 1918. Despite the fact that the payments are spread over such a long period, a full half-year's interest will be paid on June 1st, 1918, to buyers of the bonds. The bonds, paid for in instalments in this way, give a net yield to the investor of 5.61 per cent. on the 20-year issue, 5.68 per cent. on the 10-year issue, and 5.81 per cent. on the 5-year issue. The yields on the first, second and third loans were respectively 5.42 per cent., 5.30 per cent., and 5.40 per cent.

For the first time, the minister of finance reserves the right to allot any portion of the amount subscribed in excess of the loan amount, namely, $150,000,000. It is very desirable that the loan should be heavily oversubscribed.

The first war loan was for a period of 10 years, the second for 15 years, and the third for 20 years. On this occasion, there are three maturities, 5, 10 and 20 years. Investors have therefore the choice of buying bonds payable at the end of either of those three periods. Subscribers desiring to convert second and third war loan bonds, however, as part payment for their Victory Loan bonds, can convert into the 20-year Victory bonds only.

The instalment payments of the first loan were spread over 159 days; of the second loan, 94 days; and of the third loan, 96 days. The payments on this loan are spread over 152 days. Supposing, however, a subscriber makes application for some Victory bonds on Monday,



This chart shows the amount of oversubscription in the three previous loans; on the Victory Loan an oversubscription of at least $150,000,000 is desired.

November 12th, his first payment not being due until December 1st, he is allowed, from the time he applies for the bonds, 170 days to complete his purchase.

In the first, second and third loans, the instalments were payable in full on and after the second instalment date, under discount at the rate of 4 per cent. per annum. A similar privilege is granted in connection with the Victory Loan, with the additional attraction that the instalments may be discounted at the rate of 5½ per cent. instead of 4 per cent. per annum.

These bonds will, in the event of future issues of like maturity, or longer, made by the government, other than issues made abroad, be accepted at par and accrued interest, as the equivalent of cash for the purpose of subscription to such issues.

While the prospectus does not so state, *all* the bonds may be registered as to principal or as to principal and interest. Principal is payable and registration may be made at the office of the finance minister and receiver-general at Ottawa and at the various offices of the assistant receiver-general. The prospectus states only that principal is payable at those offices and that bearer bonds with coupons can be registered as to principal only. The changes as noted above were made at a conference of the finance minister and the Dominion executive committee on Tuesday last.

For the first time, a Canadian war loan prospectus is adorned with something other than the terms and conditions of the loan. The Victory Loan prospectus contains this injunction: "Lend to your country—all Canada is your security." There is also the following reminder: "The man, be he rich or poor, is little to be envied, who at this supreme moment fails to bring forward his savings for the security of his country."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Scarboro' Township, Ont.—Tenders will be received up to November 12th for an issue of $4,358 5½ per cent. 9-year debentures. J. H. Richardson, township treasurer, West Hill P.O., Ont.

Alberta.—The following school district debentures were awarded to the Manufacturers' Life Insurance Company at the following prices: Blocks Nos. 1, 4 and 5, $15,200, 97 at 7 per cent.; block No. 2, 20-years, $4,000, 96.75 at 7 per cent.; block No. 3, 5-years, $1,000, 98 at 7 per cent.

Montreal, Que.—The mayor has submitted to the board of commissioners a draft budget for the city for 1918. The sum deemed necessary for the proper care of the municipal services is $16,179,000, $2,000,000 more than was appropriated for the current year. The details are as follows:—

	1917.	1918
Debt charges	$ 5,155,000	$ 5,521,000
School tax	2,060,000	2,750,000
Reserve	419,000	485,000
Losses	95,000	115,000
Salaries and wages	4,033,000	4,451,000
Pensions	43,000	65,000
General expenses	2,281,000	2,792,000
Special re loan	21,000	....
	$14,109,000	$16,179,000

Maisonneuve, Que.—Payment by the city of half-yearly interest coupons which fell due on November 1st was made possible by the prompt action of seven banks of this district. In order that Maisonneuve might not be forced to default, with discredit to itself and reactionary effect of an unfavorable kind on Montreal generally, seven of the banks agreed to come to the assistance of the municipality and provide the funds required to meet the city's obligations.

A total of $407,000 was raised by the voluntary and public-spirited action of the banks concerned, their allotments to the common fund being approximately as follows: Bank of Montreal, $85,000; Royal Bank of Canada, $85,000; Merchants Bank of Canada, $50,000; Montreal City and District Savings, $50,000 Molsons Bank, $25,000; Banque Provinciale, $25,000; Banque d'Hochelaga, $87,000. It is understood that the banks' action was predicated on the city's financial affairs being taken in hand.

The issue of $700,000 20-year 5½ per cent. bonds offered by the city in April has not been sold. Mr. A. P. Frigon has been appointed financial agent of the city.

British Columbia.—The following certificates have been issued by the municipal department: Nanaimo—Debentures numbered 1 to 12, issued under By-law No. 299, real property purchase, $6,000, 10-years; interest, 6 per cent., payable half-yearly. Date of certificate, October 26th, 1917. Victoria—By-law No. 1947, local improvement paving, $11,222, 1 to 10 years; interest, 4½ per cent., payable half-yearly. Date of certificate, October 26th, 1917. Victoria—By-law No. 1948, local improvement paving, $3,068 1 to 10 years; interest, 4½ per cent., payable half-yearly. Date of certificate, October 26th, 1917. Victoria—By-law No. 1959, local improvement paving, $7,944.60, 1 to 10 years; interest, 4½ per cent., payable half-yearly. Date of certificate, October 26th, 1917. Victoria—By-law No. 1974, local improvement paving, $9,056.03, 1 to 10 years; interest, 4½ per cent., payable half-yearly. Date of certificate, October 26th, 1917. Victoria—By-law No. 1975, local improvement consolidation of above four by-laws into one sum of $31,290.63, 1 to 10 years; interest increased to 5 per cent., payable half-yearly, and debentures numbered 12516 to 12599 for the full amount thereunder. Date of certificate, October 26th, 1917.

Saskatchewan.—The following is a list of debenture authorizations granted by the local government board during the week, October 22nd to 26th:—

School Districts.—*Haverhill, $400 10-years not ex. 8 per cent. instalment; Sam Blyth, Haverhill. *Claudia, $1,200 5-years not ex 8 per cent. annuity; T. Kuchler, Horizan. Kingsley, $1,600 10-years not ex. 8 per cent. annuity; T. Treadwell, Broadview *St. Jean Baptiste, $1,000 10-years not ex. 8 per cent. annuity; B. Reo, Titanic. Hilton, $1,800 10-years not ex. 8 per cent. annuity; R. R. Williams, Vantage. *Mackay Creek, $400 10-years not ex. 8 per cent. annuity; F. E. Smith, Maple Creek.

Rural Telephone Companies.—Lockwood, $1,500 15-years not ex. 8 per cent. annuity; E. D. Gardiner, Lockwood. Viscount, $27,600 15-years not ex. 8 per cent. annuity; W. W. Shaw, Viscount. Alida, $3,800 15-years not ex. 8 per cent. annuity; John Selliwell, Alida. Bredenbury, $2,100 15-years not ex. 8 per cent. annuity; L. Keene, Bredenbury. Northern Balgonie, $4,800 15-years not ex. 8 per cent. annuity; C. C. Rigby, Balgonie. Tadmore, $11,400 15-years not ex. 8 per cent. annuity; G. H. B. Franklin, Tadmore. Kaiser, $1,000 15-years not ex. 8 per cent. annuity; C. A. English, Kaiser. Wurtzburg, $6,500 15-years not ex. 8 per cent. annuity; S. Wurtz, R.R. No. 2, Saskatoon. Speers, $2,000 15-years not ex. 8 per cent. annuity; S. C. Wilson, Speers. Anglia, $11,500 15-years not ex. 8 per cent. annuity; R. L. Duff, Anglia.

Village.—Hawarden, $3,000 15-years not ex. 8 per cent. instalment; E. C. Stevens, Hawarden.

The following is a list of debentures reported sold by the local government board during the week, October 22nd to 26th:—

School Districts.—Webster, $1,600; Goldman and Company, Regina. Cornwall, $2,500, Windcrest, $2,200, Great-West Life Assurance Company, Winnipeg. Ballymena, $2,000, Victoria Plains, $1,000, Sunny Corner, $2,500; Canada Landed and National Investment Company. Clear Ridge, $2,000; S. J. Morrish, Spring Hill.

Rural Telephone Companies.—Beatty, $4,800; Wm. Trevethick. Golden Brae, $13,900; Pirt and Pirt, Regina. Pelican, $2,500; Nay and James. South Webb, $8,100. Elrose, $11,300; W. L. McKinnon and Company. Bridge Creek, $6,300; T. R. Billett and Company, Winnipeg. Yeomans, $12,400, Goodwater, $2,700; City of Weyburn sinking funds.

City.—Swift Current, $30,000; city of Swift Current sinking funds.

---

*Being sold through the local government board.

LIFE COMPANIES AND WAR LOANS

They Have Invested $30,000,000 and Will Be Heavy Subscribers to Victory Loan

The life insurance companies will be substantial investors in the Victory Loan, as they were in the three other war loans. Legislation was passed in 1916 whereby life insurance companies and associations carrying on business in Canada under Dominion license were obliged to invest and keep invested a certain portion of their assets, during 1916 and 1917, in the currency bonds or debenture stock of the Dominion. Companies whose domicile is outside of Canada, but which are licensed to transact business in Canada, were required to make the deposits (for 1916 and 1917) as security for their policyholders in the Dominion in such securities; and Canadian companies for the same two years had to invest in such securities one-half of the increase in their net ledger assets during the years 1915 and 1916, after making provision for increase in foreign reserves and in policy loans.

Provision was made to meet the case of foreign companies which had already made their deposits for 1916. The aggregate amount of such investments had reached a total of at least $15,000,000. "Having regard to the rate of interest which the Dominion is now paying upon its securities, there can be no hardship in such legislation, either to the insurance companies or their policyholders, who will obtain an investment of the highest character, yielding a most attractive interest return," the finance minister stated, when suggesting this legislation in the House at Ottawa. He added that he had less hesitation in proposing it because, unlike other financial companies, life insurance companies and associations have not been subjected to Dominion taxation. Their holdings of the Canadian war loan will be available pro tanto in discharge of their obligations under the act.

While this legislation expires at the end of 1917, it should be noted that the life insurance companies have more than lived up to the letter of the act. In the aggregate, they have subscribed to Dominion government securities approximately three times the amount required by law. To *The Monetary Times*, on this subject, Mr. G. D. Finlayson, insurance superintendent, Ottawa, said: "The Life Insurance Companies' Investment Act, 1916, has not been renewed, but I think it is generally understood that insurance companies are expected to at least continue their investments in accordance with the provisions of the act. In most cases, of course, the requirements of the act have been by far exceeded."

Invested $30,000,000.

The life insurance companies have invested approximately $30,000,000 in the three previous war loans. This was subscribed chiefly during the period the subscription lists were open, but the amount was partly made up by purchases at later dates.

The following table, compiled by *The Monetary Times*, shows some of the life insurance companies' investments in the three previous war loans:—

LIFE INSURANCE COMPANY	First War Loan		Second War Loan		Third War Loan	
	Subscription	Allotment	Subscription	Allotment	Subscription	Allotment

Of the Canada Life's third war loan subscription $1,500,000 represents conversion of the issue due 1925 into the 1937 maturity. Since the allotment of the third loan, the company has purchased an amount of bonds to bring their holding of the 1937 issue to an even $3,000,000.

In connection with the purchase by the Confederation Life of $2,000,000 of the third loan, the bonds held of the first loan of $500,000 were turned in to the government.

On the subscription of the 1931 war loan, the Crown Life made a further purchase of $12,000.

The Excelsior Life Company disposed of $50,000 of the first loan and converted the balance into the third loan, this amount being included in the $300,000 subscribed to the third loan.

In addition to its $75,000 subscriptions, the Gresham Life bought further bonds of the 1925 loan amounting to $25,000, making their total holdings $100,000. These figures are of local application only, as the society has a total holding of $4,250,000 in the British war loans, and a further $940,000 in war loan stock issued by the allies and the British colonies.

In addition to the subscription of $100,000 to the third loan, the London and Lancashire Life converted the first two issues. The company also purchased in the open market from time to time with the result that in September, 1917, its total war loan holdings were $655,500.

The Manufacturers' Life purchased after the lists were closed $335,000 of the first war loan, turning in their total holding of $835,000 to the second loan, thus gaining a holding of $1,122,500 of the second loan. The company also purchased in the open market $285,000 of the third loan, making a holding of $1,000,000 of that loan.

The Mutual Life of Canada, which bought $500,000 of the first loan, made a subsequent purchase of $325,000 of that loan, and also converted $825,000 of the first loan into the third loan.

Through additional purchases and converting, the Travellers (of Hartford) Company's holdings are at present $950,000 of the three loans.

WAR LOAN INTEREST PAYMENT DATES

The following table shows the half-yearly interest payment dates of our four war loans:—

Loan.	Due.	Rate %.	Interest payable.
First......	1925	5	June 1st and December 1st
Second....	1931	5	April 1st and October 1st
Third.....	1937	5	March 1st and September 1st
Fourth....	1922-27-37	5½	June 1st and December 1st

ALL BONDS MAY BE REGISTERED

The finance minister has issued a new instruction in connection with Victory bonds which will be of much benefit and importance to many small investors. He has decided to grant the privilege of the registration of all bonds, that is to say, that bonds of all denominations, including the $50 bond, may be registered as to principal and as to principal and interest.

In previous loans the privilege of registration was necessarily confined to bonds of the larger denomination, such as $1,000 bonds or more. Bonds of lower denominations were issued as bearer bonds with coupons attached, and, while carrying equal benefits as to principal and interest, were liable to being lost by the owners. Under the privilege now given by the finance minister the buyer of any bond (whatever the denomination) may have it registered, in which case the interest will be paid by cheque, and the bond, if lost, may be replaced after proper evidence has been shown.

This privilege will be greatly appreciated by many thousands of small investors, who will thus be assured of the absolute safety of their investment, even against fire or carelessness or any other accidental cause of loss. This improvement in the issue will involve extra work upon the department of finance, but Sir Thomas White considers that its benefits will more than offset the labor involved.

KITCHENER, ONTARIO, HAS ORGANIZED

The various organizations to make a thorough canvass of Kitchener, Ont., for the Victory Loan are being completed, and the campaign promises to be a successful one. The city advisory committee has been formed with the following officers: President, G. C. H. Lang; first vice-chairman, L. J. Breithaupt; second vice-chairman, J. Fennell; secretary, J. A. Law.

The manufacturers of the city met on Wednesday, and $500,000 was set as the objective for the city. An appeal will be made to the individual workmen and to the women of the city. The meeting was addressed by Mr. N. F. Davidson, K.C., of Toronto.

JOSEPH QUINTAL, MONTREAL,

Chairman, French-Canadian Committee, Island of Montreal and Isle Jésus, Victory War Loan Campaign. *(The Monetary Times Photo.)*

MR. JOSEPH QUINTAL is a grain exporter and has been in business in Montreal for about 30 years. He was born in Montreal where he has always lived. He is 54 years of age and is a member of the Montreal Board of Trade, of which he was at one time first vice-president, a member of the Corn Exchange of Montreal, of which he is also a past president, a member of the Chambre de Commerce de Montreal, of which he is now first vice-president, and a member of the New York Produce Exchange, Chicago Board of Trade and Winnipeg Grain Exchange. He has one son, a returned soldier, a captain, who was wounded at Ypres and Givenchy, for which he got the French Military Cross and Legion of Honor.

THIS IS THE WAY TO DO IT

An interesting letter has been received by Sir Augustus Nanton, Winnipeg member of the Dominion executive war loan committee, from J. D. Baskerville, M.L.A., who farms at Dominion City. Mr. Baskerville says in part: "I intend to take out at least one $50 bond for each member of my family of eight, including three sons on active service. I will also invest about $400 assigned pay of two sons in France. The third boy, Flight Lieut. M. G. Baskerville, will be home on his last leave in a couple of weeks before sailing for France. I will endeavor to get him to draw from the bank and invest his surplus cash in war bonds. My hired man, who is a Russian by birth, says he will take $700 worth."

LIMIT MILLERS' PROFITS

Mills With Capacity of One Hundred Barrels Daily Must Hold License

Following his declared policy of refusing to permit middlemen handling food products to take excessive profits, the food controller has announced that the net profits of Canadian millers will be limited to a maximum average of 25 cents on the milling of sufficient wheat to make a barrel of flour of 196 pounds and the offals produced in connection with such milling. An arrangement to this effect was made by Mr. Hanna as the outcome of several conferences with representatives of all branches of the milling trade.

Every mill with a capacity of 100 barrels of flour or more per day must take out a license from the food controller. The licensing will be optional with mills with a capacity between 50 and 100 barrels per day. Every licensed establishment must submit each month a detailed sworn statement of costs of manufacture and profits on sales. Failure to comply with any of the regulations may result in suspension or cancellation of license.

Will Select Standard Grades.

The food controller will select and approve three standard grades of flour and all licensed mills will be required to manufacture and sell one or more of these standard grades. One will be a flour made from Manitoba spring wheat; the second will be a blended flour from a mixture of Manitoba spring wheat and Ontario winter wheat; while the third will be made entirely from winter wheat. These standard grades will be of first-class quality, suited to all purposes, and will have the additional advantage of representing the highest percentage extraction from the wheat that will give a wholesome loaf of bread. In this way there will be a saving in wheat because a larger proportion of the wheat berry will be utilized for human consumption.

Maximum Cash Price.

For each of the standard grades a maximum cash price will be set from time to time. Such prices will be f.o.b. cars on track at point of delivery or the equivalent at point of origin. After October 5, when the announcement was made by the food controller, mills were not permitted to make any contract of sale for delivery at a longer period than 30 days ahead. Mr. W. Sanford Evans has been appointed by Mr. Hanna to supervise the carrying out of the arrangement with the millers and a special committee of the latter has been named to act in an advisory capacity to the food controller and on behalf of the mills. It is expected that sufficient information will be in hand for the food controller to name the prices for the three standard grades of flour by November 1.

The mills will be permitted to manufacture their regular brands of flour, consisting of higher or lower quality than the standard grades, but such manufacture will be subject to the same general provisions as to profits.

Restrict Sale of Small Sacks.

At the conferences with the millers, the food controller intimated that he was considering the advisability of taking action in the interests of the public to restrict the sale of flour and other cereals in small packages. He was of the opinion that the small sack or package trade involved a needless waste and enhancement of cost to the consumer and that unless the purchaser wanted a large sack he would purchase more advantageously in bulk. In this way the expenses of handling and distribution which are paid by the consumer, would be reduced.

The special committee of the millers consists of General Labelle and Messrs. Black, Hutchinson, Macfarlane, Campbell, Goldie, Moore, Watts, Gray and Sinclair.

GRAIN EXCHANGE TO GET SUBSCRIPTIONS

Members of the Winnipeg Grain Exchange have organized in the hope of securing a subscription to the Victory Loan from practically every employee of the hundreds of firms in the grain business. For this purpose a committee has been formed of President W. R. Bawlf, H. N. Baird, R. T. Evans, C. C. Field and C. Tilt. The committee will interview every member and as many of the employees as possible to make clear how easily everyone can participate in the loan.

VICTORY LOAN AND VICTORY

(Reprinted from The Monetary Times of August 7th, 1914.)

Once again British diplomacy has played fairly, satisfying the most delicate conscience. Once again it has maintained the British standard of honor, this time at the expense of valuable points in warfare, now gained by the enemy. Germany having pushed war, it has challenged a nation which has strained every diplomatic nerve and sinew to preserve peace. Flouting Britain's heroic determination to strangle war, now it must face that determination in a grim shape. It is not war upon Great Britain alone. It is a challenge to the Empire, one which has done for civilization more than other Empires have even tried to dream. That challenge the Empire has answered. Canada, Australia, South Africa, every dominion overseas join with the Motherland in this international struggle, one into which that Motherland has done everything possible to prevent the Empire having to plunge. Victory on one side may mean a new map of Europe, the flowering of autocracy and the predominance of belligerence. Victory where the British Empire may place it, will mean the preservation of individual nationalities, the progress of democracy, always arbitration and perhaps lasting peace.

Seldom has England girded its loins in such a good cause, especially as the struggle has been forced upon it. Heaven knows of the prayers which have been offered and the statesmanlike efforts made for peace. War has come to bring it. Having entered the fight, the British Empire will proceed to the end. In this struggle it has the help of some and the sympathy of all, except perhaps two, of the civilized nations of the world. May Right ride as conqueror!

THE PLAIN FACTS

When we save and lend to the State we transfer our purchasing power to that extent to the government. By this process the purchases of the State take the place of, instead of being added to, the purchases of the private citizen. Thus competition for labor and material between the State and private individuals is avoided. The rise in prices is checked and the cost of the war is reduced.

If the general body of individual consumers reduce their expenditure by the same amount as that spent by the government on the wasteful process of war, then little damage occurs to the nation's economic position.

Even though the money we earn or the profits we make are the result of direct war work we must, none the less, save all we can, because if we spend these wages or profits on unnecessary things we make other people work for us instead of for the war, and so lessen the usefulness of our own good work. Therefore, everyone who wishes to do the right thing by his country should save all he can and buy Victory Bonds.

WARS MUST BE PAID FOR BY SAVINGS

Wars must be paid for by savings. We must save in the consumption in commodities and the consumption of unproductive labor in order that we may divert our manhood to the Army and Navy and to the shops. If by the reduction in consumption of labor and the commodities that it produces and the diversion of this saving to that labor and those commodities demanded by the war, we shall be able to fight almost indefinitely. We can mortgage our future savings for a little while, but a piling up of mortgages is but a short step toward bankruptcy. Every dollar we save is available for subscription to Victory bonds.

The whole of Europe has been engaged ever since the war commenced in the elimination of waste, the simplification of life, and the increase of its industrial capacity. When the war is over the consuming power of the world will be reduced by the loss of prosperity and man power, and we shall enter a period of competition probably without parallel. After the war we must maintain our foreign markets if our working people are to be fully employed. We shall be in no position to compete if we continue to live on the same basis of waste and extravagance on which we have lived hitherto. Simple, temperate living is a moral issue of the first order at any time, and any other basis of conduct during the war becomes a wrong against the interest of the country and the interest of democracy.

HELP FROM THE SMALL INVESTORS

Small subscriptions are an important factor in the success of our war financing. The outstanding feature of the British Victory war loan was the great number of small subscriptions, which helped to swell the loan to record proportions. Our banks have much to do in financing war orders placed here and in carrying the increasing volume of agricultural and industrial production. Financial and other corporations will subscribe liberally to Canada's Victory Loan, 1917, but it is absolutely necessary that many thousands of subscriptions, ranging from $100 to $25,000, should be received in order to make the loan a real success. Dominion war loan bonds are one of the world's best investments and have a patriotic flavor. A subscription to our Victory Loan is not a sacrifice. It is a duty, and incidentally it will remunerate the subscriber handsomely.

A large number of small subscriptions to the war loan will be more appreciated by the government than a small number of large subscriptions. The allotment of the loan to large subscribers will be cut down, if necessary, by the government so that all the small subscribers may have their full share of bonds.

There are many thousands of people who have from $100 to $5,000 for investment. Their duty is to lend this money to their country. The security of the war bond is excellent, the income yield is high and the bonds are readily saleable at any time, should the holder desire to sell.

How the Previous Loans Were Allotted: What of This Loan?

While the official prospectus of the Victory Loan asks for the subscription of $150,000,000, it is necessary that far more than this amount should be subscribed. A heavy oversubscription will make it unnecessary for the government to issue another war loan (should the war continue) for a considerable period. It will allow the finance minister greater freedom to make arrangements for credits for British purchases of war supplies in Canada. It will help to enhance the already high credit which Canada enjoys in the world's money markets and it will be a further indication to the enemy that our determination to win the war is as staunch as ever.

The prospectus of the first war loan of $50,000,000 did not contain any reference to allotments. That loan was subscribed to the extent of $103,729,500. Of the oversubscription of $53,729,500, the government decided to allot $50,000,000, making the loan one of $100,000,000.

The total allotment of bonds of the second loan in September, 1916, was limited to $100,000,000, exclusive of the amount of the first loan converted.

The total allotment of bonds of the third loan, issued in March, 1917, was limited to $150,000,000, exclusive of first loan and debenture stock conversions.

While the amount of the Victory Loan issue is $150,000,000, exclusive of conversions, the prospectus states that the minister of finance "reserves the right to allot any portion of the amount subscribed in excess of $150,000,000." As a large sum is needed and as the payments on these bonds are spread over a period of five months, it is probable that the finance minister will allot a considerable part of whatever oversubscription is made. How the three previous war loans were allotted is shown in the following table:—

Subscriptions of	First loan, Nov., 1915.	Second loan, Sept., 1916.	Third loan, March, 1917.
$25,000		In full.	In full.
From $25,000 to $100,000 ..	All subscriptions of $50,000 and under in full. Subscriptions, except banks, for amounts over $50,000, in full, with privilege of withdrawing subscriptions.	First $25,000 in full; remainder 30 per cent.	First $25,000 in full; remainder 80 per cent.
From $100,000 to $1,000,000		Of first $100,000, $25,000 in full, remainder 30 per cent.; above $100,000, 40 per cent.	Of first $100,000, $25,000 in full, remainder 80 per cent.; above $100,000, 70 per cent.
In excess of $1,000,000		Of the first $1,000,000, $25,000 in full, and remainder 40 per cent.; above first $1,000,000, 26 per cent.	Of the first $1,000,000, $25,000 in full, and remainder 70 per cent.; above first $1,000,000, 45 per cent.

NOTE.—First loan—Subscribers, other than the chartered banks, for amounts exceeding $50,000 were allotted their subscriptions in full, but were allowed to withdraw or reduce the amount of their subscriptions by written notification lodged with the finance department on or before December 18th, 1915. The chartered banks, which subscribed an aggregate of $25,000,000, were allowed to take such portion of their subscription as they desired, but so that the total issue did not exceed $100,000,000. Of the total loan so increased to $100,000,000, the government employed $50,000,000 to establish a credit with the finance department for the Imperial treasury. Second loan—No allotments of the $50,000,000 subscribed by the banks were made, but a credit of $50,000,000 was established here for the Imperial treasury.

ADDRESS:

THE MANAGER, BOND DEPARTMENT,
TORONTO

62

C. C. K. NOURSE, CALGARY, Chairman, Calgary Bankers' Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. NOURSE is manager at Calgary at the Canadian Bank of Commerce. Associated with him on the War Loan committee are these bankers: Messrs. W. H. Barker, Merchants Bank; W. Matthew, Bank of Hamilton; F. D. Patterson, Standard Bank; and C. R. Latimer, Bank of Toronto.

D. MACGILLIVRAY, HALIFAX, Chairman, Halifax Bankers' Committee, Victory War Loan Campaign. *(Photo by E. F. Foley, N.Y.)*

MR. MACGILLIVRAY is manager at Halifax of the Canadian Bank of Commerce. Acting on the Victory Loan committee with him are the following bankers: F. St. C. Harris, Royal Bank; H. A. Fleming, Bank of Nova Scotia; Frank Hope, Bank of British North America; and A. E. Nash, Bank of Montreal.

SCHOOL CHILDREN WILL SUBSCRIBE

A school inspector of the Weyburn district, Saskatchewan, has written the Victory Loan committee, Regina, saying he has applications for $2,000 worth of bonds from children of the district.

THE PAS OBJECTIVE IS $100,000

Mr. J. A. Campbell, who is organizing The Pas, Man., for the Victory loan, reports that great interest is being displayed. The Pas is determined to demonstrate its importance as a commercial centre by its subscription to the Victory Loan. The committee will probably make the objective of The Pas $100,000.

McKINLEY-DARRAGH MINES

The cash resources of the McKinley-Darragh Mines Company on October 1st, 1917, amounted to $392,888. With one exception this is the best showing of any quarterly statement in the company's history. It compares with $352,522 in the previous quarter, $365,728 two quarters back, $392,924 nine months ago, and $374,119 a year ago. They are equal to 17⅗ cents on each share. This statement bears out previous statements in these columns that the earning power of McKinley has been placed on a materially higher basis. Moreover, a new unit has been added to the flotation plant erected a year ago, and which is doing good service. It recovers four-fifths of the silver contents of the sands. The new mill will shortly be in full swing. The extensive series of ore bodies opened up down to the 450-foot level has, the company believes, added years to the life of the mine.

IN THE THREE RIVERS DISTRICT

Mr. J. B. Boulais and Mr. J. B. How, joint organizers for the Victory Loan campaign in the district of Three Rivers, Que., are meeting with gratifying success in organizing local committees and have in this way secured the co-operation of the leading men of the country. Berthier and Maskinonge County are two of the latest towns to endorse the campaign. At Berthier J. Olivier Gadoury, the mayor, has been elected chairman and A. J. Aubin, secretary, assisted by the following committee for the city of Berthier: J. O. Daviault, Dr. T. Gervais, John Coyle, H. Courchesne, J. A. A. Lavellee, G. Allard, P. Beaudoin, H. Gendron, Dr. Ls. de Grandpre, M. Mathieu, F. O. T. Lamarche, R. A. Gervais, O. Rajotte, L. Rattey, R. Croisetiere.

SENATOR W. H. THORNE,
Chairman, New Brunswick Provincial Committee, Victory War Loan Campaign. *(The Monetary Times Photo.)*

SENATOR THORNE is president of W. H. Thorne and Company, Limited, hardware house, and of the Thorne Wharf and Warehousing Company. He is a director of the Royal Bank and the Eastern Trust Company.

W. A. MACKENZIE, TORONTO,
Member, Dominion Executive Committee, Organizer, Southern Ontario Division, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. MACKENZIE is partner in the firm of W. A. Mackenzie and Company, bond house, Toronto, and has been in the bond business for about 18 years. He and his brother, Mr. A. G. Mackenzie, started the present firm in 1908. Mr. Mackenzie was born in Petrolea, Ont., about 44 years ago.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Shawinigan Water and Power Company.—Shareholders of the Shawinigan Water and Power Company at a special meeting authorized an increase in the capital stock of the company from fifteen to twenty millions. The charter of the company provided for a capital of $2[illegible], but up to the present time only $15,000,000 had been authorized by the shareholders.

During the course of the meeting J. E. Aldred, president of the company, explained that it was not the intention to place any of the new stock on the market at the present time, but simply to place the directors in a position where they could issue stock when necessity required without going to the shareholders for authority. He explained that when any additional issue was made it would be to the advantage of the shareholders primarily, and cannot be construed as a bear card. He said it would be something worth while to the shareholders and something that could be converted into cash if desired.

Mr. Aldred explained that an increase of 25 per cent. in charges for Hydro-Electric energy would increase earnings very materially, because all the increased price would be met. Hydro-Electric companies were not placed as other companies in the matter of labor, and this item was almost negligible.

Dome Mines Company, Limited.—The initial semi-annual statement of the Dome Mines Company, Limited, for the six months ended September 30th, 1917, shows the following results of operations:—

Returns from bullion, $694,541; non-operating revenues, $7,269; gross income, $701,810. Operating and developing costs, $534,575; net earnings, $167,234. Surplus, March 31st, 1917, $697,051; total surplus, $864,285. Depreciation of plant, $141,164; war tax on profits, 1916-17, $27,415; dividends, $100,000; profit and loss surplus, $595,706.

The balance sheet of the Dome Mines Company as of September 30th, 1917, compares with statements as of March 31st, 1917, as follows:—

Assets.	Sept. 30, 1917.	March 31, 1917.
Property account ..	$3,914,637	$4,457,192
Cash ..	347,713	303,726
Bullion	40,977	....
Accounts receivable	14,899	14,603
Supplies (at cost) ..	313,426	301,122
Prepaid insurance	15,552	....
Developing expenses ..	45,265	40,358

Western Canada Flour Mills Company.—The statement for the year ending August 31st last shows an increase in profits over the preceding year and the largest earnings in the company's history.

Net profits, after provision for depreciation, taxes, etc., amount to $418,023, compared with $376,261 in the preceding year. After paying bond interest and the usual deductions there was a surplus of $156,383 carried forward.

Figures for the last four years compare as follows:—

	Profits.	Bond interest.	Dividends.	Surplus.
1914	$315,216	$100,471	$157,482	$ 57,293
1915	[illegible]	96,865	169,976	73,221
1916	376,261	93,500	169,976	112,785
1917	418,023	91,664	169,976	156,383

President Kelly, commenting on this, points out that while in the past year the company's mills operated at capacity, the output of flour was scarcely as good as in the preceding year because of the poorer quality of the wheat, which, owing to its fibrous nature, was not altogether satisfactory for milling purposes.

A feature of the company's balance sheet on the liability side is the increase in customers' paper and discounts, which amount to $2,351,489, compared with $1,458,450 in the previous year, an increase of $893,039. On this point President Kelly says: "You will note an increased amount of trade paper under discount. This is owing to the high prices the company is obliged to pay the farmers for grain. The financial burdens of the company are, therefore, much greater than in normal years.'

WOMEN AND VICTORY BONDS

Women's organizations to sell Victory bonds have been formed, and many women have pledged themselves to help their servants buy bonds. This will be done by subscribing on behalf of the servant. The mistress pays for the bond in the usual instalments called for by the government, while the servant pays at the rate of $1 a week out of her wages. Thus at the end of the year the servant has a $50 bond fully paid for.

The Transfer Books will be closed from the 23rd to 30th November, both days inclusive.

By order of the Board.

J. P. BELL,
General Manager.

Hamilton, 22nd October, 1917.

BONDHOLDERS PAY NO TAX

War Loan is Exempt from Dominion Taxes, Present and Future

As in the case of the other war loans, the present issue will be exempt from taxes, including any income tax imposed in pursuance of legislation enacted by the Dominion government. The clause in the Victory Loan prospectus reads as follows:—

"Free from taxes—including any income tax—imposed in pursuance of legislation enacted by the parliament of Canada."

Opinions differ as to the advisability of exempting our war loans from taxation. Hon. F. B. Carvell raised this question in the House at Ottawa on May 15th last, contending that our war loans should not be tax exempt. Sir Thomas White, finance minister, replied that "we could not conceivably issue a loan to the people of this country and the United States unless that provision exempting them from any income tax was inserted on the face of the loan." He continued:—

Large Financing Operations.

"I do not think the public or we in this House realize the magnitude of the sums mentioned in our issues. It is not a question of issuing a loan of five or ten or twenty-five or thirty million dollars in an issue. Before the war broke out the largest loan ever put on by the Dominion was £6,000,000; now we are putting out hundreds of millions of dollars of these war loan issues, and we shall have to continue to put them out during the remaining period of the war. When you are seeking money on this scale and when it is in the mind of the people that the government may have to resort to extreme measures of taxation, measures never resorted to before, then the investor raises the question: What about income tax?

"When I made the issue of $45,000,000 in New York in August of 1915, and when I made an issue of $75,000,000 in March of 1916, the first question that arose was: What about income tax; are those loans subject to income tax or not? You could not have sold in New York or elsewhere in the United States an issue of bonds which might be liable to income tax of the issuing government for the reason that men buy these down to a percentage of a point having regard to the prevailing market conditions. You can put out an issue at 5.40 where you could not put it out at 5.25 or 5.30. If the purchaser is uncertain as to whether there is going to be an income tax of two per cent., three per cent., or five per cent. upon the interest derivable from an investment, he will probably not purchase. Scores of people might purchase, but you will not get the investor who is in the habit of investing large sums of money to take your securities in time of war unless they are exempt from income taxation.

"Take those loans which we put out internally. The average citizen does not stop to inquire, but his investments are only a fraction of the whole. It is the man who is accustomed to invest who considers his investments carefully, and it is the insurance companies, the loan companies and these other companies, which are most careful in regard to their investments.

"It is an attraction, a necessary attraction in connection with war loans that they should be free of income tax. The issue that the United States is putting out to-day is free of income tax, but not free, I believe, of succession duties. In England, the very home of income tax, in order to meet the situation in connection with their last loan they had to make a double issue, so to speak, one free of income tax and the other subject to income tax, with a very substantial difference in price between the two issues. If we had put out our loan without the provision of exemption from income tax, we should never have been able to sell it on the same interest basis. Consequently it is as broad as it is long. What we might have realized hereafter by way of income tax legislation would have been lost at the time of the issue. I stated when presenting the budget that if we had an income tax it would fail to reach a large proportion of our population by reason of that unavoidable provision in our bonds. It is desirable to avoid such a provision if we possibly can, but it could not have been avoided."

The tax exemption privilege had an unknown value when the first, second and third loans were issued. Now the Victory Loan is being offered, the privilege has a known value, in view of the establishment of a federal income tax at the last session of parliament. This value, by that legislation, was also given to the three previous war loans.

How the Income Tax Works.

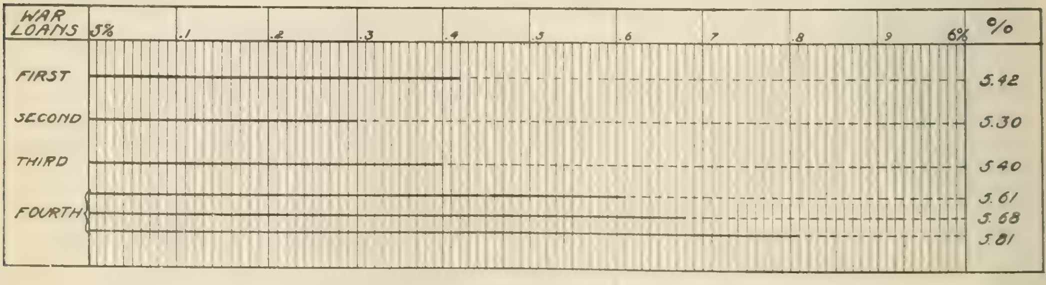
How the federal income tax affects incomes is shown in the following table:—

Income of	Unmarried men and widowers without dependent children exempt, $1,500.	All other persons exempt, $3,000.
$4,000	$ 100	$ 40
5,000	140	80
7,000	240	180
10,000	420	360
12,000	600	540
15,000	870	810
20,000	1,320	1,260
30,000	2,520	2,460
50,000	5,320	5,260
75,000	10,070	10,010
100,000	14,820	14,760
150,000	20,320	20,260
200,000	43,820	43,760

A tax of four per cent. on incomes exceeding $3,000 in the case of corporations or stock companies, is also imposed under the act.

The income from Victory Loan bonds is exempted from this taxation.

INTEREST PAID ON OUR WAR LOANS STAYS AT HOME



Victory Bonds Give an Income of Well Over 5½ Per Cent.

It is a good thing for Canadians to buy their war loans, because the substantial interest on these loans will be paid to us instead of to foreign lenders. It will stay at home and help Canadian prosperity. We are becoming bondholders of the nation as well as taxpayers. With the present Victory Loan of $150,000,000, we shall have subscribed $500,000,000 of war loans. This means that over $25,000,000 of interest will be paid to Canadians every year on their war bonds.

BRITISH INSURANCE COMPANIES' SUBSCRIPTIONS

While the British insurance companies doing business here have subscribed very large sums to British and Allied war loans, it is anticipated they will be substantial subscribers to the Victory Loan They, like all others resident or doing business in Canada, have a vital interest in assisting Britain with credits here and helping to maintain the present industrial and agricultural activities in this country.

D. E. KILGOUR, TORONTO,

Member of Dominion Advisory Committee of Life Insurance Representatives, Victory Loan Campaign. (*The Monetary Times Photo.*)

MR KILGOUR is actuary of the North American Life Assurance Company, and secretary of the Life Officers' Association of Canada. He is well known in life insurance circles on this continent and has visited Western Canada recently in connection with the organization of the Victory Loan campaign. The life insurance companies' advisory committee for the Dominion is made up of (a) all ranking officers of Canadian life insurance companies; (b) the chief agents or directors in Canada of the principal United States and British companies; (c) the officers of the Life Underwriters' Association of Canada; (d) selected life insurance men not coming under any of these heads but who are on the executive committee of the Life Underwriters' Association of Canada.

OUR NATIONAL REVENUE

The revenue of Canada for the six months (to September 30th) of the current fiscal year (which will end March 31st, 1918), totalled $[illegible], compared with $103,580,680 in the corresponding months of the preceding fiscal year. September's revenue was $2[illegible], against $16,403,872 in September, 1916. Seventeen and a half millions of this year's gain for the six months is accounted for by the further increase in customs duties, which for the half-year are reported as $81,673,818, against $64,114,675 in the six corresponding months of 1916. Expenditure on current account for the six months was $[illegible], against $[illegible]. Interest charges on debt this year show a considerable advance over those of last year. This is due directly to the war. Expenditure on capital account during the half-year totalled $95,114,[illegible], of which $[illegible] was war expenditure.

PROVINCES WILL SUBSCRIBE TO LOAN

Provincial Treasurers are Helping to Make Issue a Success

Substantial assistance to the subscription of the Victory Loan is anticipated from our provincial governments. Several will probably apply for blocks of the issue. Manitoba and Quebec provinces subscribed $500,000 each to the second war loan. Manitoba subscribed $500,000 to the third loan, and British Columbia $400,000. There were no provincial subscriptions to the first loan, but Hon. Edward Brown, provincial treasurer of Manitoba, in a statement in March, 1916, said that he had expressed to the Dominion finance minister the willingness of that province to subscribe $5,000,000 to the Dominion war loan made in November, 1916. In this suggestion he had the full approval of his colleagues in the Manitoba cabinet.

What Could be Done.

That fact raises interesting possibilities in regard to future Dominion internal loans. Mr. Brown said that when making this proposal he had at the same time an assurance from the neighboring western provinces that a similar contribution of $5,000,000 could be made by each of them. "I feel confident in saying," said Mr. Brown, "that the four western provinces would have gladly made a joint contribution of $20,000,000 for this purpose. I feel further warranted in saying that, if it becomes necessary, the provinces of Canada can easily make a contribution of $100,000,000."

After discussing the matter fully at that time with the Dominion minister of finance, it was agreed that the time had not yet arrived when it would be advisable to make use of this suggestion. Strictly speaking, the question of furnishing ways and means for national defence is a matter for the Dominion government. *The Monetary Times* does not think the need of such assistance is likely to arise, but this general desire throughout the provinces to share in the responsibility is one of which every Canadian citizen may well feel proud. The fact, too, that the provincial governments are able and willing to subscribe $100,000,000 to a federal war loan is one which will enhance materially Canadian credit in the world's money markets, even should it be unnecessary to ask the provinces to subscribe any large part of our war loans. Canada is following the best traditions of British finance and at the same time, as Mr. Brown said in the Manitoba House, "we are ready to pledge our resources to the limit for the defence of the Empire."

Provincial Treasurers Helping.

The treasurers of our provincial governments are taking an especially active interest in promoting the success of the Victory Loan. Hon. C. A. Dunning, provincial treasurer of Saskatchewan, is acting as chairman of the provincial war loan committee. Hon. C. R. Mitchell, provincial treasurer of Alberta, is acting as chairman of a similar committee in that province. Hon. Walter Mitchell, provincial treasurer of Quebec, has already made several stirring addresses at public meetings in connection with the loan. The other provincial treasurers are co-operating with the minister of finance and the various war loan organizations.

SEND US YOUR VICTORY LOAN STORIES

The Monetary Times will be glad to receive and publish the names of various Dominion, provincial and local Victory Loan committees throughout Canada, photographs of prominent organizers and workers, stories of salesmen as to their experiences in selling Victory bonds, and any other information relating to the loan, which will prove of interest to our readers.

MANITOBA'S WAR LOAN COMMITTEE

The Manitoba general committee of Canada's Victory Loan campaign is headed by Sir Augustus M. Nanton (chairman), Messrs. A. L. Crossin (vice-chairman), J. A. Anderson (secretary), and Harry Ford (treasurer).

The province of Manitoba has been divided into ten districts and these ten districts will be organized under the leadership of ten financial men as follow: Messrs. J. A. Thompson, A. N. Strang, T. R. Billett, W. H. Gardner, G. M. Black, William Jennings O'Neill, George J. Seale, Robert McK[illegible], John F. [illegible] and D. J. [illegible]

An Executor's Fees

The commissions paid an Executor are fixed by the Court and, in no case, are those allowed a Corporate Executor any greater than those allowed an individual Executor. Further, the services rendered by a Corporate Executor are incomparably superior, owing to its complete organization for administrative purposes Further particulars by letter or interview.

Going Overseas?

To those going overseas, whether in a military or civil capacity, to do their bit, or to those who contemplate spending the Winter away from home, and who may need a strong, reliable corporation to look after their affairs in their absence, we offer the suggestion that they leave a Power of Attorney in our favor. It will relieve them of all the details and worries incidental to looking after their Estates. Compared with the relief afforded and the service rendered, the charge would be small and the satisfaction great. Interviews invited; correspondence solicited. All business treated as strictly confidential.

OUR BANK DEPOSITS ARE LARGE

In August, 1914, deposits withdrawable after notice (largely made up of savings) in the chartered banks of Canada totalled $659,399,151. Three Dominion war loans aggregating $350,000,000 have been floated since then, but savings deposits, according to the latest bank statement, that of September, now amount to $966,393,541, an increase of $307,000,000, or 46 per cent. since the outbreak of war. This total has probably been augmented during October. The figures give an indication that substantial funds should be available for Canada's Victory loan.

J. M. MACKIE, MONTREAL,

Vice-Chairman, Dominion Executive Committee, Chairman Quebec Provincial Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. MACKIE was born at La Chute, Quebec. His early training as an engineer latterly brought him in touch with financial affairs in making reports for financial institutions. He joined the staff of C. Meredith and Company, Limited, Montreal, in 1911, and became manager of that firm in 1914. One of the prime movers in the formation of the Bond Dealers' Association of Canada, he became chairman of the Eastern section. He is managing director of Hillcrest Collieries, which company he was instrumental in forming. When Belding-Paul-Corticelli Silk Company was going backward, he was asked to join the board to assist in resuscitating the company. Mr. Mackie is a director of the Tuckett Tobacco Company, Hamilton; Canadian Converters Company, Limited, and several other companies.

GROWTH OF CANADA'S EXPORT TRADE

SALESMEN WILL CARRY OFFICIAL BADGE

Purchasers of Victory Bonds Will Give Cheque or Note Payable to Finance Minister

Toronto's objective in the campaign for Canada's Victory Loan was set at $75,000,000 in the announcement made by Mr. J. W. Mitchell, chairman of the Toronto executive committee for the loan, at a meeting held on Tuesday, at which 300 members of the teams who have undertaken to do the actual selling of the bonds in Toronto were in attendance. The meeting was called to complete the organization and explain the plan of campaign to the workers who begin the drive on Monday. Short addresses were also given by Mr. W. P. Gundy, Mr. E. R. Wood, who explained the economic necessity for the loan, and Mr. George Warburton.

Throughout the Dominion.

Mr. Mitchell explained that in Toronto, as in other cities and districts throughout the Dominion, the bond and stock salesmen pooled their interests and will be the direct representatives of the finance minister, rather than of their respective bond and stock houses. They are working as one unified committee and in the selling of the bonds will be aided by upwards of 200 of Toronto's business and professional men. For the purposes of the campaign Toronto has been divided into five main districts. In each of these districts there will be a chairman, a vice-chairman and six team captains. Each of these thirty captains will have a team of nine men in addition to himself. Thus over 300 men will be engaged through the entire three weeks of the campaign in the actual work of selling the Victory bonds in Toronto. Every person in the city will be personally solicited to buy the bonds.

Will Carry Official Badge.

Each salesman will carry an official badge and a credential card signed by the chairman of the Toronto executive committee. Purchasers of the bonds will not be asked to pay any money to the salesmen, but will give him a cheque or note payable to the order of the finance minister.

The chairman, vice-chairman and team captains for the various districts are as follows:—

District "A."—Chairman, W. N. McIlwraith; vice-chairman, H. B. Housser; team captains, C. K. Dodds, F. R. Graham, W. C. Macneill, J. A. McCausland, T. W. F. Norton, W. E. Nugent.

District "B."—Chairman, Major O. Heron; vice-chairman, Stuart B. Playfair; team captains, J. W. Baillie, Draper Dobie, H. Acton Fleming, E. W. Pratt, Malcolm Stobie, Wm. Wallace.

District "C."—Chairman, Lieut.-Col. F. H. Deacon; vice-chairman, J. C. Fraser; team captains, D. S. Cassels, J. T. Eastwood, R. T. Faircloth, Hugh A. Gunn, J. O. McCarthy, Morgan Jellett.

District "D."—Chairman, John A. Tory; vice-chairman, A. McKenzie; team captains, N. S. Boyd, R. E. Campbell, Robt. Cassels, D. G. Lorsch, R. A. Lyon, A. Pardoe.

District "E."—Chairman, H. H. Williams; vice-chairman, J. Allan Ross; team captains, R. R. Bongard, A. P. Burritt, W. A. Peacy, J. C. Taylor, H. B. Wills, C. W. I. Woodland.

LONG CREDIT FOR BRITAIN

In connection with the building of four steamers for the British government, the Canadian General Electric president. Senator Nicholls, states that the British government will be granted a long-time credit for the full value of the vessels. The four steel freighters will cost the British government three million dollars, but this sum will not have to be paid to the Canadian General Electric for two years. In the meantime it will be carried as an ordinary book account by the big corporation, and without any security being required.

It is pointed out that this action of the Canadian General Electric is tantamount to a straight loan of three million dollars to the British government. So far as is known, this is the first big industrial concern in Canada to come forward and volunteer to fill British war orders and wait a long time for payment of same. These are the four steel steamers mentioned recently as being built at Bridgeburg.

CANADA'S DAILY WAR COST

It is $890,000; Great Britain is Spending $30,000,000 a Day—United States' Appropriations

Canada is spending approximately $890,000 a day on war. The largest items in this expenditure are for pay and allowances, subsistence and assigned pay, and separation allowances for the troops. Each Canadian soldier costs us about $1,000 a year to maintain.

The first year of war cost Canada $90,000,000. We then had less than 50,000 men under arms. We now have about 400,000, with authority to raise another 100,000 men. Our war expenditures for the fiscal year ended March 31st, 1917, were approximately $250,000,000. They are increasing, as our part in the war and our army grow larger.

SIR ROBERT BORDEN,

In the House at Ottawa in February last the premier moved the resolution for a war appropriation of $500,000,000.

War Costs to Date.

During the first five months of the current fiscal year, which will end in March 31st, next, we spent $51,427,000 on war. Our ordinary national expenditures in the same period were less than $6,000,000. From the outbreak of war to the end of January, 1916, we had spent $158,000,000 on war. Our total war outlay, from the beginning of the struggle up to April, 1917, was about $600,000,000.

Our war costs naturally are much smaller than those of other countries. While we have spent about $650,000,000 on the war to date, Great Britain's war expenditure to date has been about $26,077,000,000. While we are spending about $890,000 a day on the war, Great Britain's war expenditures are now more than $30,000,000 daily.

So long as we advance credits for British purchases here, Britain will spend daily in Canada for war supplies more than twice the amount we are spending daily on the war.

The United States will spend for war purposes during the fiscal year which will end June next, approximately $10,735,000,000. This is exclusive of $3,000,000,000 of loans which it is making to the allies, loans to be used as credits in buying $3,000,000,000 of American goods. Our Victory Loan is to do exactly the same thing for Canada, but on a smaller scale.

STRENGTH OF CANADA'S BANKING POSITION

The Canadian banking position is one of great strength. The banks have followed the best British traditions of finance and have inspired considerable confidence in Canadian credit and national finance the world over. The banks and the Dominion government regularly consult to review the financial situation, and the government furnishes estimated requirements before new commitments are requested. Precautionary arrangements have been made by the British and Canadian governments under which the Canadian banks can at any time, under certain minor restrictions, convert their holdings of government securities into cash should it be necessary to take such a step.

The most marked and satisfactory feature of the Canadian banking situation is the remarkable position of liquidity, the result of which is that the banks will be able to meet successfully any emergency arising through war conditions.

Leading bank presidents in Chicago understand that the next Liberty Loan will be offered in the United States early in January, and in preparing for it they are keeping all the publicity and distributive machinery intact. The general opinion is that the next amount will be $3,000,000,000 a minimum, or $4,000,000,000 if no minimum or maximum is set, and in any event the rate will be 4 per cent.

VICTORY LOAN AND MOVING PICTURES

In the office of the Regal Films, Limited, at Toronto, on Tuesday, Sir Thomas White attended a private showing of the Victory Loan moving picture film, "Victory Calls to You, Canada," and saw himself for the first time as a screen star. His co-star is Miss Gwendolyn Haynes, who, as "Miss Canada," after reading the advertising of Canada's Victory Loan, interviews the finance minister about it, and secures from him reasons why the loan is necessary and why the people of Canada should strive to make it a success. The film concludes with the purchase of a Victory Loan bond by Miss Haynes.

The film will be shown next week in most of the moving picture theatres throughout Canada.

W. C. BRENT, TORONTO,

Member of the Dominion Executive Committee, Divisional Organizer for Western Ontario, Victory Loan Campaign. *(British & Colonial Press Photo.)*

MR. WILLIAM CHARLES BRENT is head of the investment house of Brent, Tovell and Company, members of the Toronto Stock Exchange, and Brent, Noxon and Company, government and municipal bonds, Toronto. He was born in Newcastle, Ont., November 1st, 1877, and began his business career as a clerk with James Parker, Toronto, 1889. Afterwards he was clerk with Edgar and Malone, barristers, Toronto, 1891; with G. A. Stimson and Company, Toronto, 1896; engaged in present business as a member of the firm, Brent, Noxon and Company, 1902; present partnership formed, 1915. His recreations are yachting, curling, lawn bowling and golf.

HONORARY COMMITTEES THROUGHOUT CANADA

Sir Thomas White has requested prominent men in every city and county in Canada to act as honorary committees to assist the local organizations in the Victory Loan campaign. The replies of acceptance are of a most gratifying character.

Reports received at the finance department show that the whole Dominion from coast to coast is exceedingly well organized for the launching of the loan on Monday. The Dominion, provincial and local organizations have taken hold of the work with enthusiasm, and if the loan is not a success it will not be for lack of a most complete and thorough organization by the most energetic business men in Canada.

JAMES RAMSEY, EDMONTON, Chairman, Northern Alberta Provincial Committee, Victory Loan Campaign. *(International Press Photo.)*

MR. RAMSEY is head of James Ramsey, Limited, departmental store, Edmonton, and is president of the Edmonton Stock Yards, Limited. He was born in Michigan in 1864. Resided in Toronto, Montreal, New York and Guelph previous to going to Edmonton in 1911. Elected to Alberta Legislature for East Edmonton, June, 1917.

HON. C. A. DUNNING, REGINA, Chairman, Saskatchewan Provincial Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. DUNNING is one of Western Canada's keenest business men. He is provincial treasurer of Saskatchewan, and, with our other provincial treasurers, is doing everything possible to make the Victory Loan a success. He was formerly general manager of Saskatchewan Co-operative Elevator Company. Born in Leicestershire, England, in 1885, he went to Saskatchewan in 1902; farmed Beaverdale, Sask., since 1903.

C. H. BURGESS, TORONTO, Member, Dominion Executive Committee, Victory War Loan Campaign. *(International Press Photo.)*

MR. BURGESS is head of the firm of C. H. Burgess and Company, bond dealers, Toronto. Born at Niagara Falls, Ont., in 1881. Started present business, October 1, 1909; formed partnership with W. A. Woodcock, January 1, 1914.

J. W. MITCHELL, TORONTO, Member, Dominion Executive Committee, and Organizer Toronto Division, Victory War Loan Campaign. *(International Press Photo.)*

MR. MITCHELL is vice-president Dominion Securities Corporation, Limited, investment bankers, Toronto. He is also director of many other institutions. Born at Port Elgin, Ont., 1876. Taught school in his early days; gave up that profession to study law; private secretary to Mr. E. R. Wood, Toronto, 1903-1911; treasurer, Dominion Securities Corporation, Limited, 1911-1916; appointed to present office, February, 1916.

ACTIVE MARKET FOR OUR WAR BONDS

Bulk of the Trading on Stock Exchanges Has Been in These Securities

War bonds have accounted for a large proportion of this year's business in bonds on the Montreal and Toronto stock exchanges. Investors are always sure of an active market in Canadian war bonds. On the Montreal stock exchange, for example, for the first nine months of the year, bond transactions totalled $14,819,900, a total which exceeds the largest for any twelve months in the history of the exchange. Transactions in both the listed and unlisted departments are included, because of the importance of the war loan factor in the aggregate, and because, pending the issue of the definitive certificates, transactions in these war loans are confined to the unlisted department.

Changes in Volume.

In the last full year before the war the total volume of listed and unlisted transactions in bonds on the stock exchange was only $6,341,845, little more than 40 per cent. of the total of the first nine months of the current year. While the average monthly sales of bonds prior to the war was about $500,000, it is now in excess of $1,600,000.

War Loans the Cause.

Somewhat similar records have been made on the Toronto stock exchange. The following table shows the sales of all bonds and the proportion of war bonds to the total, on the two stock exchanges:—

	Montreal.		Toronto.	
Year.	All bonds.	War loans.	All bonds.	War loans.
*1917 ...	$14,819,900	$12,854,000	$3,210,800	$3,075,500
1916 ...	14,350,000	9,575,200	2,977,600	2,231,600
1913 ...	6,341,845	Nil.	1,001,700	Nil.

*Nine months ended September 30th.

The difference in the average monthly total bond sales before the war and now, and considerably more, is accounted for by the increasing war loans. In 1916 about 67 per cent. of the total bond transactions on the Montreal stock exchange consisted of war bonds; the proportion is still higher at 87 per cent. for the current year to date. If the war loans are excluded, the actual volume of bond business passing through our stock exchanges to-day is less than half the pre-war average; if the war bonds are included, it is more than three times the pre-war average.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 2nd, 1917 —

Nipissing Mining Company, 87,815; Kerr Lake, 60,000; La Rose, 87,608; Tretheway, 68,106; Buffalo, 328,284; Mining Corporation of Canada, 367,688; McKinley-Darragh, 242,688; Aladdin Cobalt, 141,200. Total, 1,383,311 pounds, or 691½ tons.

The total shipments since January 1st, 1917, now amount to 31,195,179 pounds, or 15,597½ tons.

BRANTFORD CITY'S GOOD EXAMPLE

The city council of Brantford, Ont., has authorized its treasury department to subscribe for Victory Loan bonds to the par value of $25,000 of such denominations as may be decided upon by the sinking fund trustees. The bonds so acquired will be used for sinking fund purposes.

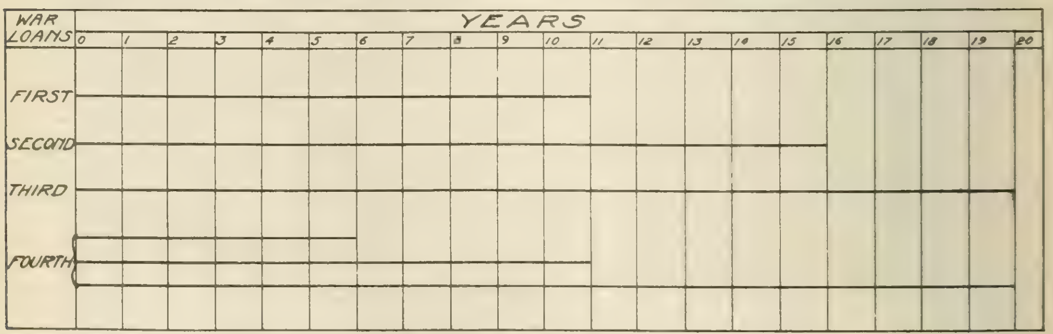
All civic employees, either of the municipality or of the several boards and commissions will be encouraged to subscribe to the loan by the council allowing the treasury department to advance the funds required to the extent of 90 per cent., such advance to be repaid from salary, or earnings in monthly instalments covering one year. The advance to any one employee will be limited to $90. The city clerk is instructed to advise all heads of departments, boards and commissions of this arrangement, and to ask their co-operation in making the loan a success

In order to promote the widest possible use of the smaller denominations of bonds as a medium of exchange, the treasury department has been authorized to accept such bonds and interest coupons thereon, from bona fide subscribers to the loan, in payment of taxes, water rates or any other civic demand, until notice is given of the withdrawal of this privilege. The amount that may be received from any one person to be limited to $50, and the total not to aggregate more than $10,000 in any one year. The bonds so acquired will be used for sinking fund purposes.

Mr. A. K. Bunnell is the city treasurer at Brantford.

The proceeds of Canada's Victory Loan, 1917, will be used for war purposes only and will be spent wholly in Canada.

MATURITIES OF CANADA'S FOUR WAR LOANS



Investors have the choice of Bonds Maturing in 5, 10 or 20 Years.

The above chart shows at a glance the maturity terms of our four war loans to date. Speaking of the merits of long-term financing, Sir Thomas White, finance minister, in his budget speech of February, 1916, said:—

"In considering the question of future loans, it is to be pointed out that while there is considerable money on this continent for short-date investment, the amount obtainable diminishes and the rate of interest increases with length of term. My personal view of the policy to be followed in war finance is that it is preferable to face the higher rate payable on long-term issues rather than to make repeated short-date issues whose maturities may have to be provided for by payment or renewal at times when further funds have to be raised for fresh war expenditures. Moreover, it is not, in my opinion, desirable that in the period immediately succeeding the conclusion of the war the government of the day should be hampered in its financing, in the possibly trying conditions of recuperation and reconstruction, by the necessity of funding numerous issues maturing due at brief intervals."

SIR AUGUSTUS NANTON, WINNIPEG
Member, Dominion Executive Committee, Victory War Loan Campaign. *(The Monetary Times Photo.)*

SIR AUGUSTUS NANTON is doing valuable work in Western Canada in helping to organize the Victory Loan campaign. He is an outstanding financial figure in Canada's affairs and a member of the firm of Osler, Hammond and Nanton, investment brokers and financial agents.

ERNEST A. McNUTT, MONTREAL,
Joint Chairman (with Mr. A. P. Frigon) of Victory Loan Committee for Quebec Province, outside of Montreal. *(British & Colonial Press Photo.)*

MR. McNUTT is treasurer of the Sun Life Assurance Company of Canada. He was born in London, England, in 1876. He left England at the age of 12 years and went to Denver and later to San Francisco. He spent five years in Melbourne, Australia; returned to England for two years; later spent six months in Paris.

A. H. VIPOND,
Member of Dominion Advisory Committee of Life Insurance Representatives, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. VIPOND is Montreal manager of the New York Life Insurance Company. He is a past president of the Life Underwriters' Association of Canada.

JOHN A. TORY, TORONTO,
Member of Dominion Advisory Committee of Life Insurance Representatives, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. TORY is manager for Eastern Ontario and Michigan of the Sun Life Assurance Company of Canada. He is a past president of the Life Underwriters' Association of Canada. His extensive experience in other campaigns will be of considerable advantage in the Victory Loan campaign.

How Our Four War Loans Compare

(Compiled by *The Monetary Times*)

	Loan of November, 1915.	**Loan of September, 1916.**	**Loan of March, 1917.**	**Loan of November, 1917.**
Amount of loan offered	$50,000,000 (later increased to $100,000,000)	$100,000,000	$150,000,000	$150,000,000 (Minister of Finance reserves right to allot any portion of amount subscribed in excess of $150,000,000)
Bonds maturing in	10 years	15 years	20 years	5, 10 and 20 years
Rate of interest	5%	5%	5%	5½%

Final allotment of bonds	$100,000,000	$100,000,000 (exclusive of amount paid for by surrender of first war loan bonds)	$150,000,000 (exclusive of amount paid for by surrender of first war loan bonds and debenture stock)	——
Fee for conversion of fully registered bonds without coupons to bonds with coupons and vice versa		25 cents	25 cents	25 cents

*All bonds may be registered as to principal or as to principal and interest on this occasion

To Maintain Industrial Activity

Subscribe Liberally for

Canada's Victory Bonds

If for no other reason than that of self interest, it is of the utmost importance to every manufacturer and merchant that the fourth War Loan of the Dominion of Canada (to be known as Canada's Victory Loan and to be offered in November) be fully subscribed.

The further extension of credits to our Allies is imperative if Canada's manufacturers wish them to continue buying here. And there can be no question about that, because upon their purchases will depend our industrial and agricultural prosperity.

Then, too, the money subscribed will be spent in Canada.

The money must come from our entire people, but a good lead from manufacturers and merchants is absolutely essential and will encourage the multitude of smaller investors. The bonds are an excellent investment. Money is not tied up in them, because they are readily saleable and because of their value as collateral.

Apart from all business and financial reasons, however, the great fact remains that Canada must have more money to carry on her part in the war.

Every ounce of our financial, as well as fighting strength, is needed.

Great Britain *must* now purchase where she can get credit. If Canada grants the credit---she will get the business.

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

91

NO COMMISSION ON AMERICAN SUBSCRIPTIONS

In view of the war financing of the United States government through its Liberty Loan issues, it is the desire of the minister of finance that the Canadian Victory Loan, 1917, should not be promoted in the United States. No commissions will, consequently, be paid for obtaining United States subscriptions

DEBENTURE STOCK CONVERTIBLE

Holders of three-year debenture stock, due October 1st, 1919, may convert their stock into Victory loan bonds at par and accrued interest.

This debenture stock was issued in October, 1916. In his budget speech on February 16th, 1916, Sir Thomas White stated that to promote saving among the public and to afford a ready means of remunerative investment in Dominion securities for funds seeking investment during the intervals between public offerings the government had determined to authorize the sale, from time to time, in principal sums of $100 and multiples thereof of debenture stock, repayable in five years from date of issue, and bearing interest payable half-yearly by cheque, negotiable without discount at any branch of any chartered bank in Canada. The issue price was par. The government reserves the right to limit the amount of individual sales, and generally to deal with the issue as may be deemed advisable, having regard to the national credit and requirements. The stock is dated October 1st, 1916.

Up to October 27th, 1917, $10,164,500 of the stock had been sold. Surrendered as part payment of allotment made in the third war loan of March, 1917, was $5,818,500 of this debenture stock.

BONDS ARE GOOD COLLATERAL

The banks regard Canada's war bonds as excellent collateral for loans to 80 or 90 per cent. of their market value.

SASKATCHEWAN'S WAR LOAN COMMITTEE

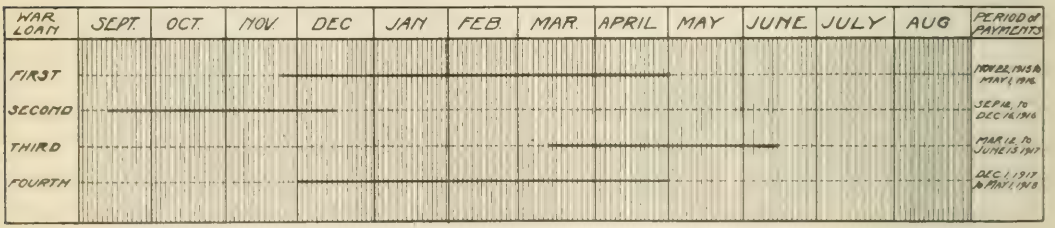
The Saskatchewan executive committee for the Victory Loan are: Hon. Chas. A. Dunning, chairman; D. M. Balfour, vice-chairman; S. W. Harris, secretary; H. W. Givins, treasurer; A. W. Scripture, superintendent of organization; Harry F. Stirk, J. H. Kern, Moose Jaw; J. O. Hettle, A. H. Williamson, Saskatoon; G. E. Cork, John Rogers and G. H. Bradshaw, Regina.

CALGARY INSURANCE MEN WILL SELL BONDS

Under the leadership of Mr. D. M. LeBourdais, president of the Life Underwriters' Association of Alberta, the life insurance men of Calgary and district have pledged themselves to give an average of two weeks' exclusive time to the sale of Victory Loan bonds, commencing Monday. This means that about eighty trained salesmen will be at the disposal of the Calgary executive war loan committee, and it will go far to ensure the success of the flotation in Calgary and district.

As it is the aim of the minister of finance that the bonds shall be as widely held as possible, the services of an organization of trained canvassers such as the life underwriters' association will be particularly valuable in reaching the people who are not likely to be reached by written appeals. Life insurance men throughout Canada are co-operating in this way.

VICTORY LOAN BONDS MAY BE PURCHASED IN INSTALMENTS



Investors have five months, if desired, to pay for their Victory Bonds.

The present Victory Loan, as was the case with our previous loans, is payable in instalments.

On the first loan, the instalments were payable over a period exceeding five months. The second loan was payable during a period of little more than three months. The third loan was payable over a similar period. The present loan is payable over a period of five months. A deposit of 10 per cent. must be made with the application for bonds, but this deposit is not actually payable until December 1st.

The privilege of paying instalments in full under discount at the rate of 4 per cent. per annum on the first occasion was not available until about six weeks after the subscription list had been opened. In the second loan, that privilege was available within practically a month of the opening of the subscription lists. As a result of conferences of the government and the bankers, it was thought necessary to defer the calls on the first war loan until the financing of the crop movement had been completed. The initial payment on the loan, therefore, became due at the end of November, the larger instalments not beginning until February 1st. In the second loan the large instalments fell due in October, November and December, the most important part of the crop movement period.

The difference in this matter in the first three loans was probably governed by the fact that financial conditions were easier, that the smaller western crops in 1916 entailed less financing than in 1915, and that the monthly expenditure for war purposes was considerably heavier. In the present case the first payment is not due until December 1st, when a great part of the crop financing will have been accomplished. The final payment is not due until May 1st, thus tending to ease general financial conditions.

How the four loans compare in this respect is shown in the following table:—

Loan of November, 1915.

Per cent. of loan.	Payable on
10	Application
7½	Jan. 3, 1916
20	Feb. 1, 1916
20	Mar. 1, 1916
20	Apr. 1, 1916
20	May 1, 1916
97½	

Loan of September, 1916.

Per cent. of loan.	Payable on
10	Application
30	Oct. 16, 1916

J. W. McCONNELL, MONTREAL,
Chairman, Quebec Provincial Committee for the Island of Montreal, Victory Loan Campaign. *(British & Colonial Press Photo.)*

MR. McCONNELL is president and managing director, St. Lawrence Sugar Refineries, Limited and director of many other companies. Born in Muskoka, Ont., July 1, 1877.

A. E. AMES, TORONTO,
Chairman, Dominion Executive Committee, Victory Loan Campaign. *(British & Colonial Press Photo.)*

MR. AMES is head of the banking and investment firm, A. E. Ames and Company, Toronto. He was born at Lambeth, Ont., in 1866. After several years in the banking business with various institutions, he founded his present business in 1889. Has been president of Toronto Stock Exchange and Toronto Board of Trade; is a director of a large number of financial and other institutions.

C. H. B. LONGWORTH, CHARLOTTETOWN,
Chairman, Prince Edward Island Provincial Committee, Victory War Loan Campaign. *(The Monetary Times Photo.)*

MR. LONGWORTH was in the canned goods business for many years, but retired two years ago. He is local director of the Eastern Trust Company, and is also chairman of the Provincial Food Control Committee for Prince Edward Island. He is a graduate of McGill College, 1894.

H. V. F. JONES, TORONTO,
Chairman, Toronto Bankers' Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. JONES is assistant general manager of the Canadian Bank of Commerce. On his committee are the following bankers: Messrs. J. C. Mason, acting general manager, Home Bank; C. A. Ross, Dominion Bank; J. A. McLeod, assistant general manager, Bank of Nova Scotia; and G. D. Boulton, Imperial Bank.

COMMERCIAL TRAVELLERS' HELP WANTED

Letter of Quebec Chairmen to Manufacturing Concerns—War and Retail Trade

The joint chairmen of the Quebec Provincial Committee in charge of the Victory Loan campaign, have addressed the following letter to wholesale firms in Quebec province, with a view to enlisting their co-operation and that of their travellers in making known the importance of the loan as a means of maintaining the prosperity of Canada:—

"Dear Sirs.—To make the Victory Loan a great success, it is necessary for all classes of the community to fully realize that a continuance of the prosperity Canada has enjoyed for the last few years entirely depends upon money being furnished to the government; failure to provide the money means that the purchasing which has been done in Canada by Great Britain and her allies will cease.

Talk Loan to Customers.

"The Victory Loan committee appointed for this province, therefore, asks you to take this matter up with your travellers and arrange with them to talk up the Victory Loan with their customers, so that the retailers may become thoroughly conversant with the fact that it is a necessity for the loan to be oversubscribed. The travellers' influence is very considerable and they can do a great deal towards convincing the retailers that getting the public to liberally subscribe will mean a continuance of good business for the retailers.

"The great expansion of domestic business in Canada since the outbreak of the war is beyond question due to the enormous quantities of supplies purchased in Canada by Great Britain and her allies, such as flour, wheat, cheese, butter, oats, meats, fish, ships, munitions and numberless manufactures.

"You will remember that prior to the outbreak of the war business had contracted and that many a retailer was having a hard time to make ends meet.

"In natural products Canada shipped in the last fiscal year 267 million dollars more than in the best year before the war, while the manufactures in the last fiscal year are 420 million dollars more, or over eight times as much as they were in the best year before the war.

"The enormous amount of money represented by these exports has been distributed in Canada among the farmers and among a very large number of people who have had continuous work at high pay. That good business has been done all over Canada is undoubtedly due to the large amount of money realized by Canada from the purchases of Great Britain and her allies. It therefore follows that if these purchases were discontinued, business in general would be very seriously affected, as it would mean a discontinuance of the large individual earnings.

As a Business Proposition.

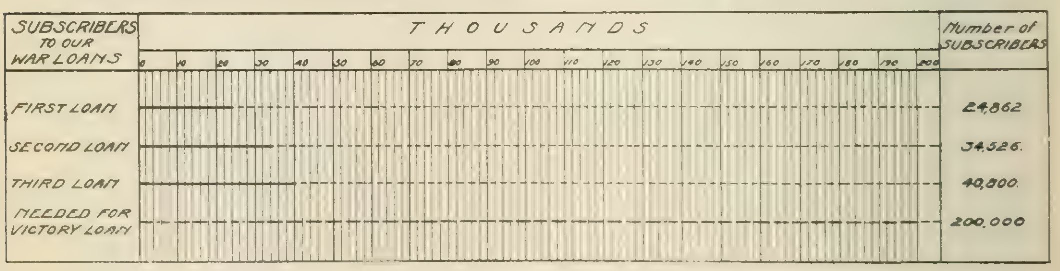
"We are plainly told that unless Canadians buy these Victory Loan bonds, so that the Dominion can loan the money to the British government to finance further purchases in Canada, then the purchases in this country will cease. As a business proposition it will pay every Canadian to subscribe for as large an amount of bonds as he or she is able to. Doing so will make prosperous times continue; failure to do so will mean a marked contraction of business. You must see that the success of this loan is of vital importance to the prosperity of each individual.

"We have said nothing in this letter about the higher idea, that subscribing freely to this Victory Loan is a national duty, as we feel that it is not necessary, and have, therefore, only dealt with it from a business standpoint.

"What we ask you to do is such good business that we feel confident you will take the matter up immediately with your travellers. (Signed) E. A. McNutt and A. P. Frigon, joint chairmen."

Toronto's fire loss for October amounted to $35,975, and of this amount $24,518 was done to buildings.

TWO HUNDRED THOUSAND SUBSCRIPTIONS NEEDED FOR VICTORY LOAN



Number of Subscriptions to Our War Loans.

Not only must a very great number of new, smaller subscriptions be secured, but the number of middle-sized subscriptions must be enlarged, and, also, the volume of big subscriptions must be repeated.

The number of subscribers to the Canadian war loans has been as follows:—

Date.	Amount.	Number of subscribers.
November, 1915	$100,000,000	24,862
September, 1916 . .	100,000,000	34,526
March, 1917	150,000,000	40,800

It was estimated that to have secured a distribution of the third Canadian war loan equal to that of the first Liberty Loan we should have had 280,000 subscribers. The Victory Loan campaign committees ask for at least 200,000 subscribers to the present loan.

The number of subscribers to various war loans has increased in most countries, with the exception of Germany, as the war has progressed. The following table shows the results of Great Britain's three large war loans in this respect:—

Date.	Amount.	Number of subscribers.
November, 1914	£ 350,000,000	100,000
July, 1915	600,000,000	1,100,000
February, 1917	1,000,000,000	8,000,000

Of the total number of subscribers to the third British war loan, 5,911,000 represented purchases of war saving certificates.

The subscribers to German war loans have been as follow:—

Date.	Amount.	Number of subscribers.
September, 1914 . .	$1,115,000,000	1,177,235
March, 1915	2,264,000,000	2,694,063
September, 1915	3,025,000,000	3,966,418
March, 1916	2,678,000,000	5,279,645
September, 1916 .. .	2,674,000,000	3,810,696

The number of subscribers to the second Liberty Loan of $[illegible] (oversubscribed by $1,617,532,300) was 9,400,000.

The number of subscribers to the first Liberty Loan of the United States of $2,000,000,000 was 4,000,000.

A. H. B. MACKENZIE, MONTREAL,
Member, Dominion Executive Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. MACKENZIE is a member of the investment house, Mackenzie and Kingman, Montreal. Had 22 years banking experience with Canadian Bank of Commerce; established present firm, 1914; born Hamilton, 1869.

RENE T. LECLERC, MONTREAL,
Member, Dominion Executive Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. LECLERC is an investment banker, dealing in government, municipal and corporation bonds, Montreal. Born Montreal, 1880. Established present business, 1901; member executive committee, Bond Dealers' Association of Canada.

EDWIN HANSON, MONTREAL,
Member, Dominion Executive Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

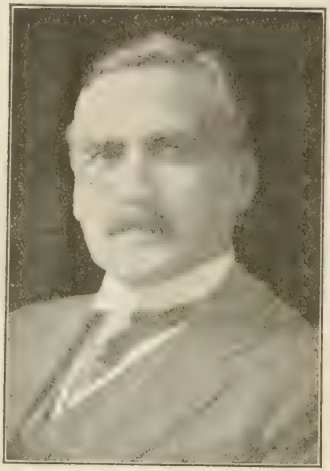
MR. HANSON is partner in the investment house of Hanson Brothers, Montreal, president Montreal Water and Power Company and director of many companies. Born Fowey, Cornwall, England. Came to Canada, 1870.

J. H. GUNDY, TORONTO,
Vice-Chairman, Dominion Executive Committee, Chairman, Dominion Finance Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

MR. GUNDY is partner in the bond house of Wood, Gundy and Company, Toronto. Previously associated for several years with the Dominion Securities Corporation as secretary, he left that firm in 1905, and, with Mr. G. H. Wood, started the investment house of Wood, Gundy and Company. Mr. Gundy is recognized as one of the leading financial authorities of the country.

HOLD MORE GOVERNMENT BONDS

While during the last few years it has been the feeling amongst investors that their investments should be varied and only a certain proportion be held in government bonds, the percentage which Dominion government bonds hold to their total investments will need to be considerably increased, just because circumstances are such as to require it.



SIR THOMAS WHITE, OTTAWA,
Canada's Finance Minister. (*The Monetary Times Photo.*)

SIR THOMAS WHITE asks for a substantial response to his request for $150,000,000 for war purposes. A heavy oversubscription is desired. This is the fourth war loan issued during his tenure of office. On this occasion, a widespread national organization is co-operating with Sir Thomas in order that an effort may be made to have every citizen and corporation in Canada subscribe to the Victory Loan. Sir Thomas was born near Bronte, in Halton County, Ont., in 1866, and attended the Bronte public school and the Brampton High School before entering the University of Toronto as a student in classics and political science. He remained for two years at the University and then joined the staff of a Toronto evening newspaper as a reporter. He resumed his studies and then dropped them again to accept a position in the city assessment department. Finally, he completed his University course, winning a gold medal at graduation. He then entered the law school, and in 1899 was graduated with a second gold medal. In August of that year the directors of the National Trust Company, then in course of organization, were seeking a manager. They selected Mr. White, and he accepted the appointment. He rose first to the position of general manager and later to that of vice-president of that corporation. He is one of the most capable finance ministers Canada has had.

HOW TO HELP EMPLOYEES BUY BONDS

Various Canadian firms have encouraged their employees to subscribe to our war loans. Similar methods will be used in regard to the present loan.

Bonuses in war bonds will be paid by some firms. Others have arranged to act as bankers for employees who wish to buy a war bond. In other instances co-operative bond clubs have been formed to provide each member with a bond. Employers are desired to encourage this method of buying war bonds.

HOW THE BONDS WILL BE SOLD

Widespread National Organization Will Co-operate in Selling Victory Loan

The first three war loans were sold in the usual way, through the bond brokers, banks and stock brokers, the various financial houses competing to obtain the largest volume of subscriptions. The Victory Loan has been made a national affair, and the banks, bond houses, stock exchanges, insurance companies, loan and trust companies, and other financial institutions are all co-operating, instead of competing, to make the loan a success. The finance minister decided that general organization work and co-operation throughout the provinces should be in the hands of a Dominion executive committee, composed of people used to the distribution of securities, and having, in their experience, a good start toward solution of such problems as would have to be dealt with prior to and during the progress of the campaign. The Dominion executive is, therefore, composed of a group which, for convenience of operation are men resident in the cities of Toronto and Montreal, with the exception of one resident in Winnipeg. The Dominion executive meets daily, and is in constant touch in an advisory capacity with all other committees.

Co-operative Committees Appointed.

To co-operate with this Dominion executive and to do everything in their power to help the success of the campaign, there have been appointed co-operative committees for the Dominion and for the provinces by the Bankers' Association, the Life Officers' and Underwriters' Association, and the Mortgage Loan and Investment Association, in the membership of which are included trust, life and loan companies. The Ontario and Quebec Fire Underwriters' Association have appointed committees to co-operate in those provinces, and other fire underwriters' committees have been formed in other provinces to give their support.

Other committees of Dominion-wide scope are as follows:—(1) Dominion Special Subscriptions Committee; (2) Dominion Finance Committee; (3) Dominion Publicity Committee; (4) Dominion Business Committee. The Canadian Press Association is also co-operating.

Provincial Organizations.

In every province there is a separate provincial organization, through which the whole province is being organized. The chairmen for these provincial organization committees have been selected with care and are considered most suitable for the tasks they have, in co-operation with the other members of their committees.

In connection with a number of provinces and cities there will be influential honorary committees, who will be of considerable use by the influence of their names and help where called upon in different directions.

All of the provincial committees have their own subcommittees, such as special subscriptions, publicity and business committees, whose activities are connected with work throughout the province and in operation with the Dominion committees of the same character. Each province is divided into a number of these districts, and at the head of each of these districts is the strongest man, qualified for the position, who could be obtained. There will be a special committee in charge of each of the cities and of each of the counties, the idea being to canvass as completely as possible people living in every part of Canada, including those on the farms and those in the factories.

PRINCE EDWARD ISLAND COMMITTEES

The following are some of the Victory Loan committees in Prince Edward Island:

Executive committee—Messrs. C. H. B. Longworth, chairman; Percy Pope, J. P. Gordon, and E. H. Cameron, secretary; chairman publicity committee, John O. Hyndman. Financial committee—Frank R. Heartz, chairman; James Eden and C. H. B. Longworth. Provincial committee—Hon. Senator McLean, Harry T. Holman, Charles Lyons, W. H. Aitken, W. L. Poole and John A. Hackett. Mr. W. K. Rogers, chairman of committee for Queen's and King's counties. Mr. J. S. Hinton, chairman of Prince county committee, Summerside.

FARMERS WILL BUY BONDS

Market for Agricultural Products Depends on Subscription of War Loans

By E. R. WOOD,

THE farmer, like everyone else, wants to win the war. The farmer is particularly interested in helping to subscribe our war loans, thus creating credits here for British purchases. British investors before the war had invested in Canada $2,914,000,000, many millions of which were placed in farm mortgage loans throughout Canada.

Not only have the people of Britain loaned their funds in generous amounts to the Canadian farmer, through our various loaning institutions; they have also purchased the bulk of Canada's farm products. In short, Britain has largely financed the Canadian farmer and at the same time has been his best customer.

E. R. WOOD, TORONTO,
Member, Dominion Executive Committee; Chairman, Special Subscriptions Committee; and one of the most strenuous workers in the Victory War Loan Campaign.

Take wheat and grain as an example. We shipped to Britain $230,000,000 of our total $289,000,000 of grain exports during the fiscal year ended March, 1917.

She bought in the same year $90,000,000 of $128,000,000 of the animal produce we exported.

During the three war years, our farm products have been exported in increasing volume and at rising prices. In 1915, we shipped over $209,000,000 worth of Canadian agricultural and animal products abroad; in 1916, $352,000.000; and in 1917, $501,000,000. Most of this went to Great Britain, who wants to buy more, if we will advance the necessary credits.

Since the outbreak of war, the department of agriculture at Ottawa has shipped 481,049 tons of hay to Great Britain and 76,000,000 bushels of oats. It has shipped also 440,000 tons of flour, requiring for its manufacture over 24,000,000 bushels of our farmers' wheat. That department alone has shipped nearly $100,000,000 worth of hay, oats and flour to Britain. This has been done with the help of credits established by us.

Despite the impetus given to Canadian manufacturing by the munitions industries, the exports of Canadian animal produce and agricultural products continue to exceed those of factory products.

For many years the exports of our farm products have exceeded those of our manufactures. These figures illustrate that fact at a glance:—

Fiscal year.	Exports of Canadian animal produce and agricultural products.	Exports of Canadian manufactures.
1914	$251,000,000	$ 57,000,000
1915	209,000,000	85,000,000
1916	352,000,000	242,000,000
1917	501,000,000	477,000,000

The early credits advanced by Canada to Britain for purchases here were chiefly for munitions, because shells were then one of the most important things needed at the front. Since then, credits have been arranged for the purchase of practically all kinds of agricultural and dairy produce.

CANADA'S WAR FINANCE POLICY

Posterity Must Bear Share of Burden, But We Can Provide Interest and Sinking Fund Charges

In discussing in his budget speech in February, 1915, the proper financial policy of a nation in time of war, Sir Thomas White, finance minister, said: "Some have strongly favored the policy of large borrowing; others have insisted that the cost of a war be defrayed by a nation at the time it is being waged. Obviously, in a war such as this the latter course would be impossible. The truth seems to be that it is not practicable for all nations to adopt the same policy or for any nation the same policy at all times. The circumstances and conditions of individual nations must be taken into consideration. If a country has much accumulated wealth, a policy of drastic taxation would appear to be advisable. With a country such as ours, rich in potential resources, certain of future development and great expansion of production and population, but without at present large accumulations of wealth, it would appear that the placing upon posterity the greater portion of the financial burden of this war is justifiable, waged as it is in the interests of human freedom, and for their benefit in equal if not in greater degree than for our own. Canada in future years of peace, with the prosperity which will be her heritage from the development of unbounded resources, will be well able to meet the interest and sinking fund charges upon such debt as we shall be obliged to incur in defence of our country and its liberties.

Utilize Only Necessary Taxation.

"Assuming that Canada's indebtedness on account of this war will reach $1,000,000,000, at 5 per cent. the annual interest will amount to $50,000,000. This sum, with a substantial amount added yearly for a sinking fund, could be met, provided strict economy be practised by governments, from the future revenue of the Dominion.

"In national finance," said Sir Thomas in the same speech, "if debts can be funded, the practical question is that of payment of annual interest. But while this is so, the fact must not be overlooked that debt is debt, a financial obligation and burden upon the body politic, whether owed to investors at home or abroad.

To Encourage Agriculture.

"It is Canada's clear national duty and supremely in the interest of our credit to provide what we reasonably by taxation can without impairing our economic strength. To attempt more would mean too drastic taxation upon a community whose trade and commerce have been seriously interrupted and affected by war conditions and unduly heavy burdens upon a people already contributing generously of their substance to funds and organizations whose patriotic object is the comfort and well-being of our soldiers and the dependants they have left behind.

"In connection with taxation, there is another feature which we must also bear in mind, namely, that Canada is a country inviting immigration, and we must be careful not to create the impression that it is likely to become a country of heavy individual taxation. In this connection, it is opportune to state on behalf of the government and as enunciating its settled policy, that, in providing Canada's war expenditure, resort will not be had to taxation upon the farms, personal effects, or income of those engaged in our great basic industry of agriculture."

Growth of Debt.

In 1913, before the war commenced, our net national debt totalled $314,000,000. In June, 1915, it had risen to $450,000,000; in July, 1916, to $635,000,000; and in August, 1917, to $864,000,000.

If our war expenditures during the last seven months of the current fiscal year (to end March next) average what they did for the first five months, (namely, $51,000,000), we shall have a national debt in March, 1918, of approximately $934,000,000.

Thrift, economy and greater production are three of the ways to meet the interest of this large war debt. The advance of credits by us to Great Britain for purchases here is a vital impetus to our machinery of production, to our prosperity. It should also be an impetus to national saving.

SIR EDMUND OSLER, M.P., TORONTO,
Chairman, Toronto Honorary War Loan Committee. *(The Monetary Times Photo.)*

SIR EDMUND OSLER is head of the firm of Osler and Hammond, stock brokers, Toronto. He is president of the Dominion Bank and a director of a large number of companies. He was born in County Simcoe, Ont., 1845.

G. H. WOOD, TORONTO,
Member, Dominion Executive Committee; Member, Toronto Honorary Committee, Victory Loan Campaign. *(International Press Photo.)*

MR. WOOD is member of Wood, Gundy and Company, bond dealers, director of several companies. Born in Cheshire, England, 1867. In 1900, upon the organization of the Dominion Securities Corporation, assumed the office of secretary and superintendent of sales department, continuing with this company until the spring of 1905, when he resigned the position of manager, and with Mr. J. H. Gundy, then secretary of the Dominion Securities Corporation, formed the firm of Wood, Gundy and Company, with which he is still actively associated.

OLD BONDS AND DEBENTURE STOCK

They Can Be Converted Into Victory Bonds—This Issue Also Convertible in Future

Canada's fourth domestic loan, the Victory Loan, is convertible into future Dominion government issues. This privilege was given in the first war loan of November, 1915, but was not included in the prospectus of the second and third loans of March, 1916, and March, 1917, respectively. The improved position of Dominion war loan securities in July brought forward the question of the permission to convert original holdings into any new issue. It was decided that in future issues holders of the first and second issues of Dominion war loan securities, those maturing in 1931 and 1937, should be allowed to convert their holdings at the original interest price and accrued interest into any issue which may be made with a maturity of twenty years or more. The minister of finance desired that the early subscribers to federal war issues which had no right of conversion should be placed in as good position as others who might subscribe to future war loans.

The prospectus of the first war loan, maturing in 1925, contained the following clause: "In the event of future issues (other than issues made abroad) being made by the government, for the purpose of carrying on the war, bonds of this issue will be accepted at the issue price, 97½, plus accrued interest, as the equivalent of cash for the purpose of subscriptions to such issues."

How Clause Reads.

The conversion clause in the Victory Loan prospectus reads as follows:—

"Bonds of the various maturities of this issue will, in the event of future issues of like maturity, or longer, made by the government, other than issues made abroad, be accepted at par and accrued interest, as the equivalent of cash for the purpose of subscription to such issues."

The privilege of conversion was first introduced in loans of the present war by Great Britain, Canada following suit in November, 1915. The first Liberty Loan of the United States was issued on a 3½ per cent. basis, and the second Liberty Loan on a 4 per cent. basis. Both issues were convertible into any United States government future loans bearing a higher rate of interest.

Debenture Stock Conversion.

In addition to the three previous war loans, three-year debenture stock is also convertible into our Victory Loan. Of this stock, which is issued for war purposes only, $10,164,500 had been sold up to October 27th, 1917. Of that amount $5,818,500 was surrendered as part payment of allotment made in the third war loan. Those who desire to convert their old war bonds or debenture stock into Victory Loan bonds may do so under the following conditions:—

Debenture stock (due October 1st, 1919), and war loan bonds (due December 1st, 1925), will be accepted in part payment for bonds of any of the Victory Loan maturities at par and accrued interest, and at 97½ and accrued interest respectively.

War loan bonds (due October 1st, 1931), and war loan bonds (due March 1st, 1937), will be accepted in part payment for Victory Loan bonds of the 1937 maturity only, at 97½ and accrued interest, and at 96 and accrued interest respectively.

The subscriptions to the second war loan, issued September, 1916, included $6,073,800 of the first loan converted. The subscriptions to the third war loan, issued March, 1917, included $18,131,000 of the first loan and $5,818,500 debenture stock converted.

UNITED STATES SUBSCRIPTIONS TO LOAN

To the first, second and third war loans there were approximately $25,000,000 of subscriptions from the United States. Liberty Loan activities in that country are absorbing several billions of dollars, but it is felt that there are certain groups in the United States which will consider it a duty to subscribe to Canada's Victory Loan. This applies, for example, to the numerous United States companies which have branch factories and other establishments in Canada and to United States insurance companies doing business in this country.

Service for Women

In the management of property and the investment of money, women often find themselves handicapped by inexperience. Mistrusting their own judgment, they appeal to friends for financial guidance. Such a course is not safe nor businesslike.

Insure your property against mismanagement, and relieve yourself of worry by enlisting the services of this company. You will receive the benefit of experience gained in the management of many estates, both large and small.

Our office will be glad to explain—by letter or interview—about the making of your will or any matters regarding a trust or banking business.

A SQUARE DEAL IN LIFE ASSURANCE

Do YOU know anything about "loadings"???

"First in the Northwest."

When the average Life Assurance Actuary figures out your premium he first finds the "net" premium, then adds to it a percentage called a "loading" to provide for expenses.

This method has been condemned by world famous actuaries for over half a century.

The Northwestern is the only Canadian Life Company that uses a scientific method of providing for expenses, and this results in

LOWER PREMIUMS

Write for our circular entitled "Life Assurance Rates" exposing the unsound methods generally followed and justifying our claim to be

Canada's only scientific Life Company.

Underwriters Survey Bureau, Limited, $10,000; A. W. Hadrill, L. Howgate, M. Wickham. Dominion Mercantile Marine Corporation, Limited, $1,500,000; W. K. McKeown, L. C. Herdman, G. E. Chart. Lee Puncture-Proof Tire Company of Canada, Limited $50,000; A. A. Garthwaite, J. M. Dettra, W. P. McFeat. Mount Royal Milling and Manufacturing Company, Limited, $1,000,000; G. W. MacDougall, L. Macfarlan, J. McNaughton. Safe on Sea, Limited, $1,000,000; R. Chenevert, L. Barry, T. Ethier. Como Realty Company, Limited, $20,000; G. E. Chart, B. Charlebois, M. B. McKeown. Brennan and Blauer, Limited, $40,000; P. A. Badeaux, E. G. Bennett, A. Mathieu.

Toronto, Ont.—Nash Motor Sales, Limited, $200,000; H. Horsman, F. Baskerville, Edmunds May Tannahill. The Transparent Rubber Goods Company, Limited, $40,000; W. B. Sturrup, T. S. H. Giles, C. A. St. Clair McKay. Alloy Steel Works, Limited, $2,000,000; R. H. Parmenter, A. J. Thomson, S. D. Fowler. Asquith Gold Mining Company, Limited, $2,000,000; G. A. Young, H. Young, E. Whitehead. Burger's, Limited, $40,000; K. F. Maclaren, R. E. Young, R. H. Parmenter. The Canadian Symphony Orchestra, Limited, $50,000; H. W. Maw, J. A. MacInnis, B. Hettger. Cane Silver Mines, Limited, $1,500,000; H. J. Martin, T. N. Poole, A. D. Parker. Consolidated Metals Corporation, Limited, $3,000,000; M. Macdonald, E. Smiley, D. I. Grant. Dominion Kirkland Gold Mines, Limited, $2,000,000; A. G. Slaght, W. E. Wilson, K. L. Johnston. Gould Rotary Sewing Machines, Limited, $350,000; F. Regan, E. Murphy, G. Sullivan. National Index Card Company, Limited, $50,000; J. F. Osborne, H. J. King, J. H. Saunders. The Famous Upstairs Clothes Shop, Limited, $40,000; H. Miller, D. Dunkleman, I. Cohen. The George C. Brymer Company, Limited, $40,000; F. E. Earl, P. G. A. Webster, C. Brotchie. Mingo Pulp, Paper and Land Company, Limited, $1,000,000; H. R. Armstrong, I Hickey, G. L. Lee.

RALPH A. STEPHENSON, MONTREAL,

Member, Dominion Executive Committee, Victory War Loan Campaign. *(The Monetary Times Photo.)*

MR. RALPH A. STEPHENSON is manager of the Canadian business of Harris, Forbes and Company, Incorporated, bond and investment house. He is making his home in Toronto during the Victory Loan campaign. Besides acting on the Dominion executive committee, he is chairman of the Dominion publicity committee. Mr. Stephenson has been in the banking business all his life. He started with the First National Bank of Boston, and worked in every department there. He then joined the Harris, Forbes Company, Incorporated, starting in at the mailing desk and has been with that firm ever since. He is now a partner in the firm.

The Federal Reserve Board of the United States has made an offer of a loan of $[illegible] in gold to the Canadian government in response to an appeal by Canadian banking interests, made on the ground that the Dominion is in need of gold to maintain her foreign exchange rates. The Reserve Board's offer has been made conditionally. It is provided that the gold is to be returned to the United States as soon as the Canadian foreign exchange position is readjusted on favorable terms.

RAILROAD EARNINGS

Earnings of the three railroads for the week ending October 31st were:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
October 31	$4,170,000	$4,989,000	+ $819,000

Grand Trunk Railway.

October 31	$1,841,092	$1,935,666	+ $ 94,574

Canadian Northern Railway.

October 31	$1,172,000	$1,350,200	+ $178,200

The Canadian railroads handled in October the greatest volume of traffic in their history, combined gross earnings of the three principal systems, as reported in their weekly statements, establishing a new high record for a month at $24,379,125.

The previous high mark was $23,709,303 in May of the current year. Prior to this year the high record had been $22,479,121 in October, 1916.

All three roads shared in the increase, but the chief factor was the expansion in Canadian Pacific earnings in the second half of the month. After starting off with a decrease of $124,000 in the first week, and only a fair-sized gain, $29,000, in the second, Canadian Pacific ran up increases of $497,000 and $819,000 in the third and fourth weekly periods, respectively, the latter being one of ten days. As a result of these gains over the same month last year, the company's total gross rose to the largest figures ever reported in the weekly statements for any one month, namely, $14,593,000. That compared with the company's previous maximum, $14,359,000, in October, 1913, and $14,068,000 in the best previous month of the current year, namely, May.

The October, 1917, gross earnings of the three companies with the increases over October a year ago, follow:—

	Oct., '1917.	Increase.	Per cent
Canadian Pacific Railway ..	$14,593,000	$1,491,000	11.4
Grand Trunk Railway	5,844,525	184,204	3.3
Canadian Northern Railway	3,941,600	224,800	6.0
	$24,379,125	$1,900,004	8.5

The record of gross earnings for the three companies in recent years shows that the new advance has carried the figures up about $8,000,000, or 50 per cent., from their depressed level in the autumn of 1914. Comparisons for October since 1911 follow:—

Year.	October gross.
1917	$24,379,125
1916 .	22,479,121
1915 .	21,458,391
1914 .	16,134,717
1913 .	22,093,744
1912 .	20,213,154
1911 .	17,610,668

Aggregate gross earnings of the three systems, month by month, this year, with the change, from 1916 in each case. are tabulated below:—

Month.	Total gross, 1917.	Increase.	Per cent
January	$17,25[illegible]	$2,726,672	18.5
February	15,043,606	375,691	2.5
March	19,967,437	2,623,194	15.1
April	20,236,111	2,158,306	11.9
May	23,709,303	3,755,467	18.8
June	23,281,719	3,441,526	17.2
July	22,771,680	1,825,119	8.7
August	21,22[illegible]	*866,256	3.9
September	21,077,092	406,366	2.0
October	24,379,125	1,900,004	8.5

*Decrease.

The return for the last ten days of October, completing the month's figures, were as follows:—

	Oct. 21-31.	Increase.	Per cent.
Canadian Pacific Railway..	$4,989,000	$ 819,000	19.6
Grand Trunk Railway	1,935,666	94,574	5.2
Canadian Northern Railway	1,350,200	178,200	15.2
	$8,274,866	$1,091,774	15.2

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES

TOWNSHIP OF SCARBORO

Tenders will be received by the Township of Scarboro, addressed to the undersigned, for purchase from the Township of its debentures to the amount of $4,358.02, payable in nine instalments, commencing December 15th, 1918, and bearing interest at five and one-half per cent. per annum.

Tenders should be computed as of December 15th, 1917.

The annual instalment of principal and interest payable under the By-law is $626.86.

Tenders must be in the hands of the Treasurer not later than 9 a.m. on the 20th day of November, 1917, and the highest, or any, tender will not necessarily be accepted.

JOHN H. RICHARDSON,
Township Treasurer,
West Hill P.O., Ont.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

POSITION WANTED by capable young man of original ideas. Ten years' life insurance experience as accountant, correspondent, salesman, associate editor agency journal and bulletins and preparing helps generally for the man in the field. Now secretary and writer of publicity in connection with a war movement, the utility of which is about to cease. Age 33, family, exempt. First-class references. Box 121, *Monetary Times*, Toronto.

FIRE INSURANCE.—Chief clerk in head office wants position with established company as office manager or in similar executive capacity. Long experience with tariff companies; thoroughly competent underwriter, able to take full charge of head office. Legitimate reasons for changing. Highest recommendations as to ability and integrity. Well qualified to hold responsible executive position, and only such would be attractive. Confidential. Box 119, *Monetary Times*, Toronto.

CIVIC FINANCES REVIEWED

City of Toronto's Assets $125,797,542 Against Liabilities of $107,391,956

An important report just issued by Finance Commissioner Bradshaw, Toronto, on the city's civic finances, in connection with the balance sheet for 1916, shows in detail the assets and liabilities and the receipts and disbursements for the year ended December 31st, 1916.

The following summary gives the chief items of the balance sheet, and the amounts include current and capital account and special trust funds:—

Assets.

Cash on deposit and on hand	$ 997,320.22
Taxes receivable	4,372,407.74
Accounts receivable	480,296.79
Stores on hand	98,682.82
*Ratepayers' share local improvement rates	14,058,174.42
Properties, improvements, etc.	99,822,235.22
Benefits, rights, etc., capitalized	5,210,293.40
Inter account loans, contra.	758,132.08
Total	$125,797,542.69

---

*Collections on account of ratepayers' share of local improvement rates are included in sinking funds and retained therein until debentures mature.

Liabilities.

Accounts payable		$ 2,233,559.80
Accrued interest on funded debt		2,106,027.51
Temporary loans, and accrued interest thereon		3,609,823.75
Funded debt	$97,735,321.24	
Deduct sinking fund for redemption	23,062,347.20	
Net funded debt		74,672,974.04
Funds held in trust		761,484.35
Sinking fund reserve		23,062,347.20
Other reserves		187,607.84
Inter account loans, contra.		758,132.08
Surplus		18,405,586.12
Total		$125,797,542.69

In addition to the funded debt set forth in the foregoing statement, the city has guaranteed debentures for certain municipal enterprises amounting to $5,275,000, as set forth on pages 31 and 32 of the report on funded debt.

City Borrowing Record.

The commissioner makes significant comments on the situation, and reiterates the warnings given the board of control and city council that the strictest economy must be observed if the city is to retain its present standing in the financial world.

"The year 1916," he remarked, "was characterized by temporary borrowings of unusually large sums, due chiefly to the prosecution of works for which very little permanent financing had been effected, and to the necessity to provide moneys in anticipation of revenues from taxes for current expenditure. At one period of the year such borrowings amounted to no less than $15,700,000, figures which, perhaps, few can begin to realize as to what they actually involve. The heavy strain placed upon the credit of the city, and the unsoundness and unwisdom of permitting such a condition to become possible, must be abundantly evident to every citizen.

As to War Expenditures.

"Up to the close of 1916, expenditures in connection with the war, including insurance on the soldiers, amounted to $2,500,015. It is estimated that by the close of 1917, they will have increased to $5,000,000. These expenditures are being capitalized by the issue of ten-year debentures. The annual debt charges of $618,561 on these debentures represent over one mill on the dollar of the present assessment, and form part of the yearly tax rate.

"The insurance on the lives of our citizen soldiers is in the sum of $1,000 each. The number covered by the scheme is 43,265, involving a contingent liability of over $43,000,000, and an actual liability up to the present of $2,500,000, no less than 2,500 of our brave soldiers having passed away. I cannot for one moment believe that it is the desire of those who are bereaved to benefit financially through the loss they have suffered, and therefore I submit that the civic insurance should be limited to those who had a pecuniary interest in the life of the citizen at the time of enlistment—in other words, to those relatives who were being supported financially by the deceased. Toronto has already made some changes in connection with her insurance scheme, and it seems to me that it is time for further readjustment."

MONCTON'S WAR LOAN COMMITTEES

The following are the parish and city Victory Loan committees at Moncton, N.B.: For the parish—Councillor C. B. Keith, Berry's Mills; A. Mitton, Boundary Creek; Thos. Hennessey, Irishtown; Rev. Mr. Bynon, Lewisville; F. Bourgeois, St. Anselme; Mayor Brown, Sunny Brae; and W. F. Humphrey, Humphrey's. For the city—E. A. Reilly, K.C., J. Fred. Edgett, F. E. Dennison, Ald. H. H. Warman, Ald. P. A. Belliveau, J. B. Toombs and Geo. A. Robertson (chairman). The two committees met on Thursday.

The clergymen of the city have been asked to make special mention of the campaign from their pulpits.

The names of Mr Jos. J. Bourgeois, Murdock McLeod and Hon. F. J. Sweeney have been added to the committee to secure public speakers for the campaign, of which committee Ald. Chapman is chairman.

RESULTS OF CANADA'S PREVIOUS WAR LOANS

The following official statement regarding the three Canadian war loans issued previously, has been supplied, at the request of *The Monetary Times*, by the department of finance, Ottawa:—

	First war loan, Nov., 1915.	Second war loan, Sept., 1916.	Third war loan, March, 1917.
Amount of loan	*$50,000,000	$100,000,000	$150,000,000
Public subscriptions	78,729,500	†151,444,800	‡200,768,000
Banks' subscriptions	25,000.000	50,000,000	60,000,000
Total oversubscription	53,729,500	101,444,800	110,000,000
Oversubscription by public	28,729,500	51,444,800	50,000,000
Number of subscribers	24,862	34,526	40,800

---

*Ultimately increased to $100,000,000.

†Includes $6,073,800 of the first loan converted.

‡Includes $18,131,000 of the first loan and $5,818,500 debenture stock converted.

Mr. W. R. Brock, of the W. R. Brock Company, who died last week, was born on February 14th, 1836, in the township of Eramosa, near Guelph, Ont. His father, Thomas Rees Brock, was of an ancient English family, who for some generations were landed proprietors in Jamaica, West Indies. He was educated in England, and came to Canada in 1832 after the abolition of slavery, and was the first settler on Lot 3 in the 3rd concession "in the wild woods of Eramosa." In addition to being the head of this well-known firm, he was identified as a director in a number of corporations, including the Dominion Lands Colonization Company, the British Columbia Loan and Investment Company, Toronto Electric Light Company, Electrical Development Company, the Ontario Accident Insurance Company, the Toronto General Trusts Corporation, the Dominion Bank, the British American and Western Assurance Company, Stanstead Granite Quarries Companies, London Electric Company and the Canadian General Electric Company. He was a life-long Conservative and a strong supporter of the National Policy. He represented Centre Toronto in the House of Commons from 1900 to 1904. He declined to accept a seat in the Senate.

*Coin and bullion	144,282	151,604	250,598	94,628,533	225,552,035	8,043,994
Total exports	53,860,164	92,423,003	115,727,645	612,610,773	1,278,477,686	1,427,752,117
Aggregate Trade.						
Merchandise	91,744,038	161,037,661	191,370,411	935,165,423	1,738,174,356	2,423,999,006
Coin and bullion	741,660	730,290	2,433,106	201,813,961	276,160,378	24,093,689
Total trade	92,485,698	161,767,951	193,803,517	1,136,979,384	2,014,334,734	2,448,092,695

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Sept., were: imports 1915, $107,185,428; 1916, $50,608,343; 1917, $16,049,695; and exports 1915, $94,628,533; 1916, $225,552,035; 1917, $8,043,994. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

The Molsons Bank

Proceedings at the Sixty-Second Annual General Meeting of the Shareholders of The Molsons Bank, Held at Their Banking House in Montreal, Monday, November 5th, 1917.

The Sixty-second Annual General Meeting of the Shareholders of The Molsons Bank was held in the Board Room of their Banking House, 200 St. James Street, Montreal, November 5th, 1917, at 3 o'clock.

The President, Mr. William Molson Macpherson, took the chair, and there were also present the Vice-President, Mr. S. H. Ewing and Messrs. George E. Drummond, F. W. Molson, W. A. Black, E. J. Chamberlin, W. M. Birks, Arthur Browning, A. Piddington, A. D. Fraser, J. W. Molson, C. E. Spragge, George Durnford, James Skeoch, W. B. Blackader, Alfred McDiarmid, John McKergow, John W. Loud, H. A. Allan, E. C. Bayne, A. Haig Sims, W. R. Miller, W. M. Dobell, H. J. Tellier, and others.

The President, having called the meeting to order, requested Mr. E. W. Waud to act as Secretary, and after that gentleman had read the advertisement calling the meeting, and stated that notice of the meeting had been mailed to each shareholder, in accordance with the requirements of the Bank Act, the President named Messrs. C. E. Spragge and Alfred Piddington to act as Scrutineers.

The Minutes of the last Annual meeting were taken as read.

THE ANNUAL REPORT.

The President then called upon the General Manager, Mr. E. C. Pratt, to read the annual report, as follows:—

Gentlemen,—

Your Directors beg to submit to the Shareholders this the Sixty-second Annual Report of The Molsons Bank and Statement of its position on 29th September, 1917.

The net profits for the year, after making ample provision for Bad and Doubtful Debts, amounted to $615,514.94, from which has been deducted $440,000 in Quarterly Dividends at the usual rate of 11 per cent. per annum; $21,308.25 to Officers' Pension Fund; $15,000 to Patriotic and Relief Funds; $40,000 War Tax on Circulation, and a further sum of $75,000 has been reserved for depreciation of bonds, the balance being added to the balance carried forward in Profit and Loss Account, which now amounts to $151,826.40.

There has been an increase of over $1,800,000 in Circulation and over $2,600,000 in deposits.

On the other side of the Balance Sheet: Current Loans show an increase of $415,000. The Dominion and British Government Securities show an increase of $3,500,000. The continued decrease in price of high class securities has necessitated our taking $75,000 from this year's profits to provide for the depreciation in value of those held by us, which now stand on our books at less than their present market value.

During the year we opened branches at Brucefield, Ont., and Lachute, Que.

To provide for the future increase of business we have purchased the property adjoining the back of our Head Office, running through to Notre Dame St. Our present quarters are beginning to get crowded and we have already moved our Stationery Department into the new premises.

The Auditors, Messrs. George Creak, Lemuel Cushing and Charles A. Hodgson, whose report is appended to our Balance Sheet, offer themselves for re-election.

As usual all the branches of the Bank have been carefully inspected during the year, and we have pleasure in testifying to the zeal and efficiency of our staff.

GENERAL STATEMENT.

Of the Affairs of The Molsons Bank on the 29th September, 1917.

LIABILITIES.

War Tax on circulation	40,000.00
Reserve for depreciation of Bonds	75,000.00
	$591,308.25
Leaving at credit of Profit and Loss Account, 29th September, 1917	$151,826.40
	$743,134.65

WM. MOLSON MACPHERSON, President.
EDWARD C. PRATT, General Manager.

AUDITORS' REPORT.

We have checked and verified the Cash, Investments, and Securities of The Molsons Bank at the Chief Office in Montreal on 29th September last, and also at another time as required by the Bank Act, and we have at different times during the year checked and verified the Cash and Securities held at other important Branches of the Bank.

We have compared the Certified Returns from all the Branches with the entries in the Books at the Chief Office of the Bank as at 29th September, 1917, and find that they agree therewith; and all the transactions which have come under our notice have been, in our opinion, within the powers of the Bank.

We have obtained all the information and explanations we have required, and we certify that in our opinion the above Statement is so drawn up as to exhibit a true and correct view of the Bank's affairs at the close of business on 29th September, 1917, according to the best of our information and the explanations given to us, and as shown by the Books of the Bank.

(Signed) GEORGE CREAK, C.A.,
LEMUEL CUSHING, C.A.,
CHAS. A. HODGSON, C.A.

20th October, 1917.

PRESIDENT'S ADDRESS.

The President, Mr. William Molson Macpherson, then presented his Annual Address, as follows:—

The Sixty-second Annual Statement of The Molsons Bank now submitted to you is the fourth since the commencement of the war. When we last met we hoped that before another meeting peace would be restored, but the war still rages as fiercely as ever. During the year the entrance of the United States into it has more than counterbalanced the disappointing conditions in Russia and has made us more confident than ever as to the final result, notwithstanding the discouraging news from Italy in the last few days.

At the time of our last meeting the Government had just issued the second war loan of $100,000,000, and had received payment of the first instalment. Since then the Canadian people have paid for this loan and have taken a third one of $150,000,000. They will doubtless subscribe freely for the new loan, which the Government is now preparing to issue. We strongly recommend everyone to invest all they can spare and all they can save in these domestic loans. It is one of the greatest helps they can give the country in war time. By subscribing liberally to the present Victory Loan, we prove how sincerely our hearts are in sympathy with our fine fellows who have won such noble reputations and renown, and are fighting for honor and civilization.

The banks have at all times gladly assisted the Government, and I am sure it is the desire of their shareholders that they shall still continue to do all in their power towards financing the war, but it is much better for the country that the Government loans should be taken by the general public instead of by the banks. This avoids inflation and allows the banks to use their resources in forwarding the business interests of the country.

Part of the expenses of the war is covered by taxation, but much the greater part must be borrowed, and the Government must provide taxation to meet the ordinary expenses of the country, the interest on the debt and part of the war expenses. It is only in this way that the present high credit of the Dominion can be maintained, and it is gratifying to know that the Government fully recognize their responsibilities and have imposed an income tax which we believe will provide the necessary revenue for this year.

The present business prosperity has, of course, been principally caused by the large expenditures by the Government for munitions and food supplies in connection with the war and by the continued rise in prices and wages, but this prosperity depends to such a large extent upon war conditions that there is bound to be a change when peace comes, and it is the duty of all business men to prepare for such a change by conserving the profits they are now enjoying, by avoiding capital expenditure and keeping their resources in such a condition that they can weather a few stormy years should they come. It is also the duty of the wage earner, who is receiving more than ever before, to provide for the future by saving some of his earnings. The banks will be glad to help any of their Savings Bank customers to purchase war bonds, extending payments over a year.

Our pulp and paper industries have been working to their full capacity during the year and at very satisfactory prices. The lumbermen have also had a prosperous year, though hampered somewhat by scarcity of labor and by the difficulty in getting cars from the railways. The farmers, however, are the mainstay of this country, and during the year have enjoyed the highest prices for everything they have produced: butter, cheese, cattle, grain, etc. Another good harvest of excellent quality is an inestimable boon to our Western Provinces. We cannot tell what the course of prices may be when the war is over, but there is undoubtedly a shortage of foodstuff at present and it will take some years after peace is declared before the supply equals the demand, therefore reasonably high prices for such products may be expected to continue for a considerable time at any rate, and they should be a strong influence in attracting immigrants to the vast number of acres in this country at present uncultivated.

Deposits in the chartered banks in Canada have increased $147,000,000, and, at the end of September, 1917, were $1,417,143,000. At the same time the circulation of the banks increased by $42,304,000, and now stands at about $177,590,000. During the same period the commercial loans showed an increase of $102,761,000, and the total loans, including call loans in Canada and those to Dominion and Provincial Governments, show an increase of $86,332,000.

Bank clearings also show an increase, caused to some extent by the higher prices for everything and by large Government disbursements.

Commercial Agency reports of failures in Canada for the nine months ending 30th September last; show a decrease of 39 per cent. from the corresponding period of 1916, and 57 per cent. below those of 1915, while the liabilities total $10,458,493, a decrease of 13 per cent. from last year, and of 56 per cent. from the year before.

Your General Manager and I have visited Quebec, Ontario and our Western Provinces during the year, and are pleased to report continued prosperity in all branches of business, especially in agriculture.

I personally travelled through Manitoba, Alberta, Saskatchewan, and parts of British Columbia, over the Grand Trunk Pacific Railway. I was immensely impressed with the development of the country since my last visit, the excellent farms, and the increased quantity of live stock through the country. The season for harvesting was good, so that the farmers have marketed their crop in excellent condition. Owing to the open season there has been an immense amount of new land broken for wheat growing, which should show a great increase in the 1918 crop.

The exportable surplus of the wheat crop of 1917 in our Western Provinces will aggregate in value about $350,000,000.

irrespective of oats, barley, flax, cattle, etc. The farmers in the West should receive for all their crops about $600,000,000, and arrangements for financing the movement of the same have been satisfactorily made.

Alberta is particularly attractive for farming, being well watered and having abundance of coal.

British Columbia abounds in most valuable timber and coal, and sawmills are rapidly being built to supply with lumber the markets in the Prairie Provinces, as well as on the Pacific Coast. The construction of ships on the Pacific is causing great demand for timber, and business in that special branch is very active.

You will notice that the gross receipts of the Canadian railways are larger than ever, showing how great a business they are doing, yet, notwithstanding this, increasing wages and the high prices of all their supplies have put such a burden on them that the net results are decreasing very greatly. The claim of the railways to an increase in rates seems to be fully warranted.

Since last we met a further number of our officers have offered themselves for service at the front, and I regret to say that during the year we have suffered additional losses in killed and wounded. Our men at the front have upheld the dignity of their country, and Canada, as well as all parts of the Empire, will ever be proud of them. We are preparing to meet further calls under the Military Service Act by training young women to do the work.

The President then invited discussion, but, there being none, he moved the adoption of the Annual Report, which was seconded by the Vice-President, Mr. S. H. Ewing, and unanimously adopted.

It was then moved by Mr. George E. Drummond, seconded by Mr. W. R. Miller, that Messrs. George Creak, Lemuel Cushing and Charles A. Hodgson be continued in their office as Auditors of the Bank for another year. This was unanimously adopted.

MOOSE JAW'S WAR LOAN COMMITTEE

When the Moose Jaw division for the Victory Loan was organized, Mr. J. H. Kern, Sr., was appointed chairman and Mr. Harry F. Stirk vice-chairman. The work of organization is completed, and the Moose Jaw division will be canvassed thoroughly during the campaign. Mr. A. W. Mayberry, formerly mayor of Moose Jaw city, has been appointed chairman for the Moose Jaw sub-division.

BANKS WILL HELP CUSTOMERS

The banks will be glad to help any of their savings bank customers to purchase war bonds, extending payments over a year. This was the statement made by Mr. William Molson Macpherson, president of The Molsons Bank, at the annual meeting, held at Montreal on Monday. Mr. Macpherson said: "We strongly recommend everyone to invest all they can spare and all they can save in these domestic loans. It is one of the greatest helps they can give the country in war time. By subscribing liberally to the present Victory Loan we prove how sincerely our hearts are in sympathy with our fine fellows who have won such noble reputations and renown, and are fighting for honor and civilization.

"The banks have at all times gladly assisted the government, and I am sure it is the desire of their shareholders that they shall continue to do all in their power towards financing the war, but it is much better for the country that the government loans should be taken by the general public instead of by the banks. This avoids inflation and allows the banks to use their resources in forwarding the business interests of the country.

"The present business prosperity has, of course, been principally caused by the large expenditures by the government for munitions and food supplies in connection with the war and by the continued rise in prices and wages, but this prosperity depends to such a large extent upon war conditions that there is bound to be a change when peace comes, and it is the duty of all business men to prepare for such a change by conserving the profits they are now enjoying, by avoiding capital expenditure and keeping their resources in such a condition that they can weather a few stormy years should they come. It is also the duty of the wage-earner, who is receiving more than ever before, to provide for the future by saving some of his earnings."

REPORT OF THE MOLSONS BANK

An excellent financial statement was presented at the annual meeting of The Molsons Bank, held at Montreal on Monday. The statement was reviewed in *The Monetary Times* last week. In his interesting address, Mr. Wm. Molson Macpherson stated that during his recent trip through the western provinces over the Grand Trunk Pacific Railway he was greatly impressed with the development of the country since his last visit, the excellent farms, and the increased quantity of live stock through the country. The season for harvesting was good, so that the farmers have marketed their crop in excellent condition. Owing to the open season there has been an immense amount of new land broken for wheat-growing, which should show a great increase in the 1918 crop.

The exportable surplus of the wheat crop of 1917 in our western provinces will aggregate in value about $350,000,000, irrespective of oats, barley, flax, cattle, etc. The farmers in the West should receive for all their crops about $600,000,000. and arrangements for financing the movement of the same have been satisfactorily made.

Alberta is particularly attractive for farming, being well watered and having abundance of coal. British Columbia abounds in valuable timber and coal, and sawmills are rapidly being built to supply with lumber the markets in the prairie provinces, as well as on the Pacific coast. The construction of ships on the Pacific is causing great demand for timber, and business in that special branch is very active.

LIBERTY LOAN RESULT

The second Liberty Loan of the United States was oversubscribed by $1,617,532,300, according to the statement made public this week by Secretary of the Treasury McAdoo. There were 9,400,000 subscribers to the loan, compared with 4,000,000 subscribers to the first loan. The total subscriptions to the loan were $4,617,532,300. Of this amount, 50 per cent. over the minimum of $3,000,000,000 will be allotted. The total allotment, therefore, amounts to $3,808,766,150.

CONSOLIDATED MINING AND SMELTING COMPANY

The purchase has been completed by the Consolidated Mining and Smelting Company of Canada of the mines and mining properties in the Camp McKinney and Fairview districts of British Columbia, and preparations are being made for production. About 2,000 acres in each camp is involved. Camp McKinney and Fairview, situated in the neighborhood of Keremeos, B.C., and Molson, Wash., are valuable in the operations of the Consolidated company because of the silicious fluxing ores they contain. These will become a large asset in the operation of the smelter of the company at Trail, B.C.

Included in the acquisitions is the old Cariboo mines in Camp McKinney, famous for its yield of gold. Both camps, about twenty miles apart, are traversed by veins of quartz-carrying gold.

The West Kootenay Power and Light Company, a subsidiary of the Consolidated, is building a line from Cascade Station to Princeton, B.C., that will enter the McKinney and Fairview fields.

WHAT AN ALBERTA FARMER SAID

The Victory Loan letter sent by President H. W. Wood, of the United Farmers of Alberta to the farmers, attracted the attention of a retired Alberta farmer in the United States. He wrote to the United Farmers' Association from Spokane, Washington, as follows:—

"Gentlemen,—Received yours re Victory loan. As we must win this war, may be able to buy a Victory bond when placed on the market. Please give full information re same. Have bought some Liberty bonds here. So far as this war is concerned we are one and the same. I have three sons in Alberta, one at Alix, one at Champion, and another relative also at Champion. All can and should buy some Victory debentures or bonds as they may be called up there.

"You should get in touch with two other friends of mine, Hungarians (names given), at Champion. They could buy bonds and likely would if you see them. Their mother, who recently died, was English born, and the boys are strong pro-British. One of them offered his services to war, but was rejected owing to Hungarian birth, having been in the United States and Canada about 12 to 15 years; the other boy came over in 1912."

Mr. D. C. Macarow, general manager of the Merchants Bank of Canada, who has recently returned from a trip to Western Canada, expressed extreme satisfaction with conditions as he had found them. "The West is now on a solid basis," said Mr. Macarow in a recent interview, "and it is not too much to say that it is only yet in its infancy in the matter of development. The spirit of optimism is strong, and is very different from that of the boom times prior to 1913. The immigration of United States farmers has been renewed to some considerable extent, and after the war no doubt will reach very large proportions. These settlers, for the most part, bring both money and farming experience, and we cannot have too many of them. The live stock industry of the great province of Alberta is being established on a safe and firm basis, and is receiving in the proper quarters due attention, with a view to bringing about the very large development for which that particular province affords so wide a natural field." The official party which made the trip included, in addition to the general manager, six members of the board of directors: Mr. F. F. Hebden, managing director: Mr. K. W. Blackwell, Mr. Andrew A. Allan, Mr. George L. Cains, Mr. F. Howard Wilson and Mr. A. B. Evans.

NORTH VANCOUVER APPOINTS COMMITTEES

North Vancouver, B.C., branch of the Victory Loan committee, with Lieut.-Col. Dorrell, chairman of the committee, presiding, appointed the chairmen for the sub-committees through which the local campaign will be engineered. There were present at the meeting besides Chairman Dorrell and Secretary Collins, Mayor Vance, Mr. G. S. Hanes, M.P.P., Ald. Wright, president of the board of trade, J. Y. Tullis, secretary of the board, H. J. Gardiner, A. G. Perry, G. H. Morden, E. V. Young and P. Stewart.

Mayor Vance was appointed chairman of the sales committee, G. H. Morden, chairman of the publicity committee, and Ald. Wright and A. G. Perry members of the finance committee.

BLACK PEPPER ADULTERATION

Mr. A. McGill, chief analyst for the inland revenue department, Ottawa, has just issued a report on black pepper. He says: "Pepper, and especially black pepper, continues to be the most generally adulterated spice offered on our markets, a fact which may, perhaps, be due to its extensive sale, which apparently makes it profitable to mix it with such various worthless articles as pepper shells and the dirt which adheres to these, ground olive stones, cocoanut shell and other similar sclerenchymatous cellular matters, and starches.

"In 1876 and 1877 the amount of adulteration in white and black pepper was 83.0. In 1917 in black pepper alone it was 13.9.

"While this record shows a great and a fairly continuous improvement in the character of the article since the earlier inspections, it leaves much still to be desired," says the analyst. "I am informed by certain grinders that it is not uncommon for them to receive orders from retailers to supply an article whch can be profitably sold at a certain fixed price. The filling of such an order may necessitate adjustment of the amount of worthless material (filler) corresponding to the then prevailing price of actual pepper; and ground pepper has been known to be sold at a lower price than the unground article was then commanding.

"The public should understand that in purchasing an adulterated article at a lower cost than that of the genuine they are not effecting a real economy. The added material has no spice value, and it is certain to be present in such amount as to afford not only an offset to any apparent reduction in price, but an accompanying profit to the grinder.

"The results of the present inspection may be stated thus: Found to meet legal requirements, 258 samples; found to be doubtful in character, 30 samples; found to be legally adulterated, 48 samples; found to be collected in error, 9 samples. Total, 345 samples.

"Although a limit of 7 per cent. for total ash in pepper is not legally established in Canada, this limit is generally accepted by other countries, and it is desirable that it should be made legal in this country also, where pepper tissues only have been found with total ash in excess of 7 per cent." be made legal in this country also. Where pepper tissues only have been found with total ash in excess of 7 per cent. I have in the meantime, judged the sample as doubtful in quality."

Mr. Charles F. Roland, president and general manager of the Winnipeg Telegram, has been released by the directors to take charge of the Winnipeg organization work for the Victory Loan campaign.

The Victory Loan committee of Fernie, B.C., is working hard. The organized effort will be extended to all parts of the district, including Elko, Baynes, Jaffray, Morrissey, Coal Creek, Hosmer and Michel, in all of which sub-committees are organized to work with the Fernie committee.

An executive committee has been formed at Ladner, B.C., to organize the district for the Victory Loan. The committee will consist of Messrs. D. A. McKee, J. A. Williamson and W. H. Wilson. A meeting was addressed by Mr. L. W. Makovski, secretary of the Victory Loan Committee, Vancouver.

Mr. R. A. Pringle, K.C., of Ottawa, has been appointed controller of the newsprint situation in Canada. He is given full power, subject to government consent, to fix prices and regulate the supply of paper and to appoint officers to aid in carrying out his orders. Mr. Pringle will co-operate with the Federal Trade Commission in the United States, which is dealing with the same subject.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

ARMSTRONG & DeWITT, General Agents,
6 Wellington Street East - Toronto

$35.40 A YEAR

payable for twenty years only, will purchase a $1,000 Insurance Policy in The Great-West Life Assurance Company on the Limited Payment Life Plan, at age 35.

At the end of twenty years the Insurance will be paid for, and a paid-up Policy will be issued for $1,000. The profits earned under the Policy will then be payable, unless, as may be chosen if desired, these profits have been paid at the end of each five-year period.

During the twenty years the Policy carries liberal loan values; and at the end of the period, if the Policyholder so desires, the contract may be surrendered, and the total Cash Value obtained, showing an excellent return on the outlay—while the twenty years' protection will have cost nothing.

Personal rates and full details will be furnished on request.

MONEY WINS WARS

Your Dollars Will Help Win a Victorious Peace!

THERE is a way by which you and all the rest of us can pay our share of the cost of the war and get our money back—that is by the purchase of Canada's Victory Bonds. Suppose the Victory Loan is not subscribed for. The cost of this war must be paid just the same. How? By taxation.

Remember that high taxes and high cost of necessities always mean a decrease in buying, a decrease in manufacturing and disaster all along the line.

> *"I want to see cheques hurtling through the air—fired from every city, town, village, and hamlet throughout the land—fired straight into the entrenchments of the enemy."*—David Lloyd George.

The Purchase of a bond of Canada's Victory Loan will

1.—Back our boys in the trenches
2.—Establish credits here for Britain
3.—Maintain our factory and farm activities
4.—Help to bring a successful peace

The proceeds of Canada's Victory Loan will be used only to assist in bringing the war more speedily to a favorable conclusion. The money will be spent entirely in Canada.

Canadians have bought nearly $350,000,000 of war bonds and are receiving $17,500,000 interest yearly upon them. Subscribe liberally to the Victory Loan, help win the war and increase our interest receipts.

Make this one of the last, hard, straight, financial punches at Kaiserism!

British Credits and the Victory Loan

By E. R. WOOD

WE must win the war, and advancing such credits is one of the most vital and important ways of helping to accomplish victory. Hence our Victory War Loan.

Up to the time that war broke out, the British people had invested in Canada $2,914,000,000, mostly in our securities. That is the financial foundation on which the present Dominion of Canada was built.

For years past, Britain has bought 50, 60, 70 and 80 per cent. of all the bonds we had to offer. This gave us the funds to carry on our public works, to build our railways, to develop our towns and cities, to finance our industries and to supply our loaning companies with funds to lend to the farmers throughout Canada.

To-day, Britain asks us to establish credits here for her, so that she may purchase large quantities of our products, and thus continue, even during war time, to help build up our agricultural, industrial and general position and prosperity.

We have only just begun to develop our resources. We shall need, after the war, further vast sums for the development of our farm lands, our forest, mineral, fishery and other resources. We shall need such funds not only from the United States, but also from Great Britain.

The year before the war commenced, we had an unfavorable trade balance of $180,000,000. In short, we had imported that much more than we had exported. After a few months of war, because of the war orders which our farms and factories were filling, this unfavorable balance had been reduced to $63,000,000.

By September, 1915, it had, for the same reason and for the first time in many long years, changed from an unfavorable to a favorable trade balance, and to the substantial sum of $100,000,000. For the five months, ended August 31st, of the present fiscal year, we had a favorable balance of $200,000,000. We were on the right side of the national ledger to that extent. This gratifying process is continuing, chiefly because of the money Britain is spending here for war purposes, thus swelling the volume of our exports to totals not previously recorded in the Dominion.

We want to maintain and perhaps better that record. We want to build up our own favorable trade balance by advancing the necessary credits to Britain. We do not want our balance to slide back again to an adverse one. We do not want the war orders to go to the United States, simply because we would not muster courage and money enough to make the necessary advances to the Motherland.

LIFE INSURANCE BUSINESS INCREASING

It Will Pass All Records This Year in Canada—Address of Dominion Insurance Superintendent

Unless all signs fail, the 1917 business of the life insurance companies in Canada will surpass all previous records. This statement was made by Mr. G. D. Finlayson, Dominion insurance superintendent, at a recent meeting of the Montreal Life Underwriters' Association. He remarked that, despite the war, the 1916 new business fell short of the record year, 1913, by only half a million dollars. The companies have undoubtedly suffered through extra mortality. Up to the end of 1916 war claims amounting to $6,518,088 had been paid by Dominion licensees, the war claims for 1916 amounting to 26 per cent. of the total claims of the year. The inadequacy of the extra premiums received may be realized from the fact that Canadian companies paid, in all, $4,069,416, and have collected extra premiums of $269,534. Practically all the old business is free of extra premiums.

"On the other hand," continued Mr. Finlayson, "there are two great advantages to be derived from the war. One is the emphasis which is being laid upon the necessity for insurance and the consequent education of the public along these lines. The other is the change in the investments of the companies due to the purchase of war bonds at particularly favorable rates. Before the war Canadian companies held Canadian government securities to the amount of $146,296 and British and foreign companies to the amount of $219,487. On July 1st, 1917, Canadian companies held $23,077,813, or 7.3 per cent. of their total assets, while British and foreign companies had $15,101,014, a total investment by life companies of $38,178,827. This combination of perfect security with high interest yield will be of inestimable benefit to Canadian policyholders.

Tendency Towards Business Insurance.

"Next, I might mention the marked tendency towards what is known as business insurance. Policies of an amount unheard of a few years ago are being written to-day and treated as scarcely worthy of special mention. Men are to-day effecting insurance to protect the business in which they are engaged, as well as their families and others dependent upon them. There is no doubt that a great new field for the insurance field man is thus being opened up, but I think it will be a matter of regret to all interested in the business of life insurance if this class of business is allowed to monopolize the energies of the men engaged in the profession of life underwriting to the exclusion of the ordinary small policy effected by the man, who, unless urged to protect his family by means of insurance, is liable to neglect this important duty until the time arrives when it is too late. I think there can be no doubt that the feeling that a life insurance company is in a sense a philanthropic institution has been responsible for inspiring the men who have for many years been engaged in the building up of the giant institutions which are to-day dispensing the benefits of insurance to the widows and orphans in families which would otherwise be destitute, and if this source of inspiration is withdrawn and life insurance companies become merely the media for protecting businesses which would otherwise carry on, it appears to me that a great deal of the merit of the institution of life insurance will be lost.

"My hope would be that the tendency will be not for business insurance to exclude the ordinary business among the small policyholders, but that the two may grow together, the one supporting the other, and both contributing to the growth of the insurance idea.

Figures as to Endowment Insurance.

"There appears to be a prevailing idea that endowment insurance has for some time largely supplanted life or limited payment life insurance. I have thought it worth while to obtain the figures, and they do not support this view. In 1906 the life and limited payment life policies effected amounted to 60 per cent. of the total insurance written in that year and endowment insurance amounted to 33 per cent., while in 1916, ten years later, the percentages were, for the life plans, 70 per cent. and for endowment plans 22 per cent.

"Another feature of the business at the present time attracting attenton is that of taxation, and during the last few years [illegible] has [illegible] question. I might [illegible] taxation according as it is imposed by the legislative authorities, Dominion, provincial or municipal, by the shareholders of the companies, and by the agents of the companies. Of these three forms of taxation, the best known is the first, that imposed by legislative bodies. The total taxes paid by life insurance companies in 1916 amounted to $984,519.78, so that the taxes paid amount to over 2 per cent. of the premium income.

"These taxes are treated by the companies as a general expense, and are divided between the participating and non-participating business in proportion to the premium income. As the participating business amounts to approximately 90 per cent. of the total business, it follows that 90 per cent. of this amount is charged to the participating business, and, as at least 90 per cent. of the profits from the participating business is returned in one form or other to the participating policyholders, it follows that of the total amount mentioned approximately 80 per cent. is made a charge upon the participating policyholders, and the net cost to the policyholders is thereby increased. If life insurance were essentially a commercial business, but little objection could be taken to the imposition of these taxes, but inasmuch as the tax falls largely upon those people in the community who are doing their best to prevent their dependents from becoming wards of the nation later on, it is to be hoped that some means [illegible] this burden of taxation may be reduced or eliminated.

Taxation and Shareholders.

"The second source of taxation is that imposed by the shareholders of the company, which, to a less extent, affects the cost of insurance to the participating policyholders. During 1916, there was transferred to the shareholders' account of Canadian life companies as interest on paid-up capital and the balance of shareholders' accounts a total of $324,835.24. There was transferred as the shareholders proportion of the profit on participating policies $267,841.60. There was transferred from the shareholders' account to the non-participating business to make up a deficiency in that account a net amount of $11,906.30, the total net amount transferred to the shareholders' account during the year amounting to $580,770.54. Dividends to the amount of $510,404.03 were declared during the year.

"Of this amount, as has been said, $324,835.24 represents interest on the shareholders' funds, so that the balance, $185,568.79, represents the portion of the shareholders' dividends drawn from the participating policyholders' profit. These dividends were paid by fifteen out of the twenty-three stock companies. The total paid-up capital of all the Canadian companies was at December 31st, 1916, $5,680,106.25. Of this amount, $942,893.88 represents paid-up capital of the eight companies which did not pay dividends during the year. The balance of $4,737,212.37 represents the paid-up capital on which the dividends referred to have been paid. The rate of dividend per cent. of paid-up capital, therefore, amounts to 10.8 per cent.

Premium on Capital.

"There are two considerations, however, which must not be overlooked. Of the paid-up capital of the fifteen companies referred to, $388,926.50 has been paid by the application of stock dividends, while, on the other hand, the shareholders of these companies have contributed as premium on capital, reduction of capital, or special contributions to surplus, a total of $912,261.12. If, therefore, we deduct from the paid-up capital the amount paid up as stock bonuses and add to the difference the amount of premium on capital, we have as the total shareholders' investment in the companies $5,260,546.99. Taking this as the investment, the dividends declared amount to 9.7 per cent. There might, however, with justice, be added to the amount of investment arrived at the total of the balances of the shareholders' account, which, although not actually distributed to the shareholders, has been allotted to the account in accordance with the provisions of the act. This amount is $960,648.56, and, adding this to the amount of investment above mentioned, we have a total of $6,221,195.55. On this capital the rate of dividend paid is 8.2 per cent.

Life Insurance and Dividends.

"The foregoing figures deal with the companies which are paying dividends to shareholders and disregards the very large amount of capital invested in the business by the newer [illegible] As stated above, the paid-up capital of the non-dividend paying companies amounts to $942,893.88. The shareholders of these companies, however, have paid as premium on this capital $1,213,634.62, the total investment being $2,156,528.50, which, added to the corresponding figure for the dividend paying companies, makes a total of $7,417,075.49, from which it will be seen that of the total capital invested in the business of life insurance in Canada, approximately 30 per cent. is yielding no return to the shareholders who have contributed it.

"If we apply the total dividends paid by the dividend paying companies to the total capital and premium invested in all the companies, we find that the rate of dividend is 6.9 per cent., while if we add to this total investment the balance of the shareholders' accounts, we have a total capital of $8,396,500.12, of which the total dividends declared amount to 6.1 per cent.

Dividends and Capital.

"The foregoing figures will, I think, serve to show that in the aggregate the dividends paid are not an excessive percentage of the capital invested, taking into account the uncertainty of early returns on the invested capital. In individual cases the question as to whether the caiptal stock imposes a tax upon the participating policyholders can be best answered by considering whether the dividends paid provide a reasonable return on the capital actually invested for the purpose of building up the company. Capital paid into a life insurance company after the company has been firmly established is certain to impose a tax upon the policyholders of the company unless the dividend paid is restricted to the amount of interest earned on the additional capital.

"It must be noted that while the Insurance Act permits 10 per cent. of the participating profits to be transferred to the shareholders' account, it is not necessary in many cases that the full 10 per cent. should be transferred. In some cases at the present time a lesser percentage is thus used, and as the companies grow and their profits increase it will be possible for the shareholders of the companies to relieve their policyholders from a substantal measure of tax by reducing the percentage of profits transferred to the shareholders' account.

Taxation and Agents.

"The third form of taxation is that imposed by the agents of the company, and I touch on this in order that I may present it in a light which has probably not occurred to a great many of you. The item does not appear in the financial statement of the company, but it is nevertheless there, and is in a very real sense a tax upon the policyholders of the company. I refer to the cost to the company of the lapsing of business. As is well known, a large proportion of lapsing occurs in the early years of the policy, a very large proportion lapsing from non-payment of the second premium. It is well known that a policy on which the first renewal premiums is not paid is, in most cases, a loss to the company, as the cost of acquisition is in excess of 100 per cent. of the annual premium. Taking Canadian companies only during the year 1916, insurance to the amount of $47,163,572 was terminated through lapse, and if we assume an average premium of $30 per $1,000, we have an annual premium on this lapsed business of $1,414,907.

"If we assume that the percentage cost of new business is ten times the renewal cost, the total average cost of obtaining new premiums in 1916 was 121 per cent. of the new premiums, and if we assume that of the insurance lapsed one-half lapsed at the end of the first year, it will be seen that the cost to the company is 21 per cent. of $707,504, or $147,565, or practically one-half of 1 per cent. of the total premium income. This, it will be seen, forms an important item of tax, and it is possible for every insurance field man to lessen this burden of taxation by not only using his best efforts to prevent policies already on the books from lapsing, but to avoid placing on the books of his company in the future policies which are liable to lapse before the company has been reimbursed for the initial cost. The field thus opened up for the insurance agent is a very large one, and in times like the present, when the conservation of resources of all kinds is being urged upon our people, there is surely no more laudable effort in which the life underwriters of Canada can engage than in reducing this burden of waste, which now falls so heavily upon the persisting policyholders of the company.

"Another feature of the business which is attracting considerable attention at the present time is that of social insurance. Whether this campaign which is being waged will in the near future greatly affect Canadian life insurance remains to be seen, but of this I am sure, that the future is going to demand of the life companies, and particularly of the life underwriters a larger measure of real social service than it has in the past. I think tnat in grappling with new problems we often disregard the value of existing organizations. A new problem arises, and immediately there is a demand for a new organization to deal with it, while the fact may be that there is already created available for immediate service an organization ideally fitted for the work in hand. I believe this is the case in the movement which is evident at the present time in the direction of the improvement of conditions of living among our people. There are many pressing problems, including the problems of health and the prevention of epidemics, with which the life underwriting organizations are well fitted to deal. It appears to me that we can with reason look to the life insurance companies of this country to play a most important part in the eradication of disease, particularly infectious diseases. Experiments along this line have been made by individual companies, in some cases with conspicuous success. I think the future will see some well-planned organization among the companies for dealing with this question, and it is probable that the public apathy in matters relating to the public health may be removed by the efforts of the insurance fraternity.

Sickness Insurance.

"I have always been interested in a provision in the sickness section of the National Insurance Act of Great Britain. The provision I refer to is that regarding excessive sickness, and, in brief, it is that where it is alleged by the insurance commissioners or any society that sickness which has taken place among insured persons is excessive, an enquiry may be held by the commissioners, and if it is found that the excessive sickness is due to the conditions or nature of the employment, or to any neglect on the part of any employer to observe the health regulations, the cost of such excess sickness is to be made good by the employer, and that where the cause is due to bad housing or insanitary conditions in the locality, or to any neglect on the part of any local authority to observe the health regulations, the cost of the excess sickness is to be made good by the local authority.

"The section deals particularly with the question of contaminated water supply, and provides that in such cases the cost of excess sickness shall be made good by the local authority, company or person by whom the water is supplied unless it can be proven that the insufficiency or contamination was not due to any fault on the part of such authority, company or person, but arose from circumstances over which they had no control A provision such as this may not be applicable to conditions in Canada, but something of the same principle might have a good effect in awakening the individual and corporate conscience to the importance of taking proper precautions for the preservation of the health and the lives of the citizens of our country."

ALL CAN CONTRIBUTE, SAYS LAURIER

Sir Wilfrid Laurier has addressed the following letter to Sir Thomas White, in regard to the Victory Loan: "I will gladly join my voice to your own in commending to the Canadian people the loan which you are now placing on the market.

"You are appealing not only to the business sense, but also to the patriotism of the community, and I hope that the response may be instantaneous, universal and enthusiastic, since from every consideration of business and of patriotism it is preferable that we should borrow in the country than outside.

"I commend especially your intention of making an appeal to that class of the public which does not generally invest in public securities. All can contribute, even to the humblest. Their contribution, whilst not like the mite of the widow of old, deposited in the trunk of the temple, will find its place on the altar of a grateful country."

Back our boys in the trenches.

Owing to the authorities having made a number of changes in the names of the streets, the Dundas and Queen Streets (Toronto) branch of the Dominion Bank will in future be known as Queen Street and Ossington Avenue branch.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 9th, 1917:—

Tretheway Mines, 76,304; Coniagas Mines, 237,329; Mining Corporation of Canada, [illegible]; Buffalo Mines, [illegible]; total, 842,646 pounds, or 421 tons.

The total shipments since January 1st, 1917, now amount to 32,037,825 pounds, or 16,018½ tons.

EDMONTON BANKERS AND WAR LOAN

Mr. Kirkpatrick is chairman of the Edmonton bankers' committee, Victory Loan campaign. He is manager at Edmonton of the Imperial Bank. His associates on this committee are Messrs. J. F. McMillan, Royal Bank; H. H. Richards, Northern Crown; F. Pike, Merchants' Bank; and J. J. Anderson, Union Bank of Canada. *(The Monetary Times Photo.)*

G. R. F. KIRKPATRICK.

SUN LIFE TAKES OVER BRITISH COLUMBIA LIFE

The British Columbia Life Insurance Company has been absorbed by the Sun Life Insurance Company of Canada under an agreement which provides that shareholders of the British Columbia Life shall have the capital redeemed to them in cash and that policies will be taken over by the Sun Life.

The British Columbia Life commenced business in 1911 and had a paid-up capital of $100,000, with insurance in force of $2,750,000. Senator L. W. Shatford has been its president.

After emphasizing the financial soundness of British Columbia, the official statement issued by the company says:—"At the present time it would be extremely difficult, if not impossible, to obtain the additional capital which would be necessary to continue in business in a progressive way and meet the possibility of a larger mortality."

Keep the flag flying; buy a war bond.

If you doubt our war bonds' safety, give up business.

Mr. A. P. McEachren of the Canada Bond Corporation, Toronto, Victory Loan organizer for Central Ontario, was fatally injured in an automobile accident near Barrie on Monday. Mr. McEachren had been temporarily relieved of his duties with his firm to do national service as a Victory Loan organizer in the Central Ontario district. He was a well-known bond salesman and was greatly respected by his colleagues.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Dorval, Que. An issue of $40,000 6 per cent. 30-year debentures has been awarded to Messrs Nesbitt, Thomson and Company, Montreal.

Manitou, Man.—Tenders will be received up to November 28th for an issue of $3,000 7 per cent. 10-year debentures. G. T. Armstrong, clerk, Manitou, Man.

Barton, Ont.—Tenders are invited up to November 17th for $5,055 5½ local improvement debentures. A. G. E. Bryant, township clerk, 422 Concession S, Mount Hamilton, Ont.

Windsor, Ont.—No tenders were received for the $46,024, $80,439 and $32,178 blocks of bonds. The bonds are withdrawn for the present. Mr. M. A. Dickenson is acting clerk.

Calgary, Alta.—The city is offering tax certificates covering delinquent taxes up to and including the year 1915, three-year maturities, subject to redemption during their currency, by any person interested in property. These certificates bear interest at option of bidder thereon up to 10 per cent. Bids will be received until November 21st, 1917. Mr. J. M. Miller, city clerk, Calgary.

South Vancouver, B.C.—The offer of the National Bond Company to take an option for 30 days on approximately $1,000,000 bonds now lying with the Mutual Trust Company, New York, as security for $790,000 of treasury certificates which have been issued against them was considered by the council recently. The price offered by the bond company was 82 net.

It was decided not to give the option, but to put the bonds in the open market.

Saskatchewan.—Each municipality in the province is required by law to have compiled within the first two months of the year a complete financial statement for the twelve months comprising the preceding year. In practically all cases this important document is compiled with ease and given ample distribution or publication. In towns, villages and rural municipalities the form of the return is prescribed by the provincial department of municipal affairs. A few municipalities failed to have their 1916 annual financial statements filed with the department within the time required by law. The returns show in almost every case a prosperous condition.

Quebec, Que.—A special civic committee has discussed the amendments to the city charter which will be recommended to the legislature at its next session. It was found that taking into account only the strictly necessary things, the sum of $1,536,548.44 must be borrowed. This sum consists of the following: A loan due in January for $79,813.44 and another in July next for $1,132,960; for subscription to the Patriotic fund, $100,000; to pay Lemoine and Company for claims re Drouin Bridge, $12,943; to reimburse amounts retained on contracts, $18,835; to cover overdraft at Bank of Montreal on April [illegible], [illegible], $66,996.[illegible]. These amounts total $1,411,548. To this must be added the cost of the following permanent works. By eliminating everything except what is absolutely essential, the city would require $160,000 for road work and $34,000 for waterworks. It was decided, however, to reduce the road work to $66,000, which, with $25,000 to pay half the cost of permanent sidewalks and the $34,000 for waterworks, would total $125,000. This, added to the first set of figures, makes the total mentioned at first of $1,536,548.44.

INSURANCE LECTURES FOR UNIVERSITY

A course on life insurance lectures is to be held at the University of Manitoba. Mr. D. J. Scott, of the Winnipeg Life Underwriters' Association, announced that the course would include lectures by professors on the mathematical and economic principles underlying insurance.

Mr. F. J. J. Stark, of the Dominion Gresham Guarantee and Casualty Company, Montreal, is making a business trip in Western Canada.

Bank and War Loan 10

AMERICAN BANKS HERE

The suggested establishment of American banks in Canada is discussed on another page. No good reason seems to exist why foreign banks should not do business in another country without undue restrictions. It would, however, be disadvantageous to the interests of Canada if banks were permitted to do business here on other lines than those contained in our admirable bank act. In other words, our bank act is so well adapted to the requirements of this country that it would be a pity to have banking conducted within our borders on any other lines.

The Canadian banks supply all the facilities which are at present needed in Canada, but they would probably raise no objection to one or two of the large American banks establishing branches in Montreal or Toronto. It would, however, be impossible for them to do so and use the title "bank" without conflicting with the Canadian law.

The Canadian banks are permitted to do business only under license in certain of the States. They are not allowed to take deposits or do a regular discounting business, and are prohibited from using their notes for circulation there. These conditions would likely apply to any American bank operating a branch here.

The simplest way for any American bank to meet the situation would be to apply for a charter under the Canadian Bank Act. There is no banking monopoly in Canada. Any group of men can obtain a charter provided they comply with the conditions of the Bank Act.

The bankers of the United States are not likely to go into country banking in Canada. They might have branches in Winnipeg, Toronto and Montreal, more particularly in Winnipeg, on account of the grain connection which they have.

FINANCING OUR FOREIGN TRADE

Negotiations conducted by the Imperial Munitions Board at Washington have resulted in the placing of a large order for 75-millimetre shells to be produced by Canadian plants for the United States government. From 6,000,000 to 7,500,000 shells, under the arrangement, will be produced in Canada during the first seven months of 1918. The value of these orders is approximately $40,000,000.

The value of munition orders placed by Great Britain in Canada up to September last was $925,000,000 and by the end of this year the total will be $1,000,000,000. The orders from the United States will stimulate still further our industrial and general activities. They will help also to balance the changes made a few months ago by the Imperial Munitions Board in regard to the sizes of shells required by Great Britain. We must not overlook the fact, however, that Britain will continue to purchase vast quantities of our products as long as the war lasts, for war purposes, but only if we give considerable help in financing them. That is one purpose of our present Victory Loan. As Mr. E. R. Wood, of Toronto, has pointed out in his Victory Loan pamphlet, Britain has always been our best customer. She is our best customer now. She will be one of our best customers in the future.

Britain could sell back to us hundreds of millions of our securities and thus finance her purchases here, but we are unable to buy them back. We can, however, establish credits here, from month to month, by dint of thrift and economy and substantial investment in war loans.

The British food controller, and the grain commission, state: "We require your wheat, your meats, and other food products."

The British minister of munitions has advised: "We want the munitions which you are now supplying; indeed, if you could arrange to do so, we would like to secure an increased, not decreased, supply from Canada."

The British minister of shipping has expressed himself as wanting to arrange for the building and purchase of further ships in Canada in addition to those now under construction.

The admiralty controller has advised: "It would be of great service if arrangements could be made whereby ship's plates could be rolled in Canada."

The chairman of the air board has requisitioned for further training camps, with additional aeroplanes. The aeronautic supply department has made an earnest demand for the production of silver spruce, which will require a somewhat extensive expenditure in the development of facilities in British Columbia for the production of the large quantities which are needed.

Mr. Wood has truly said that the answer which the British treasury makes to all these demands is: "We do not know how we can provide dollar credits in Canada to meet the bills. We have asked for additional assistance from Canada so that the necessitous supplies for the war may be made available, and the foodstuffs for the army and the civilian population provided."

HELP STAFF TO BUY BONDS

Many Employers Have Made Arrangements in This Way —Hamilton Manufacturers' Plan

In Hamilton 115 manufacturers have already pledged themselves to finance their employees on the instalment plan, covering a period of ten months. The newspapers of Hamilton have opened a two-column "honor roll," in which are entered only the names of those plants in which every employee has purchased a Victory bond. Hamilton's honor roll opened on Monday with four plants, in which every employee had purchased a bond. In the Royal Connaught Hotel every person, from the kitchenmaid to the manager, has agreed to purchase a bond, making a total of 185 bonds for the hotel. The objective of the manufacturers in Hamilton is that they must sell bonds to 25,000 out of the 30,000 of their employees. If this is reached it will mean that the greatest record established in the United States by any city will be exceeded. Detroit sold one bond to every four of its population.

Guarantee Company of North America.

The Guarantee Company of North America, Montreal, has notified its head office staff that in lieu of the bonus heretofore paid them at the end of the year, it will finance them for half of any amount subscribed by them to the Victory bonds, which it contemplates, in addition to appealing to their patriotism, will be an incentive to subscribe to the best of their financial ability.

A gift of a Victory Loan $50 bond to every one of the 200 employees of Greenshields, Limited, Montreal, was made by that firm last week. Thirty of the employees are serving at the front.

Grand Trunk Employees.

Mr. Howard G. Kelley, president of the Grand Trunk Railway Company, has issued an appeal to all the officers and employees of the company to subscribe to the Victory Loan. He says: "In order to accommodate the officers and employees of the company, and to make the terms of payment offered by the government easier, it has been decided to offer all the officers and employees the opportunity of spreading their payments over a period of ten months, in equal payments of 10 per cent. per month of the amount subscribed, or for example, $5 per month on a $50 bond. The Grand Trunk Railway Company will undertake to see that the instalments, as required by the government, are paid, and will arrange to carry the balance [illegible] on an interest basis of 5½ per cent."

The Steel Company of Canada announces that it will underwrite Victory bonds to any amount subscribed by its employees, and carry them free of interest for one year.

BANKS AND WAR LOAN

In order to encourage small investors to participate in Canada's Victory Loan, the chartered banks will lend in moderate amounts upon the pledge of the securities themselves to subscribers to the loan who have a reasonable certainty of repaying the advance in one year. The banks will advance up to 90 per cent. of the amount subscribed, and the rate of interest will be 5½ per cent. per annum with monthly or quarterly reduction payments as may be arranged.

The banks will also accept from subscribers, for safekeeping, without charge, the interim securities and later the bonds themselves to a reasonable amount, for the term of one year.

Through this action on the part of the banks, many small investors will be able to subscribe for the bonds or to increase the subscriptions they already had in mind. Habits of thrift and of saving will be promoted throughout the Dominion and the success of the loan is considerably helped. The action of the banks in handling advances at the same rate as is being paid on the loan will be especially commended.

FOUR-MINUTE SPEAKERS AT MOOSE JAW

During Victory Loan week the Saskatchewan executive will follow the example set in the United States in regard to the Liberty Loan, and "Four-Minute Speakers" will talk about the loan in every theatre in Moose Jaw. Some of the most prominent men in the city and province have promised their co-operation in this respect and during the three weeks the Canadian Victory Loan, 1917, is offered to the public, these "Four-Minute Speakers" will address the audiences in the theatres at every performance every day of the loan campaign.

WORK FOR THE COUNTY CHAIRMEN

Mr. G. H. Wood, chairman of the Ontario executive committee, on Monday sent the following message to the county chairmen of the Victory Loan campaign:—

"The guns are ready, the men eager, the goal is set. At 9 o'clock Ontario goes over the top. You are in command. Ontario's past records have stirred the Empire. Our present campaign must inspire the men over there. We are one army at home and abroad for three weeks—like courage, like determination, like sacrifice, must bring us victory. We shall show that Ontario alone will offer the entire hundred and fifty millions. Even America's proud record of one bond to every eleven persons can be exceeded. More money, less blood. Ontario's dollars shall back Ontario's sons. You are in command. Lead on!"

Mr. G. H. Wood is a member of the Dominion executive committee, of the Toronto executive committee, of the Toronto honorary committee of the Victory Loan campaign, and is also chairman of the Ontario provincial committee, a very important and arduous position.

Saving is accomplished only by an effort.

Victoria, B.C., launched the Victory Loan drive with a [illegible] for an hour and a half enabled all to share in the proceedings.

EASTERN ONTARIO MAKES FIRST DAY'S RECORD

The Eastern Ontario division, Victory Loan campaign, which was organized by Mr. W. L. McKinnon, of Toronto, headed all the divisions of the province, including Toronto, for the first day's subscriptions to the Victory Loan, showing a total of $986,450, exclusive of special subscriptions, and is far in excess of anything reported elsewhere in the province. The following are the figures for the champion district as received at provincial headquarters: Durham, $76,000; Northumberland, $48,000; Hastings, $136,000; Peterboro, $60,000; Prince Edward, $39,650; Lennox and Addington, $55,450; Frontenac, $250,000; Leeds and Grenville, $314,000; Lanark, $47,350; Dundas, Stormont and Glengarry, $110,000. Total, $1,136,450, including special subscriptions.

Mr. McKinnon is organizer of the Eastern Ontario division, Canada's Victory Loan campaign, and is a member of the firm of W. L. McKinnon and Company, with Mr. D. H. Pettes as an equal partner. He was born in Toronto in 1882. He graduated from McMaster University in 1906, taking honors in special philosophy. He was then assistant field-secretary of McMaster University, and later business manager of The Financial Post. He has had nine years' experience in the bond business. Six years ago he started in business under his own firm name. Mr. McKinnon is an enthusiastic worker in the Toronto Central Y.M.C.A., where he has for many years served on the business men's executive.

W. L. McKinnon.

The following is his aggressive Eastern Ontario Victory Loan organization, the details given being in order, county, county organizer, county chairman and county secretary: Durham, A. E. Gilbert, R. A. Mulholland, S. O. Runnals; Peterborough, R. L. Warren, W. D. Bradburn, F. Brownscombe; Hastings, W. B. Evans, W. B. Deacon, H. W. Ackerman; Prince Edward, C. C. Cross, R. Davison, R. J. Purtelle; Lennox and Addington, K. M. Pringle, W. A. Grange, D. McClew; Frontenac, G. R. Warburton, R. Meek, Dr. W. W. Sands; Lanark, A. Dymond, J. A. Stewart, J. J. Hands; Leeds and Grenville, G. B. Richardson, Judge J. K. Dowsley, H. B. White; Dundas, Stormont, Glengarry, D. J. McDougald, G. A. Stiles, F. D. McLennan; Northumberland, R. M. Bird, W. F. Kerr, H. H. Goss. (*The Monetary Times Photo.*)

Every dollar invested in the Canadian Victory Loan is so much insurance against the danger of warfare in the future.

CHARLOTTETOWN BANKERS' WAR LOAN COMMITTEE

Mr. Binning is chairman of the Charlottetown bankers' committee, Victory Loan campaign. He is manager at Charlottetown of the Bank of Nova Scotia. Associated with him on the Victory Loan committee are these bankers:—Messrs. E. G. Coombs, Bank of Montreal; A. W. Hyndman, Royal Bank; and G. W. Harrison, Bank of Commerce. (*The Monetary Times Photo.*)

H. W. Binning.

FINANCE MINISTER ON VICTORY LOAN

Sir Thomas White's Slogan for Canada: "Invest in Dominion Securities"

Sir Thomas White, speaking at the opening meeting of the Victory Loan campaign in Toronto, said:—

"This loan is needed not only to support the men at the front, but in order that the prosperity of Canada, upon which our power to continue the war depends, may be maintained. The purpose to which I refer is the establishing in Canada of credits for the Imperial government by which they may continue to purchase our grain and other foodstuffs, our munitions and other supplies."

Sir Thomas said that many people did not realize the importance of establishing credits here for the Imperial government. At the beginning of the war gold flowed to Britain from all over the world, but as the war went on and the "tight little island" began to raise and equip troops by the millions she began to buy supplies of all kinds far in excess of her exports, with the result that exchange went against her. To-day, with the United States in the war and preparing to spend vast sums of money in the common cause, the situation was radically different, financially, to what it was in the early days of the war. The United States for the coming year had a programme of expenditure of $18,000,000,000, of which $6,000,000,000 was to be distributed as advances to the allies.

"But the money that the United States loans to the allies must be largely expended in the United States. Great Britain, by reason of obligations she has assumed, and by reason of the exchange situation between England and America, must, in order to continue purchases upon the continent of America, find dollar credits on this continent. If she could pay in pounds sterling she would have no difficulty, for she is not nearly at the end of her financial resources—if it was only a pounds sterling situation she could continue this war for years. But it is a matter of dollar credits. The United States loans money to Great Britain and when she loans her citizens get the benefit by selling supplies to Great Britain."

To Free British Purchases.

The finance minister then told of what he had done to encourage British purchases in Canada by providing credits here for the Imperial government. When the first war loan ran $50,000,000 over the amount asked for, he had taken that money to provide credits and munition orders had flowed to Canada as a result. The amount set aside as credits had steadily increased until to-day the Canadian government was advancing $25,000,000 monthly to assist the purchase of munitions in Canada. At the first these advances were set off against those made by Great Britain for the maintenance of Canadian troops on the other side, but it was creditable to Canada that long since the early debit balance had been overtaken, and that to-day Canada was a creditor and not a debtor of Great Britain.

Sir Thomas showed what munitions orders meant to Canada by pointing out that Britain was now spending $500,000,000 a year in the Dominion for munitions. Apart from its patriotic importance, this industry had benefited every class in the country. The minister paid a tribute to the assistance given him by the Canadian banks in financing, referring particularly to their help in financing the movement of the wheat crop last year.

Great Question is Credits.

The question of credits was one of the great questions before the people to-day. "Are we able to do it?" asked the minister. "In our ability to carry on business rests our ability to carry on the war. This is really a great business opportunity for the people of Canada, as well as a great patriotic duty. The people of Canada at no time in their history had as much wealth as they have to-day, even after deducting the increase in the national debt. I am not glorying in that fact. I am simply stating it." Sir Thomas then told of how Canada's trade had jumped from the outbreak of the war until last year it amounted to $2,000,000,000, or double that of 1915. Last year Canada had a favorable trade balance of $300,000,000, and this year he was confident it would be from $500,000,000 to $600,000,000. There was $400,000,000 more in the savings banks last month than in October, 1915, despite the fact that $350,000,000 had been raised in war loans.

"Can the people of Canada supply these credits? I say they can, if they will," he continued. "In the early days of the war I gave the people a slogan, 'Produce, produce, produce.' A year later I gave them this one, 'Produce and save.' To-day I say to you, 'Produce and save and invest in Dominion securities.' "

Mobilize Financial Resources.

Toward the closing part of his address the finance minister earnestly "preached" the need of greater service and sacrifice. "We must mobilize our financial and other resources in this country," he said. "We must get down to a war basis in a way that we haven't done yet. That means self-discipline and self-denial and self-sacrifice. That is what it means."

Sir Thomas declared that the people should remember the sacrifices that were being made by the men at the front. "The sacrifices they have made should be the great appeal to the people of Canada to exercise self-denial and self-sacrifice. National saving and the elimination of luxury were absolutely necessary. The people had responded to the appeal to produce, but they had not saved as they should have done. An example should be set by the wealthy," he said. "You cannot expect the great mass of the people to exercise thrift if those who have so much are not denying themselves."

Success of Loan.

Sir Thomas had no doubts about the success of the Victory Loan. He was satisfied that within the next few weeks from the Atlantic to the Pacific there would be a response that would make a great impression upon the outside world. That would not be surprising because everyone was interested in it. It was both a patriotic and a business opportunity.

"I want from 300,000 to 400,000 subscribers to it," said the minister, referring to the fact that one in twenty-three subscribed to the last British loan, one in thirty-seven to the United States loan, but only one person in eighty-seven to the last Canadian war loan. The security was the best in the world, barring that of the United States, and the interest rate was 'really too high.' It would not have been so high had Britain not set the rate when she came to the United States to borrow money.

"Let the word go forth unceasingly," said Sir Thomas White in closing, "organize, save money, reduce luxuries in order that the full power of the country may be brought to bear for the one sole and supreme purpose—for the winning of the war."

MEDICINE HAT CAMPAIGN

The following is the list of the captains of the canvassing teams for the Victory Loan in Medicine Hat and the districts that have been allotted to them to canvass: District No. 1—H. L. Tweed, captain. First, Second and Third Streets, from Canadian Pacific Railway to Division Avenue, both sides of street, including avenues. District No. 2—C. S. Pingle, captain. Fourth, Fifth and Sixth Streets, from Division Avenue to Hill Road and Canadian Pacific Railway, including all short streets between Fifth and Sixth Streets. District No. 3—E. L. Chudleigh, captain. Central Park and High School annex, south of Sixth Street to and including both sides of Thirteenth Street. District No. 4—J. H. Davies, captain. South Yuill and Rosedale lying east of Sixth Ave., running to Seven Persons Creek. District No. 5—A. P. Burns, captain. District lying east of Division Avenue and south of Central Park and south of districts 3 and 4. District No. 6—R. R. Evans, captain. Herald Hill and Riverdale, from and including Division Avenue West. District No. 7—A. J. N. Terrills and W. E. Hay, captains. Cousins and Sissons, Bending and Grandview. District No. 8—J. K. Drinnan, captain. North of river. District No. 9—H. S. Joslin, captain. First, Second, Third and Fourth Streets, north of Canadian Pacific Railway to Allowance Avenue, including all avenues. District No. 10—H. S. Ireland, captain. Fifth, Braemar, Balmoral and all short streets, from Allowance Avenue to North Railway, including Prince, Queen and other similar streets. District No. 11—W. A. Burton and A. F. Andrews, captains. Lying east of Allowance Avenue in North Yuill, including the district around the Alberta Clay Products Company.

Harold F. Woollatt, of Walkerville, Ont., bought the first bond sold along the Ontario border in the Victory Loan campaign. Mr. Chas. G. Drake secured the subscription, which was for $100.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Smart-Woods Company, Limited.—The directors have placed the common stock on a 7 per cent. per annum basis, instead of the 5 per cent. basis declared earlier in the year. The 1916 profits amounted to $516,190, but the profit and loss surplus to be carried forward to 1917 was affected to the extent of $135,671, which was paid on account of 5¼ per cent of deferred dividends on the preferred stock. However, the profit and loss balance was augmented to the extent of $150,208, despite the deferred dividends, thus bringing the carry forward to the sum of $689,649.

The profits in 1916 were equal to 8½ per cent. on the common stock after current and deferred preferred dividends, but eliminating deferred dividends, the profits equalled 16½ on the common stock. The profits in 1917 will greatly exceed those of 1916.

The Smart-Woods securities were listed on the Stock Exchange early in 1913. The common began dividends just before the outbreak of the war, making only one quarterly distribution of 1¼ per cent. The preferred paid three quarterly dividends, when they were passed for the quarter ending September, 1914, and renewed for the quarter ended December, 1915. The highest price touched by the common stock was 70¾ in April, 1913, while the preferred stock touched its highest at 94 in the same month. The minimum price of Smart-Woods common stock when the Stock Exchange opened in 1915 was $20 per share. The minimum price established this month was 53¾.

Canadian Pacific Railway.—The company's stock sold the week of November 3 at 132, says the Evening Post, New York. That price compares with 151, the high of the preceding week and 167¾, the high for this year, touched on March 23. When a stock declines 20 points within a few days, as Canadian Pacific did, the first inquiry usually raised by Wall Street is, what about the company's dividend prospects? That question was asked with added emphasis later, when Canadian Pacific's earnings were published for September and for the nine months of the current fiscal year. That statement showed an increase of $110,000 in gross but a decrease of $1,382,000 in net for September, with a gain of $8,729,000 in gross and a loss of $1,894,000 in net for the nine months of this year to the end of September. Those figures indicated clearly that Canadian Pacific's surplus for dividends was working in the wrong direction. It net earnings for October, November and December continue to decline at the same rate as those for September, will the company be able to continue its regular dividend rate?

Light is thrown on that inquiry by the following figures showing the surplus over dividends for the years ending June 30, 1915 and 1916, and for the six months ending December 31, 1916, the company having changed its fiscal year to end December 31 instead of June 30:—

	6 months ending Dec. 31, 1916	12 months ending June 30, 1916.	12 months ending June 30, 1915.
Total income .. .	$37,200,118	$50,166,875	$42,024,807
Fixed charges	5,132,551	10,306,196	10,446,510
Surplus for dividends ...	30,813,495	46,812,390	32,478,297
Preferred dividend	1,613,630	3,227,277	3,169,900
Surplus for common dividend	29,199,857	43,585,113	29,308,391
Common dividend	13,000.000	26,000,000	26,000,000
Surplus for all dividends	16,199.857	17,585,113	3,308,391

For the six months ended December 31, 1916, Canadian Pacific earned a surplus over its common dividend of $16,199,853. As the last six months of the calendar year are always best, that does not mean that the company was earning at the annual rate of $32,399,714 over all dividends. From the foregoing figures, however, it is safe to assume that net earnings for October, November and December can continue to decrease at the rate of those for September without endangering dividends. For the fiscal year ended June 30, 1916, Canadian Pacific earned for its common stock 16.8 per cent.; for 1915, 11.3 per cent.; for 1914, 13.6; for 1913, 10.5; for 1912, 19.6; for 1911, 17.3. The average surplus over dividends for a series of years past shows that Canadian Pacific can be depended upon to earn a safe margin over the dividend being paid. That is, from the investment viewpoint. From the speculative point of view, Canadian Pacific should be compared with other stocks. For example, at this week's low price Northern Pacific offered an income return of 7.9 per cent., Union Pacific offered 8.8 per cent. Canadian Pacific, despite the 20-point break, offered only 7 per cent.

At a meeting of the directors a dividend of 2½ per cent. on the common stock for the quarter ended September 30th last, being at the rate of 7 per cent. per annum from revenue and 3 per cent. per annum from special income account, was declared, payable December 31st next to shareholders of record on December 1st next.

GOVERNMENT CONTROL OF PACKING COMPANIES

Official announcement was made on Tuesday of the government's plan to establish effective control over all packing houses in Canada. The action taken provides for a control of the profits of the packers, and provides also for the appropriation by the government of all profits in excess of 15 per cent. One-half of all profits in excess of 7 per cent. and up to 15 per cent. will be taken by the government. The official announcement is as follows:—"In carrying out the policy of the union government as announced by the prime minister shortly after its formation, it has been decided to establish effective control over all packing houses in Canada. The control of profits shall be as follows:—1. No packer shall be entitled to a profit of more than 2 per cent. of his total annual turnover, that is, his total sales during any one year. 2. If the 2 per cent. on annual turnover exceeds 7 per cent. on the actual capital invested in the business, the profits shall be further restricted as follows:—(a) Up to 7 per cent. on capital the packer may retain the profits. (b) If the profits exceed 7 per cent. and do not exceed 15 per cent., one-half of the profits in excess of 7 per cent. shall belong to the packer and one-half to the government. (c) All profits in excess of 15 per cent. shall belong to the government. Suitable regulations shall be made to insure the carrying out of this policy."

The undersigned beg to announce that they have admitted to partnership

Mr. J. D. McNabb, C.A.

and will carry on business as Chartered Accountants, Auditors and Liquidators under the style and firm name of

Robertson, Robinson, McNabb & Co

at the undermentioned offices as heretofore.

CALGARY UNDERWRITERS MEET

Members of the Calgary branch of the Life Underwriters' Association met recently to discuss organization to carry on the campaign in connection with the sale of Victory Loan bonds in Calgary. Mr. D. M. Le Bourdais acted as chairman at the meeting.

Aggressive addresses were delivered by Mr. G. R. Marnoch, vice-chairman of the Southern Alberta Victory Loan committee, and by Mr. C. P. McQueen, who has charge of the organization for Calgary.

ONTARIO EXECUTIVE COMMITTEE

Mr. Tudhope is a member of the Ontario executive committee for the Victory Loan campaign. He is a member of the banking and investment firm, A. E. Ames & Company, Toronto, with which he has been associated a number of years. He is a well-known member of the Toronto Stock Exchange, of which he is president this year. The other members of the Ontario Executive Committee for the Victory Loan campaign are as follow:—G. H. Wood, chairman; J. W. Mitchell, vice-chairman; G. Tower Ferguson, vice-chairman; R. A. Daly, secretary; R. A. Nevitt, assistant secretary; T. E. Griffis, treasurer; Dr. A. H. Abbott, W. C. Brent, A. H. Campbell, H. C. Cox, John F. Ellis, Gordon T. Finch, J. J. Gibbons, R. S. Gourlay, D. B. Hanna, W. A. MacKenzie, A. M. Macrae, G. A. Macpherson, W. L. McKinnon, J. G. O'Donoghue, S. R. Parsons, T. S. G. Pepler, R. Home Smith, Norman Sommerville, T. A. Stevenson, C. G. Wills and W. G. Watson. *(British & Colonial Press Photo.)*

H. R. TUDHOPE.

VICTORY LOAN CAMPAIGN AT WINNIPEG

The Victory Loan campaign in Winnipeg was organized by the Industrial bureau and has been assured of the fullest co-operation of M.D. 10 by Brig.-Gen. Ruttan, O.C.

Mr. Fred. J. C. Cox has been named chairman of the parade committee, Mr. Chas. H. Webster, secretary and Mr. H. B. Andrews, marshal. His assistants include Major Howland, Arthur Morrison and A. C. Emmett.

Organization for canvassing the city and suburbs is now complete. Each district embraces three parts, this division having been necessary to give each committee a portion of the more fertile territory.

Winnipeg, Transcona, St. Boniface, St. Vital, Fort Garry, Charleswood, Assiniboia, East Kildonan, West Kildonan, East St. Paul, and West St. Paul, are included in the canvass. The whole is divided into nine districts, each of which is again sub-divided into three sections, making 27 sections in all. The districts are to be managed by Henry Detchon, general manager of the Canadian Credit Men's Trust Association; J. W. Kelly, president, J. J. H. McLean Company; F. P. Hayden, superintendent of agencies, Great-West Life; R. M. Huestis, western superintendent, National Life; H. C. Thompson, city treasurer; C. H. S. Bamford, sales manager, Ashdown Company; H. Beliveau, manager, Richard-Beliveau Company; Harry M. Agnew, manager, Crane Company; and L. M. Fingard, manager, Merchants' Casualty Company.

FIRST-DAY TOTALS

Some of the first-day Victory Loan totals were as follow: Chatham, $150,000; Sarnia, $100,000; Gananoque, $66,400; Kingston, $250,000; Toronto, $2,055,000; Peterboro, $50,000; Renfrew County, $126,900; Galt, $29,600; Fort William, $50,000; Perth County, $107,300; North Waterloo, $109,550; Lincoln County, $63,000; Hastings, $136,000; Elgin County, $27,750; Durham, $59,750; Huron, $72,900; Muskoka, $30,000; Lambton County, $106,300; Lennox and Addington, $55,450; Haldimand, $14,550; Leeds and Grenville, $314,000; Middlesex County, $25,200; Sudbury District, $50,250; Parry Sound, $92,300; Norfolk, $81,000; Kent County, $150,000; Port Arthur, $10,700; Brandon, $100,000; Saskatoon, $172,500.

LIFE INSURANCE MEN HELPING

Mr. L'Esperance is a member of the Quebec provincial committee of life insurance men, for the Victory Loan campaign. He is Montreal manager of the Imperial Life Assurance Company, which is making a substantial subscription to the Victory Loan. He is one of the best salesmen of life insurance on this continent and will undoubtedly make an excellent record in the Victory Loan campaign. His associates on this committee are the following, all well-known life insurance men in Quebec province:—A. H. Vipond, New York Life; A. J. Meiklejohn, Confederation Life; J. C. Stanton, Sun Life; J. C. Tory, Sun Life; C. A. Butler, Great-West Life; G. E. Williams, North American Life; E. A. Champagne, Standard Life; and A. G. Rowley, Metropolitan Life. *(The Monetary Times Photo.)*

E. J. L'ESPERANCE.

MANUFACTURERS OF CANADA

The postal census of the manufacturers of Canada, taken in 1916, for the calendar year 1915, just issued, shows a general expansion in the manufacturing business of the Dominion. The number of establishments in operation was 21,306, representing an invested capital of $1,994,103,272, employing 52,683 persons on salaries and 462,200 persons on wages, and producing goods to the value of $1,407,137,140 from raw materials valued at $802,135,862.

During the decade 1905-15 the number of establishments increased by approximately 34 per cent.; capital, 135 per cent.; employees on salaries, 44 per cent.; employees on wages, 29 per cent.; salaries, 96 per cent.; wages, 70 per cent.; and the value of products, 95 per cent.

The value of the products of factories in 1915 was $1,407,137,140, as compared with $718,352,803 in 1905, an increase of $688,537, while wages paid totalled $229,456,210, an increase of $95,080,285.

There were in Canada during the year covered by the statistics 65 establishments employing over 500 hands; 25 employing over 1,000; nine employing over 2,000; five employing over 3,000; and three employing over 4,000. Of these three establishments two employed over 5,000 hands.

During the five-year period, 1910-1915, the capitalization of Canadian industrial enterprises increased by $746,520,663, or about 60 per cent.

Transfer of Shares

Incorporated Companies should use the services of a Trust Company for the transfer of their share certificates. The services of this Corporation as Stock Transfer Agent will be found most convenient and reliable. Write for particulars as to charges, etc.

Going Overseas?

To those going overseas, whether in a military or civil capacity, to do their bit, or to those who contemplate spending the Winter away from home, and who may need a strong, reliable corporation to look after their affairs in their absence, we offer the suggestion that they leave a Power of Attorney in our favor. It will relieve them of all the details and worries incidental to looking after their Estates. Compared with the relief afforded and the service rendered, the charge would be small and the satisfaction great. Interviews invited; correspondence solicited. All business treated as strictly confidential.

TAXING UNLICENSED COMPANIES

Why Tax the Public to Increase Dividends of Untaxed Insurance Companies?

Editor, *Monetary Times*:

Sir,—In replying to the cutting from "Industrial Canada," published in your issue of October 26th, I can never make up my mind which I enjoy the most, the London Punch or the literary efforts of the Canadian Manufacturers' Association to prove that, while the unfortunate public should be taxed anywhere up to 50 per cent to increase the dividends of the manufacturers, the same manufacturers should be entitled to buy their raw material (including insurance) outside of Canada without paying any duty. They are not even satisfied with this privilege, which they now enjoy, but want all the licensed insurance companies taxed to pay a proportion of their country's expenses, while they buy their insurance a little cheaper from unlicensed companies, which contribute nothing, either in the way of men or money, to the country in which they receive protection.

Where was Wealth Obtained?

The writer of the article refers to "about one hundred or more wealthy insurance companies." Did any of them obtain their wealth from Canadian business? No! If he will take the trouble to refer to the government blue books he will find not only that few of them have made a profit from underwriting sufficient to equal the ordinary rate of interest on the capital invested, but many insurance companies, writing Canadian business only, have become bankrupt and their shareholders lost every cent they invested. One could mention the names of a dozen defunct companies, but the names of the Eastern and Central Manufacturers' Mutual Insurance Companies, organized and managed by the insurance department of the Canadian Manufacturers' Association, are no doubt amply sufficient. The writer also laments that the unfortunate manufacturer who suffers a loss by fire has to pay a tax on the amount of his loss. What is he "kicking" about? He is not obliged to insure in unlicensed companies, and knows when he does so that if he has a loss he must pay the tax. Why does he not practice what he preaches and buy his insurance in Canada, thus keeping the money in the country in which he expects to sell his finished products or why not insist, before placing insurance outside of his own country, that the insurers agree to pay the 1 per cent. tax in case of loss?

Should Compete in Open Untaxed Market.

Of course, the article referred to was not written for the eyes of intelligent readers, but only for the immaculate palates of the members of the Canadian Manufacturers' Association, and, therefore, should be accepted more as a joke than as an effort entitled to serious consideration.

In conclusion, while financially interested in several manufacturing concerns, and just as keen for dividends as most manufacturers, I hardly think it is becoming to a gentleman to ask his fellow-citizens to pay exorbitant prices for his benefit, and that the man he buys from shall not only be taxed, but compete in an open untaxed market.

Apologizing for taking up so much of your valuable space, I am,

Yours, etc.,

"Fairplay."

Toronto, November 7th, 1917.

YELLOW GRASS IS IN CAMPAIGN

The following are the officers of the Victory Loan campaign in the Yellow Grass district, Saskatchewan: Chairman, T. Murray, Yellow Grass; secretary-treasurer, H. C. Dupont, Yellow Grass; publicity, E. G. Drowell, Yellow Grass; Mr. Steidal, Lang. Executive—J. H. Allen, Yellow Grass; P. D. Hill, Yellow Grass; J. E. Jones, Yellow Grass; W. Devereaux, Lang; J. M. Sanderson, Lang; W. Smith, Lang.

The Maximum of Security

Real Estate Mortgages afford investors the maximum of security. More than twenty-eight million dollars of this Corporation's investments are in first mortgages on carefully selected improved real estate securities. It is in these that the funds entrusted to our care by our Debentureholders are invested, thus assuring

Safety of Principal and Certainty of Interest.

That the conservative investor of small means may be afforded the advantages of this most desirable security, we issue our debentures in sums of one hundred dollars and upwards. Don't wait till you have accumulated more money. If you have a hundred dollars to invest write us for particulars.

THE accompanying chart, showing the organization of the Southern Alberta general committee for the Victory Loan campaign, is typical of the organization for the Loan throughout the Dominion. The Southern Alberta territory is under the chairmanship of Mr. W. Toole, of Toole, Peet & Company, financial agents, Calgary. The territory has been divided into thirteen districts. A number of the general committee who are designated as district deputies are in charge of each district. The district deputies were carefully selected from the best business men in the community. They have met with splendid receptions in travelling through the country. The local organizations throughout Southern Alberta have been completed not only efficiently, but also in a highly enthusiastic patriotic spirit. Mr. Toole, writing to *The Monetary Times*, says:—"We are justified in anticipating that Southern Alberta will once again meet the call for money by over-subscribing their allotment, as they did when men were called by enlisting to the highest percentage of any part of Canada."

"The more gold the less blood" is a current saying among the French. Help to end the bloodshed by subscribing to the Canadian Victory Loan.

Celebrating the inauguration of the Victory Loan, all the expeditionary force troops of the Winnipeg garrison paraded on Monday.

What are Canada's Victory Bonds?

CANADA'S Victory Bonds are the solemn promise of the Dominion of Canada to the holders that Canada will repay, at the time stipulated in the bonds, their full face value in money, and will pay interest at the rate stated in the bonds, every six months.

As a financial investment Canada's Victory Bonds are in the first rank of the world's investments because:

—the security of the principal and interest is certain as anything human can be, being nothing less than the entire assets of Canada, the pledged honor of the people of Canada and all the assets of all the people of Canada.

—they are the most "liquid" form of investment; they can be promptly turned into cash at any time.

—they bear interest which, if saved and compounded, at ordinary bank interest rates would double the amount of the original investment in about fourteen years.

They are also free from Dominion taxation, present or future.

FOR the investment of estate funds, trust funds, sinking funds and all other funds which by law or other necessity must be invested in unquestioned securities, Canada's Victory Bonds are the premier investment.

Executors, trustees, municipalities and public service corporations and all others with trust or sinking funds to invest, can render to Canada valuable patriotic service by investing their funds in Canada's Victory Bonds.

AND because of the high rate of interest they bear, coupled with their supreme security, there is every reason to expect that Canada's Victory Bonds will increase in value, when peace is declared.

The English Rothschilds laid the foundation of the fortune of that branch of the family by buying British war bonds before the battle of Waterloo, thereby making huge profits from the increase in value which followed the declaration of peace.

BUT Canada's Victory Bonds are much more than merely a sound money investment; they are Canada's renewed pledge to fight the war to a finish till victory is with the Allies and lasting peace is secured to the world.

Every one of Canada's Victory Bonds bought by you is a new assurance to every Canadian soldier that Canada stands behind him ready to send him food and munitions, and to care for those he has left in Canada.

Canada's Victory Bonds guarantee that Canada will keep on producing the food, the munitions and machines to bring victory to the Canadian soldiers in France, and that Canada will keep the home-fires burning for their loved ones while they are fighting for our freedom.

SO when you buy Canada's Victory Bonds you help Canada finance the war,

—you help to maintain the production of food, munitions and supplies which our soldiers must have,

—and the money paid for those products helps to maintain business and industrial conditions by which the productive efficiency of Canada can be kept at high pressure.

Your investment in Canada's Victory Bonds will be a link in the complete chain of helping our soldiers, helping the country and thereby also helping yourself.

Investment in Canada's Victory Bonds is Sound Business Patriotism

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

14

GERMAN SUBMARINE IN CANADA

A German submarine will be exhibited at Montreal, Toronto and other cities during the Victory Loan campaign. It is on its way to Montreal, via the Hudson River, the New York State Canal, Lake Champlain and the St. Lawrence River. It will go to Toronto through the Welland Canal.

SOUTHERN ALBERTA'S GENERAL COMMITTEE FOR LOAN

W. TOOLE.

Mr. Toole is chairman of the Southern Alberta general committee for the Victory Loan campaign. He is a member of Toole, Peet & Company, financial agents, Calgary. He was born in Ireland, 1871. Came to Western Canada in 1889, with Canadian Pacific Railway Land Department 1890-1905, transferred to Calgary in charge of company's land and immigration business for Alberta in 1895. Left Canadian Pacific Railway service and established Toole, Peet and Company, Limited, 1905. Has been manager Canada Life investment department for South Alberta since 1907. President Toole, Peet and Company, Limited. Member Calgary board of trade, member local advisory board for Canada Life Assurance Company, Edinburgh Life Assurance Company, and Commercial Union Assurance Company, investment departments. Director P. Burns & Company, Limited, Alberta Ice Company, Limited. *(The Monetary Times Photo.)*

GRAND TRUNK NOTES REPAID

The Grand Trunk Railway has paid off the $4,000,000 5 per cent. two-year gold notes due on November 1st, 1917, issued November 1, 1915, through Blair and Company. The company was prepared to pay off these notes at maturity and made no attempt to secure renewal.

NATIONAL REVENUES CONTINUE TO IMPROVE

Dominion revenues for the seven months of the fiscal year ended October 31, totalled $145,719,060. For the same period last year they were $121,747,808. The increased revenue for the period was approximately $24,000,000. The increase was largely due to customs collections which increased from $75,191,250 for the first seven months of the last fiscal year to $91,763,123.

Expenditures on ordinary account for the seven months totalled $66,644,227 as against $57,561,116 in 1916.

Expenditures on capital account reached $144,213,352, of which $133,254,798 was due to the war, and $10,590,242 was on account of public works. Last year the war expenditure for the same period was $127,487,147, and the public works expenditures $13,540,236. The total war expenditure for the month of October was $45,481,040.

The total net debt of the Dominion on October 31 was $948,236,872, an increase of $47,227,371 for the month of October.

AETNA WILL WRITE OTHER LINES HERE

The Aetna Life Insurance Company of Hartford, Connecticut, has been doing business in Canada for many years. At an early date, the Aetna Accident and Liability Company, an associate company, with an excellent reputation, will commence to write casualty, accident and liability insurance and surety bonds in Canada.

IN PRINCE EDWARD ISLAND

J. O. HYNDMAN.

Mr. Hyndman, of Charlottetown, is a member of the Prince Edward Island provincial committee of life insurance men, for the Victory Loan campaign. He is representative at Charlottetown of the Great-West Life Assurance Company, which is making a large subscription to the Victory Loan. He is an active member of the Life Underwriters' Association, and has had a wide experience in the insurance business. The prospects of the Victory Loan in Prince Edward Island are excellent. Reports this week indicate that Canada's island province will make a creditable record when the campaign closes. *(The Monetary Times Photo.)*

LOAN CAMPAIGN AT MONTREAL

PERCY P. COWANS.

Mr. Cowans, Montreal, is vice-chairman of the English section of the Montreal committee of the Victory Loan campaign. He is a partner in the stock brokerage firm of MacDougall and Cowans. He was born in Montreal, 1878; was five years with Bank of Montreal; then ranched in the west, and in 1901 joined MacDougall and Cowans as a partner when that firm was formed. He has put through many large financial deals and had a hand in a number of notable mergers, particularly the Steel Company of Canada and others of about that time. His firm is one of the largest firms of stockbrokers in Canada, having private wires to all important cities in Canada from Halifax to Vancouver, and to the United States and Canadian stock exchanges. *(The Monetary Times Photo.)*

Buy Victory Bonds

Canada's Victory Bonds are always as good, and at most times better, than cash. For this reason, if, for example, you put $100 in a safe, at the end of fourteen years you would still have your $100, but only that, and nothing more. But if you put a $100 Canada Victory Bond in the safe, and then put the interest on the Bond in the Savings Bank each six months and let this interest accumulate, you will have at the end of fourteen years at least $200.

LOAN CAMPAIGN IN MONTREAL

Work is Being Undertaken by French and English-speaking Organizations

The Victory Loan campaign at Montreal started on Monday with an artillery salute, at which signal the sales teams started under the following captains: W. Graham Browne, Louis E. Caldwell, R. P. Doucet, G. W. Farrell, A. M. Irvine, W. E. Luther, George Lyman, J. A. Mackay, Phil. McKenzie, C. J. McCuaig, J. J. McGill, Lt.-Col. P. V. G. Mitchell, W. C. Mussen, W. P. O'Brien, John Pitblado, H. Randall, J. C. Stanton, Jr., W. K. Trower, Lt.-Col. B. W. G. Winans and D. L. Young.

The opening of the campaign was signalized by a rally of all the teams and workers, who were addressed by Lord Shaughnessy and Sir Lomer Gouin, premier of the province.

Mr. McConnell, at a meeting last week, referred to the work undertaken by Mr. R. N. Watt, as chairman of the employees' committee, in which he had undertaken the task of soliciting the employees of 1,500 concerns on the Island of Montreal. With the co-operation of the employers it was hoped to teach every workingman on the island to save at least 10 per cent. of his earnings during the coming 12 months and invest the money in Victory Bonds.

Fifty Dollar Bond Buyers.

Mr. J. W. Ross explained that although the Victory Loan work had only started a month ago they already had 30 offices fully equipped, with 30 telephones, 75 employees and separate offices for the publicity, employees', speakers' departments, while the ladies had secured offices in the Drummond Building, and Mr. Jos. Quintal, at the head of the French end, had already increased his work so that he had overflowed and taken a complete flat in the Duluth Building.

As a basis of the persons who could afford at least a $50 bond the telephone directory had been used, and this had furnished an initial list of $60,000, and the same thing had been done throughout the province. These names had all been assorted, divided into French and English, duplicates eliminated, and the whole arranged on cards, through the kindness of the Bell Telephone Company.

The territory to be covered in the campaign was the Island of Montreal and the Ile Jesus. For this work there were 20 active ladies' committees, 20 French-speaking teams to canvass the French-speaking citizens, and the regular English-speaking teams, who would only take the English-speaking people, while the ladies would confine their activities to their own sex. With regard to certain expected large subscriptions it had been arranged with the minister of finance that these should be dealt with through a special list, with a committee headed by Mr. Percy Cowans.

Six Thousand Promising Names.

Following this was a list, for the English-speaking teams, of 6,000 most promising names. These had been set on salmon-colored cards, and divided equitably amongst all the teams, while the general lists were on white cards. Thus each team would have first its share of the select list, then the telephone names and finally a general canvass of districts, with an even distribution of territory, as far as possible.

As to reports, Mr. Ross said that the workers would meet at the Windsor next week.

Principal Smyth, chairman of the speakers' committee, explained the amount of work involved with the speakers' committee. Already they had a list of 70 speakers, including English, French, Hebrew, Italian, Polish, Russian, Greek and a Chinaman. Further than that, all the Protestant churches of the city had fallen into line, while the committee had received an exceedingly cordial welcome from Dr. Abramowitch, so that references would be made to the Victory Loan from every Protestant and Jewish pulpit in the city.

In addition to this the leading theatres and moving picture shows had offered their co-operation, and 16 speakers had been detailed for this work. The labor organizations numbering 125 had been circularized, 13 railway organizations had been approached, 52 Jewish societies had promised their assistance, two Orders of Foresters, the Free Masons and the Oddfellows had also promised their aid, while on the following evening a meeting was to be held at which a thousand women would be addressed in the Windsor Hall on the Victory Loan campaign.

Ten meetings were held at the Massey-Harris Company's works, Toronto, on Monday, and in less than three hours, bonds to the value of $25,000 were sold for cash.

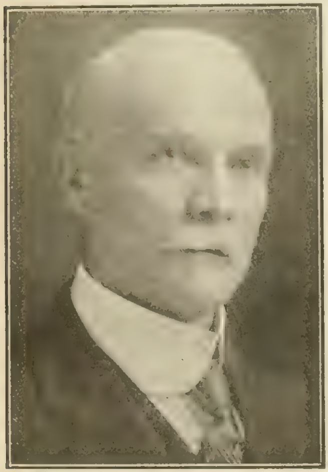
ST. CATHARINES WAR LOAN WORKERS

Since the organization of the Victory Loan campaign was started the city section of the publicity committee of St. Catharines, Ont., has been enlarged and is now as follows: Arthur Robinson, chairman, E. Graves, H. McAvoy, D. W. Eagle, Bert Gadsby, W. R. Robertson, P. B. Yates, C. G. McGhie, J. D. Chaplin, L. R. Grimshaw, E. H. Jones, J. E. Waterhouse, A. F. [illegible], R. B. Hamilton, Roy McKinnon, J. H. Bennett and Mr. Specht.

There is also a mercantile committee to organize those engaged in the stores and business houses of the city, which is made up as follows: J. S. Smith, John Madill, J. T. Petrie, Alex. McLaren, A. M. Stobie, A. W. Moore, Frank Coy, A. M. Watts, W. W. Burleigh, James Dillon, Chas. Taylor, A. M. Ecclestone, Frank Murphy, R. Newman, Geo. Sherwood, A. J. Gilmore, F. H. Avery, E. O. Veal

TORONTO INDUSTRIAL WAR LOAN COMMITTEE



S. R. PARSONS.

Mr. Parsons is chairman of the Toronto industrial committee for the Victory Loan campaign. He is president of the British American Oil Company, Limited; president Canadian Manufacturers' Association. He was born in Port Hope, Ont., in 1854, went to Winnipeg when a young man and became senior partner of the firm Parsons, Bell & Company, which amalgamated afterwards with the Consolidated Stationery Company, Limited, of which he was president. He was chairman of Ontario board of directors, Canadian Fire Insurance Company, since 1900; was also chairman of the transportation committee, for four years being elected second vice-president 1915, first vice-president 1916, and is now president of the Canadian Manufacturers' Association. *(British & Colonial Press Photo.)*

POWER CONTROLLER APPOINTED

Sir Henry L. Drayton, chairman of the Dominion Railway Board, has been appointed by the government "controller of the production and distribution of electrical energy by companies generating or distributing electrical energy in the province of Ontario." His duties as defined in the order-in-council will be "to determine preferences and priorities in the supply of such electrical energy to the end that a sufficient supply shall be furnished to factories and users engaged, directly or indirectly in munition work or work for any of the allied governments, and also for municipal and public utility requirements." He will also restrict the disposal of electrical energy to users other than those before-mentioned until such preferences and priorities have been first met. In the event of a dispute between a power company and a customer coming within the preferred class, the controller will fix the price at which electricity is to be supplied.

Lambton County's objective in the Victory Loan is $1,000,000.

ASSESSMENT AND TAXATION

Saskatoon City Commissioner Discusses Important Question—Creation of Unhealthy Prosperity

Mr. C. J. Yorath, city commissioner for Saskatoon, has presented the following report:—

During the past six months special consideration has been given to the question of assessment and taxation, and much information has been obtained from other cities in Canada and the United States. Special reports and investigations made by commissions for the cities of New York, St. John and Winnipeg have been carefully perused, and it is only after the most thorough and careful investigation of the question that this report is submitted. As the council and the citizens are aware, during the boom days preceding 1913 the assessment of the city was raised on a par with the speculative real estate values prevalent at that time and capital expenditures and commitments were made out of all proportion to the true economic value of the city's assessment.

While the boom lasted, very little objection was taken to the assessment. In fact, some of the citizens strongly urged its advancement so that it would be in keeping with realty values, and tax levies were easily paid out of the large profits made in real estate transactions.

Raise Local Taxation by Land Grant.

In Western Canada during the boom days a system of taxation was largely adopted which provided for raising the greater part of local taxation by a tax on land alone. In some cities the assessment on improvements was reduced to a minimum and in a few instances was entirely eliminated. The arguments in favor of its adoption were:—1. That it was the simplest method of raising revenue. 2. That it would induce owners of land to develop their property. 3. That it would prevent the speculation in land. 4. That it was the only fair and just method of taxation, because the value of the land is entirely due to the presence and expenditure of the people.

What are the actual results? 1. It has proven to be the most difficult method of raising revenue and is largely responsible for enormous arrears of taxes. 2. It did induce owners to develop their property, so much so that property was developed beyond the normal demand, with the result that increased taxation has been incurred, rents have been reduced and the supposed benefits of the tax have acted like a boomerang against the owner.

Created An Unhealthy Prosperity.

Some owners were so obsessed with the idea of getting as much as possible out of their land that large six or ten story blocks were built with the result that store and office accommodation is corralled upon a small parcel of land and the unfortunate owner of the balance is prevented, even if he would, from developing his property. 3. It did not prevent speculation in land as while it was in operation Western Canada was passing through the greatest land speculation in its history. In fact it stimulated speculation, as through the supposed advantage of inducing the owner to develop his property an unhealthy prosperity was created. 4. No system of taxation can be just which makes it impossible for an owner to earn a fair interest on his investment and results in confiscation of his property. 5. It did not spread the burden of taxation over the community, i.e., through the payment of rents, etc., as owing to the unhealthy development which it partly created the supply was far greater than the demand and owners for the last three years at least have been compelled to take by way of rent whatever they were offered, which in the majority of cases was not sufficient to pay three per cent. on the money invested.

For a system of taxation to be successful, just and fair it must, (a) Enable the local authority to raise revenue for its current expenditure expeditiously leaving as small a percentage of arrears at the end of the financial year as possible. (b) Be based upon benefits received and ability to pay. (c) Be distributed so that the cost of maintenance of streets, sewers, etc., be charged against the property which is especially benefited and the cost of regulating public health, education, police protection, etc., be assessed according to the ability of the resident to pay. (d) Prevent an owner by the imposition of an unearned increment tax from making an undue profit out of the enhanced value of his land created by the presence and expenditure of the people.

Consider the Cost

A FACT not generally understood by those drawing up a will, is that the highly specialized and competent service rendered by a Trusts Corporation costs no more than the uncertain service of an individual trustee.

When you consider that your estate will receive the benefit of experience gained in the management of many estates, your heirs will be assured the utmost protection.

When you make your will, why not insure efficient and economical management of your estate by appointing this Company as Executor and Trustee?

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

INCREASE IN PRICE OF STANDARD COMMODITIES

The following figures, prepared by the United States Department of Commerce, show percentages of increases in the prices of various standard commodities since the war began: Potatoes, 145; wheat, 140; beans, 135; corn, 122; metals (22 grades), 124; canned goods, 120; drygoods, 102; lard, 100; shoes, 63; hogs, 75; coffee, 40; general level, 36; clothing, 35; oats, 26; beef, 22; domestic coal, 20; lumber products generally, 20 to 30; millwork, 15 to 20.

VICTORY LOAN IN ALBERTA

Mr. Mitchell is chairman of the Northern and Southern Alberta provincial committees for the Victory Loan campaign. He is provincial treasurer of Alberta and is member in the provincial legislature for Bow Valley. He was born at Newcastle, N.B., in 1872. From University of New Brunswick, Fredericton, he graduated in 1894 with the degree of B.A. Studied law in the office of the late Hon. A. G. Blair, in St. John, for a time, and later took the degree of B.C.L. at King's College, Windsor. Practised law with Hon. L. T. Tweedie, and in 1898 went to Medicine Hat, Alta., and opened an office. In 1901, appointed Crown Prosecutor, and November 22nd, District Court Judge for the District of Calgary. Resigned May 31st, 1910. Sworn in as member of the executive council of Alberta, as attorney-general and minister of education, June 1st, 1910. Elected to Alberta legislature for Medicine Hat, June 29th, 1910. Elected for Bow Valley at general election, 1913. Re-elected general election, 1917. Appointed K.C. same year. Was appointed minister of public works, relinquishing other portfolios May 4th, 1913; November 28th same year, appointed provincial treasurer. *(The Monetary Times Photo.)*

HON. C. R. MITCHELL, K.C.

POWER SHORTAGE IN ONTARIO

Closely allied with the power shortage at Niagara, as well as at all water-powers of the St. Lawrence, is the question of water diversion through the Chicago Sanitary Canal. One feature, which has perhaps not been sufficiently emphasized in connection with this scheme, has been forcibly brought out in recently published figures respecting the power plant, which evidently is a very important feature of the project. The figures show that the disposal of sewage is only a secondary consideration when compared with the financial aspect of the hydro-electric power development. This is further accentuated by the fact that the estimated profits from the extensions now under construction would be about 100 per cent. Figures showing the growth of the power plant give the development as 15,278 h.p., with earnings of $130,936 for the year 1908, while, in 1915, these figures had reached 55,640 h.p. and $932,566, respectively. Although the authorized diversion is but 4,167 cubic feet per second, it is notorious that about 8,000 cubic feet per second is actually flowing through the Chicago River.

WILL AMERICAN BANKS ESTABLISH HERE?

What Would Canada's Attitude Be to Banking Reciprocity?

The Bankers' Magazine, of New York, in its October issue has the following article:—

"Several of the great chartered banks of Canada have branches in the United States, and the fact that new branches have been established here from time to time would seem to warrant the inference that the Canadian banks find in this country a profitable field for their operations.

"It has been pointed out in previous issues that the banking laws of the respective states quite generally restrict the operations of branches of foreign banks to an exchange business, and to receiving funds for remittance abroad. They are, as a rule, denied the privilege of conducting a general deposit and discount business. It has been pointed out as well that when United States banks, acting under authority recently given them, establish branches in foreign countries, they expect to encounter no such restriction upon their transactions, but hope to do a general banking business, including the receipt of deposits and the granting of discounts. Whether they may be granted these broad privileges in all cases is another question.

Attitude of Canadian Banks.

"It is at least an interesting subject of speculation to consider what will be the attitude of the Canadian banks and the Canadian government should United States banks seek to establish branches in Canada. The possibility of our banks wishing to gain a foothold in Canada is by no means a remote one, if an opinion may be ventured based upon the very close banking and business relations existing between the two countries.

"The Federal Reserve Act limits the right to establish branches to national banks having $1,000,000 capital and over. This minimum is so small compared with the average banking capital in Canada that both the Dominion government and the Dominion banks might consider it just to exclude such banks on the grounds of insufficient capital. But quite likely, if United States banks should seek hereafter to locate branches in Canada, the movement will originate with some of the very large banks in New York, Boston and Chicago, to which the objection of insufficient capital would not apply.

"So far as is at present known, a movement of this character is not contemplated, but in view of recent banking developments a discussion of its probability is not untimely.

Question of Banking Reciprocity.

"The doctrine of trade reciprocity between the United States and Canada has been repudiated by the latter country. What will be the attitude of Canada should the question of banking reciprocity as above outlined become a practical matter?

"It would seem desirable, in view of the growing financial importance of New York, that the present restrictions against foreign banks having branches here should be modified. This movement might be hastened by the display of a liberal policy toward outside banks on the part of other countries."

BRANTFORD LIFE UNDERWRITERS

Mr. Fred. J. Reid, of the Life Underwriters' Association of Brantford, Ontario, tells *The Monetary Times* that the life insurance men of that city held a meeting last week which was addressed by Mr. A. K. Bunnell, city treasurer and local organizer for the Victory Loan, and by Mr. Hope. These gentlemen spoke hopefully of the prospects of the loan in the Brantford district. Mr. Bunnell stated that five of the members of the Brantford Life Underwriters' Association had been chosen to assist in the sale of the loans. He felt sure that everybody appreciated the personal responsibility in the success of the sale. He also expressed his conviction that Brantford's allotment would be fully taken up.

The first Victory bond sold in Welland, Ont., was purchased by Hon. Richard Harcourt for his three grandchildren.

The MINISTER OF FINANCE offers for Public Subscription

Canada's Victory Loan

issue of

$150,000,000 5½% Gold Bonds

Bearing interest from December 1st, 1917, and offered in three maturities, the choice of which is optional with the subscriber, as follows:

5 year Bonds due December 1st, 1922
10 year Bonds due December 1st, 1927
20 year Bonds due December 1st, 1937

This Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge upon the Consolidated Revenue Fund.

The amount of this issue is $150,000,000, exclusive of the amount (if any) paid by the surrender of bonds of previous issues. The Minister of Finance **however**, reserves the right to allot the whole or any part of the amount subscribed in excess of $150,000,000.

The Proceeds of this Loan will be used for War purposes only, and will be spent wholly in Canada.

Principal and Interest payable in Gold
Denominations: $50, $100, $500 and $1,000

Subscriptions must be in sums of $50 or multiples thereof.

Principal payable without charge at the Office of the Minister of Finance and Receiver General at Ottawa, or at the Office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable, without charge, half-yearly, June 1st and December 1st, at any branch in Canada of any Chartered Bank.

Bearer or Registered Bonds

Bonds may be registered as to principal or as to principal and interest.

Scrip certificates, non-negotiable, or payable to bearer, in accordance with the choice of the applicant for registered or bearer bonds, will be issued after allotment in exchange for provisional receipts. When these scrip certificates have been paid in full, and payment endorsed thereon by the bank receiving the money they may be exchanged for bonds, when prepared, with coupons attached, payable to bearer, or registered as to principal, or for fully registered bonds when prepared, without coupons, in accordance with the application.

Delivery of interim certificates and of definitive bonds will be made through the Chartered Banks.

Bearer bonds with coupons will be issued in denominations of $50., $100., $500., and $1,000. and may be registered as to principal only. Fully registered bonds, the interest on which is paid direct to the owner by Government cheque, will be issued in denominations of $1,000., $5,000. or any authorized multiple of $5,000.

Subject to the payment of 25 cents for each new bond issued, holders of fully registered bonds without coupons, will have the right to convert into bonds of the denomination of $1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons, at any time, on application to the Minister of Finance.

Surrender of Bonds

Holders of Dominion of Canada Debenture Stock, due October 1st, 1919, and bonds of the three preceding Dominion of Canada War Loan Issues, have the privilege of surrendering their bonds in part payment for subscriptions to bonds of this issue, under the following conditions:—

Debenture Stock, due October 1st, 1919, at Par and Accrued Interest.
War Loan Bonds, due December 1st, 1925, at 97½ and Accrued Interest.
(The above will be accepted in part payment for bonds of any of the three maturities of this Issue)

War Loan Bonds, due October 1st, 1931, at 97½ and Accrued Interest.
War Loan Bonds, due March 1st, 1937, at 96 and Accrued Interest.
(These will be accepted in part payment for bonds of the 1937 maturity ONLY of this Issue.)

Bonds of the various maturities of this issue will, in the event of future issues of like maturity, or longer, made by the Government, other than issues made abroad, be accepted at par and accrued interest, as the equivalent of cash for the purpose of subscription to such issues.

Issue Price Par

Free from taxes -including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

Payment to be made as follows:

10% on December 1st, 1917	20% on March 1st, 1918
10% on January 2nd, 1918	20% on April 1st, 1918
20% on February 1st, 1918	20% on May 1st, 1918

A full half year's interest will be paid on 1st June, 1918.

The Bonds therefore give a net interest yield to the investor of about:

5.61% on the 20 year Bonds
5.68% on the 10 year Bonds
5.81% on the 5 year Bonds

All payments are to be made to a Chartered Bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture, and the allotment to cancellation. Subscriptions accompanied by a deposit of 10% of the amount subscribed, must be forwarded through the medium of a Chartered Bank. Any branch in Canada of any Chartered Bank will forward subscriptions and issue provisional receipts.

In case of partial allotments the surplus deposit will be applied toward payment of the amount due on the January instalment.

Subscriptions may be paid in full on January 2nd, 1918, or on any instalment due date thereafter under discount at the rate of 5½% per annum. Under this provision payments of the balance of subscriptions may be made as follows:

If paid on January 2nd,	1918, at the rate of 89.10795 per $100.
If paid on February 1st,	1918, at the rate of 79.46959 per $100.
If paid on March 1st,	1918, at the rate of 59.72274 per $100.
If paid on April 1st,	1918, at the rate of 39.90959 per $100.

Forms of application may be obtained from any branch in Canada of any Chartered Bank, or from any Victory Loan Committee, or member thereof.
The books of the Loan will be kept at the Department of Finance, Ottawa.
Applications will be made in due course for the listing of this issue on the Montreal and Toronto Stock Exchanges.

Subscription Lists will close on or before December 1st, 1917.

DEPARTMENT OF FINANCE,
OTTAWA, November 12th, 1917.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

Toronto, 19th October, 1917

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be **over $5,000.00, and** he has built up a future income of over **$3,000.00 a year on** business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. **W. A. Peace,** Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

FIRE INSURANCE.—Chief clerk in head office wants position with established company as office manager or in similar executive capacity. Long experience with tariff companies; thoroughly competent underwriter, able to take full charge of head office. Legitimate reasons for changing. Highest recommendations as to ability and integrity. Well qualified to hold responsible executive position, and only such would be attractive. Confidential. Box 119, *Monetary Times*, Toronto.

POSITION WANTED.—Fire Insurance Man, with Winni[illegible] will be paid for office work and commission or bonus for business [illegible] Apply Box [illegible] Toronto.

BRITAIN'S REMARKABLE FINANCIAL RECORD

Summary of Its War Financing—Why We Must Advance Credits

Here is a summary of Great Britain's remarkable war finance record from August 1st, 1914, to March 31st, 1915.

Financial Year, 1914-15.

	£		£
Total spent ..	498,359,980	Raised by revenue	171,758,744
Increase in Exchequer balances	78,390,564	Net borrowings	404,991,800
Total	576,750,544		576,750,544

Financial Year, 1915-16.

	£		£
Total spent ..	1,559,158,377	Raised by revenue ...	336,766,824
Decrease in Exchequer balances	57,875,946	Net borrowings	1,164,515,607
Total	1,501,282,431		1,501,282,431

Financial Year, 1916-17.

	£		£
Total spent ..	2,198,112,710	Raised by revenue	573,427,582
Increase in Exchequer balances	860,853	Net borrowings	1,625,545,981
Total	2,198,973,563		2,198,973,563

Financial Year, 1917-18 (to date), April 1 to October 13, 1917.

	£		£
Total spent ..	1,430,677,794	Raised by revenue	283,259,774
Decrease in Exchequer balances	7,580,056	Net borrowings	1,139,837,964
Total	1,423,097,738		1,423,097,738

Grand Total—August 1, 1914, to October 13, 1917.

	£		£
Total spent ..	5,686,308,861	Raised by revenue	1,365,212,924
Increase in Exchequer balances	13,795,415	Net borrowings	4,334,891,352
Grand total since beginning of the war	5,700,104,276		5,700,104,276

Loans to Allies.

The expenditure includes loans to allies and dominions, which the chancellor of the exchequer stated in his vote of credit speech on July 24th, 1917, to amount to £1,171,000,000, made up as below: —

	Advances August 1, 1914, to March 31, 1916.	Advances during financial year 1916-17.	Advances April 1, 1917, to July 21, 1917.	Total advances from August 1, 1914, to July 21, 1917.
	£	£	£	£
Dominions	88,000,000	54,000,000	4,000,000	146,000,000
Allies ...	288,000,000	540,000,000	197,000,000	1,025,000,000
Total ..	376,000,000	594,000,000	201,000,000	1,171,000,000

For the financial year 1917-18, loans to allies and dominions have been estimated to amount to £400,000,000.

British Credit is High.

British credit, despite the tremendous strain of war and war finance, still stands as high as it did before the war. One proof of this is the willingness of the United States to loan three billions of dollars to the allies, the greater part to Britain. Another proof is the very slight discount at which the English pound sterling stands in New York, as compared with the heavy discount in the currency of other countries.

That is the situation as between Britain and the United States. It is exactly the same as between Canada and Britain, except for the fact that we have far more good reasons for doing, in a smaller way, what the United States is doing for the Motherland.

Credits for Britain.

Great Britain before the war loaned us practically all the money used for our development. She now holds about $2,500,000,000 of our securities. She has bought from us the greater part of our exports for nearly half a century. She is our best customer, and now asks for some credit, for war purchases in this country, for the prosecution of the war. Those are some of the reasons why Great Britain finds it necessary to request credits in Canada. Much of the proceeds of our Victory Loan will be used for that purpose, and the loan will be wholly spent in Canada.

Britain finances in London the expenditure of the Dominion government in the upkeep of Canada's forces in Britain and at the front. This financing constitutes a partial set-off to credits established here for the Imperial treasury.

FIRST VICTORY BOND IN TORONTO

The first Victory bond sold in Toronto was purchased by Corporal J. C. Waddell, who lost both legs in France. He was carried into the Loan headquarters as soon as the doors were opened and bought a $100 bond. The second purchaser was the Right Rev. Bishop Sweeny. Before closing time the clerks at the desk had exchanged bonds of the face value of $50,000 for cash and most of the bonds were of $50 and $100 denominations.

BRITISH CANADIAN TRUST COMPANY

The seventh annual report of the British Canadian Trust Company, Limited, shows that after paying interest and expenses on borrowed money, expenses of investment and management and income tax, the balance at the credit of revenue account, including £3,696 brought forward, is £17,533 9s. 7d., from which deduct interim dividends paid on April 18th, 1917, viz.: on preference shares at 4½ per cent. per annum, less tax, £2,109 13s. 2d.; on ordinary shares at 5 per cent. per annum, less tax, £2,344 1s. 6d.—£4,453 14s. 8d.; balance now to be dealt with, £13,079 14s. 11d., which the directors recommend should be disposed of as follows: In paying final dividends for the year, viz: on preference shares at 4½ per cent. per annum, less tax, £2,109 7s. 6d.; on ordinary shares at 6 per cent. per annum, less tax (making 5½ per cent. for the year), £2,812 10s.; together, £4,921 17s. 6d.; showing a surplus revenue of £8,157 17s. 5d., of which £5,000 is transferred to contingent fund, leaving to be carried forward £3,157 17s. 5d., subject to directors' and auditors' fees.

In accordance with the request of the government the company realized a further portion of its United States investments and brought home the money, part of which was used in paying off debentures and part invested in home securities. Notwithstanding this reduction of income in the United States and Canada, the gross income for the year is £687 more than last year, chiefly extra profit on exchange, but on the other hand the income tax at home and in the United States is up £1,793. The interest on mortgages, both in Canada and in the United States, has been well met on the whole, but the absence on war duties of many farmers meantime delays the payment of their interest and, in some cases, has led to their loans falling into real estate. This item shows some increase, but it is not expected to result in any loss of capital.

The entry of the United States into the war on the side of the Allies, and the raising by that country of such immense loans, has caused a considerable fall in railroad and other investments in the United States. In view of this, the directors have thought it prudent to again transfer £5,000 to the contingent fund. In addition to the £12,000 invested in British government securities, the company has lent to the treasury United States' securities of the par value of £17,000.

The purchase of a war bond will help to bring peace and victory to the British Empire.

NEW INCORPORATIONS

Two Western Cities with $1,000,000 Capital Launch Oil Concern

The following are the largest companies incorporated during the past two weeks:—

Gillette Safety Razor Company of Canada, Montreal	$2,000,000
The Mid-West Oil Company, Calgary, Alta.	1,000,000
The American and Northern Canadian Oil Company, Edmonton	1,000,000

The following is a partial list of charters granted during the past two weeks in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Outlook, Sask.—Arneson-Hepsworth, Limited, $50,000.

Cupar, Sask.—F. C. Hesketh Company, Limited, $30,000.

Truax, Sask.—Southern Grain Company, Limited, $50,000.

Conquest, Sask.—The Conquest Machine Works, Limited, $30,000.

Victoria, B.C.—The Simon Produce Company, Limited, $10,000.

Cardstone, Alta.—The Woolf-Harris Agency, Limited, $10,000.

Semans, Sask.—The Coliseum Theatre Company, Limited, $10,000.

Fort Qu'Appelle, Sask.—The Pioneer General Stores, Limited, $20,000.

Lafleche, Sask.—The Lafleche Publishing Company, Limited, $10,000.

Princeton, B.C.—The Princeton Mining and Development Company, Limited, $150,000.

Woodstock, Ont.—Woodstock Spinning Company, Limited, $50,000. E. Holden, A. McGladery, A. Holm.

Pembroke, Ont.—Union Shook and Box Mills, Limited, $150,000. J. H. Reeves, J. R. Lockhart, W. F. Beehan.

Quebec, Que.—Stoneham Woodlands Corporation, $25,000. M. M. A. Galipeault, L. S. St. Laurent, J. A. Gagner.

The Pas, Man.—The Canada North Fish Company, Limited, $50,000. W. Sinclair, E. I. Shieff, W. H. Bunting.

Windsor, Ont.—Alexander Coleridge and Simmers, Limited, $40,000. G. A. A. Simmers, A. Simmers, G. V. Alexander.

Regina, Sask.—Indemnity Agencies, Limited, $200,000. The Consumers Co-operative League of Regina, Limited, $20,000.

Portage la Prairie, Man.—The Returned Soldiers' Association of Portage la Prairie. R. H. M. Pratt, C. J. Sharp, R. Watson.

Lethbridge, Alta.—The Kaustine and General Supply Company, Limited, $20,000; the Tom Farming Company, Limited, $50,000.

Sault Ste. Marie, Ont.—The Algoma Co-operative Mercantile Society, Limited, $100,000. A. S. Craneman, E. H. Reynolds, W. H. Tugwell.

Saskatoon, Sask.—The Kennedy Billiard Rooms, Limited, $25,000; the Saskatoon Citizens' Band, Limited, $5,000; Monarch Grain Company, Limited, $20,000.

Toronto, Ont.—James Goodall, Limited, $40,000. T. L. Carmichael, P. C. Carmichael, S. J. Hogg; Northway Rush Company, Limited, $80,000. D. I. Grant, G. Grant, M. MacDonald.

Calgary, Alta.—H. B. Wright, Limited, $10,000; the First National Film Service, Limited, $10,000; the Crooks Keeley Furniture Company, Limited, $20,000; the Mid-West Oil Company, Limited, $1,000,000; the Alberta Newspapers, Limited, $350,000.

Ottawa, Ont.—Villa Brothers of Canton, Limited, $1,000. A. C. Fleming, W. S. Mackenzie, J. W. York; Villa Brothers of Japan, Limited, $1,000. A. C. Fleming, W. S. Mackenzie, J. W. York; Villa Brothers of Shanghai, Limited, $1,000. A. C. Fleming, W. S. Mackenzie, J. W. York.

Vancouver, B.C.—Angelus Hotel Company, Limited, $10,000; Adanac Lumber Company, Limited, $10,000; Premier Lumber Company, Limited, $10,000; British Columbia Cravat and Regalia Company, Limited, $10,000; Red Jacker Development Company, Limited (non-personal liability), $100,000.

Macfarlane; Hollander Fur Dyeing Company, Limited, $20,000. P. Bercovitch, E. Lafontaine, N. Gordon; Ogdensburg Coal and Towing Company, Limited, $1,500,000. W. K. McKeown, L. C. Herdman, G. E. Chart; King's Express Company, Limited, $50,000. R. T. Heneker, H. N. Chauvin, H. E. Walker.

Winnipeg, Man.—A. J. Massie, Limited, $20,000. A. J. Massie, G. S. Francis, F. C. Hamilton; Western Tools, Limited, $5,000. L. Holling, A. B. Cail, M. E. Cail; the Western Milling and Export Company, Limited, $100,000. S. M. Battram, W. C. Hamilton, A. T. Hawley; Gate City Company, Limited, $40,000. C. C. O'Neil, N. D. McIntyre, A. L. O'Neil; Manitoba Free Press Company, Limited, $2,000,000. E. H. Macklin, J. W. Dafoe, W. McCurdy; George Stambler, Limited, $5,000. G. Stambler, A. Stambler, S. Stambler; the Parisian Dye House, Limited, $10,000. A. Davidson, J. M. Davidson, J. A. Davidson; St. Paul Investment Company, Limited, $20,000. D. S. Robb, J. Hample, C. S. Hample; Multipower Motor Sales, Limited, $100,000. F. L. Malcolm, V. A. Leslie, L. M. Sharn; Stanley's Cash Stores, Limited, $20,000. A. J. Costigan, A. M. Doyle, A. Cantor.

TRADERS' TRUST COMPANY

The Traders' Trust Company, with head office at Winnipeg, have opened up a branch office on the ground floor of the Strand Block, Brandon, Manitoba, for the purpose of taking care of their business in the western part of Manitoba and the eastern part of Saskatchewan.

The company will carry on all branches of trust company work. Mr. C. H. Newton, president of the company until recently, still remains on the directorate and his opinions and advice will at all times be available.

Mr. J. B. Nicholson, the president of the company, has been connected with the business for the past fifteen years. He has an intimate knowledge of western conditions and of trust company business in all its branches. Mr. D. E. Williams, vice-president of the company, has lived in Winnipeg for more than 30 years and has been connected with large mercantile and financial corporations for a considerable period. He has a wide experience in financial matters pertaining to Western Canada. Mr. J. W. Campbell, secretary and office manager of the company at Winnipeg, has also been identified with mercantile and financial organizations for some years, and is well and favorably known in the business community.

Mr. A. A. Evans, who has been in the real estate, insurance and brokerage business in Brandon for the past eighteen years, has acquired a financial interest in the company and will assume the duties of manager for the Brandon branch.

In discussing conditions with Mr. Evans he told *The Monetary Times* that conditions in Brandon and district are good. While some of the farmers, he said, did not have a large yield others had a good average and with the high prices that prevail for all cereals as well as other products of the farm the farmer will be in good shape financially. The labor question was not as serious as at first anticipated, and as a whole the farmer has all his fall operation well advanced. Business in the wheat city, Mr. Evans stated, is good and the year's profits will equal other years, due mostly to the merchant minimizing his overhead charges.

Lieutenant Travers Williams-Taylor, only son of Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, with the Imperial Cavalry forces operating in Mesopotamia, has been reported wounded and missing.

BARCELONA COMPANY'S REPORT

The chief changes in the accounts of the Barcelona Traction, Light and Power Company for 1916, as compared with 1915, were an increase of $2,895,121 in the amount of 5 per cent. notes issuable in payment of interest on bonds, in accordance with the agreement of April 9th, 1915, and further advances to associated companies, the money thus advanced having been applied to construction.

The leading features of the plan approved by the bondholders were set out in last year's report. Under this plan all surplus earnings from operation up to June 1st, 1918, were to be applied to further construction, all bond interest, excepting that on the prior lien "A" bonds, being satisfied by the issue of 5 per cent. notes. As a result, no profit and loss statement is published, as all earnings of the associated companies as and when received are applied as provided in the committee agreement.

The following comparative table shows the net revenue from all sources available in 1915 and 1916 for the payment of the interest on the prior lien "A" bonds of this company, from which it will be seen that such interest is covered several times over:

	1916.	1915.
Net revenue	$1,875,315.73	$1,316,282.72
Interest on prior lien "A" bonds	331,900.31	96,355.70
Surplus	$1,543,415.42	$1,219,927.02

The results for the first six months of 1917 indicate a further large increase, and it is anticipated that this rate of increase can be maintained throughout the year.

The shares in the capital stock of the Tramways de Barcelone purchased by this company are still held as security for the balance of the purchase price, under the conditions explained in the last annual report, and will probably remain so until after the war. The application for a concession for unification which the tramways company is making is still pending and the managing director reports that there is reason to believe it will be granted in due course. The tramways earned a surplus over the dividend upon their common shares which this company guarantees. This company owns about 25 per cent. of the capital stock of the Energia Electrica de Cataluna, whose operations are controlled by a French group. No dividend has been paid upon this stock during the year, nor is it anticipated that there will be any dividend in the near future.

The balance sheets of the Ebro Irrigation and Power Company, Limited, the Ferrocarriles de Cataluna, S.A., and the Ferrocarril de Sarriá á Barcelona, the chief operating companies in Spain in which this company is interested, show that the combined surplus earnings of these companies were much larger than in 1915.

The report of Dr. H. F. Parshall, the president and consulting engineer of the Ebro Irrigation and Power Company, Limited, and the Ferrocarriles de Cataluna, S.A., on the progress in construction and operation of these enterprises in Spain shows that substantial progress has been made during the year by the companies operating in Spain, and the results are satisfactory, having regard to the conditions under which they are realized. The war makes construction everywhere more difficult and expensive, and this is especially true where a large quantity of the materials has to be brought from overseas. Nevertheless, the works outlined in Dr. Parshall's original report have been substantially completed. The continued high price of coal, however, has necessitated a considerable change of plans, and in view of the rapid growth of business it became necessary for the Ebro Company to begin construction of another hydro-electric power plant without further delay. It is not easy at present to raise new capital, but it is satisfactory to report that such financial provision has been made as will enable the Ebro Company to carry on construction into 1918. Work on the new plant was begun in July last and is being pushed forward as rapidly as possible. It is hoped that when complete it will furnish sufficient power to cover requirements for a number of years.

QUEBEC FOREST INDUSTRY

During the past year, more than 500,000 forest tree seedlings have been shipped from the Quebec forest nursery at Berthierville, P.Q. The provincial forester, G. C. Piché, reports that of these, nearly 200,000 were white pine, 180,000 Norway spruce, 82,000 Scotch pine, 20,000 Douglas fir, 8,000 red pine, 7,000 white spruce and 6.000 tamarack, the balance being made up of relatively small numbers of other species, mostly hardwoods, to supply the demands of farmers. The great bulk of the demand was, however, for the reforestation of burned-over non-agricultural lands. The Laurentide Company and the Riordon Pulp and Paper Company were heavy purchasers of plant material from the provincial nursery, in addition to supplies secured from their own nurseries. The Perthuis seigniory also has purchased a large number of small trees from Berthierville annually during the past seven years.

To date, the provincial nursery has shipped a total of more than 1,500.000 trees since its inception; of these, more than half have been supplied during the past two years. The demand for planting stock has become so insistent that the provincial forester announces the proposed extension of the capacity of the Berthierville nursery to 3,000,000 seedlings annually. Of these, the majority will be Norway spruce, which is believed to be the most suitable species for pulpwood production.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first week of November:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
November 7 ...	$3,036,000	$3,204,000	+ $168,000

SUBSCRIBERS TO VICTORY LOAN

Governor-General First on List—Maple Leaf Milling Company's Good Example

The subscription of Canada's Governor-General will be the first on the list of subscribers to the Victory Loan. The Governor-General has written the following letter to Sir Thomas White, minister of finance:—

"I shall be glad if you will include my name in the first list of subscribers to the Victory Loan. The purpose and objects of the issue—namely, to provide funds for Canada's continued vigorous prosecution of the war and to furnish needed credits whereby the Imperial government may be enabled to purchase in the Dominion grain, foodstuffs, munitions and other supplies, are such as will powerfully appeal to the loyalty and patriotism of the Canadian people, and I am confident that the response will add one more to the long list of notable achievements of Canada during this terrible conflict. My best wishes for the success of Canada's Victory Loan."

The following is a list of some of the subscriptions to the loan this week:—

Industrial and Other Companies.

Anglo-Canadian Leather Company	$1,500,000
Steel Company of Canada, Hamilton	1,500,000

A. Racine and Company, Montreal	20,000

The subscription of $3,000,000 of the Mutual Life Assurance Company of Canada, with head office at Waterloo, Ont., is in addition to that which the company made to the last Canadian war loan, when the sum of $2,393,500 was invested. The total amount now invested by the company in our war loans will be $5,393,500.

The Cape Breton Electric Company will purchase at least $10,000 of Victory Loan bonds, but if their employees will subscribe for $6,000 the company will take $12,000 and if the employees will subscribe $10,000 the company will subscribe $20,000.

Shareholders of the Maple Leaf Milling Company, Limited, will receive a Christmas present in the form of Victory Loan bonds to the extent of 10 per cent. of their holdings. The company's directors, have decided to invest $500,000 in war bonds and to give half of this to the shareholders at once. The company has $2,500,000 capital outstanding.

Canada Life's Subscription.

The Canada Life Assurance Company's subscription of $5,000,000 is one of the largest received to date. This is entirely new money and does not represent conversion of holdings of previous loans. The company is, however, in addition, converting its holdings of former war loans which will give the Canada Life, a total investment of $8,407,500 in the Victory Loan. The new subscription of $5,000,000 is practically all the company's revenue for the ensuing year, less only the necessary provision for claims and current payments. This handsome subscription is a very tangible expression of a desire to co-operate with the government and the people to make the loan an overwhelming success.

Out of an approximate total subscribed to the Victory Loan in Ontario during the first four days of $33,000,000, the province has contributed $22,700,000 and Toronto $10,300,000.

CANADIAN NORTHERN RAILWAY APPOINTMENT

Mr. S. J. Hungerford has been appointed general manager of the eastern lines of the Canadian Northern Railway, the position recently vacated by Mr. L. C. Fritch. Mr. Hungerford's first official appointment was that of chargeman for the Canadian Pacific Railway at Montreal. From that position he gradually rose and in 1908 he was made superintendent of shops. In 1910 he joined the Canadian Northern Railway at Winnipeg as superintendent of rolling stock for the Canadian Northern Railway, Duluth, Winnipeg and Pacific Railways. On May 1st, 1915, he was moved to the head office, Toronto, and his jurisdiction extended to include the rolling stock on the 10,000 miles of trackage of the Canadian Northern. *(The Monetary Times Photo.)*

LIBERTY LOAN RESULTS

There Were 9,400,000 Subscribers — Details of Allotment

The final returns received from the twelve federal reserve banks in regard to the second Liberty Loan of the United States show that the total subscriptions were $4,617,532,300, an oversubscription of $1,617,532,300, or approximately 54 per cent. of the amount offered. This is a more gratifying result even than was the first Liberty Loan, when $2,000,000,000 of bonds were offered and a subscription of more than $3,000,000,000 was received.

These financial operations are greater in magnitude than ever attempted by any other government in the world. The people of the United States not only absorbed readily the full amount of the first and second Liberty Loans, but in each instance oversubscribed the loan by more than 50 per cent.

Over Nine Million Subscribers.

The second Liberty Loan was subscribed for by approximately 9,400,000 men and women of the country. In this number it is estimated that 9,306,000, or 99 per cent., subscribed in amounts ranging from $50 to $50,000, the aggregate of such subscriptions being $2,488,469,350. The fact that such a number subscribed for bonds is significant of the widespread interest of the people in the purposes of the war and of their determined support of the government in all measures required for its vigorous prosecution.

In conformity with the original announcement of the United States treasury, 50 per cent. of the oversubscription has been accepted, making the total issue of the second Liberty Loan $3,808,766,150. Allotments will be made as shown in the table at the foot of the page.

Subscriptions by Districts.

The subscriptions by federal reserve districts are as follows:—

	Total subscriptions received.	Quota.	Per cent. of oversubscription.
Boston	$ 470,050,000	$ 300,000,000	50
New York	1,550,453,450	900,000,000	72
Philadelphia ...	380,350,250	250,000,000	52
Cleveland	486,106,800	300,000,000	62
Richmond	201,212,500	120,000,000	68
Atlanta	90,695,750	80,000,000	13
Chicago	585,853,350	420,000,000	39
St. Louis	184,280,750	120,000,000	54
Minneapolis . .	140,932,650	105,000,000	34
Kansas City ...	150,125,750	120,000,000	25
Dallas	77,899,850	75,000,000	4
San Francisco..	292,671,150	210,000,000	39
Total	$4,617,532,300	$3,000,000,000	54

Every federal reserve district exceeded its quotum of the $3,000,000,000 of bonds offered.

Commenting on the allotment, Treasury Secretary McAdoo said: "It may be asked why I do not accept the full amount of the subscription. The answer is simple: The government must never alter the basis upon which it offers an issue of bonds after subscriptions are closed. Having announced that only one-half of the oversubscription would be accepted, the government must, of course, faithfully observe that basis. Whenever loans are offered to the public, the banks and the public adjust themselves, both consciously and unconsciously, to the basis of the offering, and it would be extremely unwise to alter that basis after the subscriptions have been received.

"The success of the second Liberty Loan, like that of the first, is a distinct triumph for the people of the United States. It not only demonstrates their ability, patriotism and resources, but augurs the certain success of any future loans that may be offered by the government."

PRIME MINISTER'S VICTORY LOAN APPEAL

The prime minister has addressed the following communication to the people of Canada: "The Dominion of Canada Victory Loan now offered for subscription by the minister of finance affords an opportunity to contribute direct and effectual aid towards the vigorous prosecution of the war.

"Our gallant soldiers overseas are daily offering their lives in our defence. Upon us who remain at home devolves the sacred obligation of supporting them to the utmost of our power. Let each, according to his means, assist in this supreme national purpose. The proceeds of the loan are urgently and imperatively required to maintain and augment our military effort in the field and to furnish funds wherewith Canadian products may be made available for Britain's need.

"On behalf of the government I desire most earnestly to impress the vital importance attaching to the success of this loan. Upon each of us there rests an individual responsibility to make good the national endeavor. I do not doubt that this paramount responsibility will be adequately realized and entirely fulfilled."

WENTWORTH ORGANIZED FOR VICTORY LOAN

Lieut.-Col. J. J. Grafton accepted the general chairmanship for Wentworth County, Ontario, to organize the Victory Loan campaign there, and Senator E. D. Smith, the honorary chairmanship. While Hamilton's objective was not mentioned, it is said to be about $8,000,000. The county organization is as follows: Honorary committee—Senator E. D. Smith (honorary chairman), Lieut.-Col. J. J. Grafton, Gordon Wilson, M.P., J. T. H. Regan, M.P.P., Capt. (Dr.) Rykert, M.P.P., Lieut.-Col. H. C. Gwyn, R. B. Ferrie, C. H. Moore, Wm. Bruce, Wm. Drummond, Dr. J. C. McGregor, John S. Fry, Senator George Lynch-Staunton, Henry Bertram, Milton Stenabaugh, J. L. Counsell, S. J. Lennard, W. J. Southam, R. B. Harris, Austin Smuck, Erland Lee, Dr. James McQueen and James Chisholm.

Executive committee—Lieut.-Col. J. J. Grafton, chairman; G. E. Main, vice-chairman; H. M. Marsh, secretary; Gordon T. Finch, divisional organizer; C. H. Rankin, organizer; G. R. Harris, assistant organizer; F. L. J. Sheldon, publicity; J. L. Counsell, speakers; J. B. Robinson, schools; Ed. Morwick, G. L. Goodrow, H. J. Hale, teams; L. R. Tobey, churches.

Publicity committee—F. L. J. Sheldon (chairman), W. A. Davidson, Geo. H. Horning, J. Simpson, D. McAlister, D. A. Gallagher, George S. Jones, E. D. Reed, F. C. Binkley, W. A. Ryckman, Fred. Pool, Alfred Parnell, Austin Smuck, E. Hopkins, C. C. Morin, W. C. Thompson.

Teams committee—Ed. Morwick, G. L. Goodrow, H. J. Hale, W. Davidson, B. J. Brack.

Box alarms received, 4; telephone alarms received, 14. Total alarms received, 28

BRANDON DISTRICT PROSPEROUS

(Staff Correspondence.)

Brandon, November 12th.

The Brandon district this year has again measured up to something of its old-time record in the matter of good crops, and as a consequence the district and wheat city are prosperous. On the train the writer got into conversation with a Manitoba farmer's wife, and in the course of conversation she said their crops had turned turned out well. They had over 1,000 acres in wheat and it had gone from 15 to 30 bushels to the acre, and had netted them in the neighborhood of $35,000, in addition they had 1,600 bushels of potatoes to sell. The business men of Brandon are well satisfied with year's turnover. Mr. A. E. McKenzie, of A. E. McKenzie & Company, seedmen, stated to *The Monetary Times* that collections were good and quite on a par with any of the past seven years. He said they were in a position to know as they had nearly 4,000 merchants' accounts on their books. Mr. McKenzie stated that seed was going to be scarce, that farmers were demanding high prices for special strains of seed.

Mayor H. Carter stated to *The Monetary Times* that the city of Brandon was in good shape and he was well satisfied with the year's business and general outlook. Alderman Burke, chairman of the finance committee, and a prominent manufacturer, was very well satisfied with conditions, the city, he said, was in splendid shape, they had no debentures to sell and he was most optimistic about the future.—G. W. G.

AND FIRE INSURANCE

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

A GOOD INVESTMENT

In the year 1897, just a matter of twenty years ago, a young man, then aged 37, took out a Policy with The Great-West Life for $5,000 on the Twenty Payment Life Plan.

He paid a premium of $177.35 per annum. This year the Policy matures, and the Policyholder received the Guaranteed Value of $2,815, and Profits $2,250, making a total cash value of $5,065. He paid in premiums during twenty years $3,547, and received back $5,065, making a clear profit return of $1,518, or 3¼% compound interest, plus $5,000 of Life Insurance for twenty years free of cost.

Enquire into the Policies that give such remarkable results.

IF WE DID NOT WANT TO WIN THE WAR

And if we did not want to turn out war orders for Britain and our Allies at the rate of $600,000,000 a year—

IF WE DID NOT WANT TO BACK OUR BOYS OVERSEAS

And if we did not want to maintain our extraordinary industrial and agricultural activities—then we might fail to over-subscribe the Victory Loan.

BUT AS WE DO WANT

To win the war, to finance Britain's war purchases here and to maintain our prosperity, we must over-subscribe the Victory Loan of $150,000,000 so that we will

MAKE IT THREE HUNDRED MILLIONS!

"As you look for peace, for reparation, and for security, so lend freely to the utmost of your power."—Right Hon. Reginald McKenna.

YOUR OBLIGATION

YOU have a two-fold duty to perform to those whom you have sent to fight your battle. Firstly, to help the State to provide for their immediate necessities, and after the war is over to help those dear to you to start in civil life. You can meet both these obligations by lending money to your country now. The amount you save grows in value as the time passes.

It is the National obligation this month to invest in

Canada's Victory Loan Bonds

Victory Loan is Going Fairly Well

BUT *Every Citizen Will Have to do His Part in Order That the $300,000,000 Objective May Be Reached—Ontario Leads in Subscriptions by Provinces—Number of Subscribers to the Middle of this Week Was 91,704.*

By Tuesday night there had been subscribed to the Victory Loan $120,141,700 by approximately 91,704 subscribers. That is a good record, but it is not good enough. The second week's campaign, just closing, has been fairly fruitful. During next week, the final period, will come the real test. While the finance minister has asked for a loan of $150,000,000, a sum of $300,000,000 is needed, and if it is subscribed he will probably allot it all. That is the real objective. It will be very unfortunate, in many ways, if the amount is not fully subscribed.

The war orders placed in Canada to the end of this year will total $1,800,000,000. On that sum, substantial profits have been made. The benefits of the orders have been felt, directly and indirectly, by every citizen of Canada. Great Britain is spending $2,000,000 here every day for shells and war supplies. That is at the rate of $730,000,000 annually. We are asked to raise a loan of $300,000,000. All of it will be spent in this country. If that amount is raised—and it is an imperative duty to do so—the finance minister will not find it necessary to seek another loan for a considerable period, probably not until early next fall. That in itself is an important consideration, because the work of raising such large sums of money by means of a widespread, national organization, absorbs much time, labor and energy which otherwise would be directed to normal channels.

We have no reasonable excuse should we fail to raise $300,000,000. That failure would be due to individuals or corporations or other subscribers who can, with or without effort, subscribe to the loan but who did not do so; and the stigma for the failure would rest upon the nation as a whole and reflect adversely upon Canadian credit.

The $120,000,000 raised up to Tuesday last inclusive was made up as follows:—

Ontario	$ 69,490,050
Quebec	24,356,850
Manitoba	8,685,400
Saskatchewan	3,397,350
Alberta	3,934,250
British Columbia	2,577,150
Nova Scotia	4,876,100
New Brunswick	2,267,650
Prince Edward Island	557,300
Grand total	$120,141,700

The subscribers by provinces, up to Tuesday night, were as follow:—

British Columbia	3,308
Manitoba	11,276
New Brunswick	1,350
Alberta	5,055
Nova Scotia	5,366
Quebec	2,362
Ontario	26,481
City of Toronto	36,516
Total	91,704

These figures are satisfactory only to the extent that they indicate further effort. They leave room for considerable improvement and that must come during the week November 26th to December 1st. There is no excuse of value for any province to fail in the quota allotted. Fifty per cent. of the manufacturing industry of Canada is in Ontario. Fifty per cent. of the ten principal manufacturing centres are in Ontario, which has heavy agricultural production also. Ontario should be able to subscribe 50 per cent. of the $300,000,000 loan. Quebec province has frequently boasted of its agricultural prosperity and of the rapid increase in the number of bank branches there, compared with decreases in other sections. The full contribution of Quebec is needed for the Victory Loan. France is a nation of bondholders; so also should be French Canada.

Western Canada has had excellent crops this year and is receiving high prices for its products. There is plenty of money in our Western country and a substantial amount is expected for the loan from the prairie provinces and British Columbia. The Maritime provinces, famous for their production and thrift, must put that thrift to practical advantage by helping to make an honorable Victory Loan record.

With approximately 92,000 subscribers to the loan by Tuesday last, the record of the third loan, namely, 40,800 subscribers, had been exceeded; but we can have little pride in that fact. In the United Kingdom, one in 23 subscribed to the Victory Loan there. In the United States, one in 27 subscribed to the Liberty Loan. In Canada, 1 in 187 subscribed to the third war loan in March last. To equal the record of the United States in its first Liberty Loan, we should have had 280,000 subscribers. To equal the record in its second Liberty Loan we should have had approximately 600,000 subscribers.

By the middle of the week, we had only 92,000 subscribers to the Victory Loan. That figure is distinctly disappointing, when we consider that bonds of as low a denomination as $50 can be purchased on the instalment principle. Even a dollar a week will buy a bond under the arrangements made by the Canadian banks.

According to the reports of the committee in charge of the sales, however, the people at large are responding fairly well, although there are many thousands who can afford to subscribe from $50 to $3,000 who have not yet done so. Many people are buying $50 bonds when they can afford $500. Complaints are also heard that those who can buy $5,000, $10,000 and $25,000 of bonds are not responding to the appeals in a satisfactory manner. There are also many corporations who are subscribing comparatively small amounts when larger ones are possible.

While the entire situation, at the end of the second week of the campaign, has its satisfactory points, it calls for the greatest possible effort on the part of the selling-organization, and more particularly upon those who have the funds but who have not invested them in Victory Bonds. Canada has for years made a boast of its initiative, resources, record-beating proclivities, rising bank deposits, continuous prosperity, large war orders, and so on. Here is an opportunity to prove that our dollar talk is more than talk. Beginning on Monday, November 26th, the final week of the loan campaign, we have seven days to make good. No time must be wasted. No money must remain stationary when it should move to the Victory Loan total. The task of raising $300,000,000 is a heavy one. It can be accomplished only if every citizen does his full bit.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

The four plants of the Canada Foundries and Forgings Company are working almost to capacity, both on war orders and on ordinary business. The company recently obtained an order for 500,000 shells from the United States. The first delivery was to be made on December 15th; delivery was given a month ahead of time and as a result the company obtained another order for 500,000 shells. The Brockville plant has enough business to keep it going until May 1st, 1918, and the two Welland plants have orders which will keep those factories busy until January 1st, 1918.

The company has the largest equipment of any forge shop in Canada, with probably one exception. While it is turning out war orders, domestic and export trade have not been neglected. In an interview with *The Monetary Times* this week, Mr. B. J. McCormick, general sales manager, said: "We are not neglecting our peace trade. We keep a certain percentage of our equipment available for regular customers. We make a large range of forgings including axe, hatchet and hammer heads, wrenches, crank shafts, connecting rods, and so on. We are doing a good business in our regular lines as well as in the munition business. We are also fostering our export trade, now shipping our products, among other countries, to Great Britain, New Zealand and Australia. Our chief difficulty at present is cargo space. While our plant is working at almost capacity we are still able to accept more business." The company is turning out a large quantity of ship forgings for Canadian yards.

Western Canada Flour Mills.—After paying the bond interest of $91,664 for the year and an 8 per cent. dividend, accounting for $169,976, the Western Canada Flour Mills Company was able to carry forward the substantial balance of $844,651. This is a balance $156,383 greater than a year ago. The net profits for the fiscal year ended August 31 last were $418,023. The company's issued capital is $2,124,700 and its bonded indebtedness, $1,504,621.

The balance sheet shows a substantial sum of customers' paper under discount—namely, $2,351,489. Mr. A. Kelley, president, explained that this large item was due to the high prices paid the farmers for grain. The financial burdens of the company are therefore much greater than normal years. Another indirect liability is a guarantee of $545,770, re Brackmanker Milling Company, Limited. Among the current liabilities are accounts and bills payable amounting to $1,233,251. This sum includes the estimated amount for two years' war tax.

The capital assets are valued at $3,466,687. Real estate, buildings, elevators, machinery and equipment account for $2,629,633 of that total. No important extensions were made to the plants during the year but the machinery and equipment have been well maintained. Share investments make up $653,986 of the capital assets. Patents, trade marks and goodwill are put in at $183,067. The company would be well advised to reduce that item to a nominal amount as soon as convenient, a policy which is being followed by a number of important corporations.

The current assets total $2,328,734 made up as follows: Accounts and bills receivable, $724,040; inventory of stock-in-trade, $1,205,906; inventory of bags, supplies and deferred charges, $[illegible]; and cash on hand and in bank, $27,057. The company's balance sheet reflects a strong financial position.

Dominion Bridge Company.—The American International Shipbuilding Corporation has placed an additional large contract for fabricating structural steel, to be used in building cargo boats for the government, with the Dominion Bridge Company. The two orders thus placed amount to 40,000 tons of steel plates and shapes. The fabrication of this steel will take up the entire capacity of the Toronto and Montreal plants for ten months.

Wallace Sandstone Quarries, Limited.—The bondholders at a recent meeting passed a resolution as follows: (a) To release the "mortgaged premises" from the hypothec, mortgage and pledge with which they are charged as security and to authorize and empower the trustee to concur with the company in executing the necessary deeds of discharge for that purpose. (b) To consent to the exchange or conversion of the bonds of the company, together with the coupons thereon maturing June 1st and December 1st, 1917, into 7 per cent. cumulative preferred stock of the company, the bondholders to receive an amount equal to the par value of their bonds, plus the coupons thereon maturing June 1st and December 1st, 1917, the capital stock of the company being increased by the amount of preferred stock so issued.

International Nickel Company.—The directors have reduced the quarterly dividend on the common stock from $1.50 to $1 a share. Report of earnings for the six months ended September 30 showed that surplus for that period was not sufficient to pay the regular common dividend, as the balance after preferred dividend requirements was equal to only $1.18 a share on the common stock. Gross income for the three months ended September 30 showed a loss of $1,139,448 as compared with the previous quarter. This reduction was mainly due, according to an official, to the great increase in costs of labor and materials. The important items which advanced in prices were coal, coke and fuel oil. Surplus for the six months' period, out of which the present common dividend is to be paid, was $1,974,320. This surplus showed a loss of $1,592,473 from the balance shown for the six months ended September 30, 1916. This reduction was practically entirely due to the reserve of $1,741,140 which was set aside for United States war taxes for the six months' period.

Canada Bread Company.—This company, which operates in Toronto, Montreal and Winnipeg, shows largely increased assets in its annual statement just issued, but a falling off in profits. The company's banner year was in 1915, when the earnings were $287,000. In 1916 they were $223,772, and last year they were $199,107. The statement shows a fairly large amount charged to depreciation and $10,000 written off trade marks and patents. At the close of the business year they had on deposit in the banks cash to the amount of $550,701, divided as follows: $284,788 being upon current account, $164,002 on capital account held for purposes of extension, and $101,910 depreciation or replacement account, while to the credit of the latter account are also held war bonds to the amount of $98,089. Following is a comparison of the chief items of the profit and loss statement:—

	1917.	1916.
Manufacturing profits	$199,107	$223,772
Bank interest, etc.	13,705	10,579
Total income	$212,812	$234,351
Bond interest	71,128	71,821
Reserve for depreciation	......	50,000
Reserve for bond redemption ...	12,422	12,500
Total deductions	$ 83,550	$134,321
Balance for dividends	129,262	100,030
Dividends preferred	87,500	87,500
Surplus for year	$ 41,782	$ 12,530
Previous surplus	105,994	*93,464
Total surplus	$147,755	$105,994

*After $10,000 written off on trade marks and patents.

Imperial Tobacco Company of Canada.—In December last the directors of the British-American Tobacco Company decided to distribute among the company's ordinary shareholders, in addition to a cash dividend of 30 per cent. for the year ended September 30, 1916, one ordinary share of $5 of the Imperial Tobacco Company of Canada in respect of every four ordinary shares of the British-American Company. The proposal, which would have involved the distribution of 1,563,580 shares of the Canadian Company, was vetoed by the treasury, and early this month the directors resolved to abandon it, being satisfied that the necessary consent of the treasury was not likely to be given during the war. In giving up the scheme they were influenced by the fact that in consequence of the enormous increase in the cost of leaf tobacco (current prices being in many cases double those of a year ago) it is absolutely necessary, in order to purchase the requisite supplies, to employ some millions of additional working capital. They therefore agreed to sell to the International Financial Society out of their holding of the Imperial Tobacco Company of Canada's shares 1,000,000 shares, the treasury intimating that it raised no objection to the sale under certain conditions. The International Financial Society, through the National Provincial Bank of England and Lloyds Bank, is now offering to the public 1,000,000 shares of the Imperial Tobacco Company of Canada which it recently acquired. The shares were purchased at 17s. each, the society paying a commission of 3d. per share and the whole of the expenses involved in offering them to the public. The price of issue is 19s., at which figure they offer a yield of 7½ per cent. on the assumption that the dividend continues to be 7 per cent., the rate of distribution for the year ended September 30, 1916. The Imperial Tobacco Company of Canada has been successful, and its net profits, exclusive of its interest in the undivided profits earned by associated companies, were £566,400 for the year ended September 30, 1916, or nearly £90,000 in excess of the amount required to pay 6 per cent. on $1,650,000 of preference capital and 7 per cent. on the $27,002,500 of ordinary shares issued and outstanding. The company possesses reserves aggregating £375,000, and carried forward over £200,000 at the end of September of last year. The shares now offered to the public for subscription must therefore be considered quite an attractive investment, especially as there is every likelihood of the dividend being ultimately raised above the present level of 7 per cent. The British-American Tobacco Company benefits directly by the sale of the shares by being placed in possession of funds needed to enable it to purchase leaf tobacco at the high prices now ruling, and no doubt in due course the shareholders will derive adequate advantage from the additional capital employed in the undertaking.

The Excelsior Life Insurance Company, Toronto, has subscribed $200,000 of the Victory war loan. The company is also buying bonds for its employees who subscribe, allowing them to make payments of the same in ten monthly instalments.

SOVEREIGN LIFE'S SUBSTANTIAL SUBSCRIPTION

Dr. H. J. Meiklejohn, managing director of the Sovereign Life Insurance Company, Winnipeg, states that the company has bought $100,000 Victory Loan bonds.

The company took $60,000 of the first loan and repeated this service in the case of the second war loan, and also in the case of the third.

The Sovereign Life commenced business 15 years ago and has assets of $1,000,000. It had a total net income last year of $250,000, and has about $6,000,000 in insurance in force. Mr. R. R. Scott is the president, and among the directors are: Messrs. D. E. Williams, C. M. Simpson, George Grisdale, G. N. Jackson, Alex. Melville, E. E. Sharpe, R. G. Macdonald, John MacClelland and William Grayson.

MARYLAND ASSURANCE CORPORATION TO ENTER CANADA

"It is not likely that we will enter Canada immediately, for I understand that the law requires a company to be five years old before it can be qualified in the Dominion. This is a matter of regret to me, for I would like to qualify the corporation immediately." This was the statement made to *The Monetary Times* by Mr. John T. Stone, president of the Maryland Assurance Corporation, Baltimore.

The Maryland Assurance Corporation was formally organized at a meeting held recently at Maryland. The corporation starts with its entire capital of $500,000 subscribed. The par value is $10.00 per share, and the selling price $16.00 per share, the additional $6.00 providing a paid-in surplus of $300,000. There are 441 stockholders, of whom 186 are agents of the Maryland Casualty Company, distributed over thirty-six states, besides Cuba and Mexico. One hundred and ten of the officials and employees of the Maryland Casualty Company are also stockholders.

At a meeting of the full board of directors the following officers were elected:—John T. Stone, president; F. Highlands Burns, vice-president; Richard H. Thompson, vice-president for the accident and health department; Alfred G. Portch, secretary-treasurer and actuary; Walter L. Clark, general counsel; and an executive committee consisting of Messrs. John T. Stone, Jas. L. Sellman, Edw. L. Robinson, Wm. J. Donnelly, and Leon E. Greenbaum.

The capital stock of the corporation will all be paid in not later than December 1st, and the corporation will qualify in the various states during the month of December, so as to begin active writing of life, accident and health insurance business throughout the country on the first day of January, 1918.

The corporation has been fortunate in securing the services of Mr. Alfred G. Portch as secretary-treasurer and actuary. Mr. Portch is president of the Actuarial Society of America and is now chief actuary for the Franklin Life Insurance Company of Springfield, Ill. His service in the Maryland Assurance Corporation will begin November 15th. He was a member of the committee of twelve insurance experts who were called in by Secretary of the Treasury McAdoo as advisors in formulating the Federal insurance law for soldiers and sailors.

The Maryland Assurance Corporation will have offices in the annex of the Maryland Casualty Company, formerly the Sexton Building, on South Gay Street, near Baltimore.

The directors of the Corporation are as follows:—Alexander Brown, F. Highlands Burns, Walter L. Clark, Chas. H. Classen, John W. Donahue, of Philadelphia, Wm. J. Donnelly, Henry S. Dulaney, Harry G. Evans, Robt. Garrett, R. Walter Graham, Leon E. Greenbaum, Louis K. Gutman, P. A. Kahle, of Lima, Ohio, W. M. McCormick, J. Wm. Middendorf, J. Henry Miller, J. W. Rausch, T. L. Robinson, Ernst Schmeisser, Jas. L. Sellman, John T. Stone, Chas. J. Taylor, T. T. Tongue, Samuel L. Willard, Geo. T. Wofford, of Johnson City, Tenn.

The whaling fleet of the Victoria Whaling Company has finished work for the 1917 season, and has put up for the winter at the company's dock in Victoria, B.C. The total catch for all vessels for the season is about 400 whales, which represents the work done at three stations, namely, Kyuquot, Sechart and Rose Harbor.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Cobourg, Ont.—November 14—Public school destroyed. Insurance was carried in the following companies:—Queen, $4,000; Northern, $2,000 Liverpool & London & Globe, $2,500; Caledonian, $2,500; Norwich Union, $2,500; Hartford, $2,000; Guardian, $3,500. Total, $19,000.

Devon, N.S.—November 9—Mr. A. Halty's frame house destroyed.

Edmonton, Alta.—November 10—Mrs. Sear's residence completely destroyed. Estimated loss, $1,500.

Euphrasia Township.—November 15—Mr. H. Dawn's barn and contents destroyed. Estimated loss, $3,000; total insurance, $800. Fire spread to another barn, which was also destroyed; owners of the grain were Mr. J. Camplin and Mr. H. Neil, they have no insurance. Cause, fire from cutting box.

Fredericton, N.B.—November 16—Miss M. O'Brien's residence badly damaged; occupant, Mr. M. Dennison.

Gagetown, N.B.—November 8—Mr. Fred. W. Cooper's barn and several small outbuildings destroyed. No insurance carried.

Georgetown, P.E.I.—November 10—Mr. Chas. Bulmer's dwelling house destroyed. Partial insurance carried.

Halifax, N.S.—November 17—Mrs. J. E. McDonald's barn and contents destroyed. No insurance carried.

Port Burwell, Ont.—October 29—Mr. Hobbs' residence destroyed. Partial insurance carried.

Toronto, Ont.—November 15—Mr. Joseph Cohen's building badly damaged. Estimated damage to building, $200; to contents, $2,000.

Vancouver, B.C.—November 12—Hastings' lumber mill badly damaged.

Viking, Alta.—November 15—Mr. Place's barn and contents destroyed. Estimated loss, $5,000; insured for $1,600.

October 28—Frame dwelling house; Mr. R. S. Dunlop; Mr. J. Clinskill; unknown; $145; $25; London & Lancashire; nil; $1,000; $1,000.

Vancouver, B.C.—Fire Chief Carlisle reports the following losses for the month of October to *The Monetary Times*:—The fire department responded to 65 alarms during the month of October, as follows:—Fires where damage occurred, 11; fires where no loss resulted, 4; false alarms, 22; chimney fires (no loss), 15; test runs, 1; services not required, 7; smoke scares, 3; and fire breaking out again, 2. The estimated total damage resulting from fires for this period was $8,261, of which $7,305 was covered by insurance, leaving the property loss above insurance as, $956. The total value of the property involved was $215,450.

On October 8th, at 4 a.m., a fire occurred at a house (dwelling), 631 Dunlevy Avenue, owned by Richards, Ackroyd & Gall, and occupied by Miss E. Gaume, the latter, however, being away at the time. The damage amounted to $800, of which $700 was covered by insurance. The cause of the fire is unknown.

On October 26th, at 8.45 p.m., a fire occurred in a dwelling house, 1357 Pender Street West, owned by Mr. W. S. Collister, and occupied by Mrs. A. Hughes. This fire, which proved to be of rather a serious nature on arrival of the department, was caused by a spark from the fireplace in the hallway, falling on a rug. The damage resulting, amounting to $6,891.90, of which $6,300 is covered by insurance.

The following shows the cause of fires and alarms for the month:—Carelessness with cigarettes, matches, etc., 1; children playing with matches, 1; chimney fires, 15; electrical origin, 1; test runs, 1; false alarms, 22; fire breaking out again, 2; flying sparks, 4; light near gasolene, causing explosion, 1; hot ashes placed in wooden box, 1; overheated furnace, 2; services not required, 7; smoke scares, 3; spontaneous combustion, 1; tar pot on fire, 1; and unknown, 2.

The Fire Underwriters' Association inspectors, having finished their investigation of this department, the alarm system, water supply, pressure, etc., their report, completed, will no doubt be forwarded to you in due course. Total number of alarms, 65; false alarms, 22; total value of property involved, $215,450; total loss (estimated), $8,261; insurance paid (estimated), $7,305; loss above insurance, $956.

Victoria, B.C.—October 28—E. W. Whittington Lumber Company's filing shop and part of factory. Estimated loss on stock, $830; on buildings, $500; insurance on stock, $100; carried in the Mount Royal Insurance Company; on buildings, $500; and machinery, $730; carried in the Pacific Fire and Boston Insurance Company. Cause, spontaneous combustion.

Winnipeg, Man.—November 1—Home Bank of Canada building. Estimated loss, $300. Insurance on stock, $1,750; on buildings, $22,000. Total insurance, $23,750; carried in the Mercantile Insurance Company.

ATTEMPT TO DEFRAUD INSURANCE COMPANIES

Ernest Barnes, of Toronto, was tried on October 3rd and 4th in the sessions for the county of York, before Judge Coatsworth on the grounds of perjury and attempt to defraud insurance companies.

Barnes had a fire in a stable upon which he had an insurance of $500 on the building and $500 on the contents. The loss was adjusted by Mr. R. A. Graydon for the National Ben Franklin for $425 on the building and $300 on contents. The proof of loss was signed by Barnes before Mr. Graydon as a justice of the peace, and he declared therein that there was no other insurance. A few days later John Kay adjusted a loss for Barnes on the same stable insured in the Hartford for $200, and he again declared in the proof of loss signed and sworn to before Mr. Kay as a notary public that there was no other insurance. The loss of the National Ben Franklin was at once paid, but we noticed the apparent dual insurance in time to stop the Hartford from paying.

Deputy Fire Marshal Lewis investigated, and as a result Barnes was arrested and committed for trial. On the purely technical ground that the affidavits taken by Messrs. Graydon and Kay were not in the form prescribed by law, the perjury charge was dismissed, but he was found guilty of attempting to defraud and was sentenced to 15 days in jail. It is important that the proofs of loss forms furnished by the companies should in all respects conform to the requirements of the Ontario law.

VICTORY BONDS AS CHRISTMAS GIFTS

There could be no more appropriate Christmas gift in 1917 than a Canadian Victory bond. Let every patriotic Canadian this year determine not to waste money on Christmas gifts of no value, gifts that would merely indulge appetite or vanity.

Let every patriotic Canadian substitute for such gifts the one present which would be of genuine value to the recipient and at the same time help to win this great war for freedom against despotism, namely, a bond of the Dominion government.

Every Canadian who contemplates making a Christmas gift of jewelry or other expensive thing should immediately decide to give a Victory bond instead. Wives, sweethearts, children would rather have a Victory bond than anything else that could be offered to them.

Every Victory bond a Canadian citizen buys will arm and equip our gallant soldiers and sailors; will help to make them invincible in the fight. The more invincible we make them the more quickly the war will be ended.

By the destruction of the Kaiser's brutalized rule of the bayonet the more quickly "Peace on earth, good will toward men" will be restored.

Christmas Day, 1917, should be a time of rededication and reconsecration to the cause of freedom and humanity throughout the world, to Christian ideals. We must be prepared to make infinite sacrifices to secure this result.

The least we can do is to give up something of our pleasure, something of our comfort, something of our convenience, something of our needs, and to employ all the savings we may thereby effect to strengthen the hands of our government and to support our gallant men on the battlefields.

LIFE INSURANCE IN CANADA

The present year, despite the war, will probably prove to be the best in the history of Canadian life insurance, so far as new business written is concerned. The record of 1913, when $231,608,000 of new business was written, may be surpassed. A large volume was transacted in 1916, when $231,101,000 of new insurance was placed on the books of the companies doing business in this country. The companies have naturally suffered through extra mortality, the war claims paid by Dominion licensees up to the end of 1916 amounting to $6,518,088 and the war claims for 1916 being 26 per cent. of the total claims of the year. The companies, however, are, as a group, in a strong financial position and anticipate another good year in 1918.

What are the principal requisites for the proper development of this business? The question was well answered by Mr. G. D. Finlayson, Dominion insurance superintendent, in a recent address to the Montreal Life Underwriters' Association. First of all, he placed the greatest importance on making insurance so sure that the agent can with a clear conscience urge his policies upon his prospects. This can best be assured by the companies in seeing to it that the funds of the policyholders are properly invested. As Mr. Finlayson truly said, the question of investments is at the very basis of the success of life insurance and the nature of the investments of a company is of such importance as far to outweigh any other feature by which the success of a company is generally gauged. This essential element cannot be ignored, however much we emphasize other important elements such as large profits, liberal policies, attractive premiums. "If we are to make an appeal with confidence to the public to entrust to us the guardianship of their dependents' funds," said Mr. Finlayson, "we must see to it first of all that those funds are sacredly preserved."

The next need would appear to be to get insurance into the individual budget. Having done that, the third step must be to get the individual budget within the individual income, for we may take it for granted that if the budget, main or supplementary, exceeds the income, the less pressing and more remote needs are certain to be sacrificed in the interests of the liabilities more nearly at hand, and it is not to be wondered at in such an event if among the first items to be struck from the budget will be found the insurance premium. Finally, Mr. Finlayson emphasized the importance of resolution and straightforwardness in the personnel of the field forces. "Without that, all the artificial aids that can be summoned to its support must fail to give to life insurance its proper place in the development of the nation."

RURAL PLANNING AND DEVELOPMENT

While after the war European nations will need restoration and reconstruction, Canada will need conservation and development. That the period of pioneer achievement is not over in this country but has entered upon a new phase, is one of the points emphasized in the valuable report of Mr. Thomas Adams on rural planning and development, just issued by the Commission of Conservation, Ottawa. The question is not whether we will grow but how we will grow. Mr. Adams, who has made a life study of his subject, points out that, broadly speaking, we require to lay emphasis on the following needs as a means of conserving human and natural resources in connection with any policy inaugurated in the future:—

(1) The planning and development of land by methods which will secure health, amenity, convenience and efficiency, and the rejection of those methods that lead to injurious speculation.

(2) The promotion of scientific training, improved educational facilities and means of social intercourse.

(3) The establishment of an efficient government organization and improved facilities for securing co-operation, rural credit, and development of rural industries.

Out of the total area of 2,306,502,153 acres of land in Canada, it is computed that 358,162,190 acres of land are capable of being used for productive purposes. The population of the Dominion in 1911 was 7,206,643 or 1.9 persons to each square mile of territory. We have 35,582 miles of railway, or about one mile to every 200 persons, providing means of distribution by railway in advance of the needs of commerce. The natural resources may be said to be unlimited in extent, subject to proper conservation and development; and the means of distribution by main railways may be regarded as capable of no limitation in meeting demands for many years to come. But, while there is practically an unlimited quantity of natural resources, and of railways to distribute them, we are limited in the economic use to which we can put them. "Wealth is produced," Mr. Adams reminds us, "not from the existence of natural resources but from the conversion of these resources into some form for human use. Canada is seriously limited in actual resources by the extent to which it lacks sufficient population to apply the human activity necessary to adequately use and distribute its resources. Hence there is nothing so vital in the interests of production in Canada as to conserve and develop human life—not merely to conserve the physical qualities, but also to develop the intellectual qualities." Mr. Adams' volume is well worth a careful perusal by those who have in hand the problems of national development.

NEW INCORPORATIONS

Toronto, Ont., Charters Shipbuilding Company With $1,000,000 Capital

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of the paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

The following were the largest companies incorporated last week:—

The Great West Chemical Corporation, Limited, (non-personal liability), Port Arthur	$1,500,000
Dominion Shipbuilding Company, Limited, Toronto	1,000,000

Nanaimo, B.C.—Straits Fish Company, Limited, $40,000.

Cranbrook, B.C.—The R. H. Ranch Company, Limited, $25,000.

Dorval, Que.—Descary, Limited, $20,000. J. H. Descary, C. C. Descary, A. Descary.

Hamilton, Ont.—R. B. Hill, Limited, $75,000. F. B. Hill, M. J. Hill, S. D. Biggar.

Chicoutimi, Que.—La Compagnie Jalbert, Inc., $50,000. H. Jalbert, S. Simard, D. Michaud.

Eden Mills, Ont.—Eden Mills Town Hall Association. W. Argo, R. Luck, A. E. Ramsay.

Kitchener, Ont.—Kitchener Realty, Limited, $40,000. G. H. Gilday, J. Warburton, H. H. Polley.

Amherst Harbor, Que.—R. J. Leslie Company, Limited, $49,000. H. S. Ross, E. R. Angers, H. M. Gardner.

Hawkesbury, Ont.—The Canadian Gambite Company, Limited, $100,000. J. S. Lovell, W. Bain, R. Gowans.

Three Rivers, Que.—Three Rivers Fur Works, Limited, $10,000. M. M. Edouard, Jockel A. Spenard, E. Buisson.

St. John, N.B.—Maritime Tire and Rubber Company, Limited, $99,000. C. E. Farrand, W. F. Porter, C. L. Bustin.

Otterville, Ont.—George L. Williams and Sons Company, Limited, $40,000. G. L. Williams, F. G. Bullock, J. W. Fish.

Walkerville, Ont.—The Walkerville Brick and Tile Company, Limited, $40,000. H. H. Howe, J. T. Ferguson, A. J. Gordon.

Port Arthur, Ont.—The Great West Chemical Corporation, Limited (non-personal liability), $1,500,000. R. J. Allman, A. Plenty, S. A. Wilson.

Victoriaville, Que.—Victoria Doll and Toy Manufacturing Company, Limited, $199,000. H. E. Bourdeau, L. Caron, G. E. Desmarrais.

Toronto, Ont.—Dominion Shipbuilding Company, Limited, $1,000,000; J. M. Bullen, H L. Steele, J. H. Fraser Lynhurst Hospital, Limited, $40,000; H. G. Fox, V. Aull, O. A. Momsen.

Windsor, Ont.—Robert H. Hassler, Limited, $50,000; J. W. Bicknell, A. T. Maher, J. S. Duggan. Thompson Brothers, Limited, $60,000; W. Thompson, H. A. Thompson, L. H. Weirs.

Vancouver, B.C.—Business Accessories Sales Company, Limited, $25,000; National Fish Company, Limited, $10,000; the Malkin-Pearson Company, Limited, $100,000; Aeroplane Spruce Lumber Company, Limited, $25,000.

PERSONAL NOTES

Mr. J. D. McNabb, C.A., has been admitted into partnership with the firm of Robertson, Robinson, McNabb & Company, chartered accountants, Toronto.

Mr. E. P. Heaton, fire marshal of Ontario, has been elected a member of the executive committee of the Fire Marshals' Association of North America.

Mr. William Farrell is chairman of the British Columbia provincial committee, Victory Loan campaign. He is manager of the British Columbia Telephone Company, and has other interests in the province.

(International Press Photo.)
T. H. HALL.

Mr. T. H. Hall has been appointed vice-president and general manager of the General Accident Assurance Company of Canada, Limited, Toronto. Mr. Hall is Canadian manager of the General Accident Fire & Life Insurance Company. He is an Ontario man, and was educated in Toronto. He has been in the insurance business for a number of years, having joined the London & Lancashire Fire Insurance Company as junior in 1880, working up through all departments to chief inspector, covering a period of 19 years. He spent two years at Waterloo, Ont., for the company whilst purchasing the Mercantile Fire Insurance Company. A few years later Mr. Hall went to Quebec to assume charge of the Quebec Fire Insurance Company, purchased by the London & Lancashire Fire Insurance Company for the purpose of reorganizing same, which he successfully accomplished. He was appointed manager of the General Accident Fire & Life Insurance Company, Toronto, in 1908. He organized the General Accident Fire & Life Insurance Company, Toronto. He was vice-president of the Canadian Fire Underwriters' Association in 1915-1916, and is now president of the Association. Mr. Hall is a director of the Standard Financial Agency. He is well known both in fire and accident insurance circles and is generally regarded as a very capable underwriter.

Mr. Graham A. Bell has been appointed a government director of the Canadian Northern Railway in succession to Senator Richardson, of Kingston. Mr. Bell has been 15 years in the department of railways, Ottawa, dealing with legislation affecting the government's financial relations with the railways.

Mr. C. Price-Green has been appointed industrial commissioner of the Canadian Northern Railway system with headquarters at Toronto. The appointment is made in anticipation of the industrial reorganization and development which will follow the conclusion of peace in view of the great number of industrial opportunities on the lines of the Canadian Northern system. The aim of the department is to locate industries and to develop the natural resources along the company's lines. Mr. Price-Green joined the staff of the Canadian Northern at Toronto in 1906 to take charge of the passenger business of the then newly-opened line between Toronto and Parry Sound. He has travelled extensively, especially in the outlying sections, and has an intimate knowledge of the Dominion and of its resources. He has a pleasing personality and is a ready writer.

Colonel W. K. McNaught is the efficient chairman of the Toronto industrial committee for the Victory Loan, not Mr. S. R. Parsons, as noted last week. Mr. Parsons is chairman of a special provincial advisory committee of manufacturers in connection with the Loan.

Mr. E. L. Pease, vice-president and managing director of the Royal Bank of Canada, was re-elected president of the Canadian Bankers' Association at the annual meeting of that body last week. The other officers of the association were also re-elected, and no change was made in the members of the council. The officers of the association for the ensuing year will therefore be: Honorary presidents, Sir Edmund Walker, Sir Vincent Meredith and Sir George Burn; president, Mr. E. L. Pease; vice-presidents, Sir F. Williams-Taylor, Sir John Aird, Mr. C. A. Bogert and Mr. H. A. Richardson.

(International Press Photo.)
H. C. WRIGHT.

Mr. H. C. Wright has been appointed assistant general manager of the General Accident Assurance Company of Canada, Toronto. He was born at Stansted, Essex, and educated at Bishop's Stortford College, Strand School, King's College, London, Eng. He came to Toronto in 1911, and was a junior in the office of the London Guarantee & Accident Company, in the company's head office in London, Eng., first in the statistical and later in the foreign department, for a period of one year. Later he joined the Canadian head office of the company in Toronto, with charge of personal accident department. He acted as special representative for that company at Calgary and Halifax, and finally returned to the Toronto office to take charge of the Canadian liability department. Mr. Wright was rejected from army service in May, 1916, and was an unsuccessful applicant for navy service in May, 1917.

Mr. Frank Scott, vice-president of the Grand Trunk Railway Company, has been elected a director of the Guarantee Company of North America. The other directors are: Messrs. H. E. Rawlings, president Wm. McMaster, vice-president; Sir Vincent Meredith, E. F. Hebden, James F. Forgan, Hon. E. C. Smith, Philip Stockton, John Macdonald, Thos. de Witt Cuyler and Sir Augustus Nanton.

Mr. Wm. Hendry, one of Canada's pioneer life insurance men died on November 18th. Shortly after the organization of the Ontario Mutual Life Insurance Company in Waterloo, the second company of its kind in Canada, he was engaged as manager, and continued in this capacity until 1897, when he retired. He was well known in the insurance world, and was a charter member of the Actuarial Society of America. He is a native of Aberdeen, Scotland.

LONG-TERM BONDS FAVORED

Those buying the long-term Victory bonds have a distinct advantage, because after the war there is good prospect that the government credit will be re-established at least on a 4 per cent. basis, which will mean an advanced value for the bonds.

Canada's Victory Loan

SERVE your Country by subscribing to the Victory Loan. It is your duty as a citizen. If you have not got the money on hand, we will make advances for moderate amounts on favorable terms, to enable you to do so.

We will look after your subscription, and keep your bonds in safe-custody, free of charge, for one year.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Quebec, Que.—Hon. Jeremie L. Decarie, provincial secretary for the province, submits the financial statement of school corporations for the year ended June 30th, 1915. He remarks:

"For the first time those corporations have been called upon to submit a detailed statement of their financial administration. You will see, in the two tables composing this volume, the cash operations and the balance sheet of each corporation on June 30th, 1915. Several secretaries sometimes find it embarrassing to furnish a statement in accordance with the form of report sent them for the purpose. This has entailed lengthy correspondence, which has delayed the printing of this report. Formerly, the department of public instruction required the secretary-treasurers of school corporations to furnish certain information relating to the cost of education, but, however interesting such reports were, they were not a rendering of accounts.

"The financial statement I now submit will be as a supplement to the Municipal Statistics, and enable brokers dealing in bonds to have the exact and official figures they need for ascertaining the credit of a school municipality desiring to obtain a loan. The Bureau of Statistics has undertaken the publication of this work, with your authorization, to meet the request often expressed by those business men. The report is divided into two tables. The first shows the basis for the imposition of the school tax and the balance sheet of each corporation, while the second contains a summary of the cash operations for the year ended June 30th, 1915. Below will be found an enumeration of the contents of those two tables for the whole province.

STATISTICAL SUMMARY.

Basis for Imposition of School Tax.

Number of proprietors paying the assessment	373,110
Number of persons paying the monthly contribution	141,552
Estimated value of taxable immovable property	$1,270,422,610.00

Balance Sheet of School Corporations—Assets and Liabilities.

Assets.

Balance in hand on June 30th, 1915	$	1,197,499.76
Estimated value of immovable property belonging to school corporations		32,681,868.32
Estimated value of movable property belonging to school corporations		2,019,817.13
Amount of arrears of assessment or of monthly contributions		1,375,898.13
Other amounts due corporations		1,267,274.77
Total	$	38,542,358.11

Liabilities.

Amount of unredeemed bonds	$	17,732,581.43
Amount of other loans, not repaid		4,678,089.48
Amount of other debts		2,289,955.80
Total	$	24,700,626.79

Receipts and Payments.

Receipts.

Balance in hand on July 1st, 1914	$	1,350,016.18
Amount collected on arrears of:—		
Ordinary assessments		542,099.50
Special assessments		35,843.08
Monthly contributions		41,542.00
Amount collected for 1914-15 on:—		
Ordinary assessments		4,581,131.06
Special assessments		485,949.69
Monthly contributions		307,270.71
Amount of government grants		577,634.87
Amount from loans in 1914-15		
Long-term loans (bonds)		3,288,870.03
Temporary loans (obligations or notes)		2,546,364.19
Other amounts received		629,815.80
Total	$	14,386,537.08

Payments.

Salaries paid teachers	$	3,430,152.57

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER
25 West Broadway New York, N.Y.

to be $4[illegible] as against $229,067 last year, or $[illegible] more.

The expenditure for the period of nine months on account of Central Administration [illegible] $4[illegible] as compared with $5[illegible],132 last year, or $[illegible] less.

The various departmental expenditures are being fairly well maintained within their respective appropriations with the exception of the streets department, the estimates of which, amounting to $99,597, increased by the recent additional [illegible] voted by council of $3,500, or $103,097 in all, will promise to be insufficient to meet requirements for the balance of the current year. Up to September 30th the expenditures of the department amounted to $91,965.

As far as may be practicable, it would be desirable, suggests city comptroller Mitchell, that departments should endeavor to regulate their expenditures on a proportionate monthly basis with a view to ensuring that their appropriations may not be exceeded in the aggregate.

Mr. David Mitchell, city comptroller, has just prepared two statements of interest in regard to the city's finances: (1) Comparative statement of revenue and expenditure (Central Administration) for the nine months, 1916 and 1917, respectively. (2) Comparative statement of revenue and expenditure of the city's public utilities for the same period, with the summary of net results of operation.

With regard to the latter statement, the only "unfortunate" amongst the city's utilities is that of the street railway, the net deficit on its operation for the present year being $129,521 as against $83,659 for last year. To some extent this showing is due to the effects of the recent strike in the railway department, together with a number of damage claims which arose in the earlier part of this year. In other respects the utilities continue to make a fair showing, the net deficit, including all utilities, being $32,524 as against $14,484 for last year.

As indicating the considerable reductions that have been made in the city's staff of employees the following figures are of interest:—

	Dec., 1914.	Dec., 1915.	Oct., 1917.
General Administration (including fire and police)	653	471	260
Public utilities	806	530	399
	1,459	1,001	659

Montreal, Que.—The following table shows how the heavy tax exemptions in Montreal are made up:—

Dominion government	$13,417,190	
Provincial government	4,917,500	
Harbor commissioners of Montreal	24,153,250	
		$ 42,487,940
Corporation of Montreal	$56,405,200	
Streets	1,478,351	
		57,883,551
Churches, synagogues, presbyteries, parsonages, etc.	$12,210,755	
	7,938,830	
	1,838,650	
	767,134	
	441,525	
		23,196,894
Schools	$27,553,876	
	14,273,910	
		41,827,786
Religious and benevolent institutions	$11,312,485	
	6,022,610	
	2,494,750	
	697,600	
		20,527,445
General (includes athletic associations and institutions of that nature), hospitals, etc.	$ 5,054,350	
		5,054,350
By-law or agreement (exempt as per agreement before annexed to city)	$15,157,060	
		15,157,060
		$206,135,026

Lethbridge, Alta.—Messrs. Henderson, Reid and Paterson, auditors, submit the following excellent report on the city's finances:

The subject of the collection of arrears of taxes is still one of very great import and it should be pointed out that the [illegible] has been a falling-off in this regard as compared with that of 1915 of approximately 2 per cent., or a cash equivalent of $9,000. The actual figures for cash [illegible] $[illegible],591 [illegible] while the cash for 1915 was $[illegible].

It will be noted that liability has been incurred during the year in the form of three-year treasury bills to the extent of $188,000. The second issue amounting to $100,000 was for the purpose of temporarily financing the construction of the waterworks filtration plant and it is fully intended that a debenture issue will ultimately be made for this expenditure thereby refunding the advance made in this way out of the city's surplus. It will also be observed that the form in which the unexpended debenture funds were held has been largely liquidated through the sale of bonds and that these are now in a form whereby action as to their further disposition can be actively considered. This is a matter worthy of the serious deliberation of the council. It should be mentioned in this connection that part of these funds—viz.: $115,000, presently acts as collateral security to arrears of taxes on behalf of the holders of treasury bills, a situation which is somewhat unique in charter powers, but should be tardily exercised if at all.

The operation of the various departments for the year has resulted in each case, with the exception of that of the street railway, in a surplus, as will be seen by referring to the revenue and expenditure statements. As has been the custom of recent years the deficit upon operations of the street railway has been provided out of the general tax levy. It will be noted that the surplus returned by the city general department is a substantial one and must be considered a gratifying result in the light of the manner in which the estimates were prepared. The analytical appendices show very clearly how this result has been achieved. The sub-departments have in the aggregate all contributed to this result which is worthy of special mention.

The waterworks department, in spite of increased earnings and largely owing to the expense of chlorination and increased fixed charges shows a very small surplus for the year. In view of these additional charges the policy of allowing discount on water bills was discontinued towards the end of the year and a penalty of 10 per cent. for non-payment within a specified time was substituted. Owing to the reduced cost of electrical power a rebate of $3,200 from the charges made during the year for pumping was allowed by that department. The results of the operation of the electric light and power department shows a very substantial increase over that of 1915 and a fair index of the increased earnings can only be obtained by making due allowance for the rebate referred to in reviewing the operations of the waterworks department. The street railway department has again shown improved returns and the increase in earnings is marked. This is the first fiscal period wherein the benefit from the operation of the "one-man" system is fully obtained. There was purchased towards the close of the summer season for the benefit of this department a merry-go-round, and while the direct returns from this amusement were not equal to the charges passed on this account, it will be noted that the item of depreciation is approximately one-third of the cost.

There has been debited against the revenues of each utility amounts covering taxes, debenture principal redeemed or sinking fund instalments and debenture interest. No provision against depreciation has been made other than that provided through the operation of bonded debt redemption. The status of the city's sinking fund has changed considerably since last presented. The redemption of bonds pledged against temporary borrowings has been completed, and the matter of the Young Men's Christian Association mortgage loan is receiving attention in the form of the preparation of a by-law for submission to the ratepayers and providing that this be ratified in the usual way the sinking fund claim will be satisfied from the proceeds of the sale of the subsequent bond issue. The satisfaction of the indebtedness of the city on arrears of instalments is wholly dependent on the collection of arrears of taxes and whether process in this direction be speeded or deferred, is the many-sided problem which the council has long found itself confronted.

Messrs. Scott and Walmsley, Limited, 32 Church Street, Toronto, and the different insurance companies that they represent have subscribed for $310,000 of the Victory Loan, to which should be added personal subscriptions for the staff, bringing the total up to $330,000.

VALUE OF THE FIRST $100

Shaughnessy Tells of It — His Company Will Subscribe Ten Millions to War Loan If—

Here is Lord Shaughnessy's story of his first $100, as told at a Victory Loan meeting at Montreal:

"In the early days, nearly 50 years ago, when my salary was a modest one, but in excess of that received by most of the young fellows with whom I associated, the portion of the monthly pay which I felt justified in appropriating to my own use disappeared regularly and rapidly, with nothing to show for it. I conceived the idea of calling on an acquaintance, the cashier of a private bank, to ask if he would loan me $100 at the current rate of interest, against my notes in monthly amounts covering the period of six or eight months. In those early days bank cashiers and managers were more considerate and confiding than they are in these times, and he agreed.

The notes were made and turned in and $100 in currency was handed to me, which I immediately placed to my credit in the savings department. The cashier did not understand the novel transaction, and asked the purpose. I told him that those notes would be personal obligations that I would meet each month as they became due, and that at the end of the period I would have a bank account of $100, and so it worked out. The notes were met without causing any special inconvenience, and during the few following years of varying fortune that amount of $100 never grew less. Indeed, if there be anyone present to whom I owe money he may be gratified to know that I still have it."

LORD SHAUGHNESSY,

President, Canadian Pacific Railway, which has subscribed $5,000,000 to the Victory Loan and will subscribe $5,000,000 more if a total of $300,000,000 is subscribed. *(The Monetary Times Photo.)*

Large Subscription Made.

The Canadian Pacific Railway has subscribed $5,000,000 to the Victory Loan and will make it $10,000,000 if the people of Canada see to it that the loan is subscribed to the extent of $300,000,000. Lord Shaughnessy, president of the company, writing of the loan, says:—

"The ordinary government loan is usually of interest chiefly to the banker, the trustee, the large corporation and the regular investing public, but the success of the new Victory Loan of $150,000,000 vitally concerns every Canadian wage-earner, every mechanic, every farmer, every salaried employee. Without this loan Canadian industry and agriculture and business must come to a standstill, representing as it does the capital necessary to finance the purchase of food and army supplies for the Allies and for our Canadian armies at the front, supplies which represent a very large proportion of our total agricultural and industrial production. These supplies are produced by Canadian labor, which must go unpaid unless the necessary capital is forthcoming. That capital, moreover, must come from the savings of the Canadian people, as under present circumstances it cannot be borrowed from abroad.

Is a People's Loan.

"This loan is and should be a people's loan. The present war is not a banker's war, nor a war for large financial interests, but is a war which champions the rights of free peoples. It is the bounden duty, therefore, of every Canadian freedom-loving citizen to become a bondholder in this loan, as it were to become a bondholder in the company of free peoples, and to help with cash if he or she cannot take a place in the fighting ranks.

"The banks, the large companies and the employers will no doubt give and give generously, but it is from the great army of the people that most of the money must come. In many concerns the employee will be helped by his or her employer to purchase bonds on easy instalments. There could not be a safer or better investment. These bonds bear good interest, and have behind them the guarantee of the whole Canadian people. The government in asking the Canadian people to make this loan is therefore asking for no sacrifice. It is asking only for co-operation, which at the same time will ensure prosperity for the people who lend."

VICTORY LOAN BONDS CAN BE REGISTERED

As announced first in *The Monetary Times* of November 9th, the privilege of full registration as to principal and interest has been extended to Victory Loan bonds of $50, $100 and $500 denomination. Previously, the full registration privilege of both principal and interest did not extend to bonds below $1,000 denomination. In consequence of this decision the deputy minister of finance has requested all banks to accept subscriptions for the bonds indicated with full registration privilege, if so desired by subscribers.

It has also been decided to permit subscribers to make payments in full on December 1st, if desired, upon the basis of the payment figures calculated as on January 2nd.

CREDITS PROVIDED BY OUR BANKS

Throughout the summer of 1917 the banks were required to provide very large credits in connection with the Canadian exports of dairy products, which attained record-breaking values, says the Journal of the Canadian Bankers' Association. Early in the fall two special credits, only surpassed in magnitude by the munition credits, were arranged. One of them, amounting to $75,000,000, was designed to facilitate purchases of Canadian packing house products by the British government; and the other, amounting to $80,000,000, provided for the British purchases of Canada's 1917 grain crops. These, like the munition credits that preceded them, necessarily impose a heavy strain on the banks. In both cases the amounts to be advanced are much in excess of the peace-time requirements. The operations of the leading packers have expanded beyond the ante-bellum limits, and they require larger "lines" to enable them to buy their animals and carry the products. To enable them to compete with the United States for British orders, Canada is obliged to do what the United States are doing—take payment in part in British securities. In connection with the grain credit it is to be remembered that the special credits to the British agents will replace, to a certain extent, the loans which the banks ordinarily make to private dealers and exporters; but, after making due allowances for that, it seems probable that the aggregate of grain loans during the season of 1917-1918 will be greater than usual—the prevailing high prices make that result very probable.

The British securities taken in case of the munition credits may run for an indefinite period, and if the securities acquired through the packers' credit are similarly subject to renewal, there will be a substantial addition to the dead load which our banks are required to carry. As the British authorities are to take up and pay cash for all grain bought under the special grain credit, on its arrival at the seaboard, this will be a more desirable transaction than the munition credits—as the advances will liquefy themselves promptly when the stuff is exported. Later in the season it may be necessary to extend long-dated credit to Britain in connection with the grain sales. These successive special credits, a number of which leave a residue of dead loans to carry, emphasize the necessity of foreign loans. With our foreign trade running as at present, loans in the United States are a necessary counterpart to the credits extended by us to Britain. Unless we get advances to cover a considerable part of our excess of purchases in the United States, our external reserve of quick assets may quickly melt away and a serious situation may develop. The call loans and bank balances we own in New York are just now among our strongest and most valuable reserves, and if they were cut down considerably our whole financial position would be weakened.

CANADA'S
VICTORY
LOAN

The Bonds of the above Issue run in denominations of $50.00 and multiples thereof.

Yielding in excess of 5½ interest, they provide an absolutely safe and profitable investment and afford at the same time, an opportunity for the exercise of Patriotism and Duty on the part of purchasers.

This Bank is prepared to receive subscriptions for and to make advances, upon favorable terms, against these Bonds.

DOMINION TRUST LIQUIDATION

Comment and Explanation on the Items of Realizations and Disbursements

Report of the liquidator of the Dominion Trust Company, statement of the realizations and disbursements, liquidator's comment and explanation: Realizations, $381,269; liquidation expenses, $167,657; expenses re contributories, $8,886; advances to protect assets, etc., $56,528; preferred claims paid, $3,823; cash on hand and in bank, $144,374; total, $381,269.

The first comment to be made with regard to the above statement is, that considering the nominal value of the assets of the company as it appeared in its last published statement before liquidation, it would appear on a cursory view that the realizations as shown above have been phenomenally small, and the liquidation expenses phenomenally heavy. But a closer scrutiny reveals the unrealizable nature of the book assets, the success of the liquidation in realizing a large amount outside of the book assets, the chaotic condition of the company's affairs and, in consequence, the inevitably large expense of the liquidation.

Company's Unsound Condition.

The realizations, amounting to $381,269, when examined demonstrate clearly, the unsound condition of the company's affairs at the time of liquidation. The actual gross amount realized from assets properly so called, that is, assets considered as such when the liquidation began, shown by the company in its last published statement at $4,687,568, only amount to $158,615. The remaining realizations amounting to $222,754 were not shown as assets of the company and are the result of having at law successfully maintained the executor's right of retainer, realizing thereby $186,209, and the earnings of the liquidation, $36,544. The heavy expenditure again arises from the condition of the company's affairs at the date of liquidation; the obligations amounting to $3,673,545; the assets largely speculative scattered from London to Vancouver Island; and the affairs of the company requiring for an extended period the services of expert accountants to reduce the company's accounts to order.

Law expenses, one of the most important items of expenditure, are the result of no less than 102 actions, 71 of which the company was defendant (25 being actions for foreclosure) and in the remaining 31 of which the company was plaintiff. All these actions whether the company was plaintiff or defendant were necessary for the protection of the company's property, and all whether as plaintiff or defendant were under the advice of counsel and the sanction of the court.

The following further comments are made with a view of explaining more fully the above statement: Realizations, $381,269. This amount is composed, as already mentioned, of the following items: General realizatious, $158,515; Arnold estate, $186,209; liquidation earnings, $36,544; total, $381,269.

The item "General Realizations" includes amounts received on account of loans, balances due by clients, estates order of foreclosure. Continuous efforts have been made and trusts, contributories, and shares in other companies.

With regard to realizations, the policy adopted has been to allow reasonable time to those debtors who make an honest effort to meet their obligations, thereby also saving unnecessary law costs.

Arnold Estate Item.

Proceeds of life insurance policies, $208,695; other realizations, $217; total, $208,912. Less—law costs and other expenses re insurance actions now pending, $17,301; general law costs re estate, $4,332; general expenses re estate, $1,068—$22,703; total, $186,209.

A large part of the expenses incurred in connection with the insurance actions now pending will, of course, be recovered if the appeal to the Privy Council is successful.

The liquidation earnings amounted to $36,544. The following accounts are included under this title: Share of interest and profits from mortgage investments, $16,000; interest earned and received since date of liquidation, $11,670; fees and commissions, $7,539; buildings and vaults:—rents, $21,229; less expenses, $19,895—$1,334; total, $36,544.

The first item of $16,000 represents the proportion of interest and profits earned on mortgage investments which were held subject to declarations of trust which require the company to pay a smaller rate of interest than the rate receivable under the mortgage, the difference being retained by the company. An action was commenced by one of the holders of an investment certificate to have the court declare that, as the due payment of the principal and interest was guaranteed by the company, and as the payments were in default, the security should be transferred to the holder of the certificate. It was held, however, and the court of appeal upheld the decision, that the liquidator was entitled to retain these mortgages, making the collections and paying the certificate holders their proportion of the collections as and when received. While this decision has increased the work and responsibility of the winding-up, it has, at the same time, provided an earning of $16,000 which should be considerably increased in the near future. The item "Fees and Commissions" represents chiefly trustees' and other fees and fire insurance commissions received.

The other items appear to require no explanation. As already stated, in addition to the above statement of realizations, the Royal Bank of Canada have collected $110,222 on the security held by them.

It will be seen that the liquidation expenses are divided as between the Vancouver offices and branch offices as follows:—Vancouver office, $126,215; branch offices, $41,441; total, $167,657.

Amount of Salaries.

$46,102 represents the total amount of salaries paid to employees in the Vancouver office from October 27th, 1914, (date of liquidation), to June 30th, 1917. The amount paid in salaries has been reduced from time to time, and I can confidently say that the liquidation has received full value for every dollar paid to employees. It should be noted that as a result of the work of the staff, the liquidation has earned a considerable amount from mortgage investments, fees and commissions, and profits from rents, as shown among the realizations. Further, the amount paid in salaries in this liquidation is unusually large because of the enormous amount of work which had to be done in the course of the winding-up for which no monetary return was received. The company had in its possession a large quantity of papers in safe keeping for clients and also held a large number of appointments as trustee under wills, etc. In a large number of these cases, the company had been a defaulting trustee and no fees were allowed by the court. All of these papers and trusteeships have had to be got rid of, which necessarily placed a considerable amount of work on the staff. This, of course, was inevitable in winding-up a company of this kind. In this connection I might also say that these same considerations have an important bearing on the amount of law expenses incurred in the liquidation.

Law Expenses.

Under the heading "Law Expenses" general $28,591, is included only those law expenses which are not recoverable and which have not been distributed to some other accounts. The account is made up to April 30th, 1917, the accounts for May and June not having yet been taxed. Other law expenses paid by its liquidation are shown under the following heads: "Expenses re Contributories," "Advances of law costs recoverable," "Costs of directors' misfeasance suits," and "Law costs re Arnold estate." In order that it may be better understood how and why the costs of litigation are such an important item in the expenses of the liquidation, two schedules are appended to this report, the one being a list of actions brought against the company, and the other a list of actions brought by the company. These schedules will show clearly the enormous amount involved in the litigation against the company, the condition of each action and, on the other hand, the equally large amount and the important character of the actions brought by the company, and in both cases, the costs either taxed or estimated up to the date of this report.

The principal items of the report are as follows:—Investigations, $21,321. This amount is made up of cost of investigation by provisional liquidator; agency expense, Vancouver; agents' remuneration; expenses re contributories; and costs of directors' misfeasance suits.

Liquidators' fees, $16,[illegible] This includes fees of provisional and permanent liquidator. Branch office expenses, $41,441. Advances as security for costs, $5,437. Advances to protect assets, $17,487. Costs of directors' misfeasance suits, recoverable, $15,856. Under this item it was decided to compromise for an amount of $[illegible]

NO INTELLIGENT CITIZEN can ever appease his conscience if he fails to subscribe to Victory Bonds. They are the only tangible assistance hundreds of thousands of loyal Canadians can give to the winning of the War. A Victory Bond is not a gift, it is an investment; it is not a sacrifice, it is a dollar-for-dollar opportunity. To buy a Victory Bond is a **duty**, but it is a duty which **profits** both the **buyer** and his **country**.

BRINGING A CAPTURED SUBMARINE TO CANADA

Bringing a captured German submarine from New York to Canada taxed the ingenuity of our transportation chiefs. The vessel was featured in the Liberty Loan campaign, and this week was on view in Montreal and Toronto in connection with our Victory Loan campaign. Lord Shaughnessy, president of the Canadian Pacific Railway, did everything possible to arrange for the transportation of the boat from New York, but investigations revealed the fact that the captured boat would not go under the elevated railroad in New York and was too large to go through the railroad tunnels loaded on flat cars. This difficulty held up the project for the time being, when somebody thought of bringing it up by water. Water transportation and the name of James Carruthers, president of the Canada Steamship Lines being linked, he was approached. It was found that it would cost about $5,000 to take the boat apart in Central Park, New York, and put it on a barge, and that it would cost several thousands more to barge it to Montreal and several thousands more to unload it here and set it up in Montreal. Mr. Carruthers immediately agreed to foot the bill.

JAMES CARRUTHERS,

President, Canada Steamships Lines, Limited, who paid the cost of bringing the German Submarine to Canada from New York for the Victory Loan Campaign. *(The Monetary Times Photo.)*

The arrival of the submarine was delayed until the end of last week, owing to the difficulties in getting the ponderous parts of the bulk towed down the Richelieu River and canals on its way down to Sorel, Que. On this part of its journey the captured U-boat traveled by horsepower, applied from the tow path, and the three lighters made only three miles an hour.

As soon as the lighters got down to Sorel, they were taken in hand by tugs for the final trip up the river. Then came the problem of docking and unloading the submarine, which was undertaken by the Canadian Vickers, Limited.

The unloading and conveying of the submarine to its resting place, at Victoria Square, Montreal, was a real engineering problem. The main piece of the submarine, that containing the machinery amidships, weighs 65 tons, the stern section 40 tons, and the bow section 20 tons. For handling these metal masses a special crane was required.

NEW COMPANY ORGANIZED

Messrs. Lewis, Apedante and Hanson inform *The Monetary Times* that they have commenced business at 17 St. John Street, Montreal, as insurance brokers. Their manager, Mr. D. A. Hanson, has had some eight years' experience in the insurance business, part of which has been spent with the London Assurance Corporation and the Commercial Union Assurance Company. During the past three years Mr. Hanson has acted as manager of E. M. Sellon and Company, Limited, insurance brokers, of Montreal. The company transacts all classes of insurance.

WAR LOAN PUBLICITY IN ONTARIO

Dr. A. H. Abbott is chairman of the Ontario publicity committee for the Victory Loan campaign. He was born in Brockville in 1871 and is a graduate of the University of Toronto. He received the degree of Ph.D. at Wuertzburg, Germany in 1904. He was appointed to the staff of the University of Toronto, as Associated Professor of Philosophy in 1908 and made secretary of University extension work, 1905-17. In March, 1915, he was elected secretary of the Speakers Patriotic League and has been loaned by the University for that work ever since. In October, 1915, he organized the British Red Cross appeal. In December, 1915, he acted as secretary Citizens' Recruiting League for Central Ontario. In June, 1916, he was appointed secretary of the Organization of Resources Committee, Ont. In October, 1916, he organized the second British Red Cross appeal. In November, 1916, he was appointed director of labor for Ontario Imperial Munitions Board and acted later on the increased production campaign of the Organization of Resources Committee. In October last he organized the third British Red Cross appeal. He has been an arduous worker on the Victory Loan campaign.

DR. A. H. ABBOTT, TORONTO, Chairman, Ontario Publicity Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

Associated with Dr. Abbott on his war loan committee are the following men, among whom are several well known advertising experts: C. P. Fell, secretary; G. Tower Fergusson, J. J. Gibbons, T. S. G. Pepler, N. Sommerville, A. H. Campbell, Clifford Elvins, Joseph Hay, Col. W. S. Dinnick, R. B. Fudger, W. E. Greig, W. H. Moore, William Brooks, J. G. O'Donoghue, R. J. McLaughlin and chairmen of all the city and county publicity committees.

AMOUNT OF CONVERTED BONDS LARGE

The amount of bonds of the former Canadian war loan issues which will be turned in for conversion into the new Victory Loan bonds will be large, according to indications during the first two weeks of the campaign.

A considerable proportion of the applications for large amounts, offer bonds of former issues in part payment for subscriptions to the new loan. The old bonds thus represented in the subscriptions are not included in the amounts of the subscriptions announced, the latter being based entirely on the actual amount of new money subscribed.

The action of large investors in the old loans indicates that conversion figures will run high. Taking gross subscriptions—that is total cash and old bonds—for large amounts aggregating about $14,500,000, for example, it has been shown that approximately 20 per cent. of the amount was represented by bonds turned in for conversion.

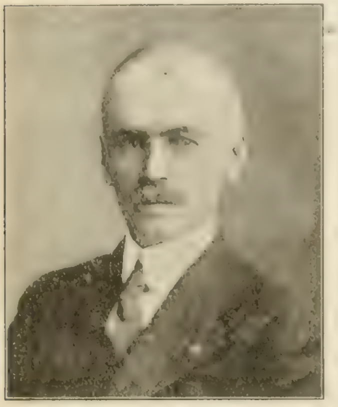
BRANT COUNTY VICTORY LOAN ORGANIZATION

The Victory Loan objective for Brant County, Ont., has been set at $1,750,000. but from present appearances, it looks as if the county will go over the $2,000,000 mark. The employees of the shops and factories are vieing with one another in subscribing to the limit of their capacity. The Massey-Harris Company report $40,000 of subscriptions and the Verity Plow Company $30,000, and their canvass is not yet finished. All other Brantford companies have local organizations and are actively at work. The two first-named companies were early in the field and sent men from Toronto to organize their Brantford factories. All the other factories, however, will probably measure up to the record set. The heads of the manufacturing industries, and the financial men of Brantford are fully seized of the importance of this work at the present emergency.



A. K. BUNNELL, BRANTFORD,
Chairman, Brant County Organization, Victory Loan Campaign. *(The Monetary Times Photo.)*

Mr. A. K. Bunnell is chairman of the Brant County Victory Loan organization. He writes *The Monetary Times*: "We have a first-class organization in the county, and have the active sympathy and support of the county council through the warden, reeves and other municipal officers, and I am sure the farmers will not be behind the city people. We have a separate organization in Paris, and reports from that thriving town are excellent. I am very fortunate in having the services of Mr. John C. Hope of the Dominion Securities Corporation as local organizer, and of Mr. I. W. Champion, of the firm of K. V. Bunnell and Company, Limited, as secretary. Both these gentlemen are first-class bond men, and the smoothness with which our organization is running is an evidence of their capacity."

A committee has been formed consisting of Frank Cockshutt (Slingsby Manufacturing Company), C. H. Waterous (Waterous Engine Works Company), W. J. Verity (Verity Plow Company), C. L. Messecar (Brantford Cordage Company) and D. P. Lamereux (Pratt and Letchworth Company), to see the heads and principal shareholders of the Brantford companies. Another committee has been formed consisting of Gordon Scarfe, G. C. Scott, A. Aitken, J. Coleman, E. Tench and C. A. Waterous to arrange through each factory executive a local factory organization and give their help and assistance wherever required

Mr. Bunnell is a well-known chartered accountant and city treasurer of Brantford. He has been one of the most energetic workers in the Victory Loan campaign.

CHINESE OF CALGARY TO BUY WAR BONDS

The Chinese section of Calgary has not been overlooked in the Victory Loan campaign. A special committee, composed of four of the most prominent Chinese merchants of that city has been selected, the members of the committee being Messrs. Louis Kheng, Charles Hee Yock Sam, Ho Lem and Wong Man Chung.

Chinese residents in the United States were heavy subscribers to the Liberty Loan, and it is expected that the Chinese residents of Calgary will be equally patriotic in connection with the Victory Loan.

HANDLING VICTORY LOAN PUBLICITY

The Toronto publicity committee for the Victory Loan is setting a great pace for the rest of Canada, and towards the end of the campaign, several spectacular publicity plans will be adopted to make the closing days fruitful of results. Mr. W. P. Gundy was chairman of the Toronto committee during the first week of the campaign and associated with him are the following: Mr. J. Allan Ross and Mr. E. L. Ruddy, vice-chairmen; Mr. E. F. Trimble, secretary; Mr. F. T. Stamford, general assistant; and Mr. Will E. Macdonald, director of news bureau. This committee has the following sub-committees: Churches, schools, theatres and public meetings, Mr. W. H. Alderson, chairman; wholesale houses and jobbers, chairman, Mr. A. R. Auld; retail stores, booths and window dressing, chairman, Mr. Ralph Connable; manufacturers' chairman, Mr. H. J. Daly; newspaper committee, chairman, M. J. E. Ganong; special advertising, Mr. R. S. Coryell. Mr. W. P. Gundy has now been succeeded as chairman of the Toronto publicity committee by Mr. Ruddy. Mr. Gundy is vice-president and general manager of Messrs. W. J. Gage and Company, of Toronto, and was recently appointed a member of the War Purchasing Commission, succeeding Sir Edward Kemp, who will probably go overseas. Mr. Gundy, who is a Liberal in politics, was born in 1858, at St. Catharines, Ont. At the age of 15 years, he entered the Civil Service in the Queen's printers' department of the Ontario government. In 1881 he began his business career with W. J. Gage and Company, publishers and manufacturing stationers, and a year later he opened a branch of the house at Winnipeg, Man. In 1884 he returned to Toronto to assume the management of the business of W. J. Gage and Company. In 1893 he became general manager and treasurer of the company, and in 1912 he was made vice-president and manager, which offices he now holds Mr. Gundy is also vice-president of the Toronto board of trade, vice-president and general manager of the Kinleith Paper Mills, St. Catharines, and vice-president of the Educational Book Company of Toronto.

W. P. GUNDY, TORONTO.

LOAN STICKERS ON LETTERS, NOT ENVELOPES

Business houses using Victory Loan stickers on their letters should note that the post office department regulations do not allow these stickers to be used on the front of the envelope. Stickers used in that way will send the letter to the dead letter office. When stickers are used on the envelope they should be used on the back only, but it is a much better plan to use stickers on the letters themselves, as envelopes go to the waste basket.

The Oak Bay, B.C., council have approved of the investment of $216,000 in Canadian Victory bonds. The money will be drawn from the sinking fund of the municipality, and will be apportioned into $100,000 worth of five-year, $45,000 of 10-year and $70,500 of 20-year bonds. The transaction will be handled through the Oak Bay branch of the Merchants' Bank.

NORTHWESTERN LIFE AND VICTORY LOAN

The Northwestern Life Insurance Company, Winnipeg, makes an offer to purchase a Victory Bond of any denomination from $500 to $5,000 and give ten years to pay for it without interest. Should death occur any time within the ten-year period, the bond immediately becomes the property of the estate and all future payments are waived. At the end of ten years the bond is fully paid. This offer is open to all British subjects under fifty years of age. Special rates will be quoted for all ages beyond fifty.

ONTARIO'S SHARE OF THE LOAN

Another of the active men in the Victory Loan campaign is Mr. R. A. Daly, Toronto. Not only is he acting as secretary of the Ontario executive committee for the Loan, but since the death of Mr. A. P. McEachren, he has also taken charge of the organization of the Central Ontario division. This double task is taking up a goodly portion of every 24 hours of Mr. Daly's time.

Mr. Daly started business in August, 1916, under the firm name of R. A. Daly & Company, and since then has built up a first class reputation for his bond house. He was born at Napanee, Ontario, in 1886, and is a graduate of the University of Toronto. After spending a year in post-graduate work at the University of Pennsylvania, he entered the Bank of Nova Scotia at their Toronto office. Later he was transferred to the New York office, and during the four years prior to entering business for himself, had charge of the investment department of the Bank of Nova Scotia at their head office in Toronto.

R. A. DALY, TORONTO,
Secretary, Ontario Executive Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

The Ontario executive committee for the Loan is as follows:—G. H. Wood, chairman; J. W. Mitchell, vice-chairman; G. Tower Fergusson, vice-chairman; R. A. Daly, secretary; R. A. Nevitt, assistant secretary; T. E. Griffis, treasurer; Dr. A. H. Abbott, W. C. Brent, A. H. Campbell, H. C. Cox, John F. Ellis, Gordon T. Finch, J. J. Gibbons, R. S. Gourlay, D. B. Hanna, W. A. MacKenzie, A. M. Macrae, G. A. Macpherson, A. P. McEachren, W. L. McKinnon, J. G. O'Donoghue, S. R. Parsons, T. S. G. Pepler, R. Home Smith, Norman Sommerville, T. A. Stevenson, H. R. Tudhope, E. G. Wills, and W. G. Watson.

Ontario did exceedingly well during the first week of the campaign, being responsible for $56,904,700 of total subscriptions of $95,343,600, and for 42,895 of total subscribers numbering 63,788. Ontario's total up to Wednesday night was $76,502,400.

Great expectations are held out for the $1 a week Victory Loan instalment plan which is being put into effect. The banks and the canvassers are working with increasingly effective co-operation, and with the new plan working smoothly, thousands of people unable to finance a bond purchase on the original $5 and $10 principle will become bondholders and thus increase the number of subscriptions.

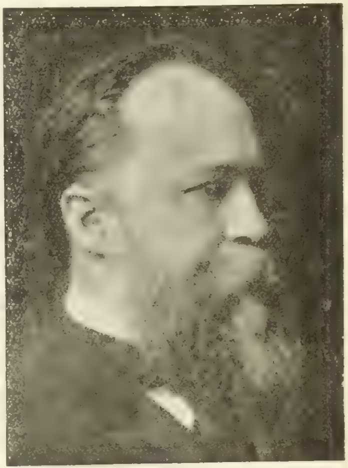
BANKERS HELP THE LOAN

Duty as Bankers and Citizens to Assist in Placing War Bonds

Speaking at a Victory Loan meeting in Toronto last week, Sir Edmund Walker paid a tribute to the loan organization as being the greatest business organization Canada had known and until the United States campaign the greatest on the American continent. With such ability behind it Sir Edmund thought the loan could not result in anything but success provided the people did their bit. The fact that the last loans got by competition $350,000,000 without any great organization gave confidence as to the success of the Victory Loan. Sir Edmund then spoke frankly of the duties of bankers at this time. The banker and the individual who loaned less than he could afford was foolish, so in this campaign business men had to bear in mind that their duty was to induce people to invest what they could afford.

Principles of Banking.

Many things had altered since the war and among them some of the principles of banking. Since the war broke out bank deposits in Canada had increased by $450,000,000 and bankers to-day were not lending for ordinary commercial purposes much more than before the war, and if the money given towards munitions and other war necessities were deducted it would be found that commercial loans were a great deal less than before the war. The bankers were a large part of the vast machinery under the minister of finance to induce the people of Canada to surrender their money in order that the war might be carried on. Sir Edmund said it was not only their duty as bankers, but as citizens, to assist in the placing of war bonds, for if the loan failed where was the money to be found. The country would inevitably have to come back to the banks. Some, Sir Edmund said, might say it was the duty of banks to accept money and loan it themselves, but in this case it would not be banking in any sense because it was impracticable. Therefore they must induce the people and especially the farmer to lend money recovered from food products back to the government.



SIR EDMUND WALKER,
President, Canadian Bank of Commerce, Who Spoke at Toronto Regarding the Duties of Bankers to the Victory Loan.
(The Monetary Times Photo.)

The relation of a banker to depositors, Sir Edmund said, was the same as that between a lawyer and his clients. He had to keep his clients' secrets and to give advice when asked, but every banker could keep his trust and be patriotic and wherever possible encourage the sale of Victory bonds.

Sir Edmund encouraged the idea of inducing the people to buy bonds out of future earnings, for it would be inculcating a spirit of saving Canada had not yet experienced. "If you can make them feel the pinch by their investment you are doing a good thing for the individual and for the country," Sir Edmund said in conclusion.

Harry Lauder, the famous Scotch comedian, will sell Victory Bonds from the steps of the Toronto city hall during the last three days of the Loan campaign.

Purely a Matter of Business

A Message That Is Intended for Business Men Only

(BY A BANKER)

Do you remember the first thousand dollars that you ever borrowed at a Bank—the thousand that started you into business for yourself ?

Made you want to pinch yourself to see if you really were awake, didn't it ?—to walk out of the Bank with ten one hundred dollar bills of the Bank's money—and all in the world the Bank had for it was your name on a piece of paper. And the funny part of it was, that it wasn't the Bank's money at all, the Bank had borrowed it from somebody else, that same day—and all somebody else had to show for it was THE BANK'S name on a piece of paper.

Where did this thing start ? It's like the old question—

Is the hen the parent of the egg—or the egg the parent of the hen ?

Then you examined one of your ten crisp bank notes and found the answer—here was another piece of paper with a name on it—the name of the Dominion of Canada—promising to pay the bearer one hundred dollars on demand.

Upon the ability of the Dominion of Canada to meet that obligation rests the credit of the country and the transaction of business.

And, now, Mr. Business man, the Dominion of Canada, which made it possible for you to borrow the first thousand dollars which set you up in business, is asking you for a loan at this time—and a whole lot more depends upon the loaner now than was the case when you made that first "touch" of yours. The Country's business would have gone on about as usual if you had not borrowed that thousand—but unless you want to finance your business with "MARKS" in the future, you had better lend Canada all the dollars you can honestly spare ***now.***

Your business—your credit—your securities will not be worth a plugged "pfennig" if our common enemy wins the war.

Protect your own interests by subscribing for Victory Bonds—all you can buy.

And if you want to ensure yourself that you will continue doing business when the war is over—let Canada borrow from you some of your money now when the country really needs it.

Your money—your sacrifice—may be just what it will take to turn the tide of war to the time of peace.

You know your duty—you believe in your own loyalty. Act to-day.

If your income is $2500 or over and you have bought but a $50 Victory Bond do not try to satisfy your conscience that you have done your full duty—you can do more.

Buy Victory Bonds—Buy More Victory Bonds—and Still More Victory Bonds

Space donated by the Toronto members of the Bond Dealers' Association

BANK OF MONTREAL

Excellent Annual Statement Submitted for the Past Year —Savings Deposits Show Big Increase

The financial statement of the Bank of Montreal for the year ended October 31, 1917, is one which not only reflects credit upon that institution, but upon Canadian banking and finance generally. It is a fitting tribute to the completion of one hundred years of service by the bank in this country. The statement is one of the strongest yet published by any of the world's principal banks. It will give entire satisfaction, especially to the president of the institution, Sir Vincent Meredith, to the capable general manager, Sir Frederick Williams-Taylor, and to the clients and shareholders of the bank.

The total assets of the bank are $404,000,000 and the savings deposits $246,000,000, the largest savings total in Canadian banking. The increased resources of the bank continue to support national and imperial financing of the war. The total liquid assets are $276,000,000, or 75.5 per cent. of the bank's total liabilities to the public, a small increase on the unusually strong position a year ago. Cash holdings, exclusive of a deposit of $14,500,000 in the central gold reserve against excess note circulation, amount to over $51,000,000, or about 14 per cent. of public liabilities.

The following table compares the profit and loss accounts for the past three years:

	1917.	1916.	1915.
Profits	$2,477,969	$2,200,471	$2,108,631
Less:			
Dividend	$1,600,000	$1,600,000	$1,600,000
Bonuses	320,000	320,000	320,000
War tax	160,000	160,000	127,347
Patriotic	47,500	.....	.....
Bank premises	100,000	.....	
Total deductions	$2,227,500	$2,080,000	$2,047,347
Balance	250,469	120,471	61,284
Previous balance	1,414,423	1,293,952	1,232,668
Total profit and loss	$1,664,893	$1,414,423	$1,293,952

In the last statement issued prior to the war, savings deposits were reported at $144,000,000. They are now $246,000,000, an increase of about 70 per cent. This is in face of heavy withdrawals from private accounts for purposes of subscription to the government's successive war loans. Of the gain, about $36,000,000 fell within the 12 months covered by the present statement.

The following is a statement of the result of the business of the Bank of Montreal for the year ended October 31st, 1917:—

Balance of Profit and Loss Account, 31st October, 1916		$ 1,414,429.99
Profits for the year ended 31st October, 1917, after deducting charges of management, and making full provision for all bad and doubtful debts		2,477,969.09
		$ 3,892,393.08
Quarterly Dividend 2½% paid 1st March, 1917	$ 400,000.00	
Quarterly Dividend 2½% paid 1st June, 1917	400,000.00	
Bonus—1% paid 1st June, 1917	160,000.00	
Quarterly Dividend 2½% paid 1st September, 1917	400,000.00	
Quarterly Dividend 2½% payable 1st Dec., 1917	400,000.00	
Bonus—1% payable 1st Dec., 1917	160,000.00	
	$1,920,000.00	
War Tax on Bank Note Circulation to 31st October, 1917	160,000.00	
Subscriptions to Patriotic Funds, $73,500—of which paid	47,500.00	
Reservation for Bank Premises	100,000.00	
		2,227,500.00

The Minister of Finance offers for Public Subscription

Canada's Victory Loan

issue of

$150,000,000 5½% Gold Bonds

Bearing interest from December 1st, 1917, and offered in three maturities, the choice of which is optional with the subscriber, as follows:

5 year Bonds due December 1st, 1922
10 year Bonds due December 1st, 1927
20 year Bonds due December 1st, 1937

This Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge upon the Consolidated Revenue Fund.

The amount of this issue is $150,000,000, exclusive of the amount (if any) paid by the surrender of bonds of previous issues. The Minister of Finance, however, reserves the right to allot the whole or any part of the amount subscribed in excess of $150,000,000.

The Proceeds of this Loan will be used for War purposes only, and will be spent wholly in Canada.

Principal and Interest payable in Gold
Denominations: $50, $100, $500 and $1,000

Subscriptions must be in sums of $50 or multiples thereof.

Principal payable without charge at the Office of the Minister of Finance and Receiver General at Ottawa, or at the Office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable, without charge, half-yearly, June 1st and December 1st, at any branch in Canada of any Chartered Bank.

Bearer or Registered Bonds

Bonds may be registered as to principal or as to principal and interest.

Scrip certificates, non-negotiable, or payable to bearer, in accordance with the choice of the applicant for registered or bearer bonds, will be issued after allotment in exchange for provisional receipts. When these scrip certificates have been paid in full, and payment endorsed thereon by the bank receiving the money they may be exchanged for bonds, when prepared, with coupons attached, payable to bearer, or registered as to principal, or for fully registered bonds when prepared, without coupons, in accordance with the application.

Delivery of interim certificates and of definitive bonds will be made through the Chartered Banks.

Bearer bonds with coupons will be issued in denominations of $50., $100., $500., and $1,000. and may be registered as to principal only. Fully registered bonds, the interest on which is paid direct to the owner by Government cheque, will be issued in denominations of $1,000., $5,000. or any authorized multiple of $5,000.

Subject to the payment of 25 cents for each new bond issued, holders of fully registered bonds without coupons, will have the right to convert into bonds of the denomination of $1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons, at any time, on application to the Minister of Finance.

Surrender of Bonds

Holders of Dominion of Canada Debenture Stock, due October 1st, 1919, and bonds of the three preceding Dominion of Canada War Loan Issues, have the privilege of surrendering their bonds in part payment for subscriptions to bonds of this issue, under the following conditions:—

Debenture Stock, due October 1st, 1919, at Par and Accrued Interest.
War Loan Bonds, due December 1st, 1925, at 97½ and Accrued Interest.
(The above will be accepted in part payment for bonds of any of the three maturities of this Issue)

War Loan Bonds, due October 1st, 1931, at 97½ and Accrued Interest.
War Loan Bonds, due March 1st, 1937, at 96 and Accrued Interest.
(These will be accepted in part payment for bonds of the 1937 maturity ONLY of this Issue.)

Bonds of the various maturities of this issue will, in the event of future issues of like maturity, or longer, made by the Government, other than issues made abroad, be accepted at par and accrued interest, as the equivalent of cash for the purpose of subscription to such issues.

Issue Price Par

Free from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

Payment to be made as follows:

10% on December 1st, 1917	20% on March 1st, 1918
10% on January 2nd, 1918	20% on April 1st, 1918
20% on February 1st, 1918	20% on May 1st, 1918

A full half year's interest will be paid on 1st June, 1918.

The Bonds therefore give a net interest yield to the investor of about:

5.61% on the 20 year Bonds
5.68% on the 10 year Bonds
5.81% on the 5 year Bonds

All payments are to be made to a Chartered Bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture, and the allotment to cancellation. Subscriptions accompanied by a deposit of 10% of the amount subscribed, must be forwarded through the medium of a Chartered Bank. Any branch in Canada of any Chartered Bank will forward subscriptions and issue provisional receipts.

In case of partial allotments the surplus deposit will be applied toward payment of the amount due on the January instalment.

Subscriptions may be paid in full on January 2nd, 1918, or on any instalment due date thereafter under discount at the rate of 5¼% per annum. Under this provision payments of the balance of subscriptions may be made as follows:

If paid on January 2nd, 1918, at the rate of 89.10795 per $100.
If paid on February 1st, 1918, at the rate of 79.46959 per $100.
If paid on March 1st, 1918, at the rate of 59.72274 per $100.
If paid on April 1st, 1918, at the rate of 39.90959 per $100.

Forms of application may be obtained from any branch in Canada of any Chartered Bank, or from any Victory Loan Committee, or member thereof.

The books of the Loan will be kept at the Department of Finance, Ottawa.

Applications will be made in due course for the listing of this issue on the Montreal and Toronto Stock Exchanges.

Subscription Lists will close on or before December 1st, 1917.

Department of Finance,
Ottawa, November 12th, 1917.

64

LOAN CAMPAIGN IN QUEBEC

Territory is Large, Extending from Gaspe to Ottawa County

Mr. A. P. Frigon is acting as joint chairman, with Mr. E. A. MacNutt, in the Victory Loan campaign for the province of Quebec, outside of the Island of Montreal. Mr. Frigon presented an interim report of the subscriptions from outside the Island of Montreal last week. He explained the difficulties his organization had to encounter, with a very large territory extending from Gaspe to Ottawa County. In spite of the extent of territory and difficulties they had the work well in hand, and had met with good response already, with 992 subscriptions, amounting to $1,022,650 in the first five days of the loan campaign. These subscriptions were as follows: Buckingham, $132,100; Ottawa County, $143,050; Argenteuil, $58,650; Terrebonne, $3,000; Champlain, $1,150; Portneuf, $2,700; Three Rivers, $2,050; Kenogami, $13,250; Beauharnois, $28,100; Chambly, $8,200; Huntingdon, $29,700; Chateauguay, $41,950; Richelieu, $28,350; Rouville, $500; Ste. Hyacinthe, $20,600; Brome, $25,950; Compton, $19,550; Missisquoi, $92,550; Richmond, $138,800; Shefford, $10,700; Sherbrooke, $35,150; Stanstead, $115,500; Beauce, $1,100; Megantic, $41,100; Levis, $9,200; Montmagny, $3,150; Lotbiniere, $1,100; Matane, No. 1, $7,600; Rimouski, $5,050; Temiscouata, $400; and Kamouraska, $400.

A. P. FRIGON, MONTREAL,

Chairman of the French Section of the Victory Loan Campaign Organization for the Province of Quebec outside of Montreal. *(British & Colonial Press Photo.)*

Mr. Frigon is a partner in the firm of St. Cyr, Gonthier and Frigon, bankers and brokers, Montreal. He is vice-president of Viauville Lands, Limited, president of the Star Realty Company, Limited, Canadian Siegwart Beam Company, Limited, Three Rivers, L'Immobiliere d'Outremer, Limitée, St. Francis Valley Railway Company and of the St. Francis Company, Limited. Mr. Frigon was born in Montreal in 1872. He began his business career as a bookkeeper for P. P. Mailloux, Montreal, 1888-1901; financial manager Seminary of St. Sulpice, Montreal, 1901-1907; formed present partnership 1907. Mr. Frigon is also vice-president of the General Trust Company of Canada, president, Comite de Surveillance Caisse National d'Economie, a member of the Board of the Chambre de Commerce, Montreal, a member of Comite France-Amerique and a Gouverneur a Vie de L'Hospital Notre Dame and Societe St. Jean Baptiste. He acted as president of the special commissioners appointed by the Chamber of Commerce of Montreal in connection with the Georgian Bay Canal project.

Here are extracts from one of the Victory Loan circulars Mr. Frigon is using in Quebec province:—

"A la promesse de remboursement de l'Emprunt de la Victoire viennent s'ajouter comme garantie toute la puissance, le crédit, la richesse du Canada. Pensez a ce que cette garantie represente! Une obligation de la Victoire est une chose à laquelle on doit attacher du prix, qu'on doit s'efforcer de posséder et de conserver. Elle équivaut à de l'argent. Vous pouvez la considérer exactement comme un billet de cinq ou de dix dollars. Elle a l'avantage de vous donner un revenu, et, si vous avez besoin d'argent, elle peut être vendue en tout temps. . . . Voulez-vous prêter 50 dollars à votre Pays ou toutes sommes dont vous pouvez disposer pour lui aider à terminer la gwerre et à maintenir la prospérité au Canada! Souvenez-vous que vous ne donnez pas cet argent, que vous le prêtez et le conservez. Il travaillera pour vous, vous apportera un revenu et vous sera rendu par votre Pays. Ces obligations sont le placement le plus sûr que vous puissiez faire."

MORE SHELL ORDERS RECEIVED

Canadian Factories Will Produce Shells for United States —Arrangements Through Munitions Board

Negotiations conducted by the Imperial Munitions Board at Washington have resulted in the placing of a large order for 75 mm. shells to be produced from Canadian plants for the United States government. It is stated that from six to seven and one-half million shells will, under this arrangement, be produced in Canada during the first seven months of 1918.

The Imperal Munitions Board will act for the United States authorities in placing the contract and supervising the production of these shells in Canada. The United States Ordnance Department will supply the steel and component parts. The Canadian manufacturers will forge the steel and machine and assemble the shells.

Will Facilitate Matters.

The Dominion government, which has co-operated in the negotiations, will, through the department of customs, facilitate the entry of steel and components into Canada and their reshipment as shells to the United States.

This important announcement is particularly welcomed by reason of the sharp decline in British orders for shells in Canada. Some months ago, it will be recalled, the British Ministry of Munitions directed that smaller quantities of certain sizes of shells would be produced in Canada. This action was partly due to the increased quantities of shells and components produced in Great Britain, and also to the difficulty in establishing dollar credits in Canada for full quantities of munitions, as well as for foodstuffs, ships and other materials.

By reason of the decline of British orders, considerable equipment in Canada for machining and assembling smaller sized shells was not required for Imperial purposes; but as these plants, with minor alterations, could be made available at an early date for the production of 75 mm. shells required by the United States government, and, as Canadian manufacturers had the advantage of long experience in making British shrapnel, negotiations were opened with the Washington government with a view to making use of this ready-made equipment.

Big Transaction Arranged.

The United States Ordnance Department, confronted with the necessity of expediting shell production, responded to the overtures made by the Imperial Munitions Board, with the result that a transaction involving many millions of dollars has been finally consummated.

Hope is expressed that the United States government may find it desirable to make use of further equipment in Canada, which is now employed in the production of shells for the Imperial government.

ANOTHER VICTORY LOAN DIVIDEND

The Alberta Pacific Grain Company, a western concern, has declared an extra Victory Loan dividend of 15 per cent., which is going to shareholders of record on October 31st last. It accompanies the regular dividend of 8 per cent. for the year.

This is the second large declaration in connection with the Victory Loan, the Maple Leaf Milling Company having declared an extra 10 per cent. distribution in bonds last week.

The extra dividend just declared calls for $210,000. Instead of distributing it later in the bonds, the company is mailing cheques to its shareholders with the statement that the dividend is intended as a Victory Loan dividend, and urging that the proceeds be used to buy the bonds.

—"And the Good Hope Went Down!"

Do you recall the naval battle off the Chilian coast three years ago, when a strong German squadron defeated British light naval forces, BECAUSE—

The Battleship Canopus *Did Not Arrive in Time?*

The Canopus could have blown the Germans to pieces had she not been 200 miles away.

A Great Tragedy is written in bold type in British naval history—a tragedy which not even the glorious victory at the Falkland Islands can blot out.

Somebody blundered! Are you going to blunder too?

MAN! MAN! WAKE UP!

CANADA'S VICTORY BONDS

Are the medium through which you can do something for your country and for yourself.

Put your income—your cash into Victory Bonds. They're as good as gold

Be sure that ***you arrive in time.*** Your money will help prevent other sea and land tragedies.

CANADA LIFE SETS GOOD EXAMPLE

The Canada Life Assurance Company, when allotted its subscription to the Victory Loan, will hold no less than $8,407,500 of that issue. It is one of the very few concerns which have subscribed $5,000,000 to the loan. That subscription, too, is entirely new money and does not represent conversion of holdings of previous loans. The company is, however, in addition, converting its holdings of former war loans which will give the Canada Life, as stated above, a total investment of $8,407,500 in the Victory Loan. The new subscription of $5,000,000 is practically all the company's revenue for the ensuing year, less only the necessary provision for claims and current payments.

H. C. COX, TORONTO,
Member of Ontario Executive Committee, Victory Loan Campaign. *(The Monetary Times Photo.)*

The company feels that a substantial subscription is the best proof it can give the government of its hearty co-operation in assisting the finance minister to reach the desired maximum subscription for the loan. The Canada Life has given conspicuous support to all our war loans, culminating in the splendid effort upon this crowning occasion.

E. M. SAUNDERS, TORONTO,
Treasurer, Canada Life Assurance Company, which has Purchased over $8,000,000 of Victory Bonds. *(The Monetary Times Photo.)*

Mr. H. C. Cox, president of the company, is a member of the Ontario executive committee for the Victory Loan. Offices for the provincial headquarters of the campaign are in the company's head office building at Toronto. Mr. Cox is taking an active interest in the success of the loan.

Mr. E. M. Saunders, formerly manager of the Canadian Bank of Commerce at Calgary, is treasurer of the company, and is devoting much of his time to help to have the loan heavily oversubscribed.

MANITOBA LIFE INSURANCE MEN AND LOAN

Mr. C. W. Strathy is a member of the Manitoba provincial committee of life insurance men, for the Victory Loan campaign. It is an exceptionally strong committee, as the following names indicate:—C. C. Ferguson, Great-West Life; C. W. Strathy, North American Life; H. T. Clarke, Metropolitan Life; D. J. Scott, Sun Life; F. P. Hayden, Great-West Life; J. W. W. Stewart, Monarch Life; E. H. Bissett, Mutual Life; and J. G. Stephenson, London Life.

Mr. Strathy has been loaning manager of the North American Life Assurance Company, for the western provinces, for 11 years, with headquarters at Winnipeg. The company recently created the important and new office of treasurer and appointed Mr. Strathy to the position. Early next yeat he will come to the company's head office at Toronto to take up his new duties. During the past 32 years, since entering upon business activities, Mr. Strathy's time has been devoted solely to investments, having served in various departments of the Canada Permanent Mortgage Corporation for 22 years. His experience has covered periods of varying conditions and has put him in close touch with every form of investment.

C. W. STRATHY, WINNIPEG,
Member of Manitoba Provincial Committee of Life Insurance Men, Victory Loan Campaign. *(The Monetary Times Photo.)*

Speaking of his new appointment, an officer of the North American Life Assurance Company, said:—"The ability with which he has directed the investments of our loan department at Winnipeg will now be brought to bear upon the larger interests of our company. Policyholders and all connected with the company will heartily appreciate the good judgment shown by the board of directors in the selection of Mr. Strathy as treasurer, being a man of outstanding ability and sterling character. Among those with whom he will be more closely associated his genial manner will assure him many friends."

During the first three days of the campaign, $5,500,000 had been subscribed to the Victory Loan in Manitoba.

Lieutenant-Governor Sir James Aikins, Hon. Edward Brown, provincial treasurer, and Mr. R. T. Riley were guests of the Brandon Canadian Club last week, the topic being the Victory Loan. Mr. R. T. Riley, who is in charge of the organization in that city, declared that in the four days' canvass Brandon subscribers had pledged themselves for $277,500. Up to that date there had been a greater subscription per capita than any other place in Manitoba.

FINANCING THE ONTARIO CAMPAIGN

Ontario subscribed approximately $60,000,000 in the first week of the Victory Loan campaign. The provincial machine continues to run almost on schedule. Slightly more than a third of the $150,000,000 objective had been subscribed last week and this week's record will bring the total up to about two-thirds.

Mr. G. Tower Fergusson, Toronto, is vice-president of the executive committee, having charge of the Victory Loan campaign for Ontario province. He is also chairman of the finance committee for the same organization. He was born in Fergus, Ont., in 1856 and educated under Dr. Wm. Tassie at Galt. He commenced business as a stockbroker in Toronto in 1888, and is head of the brokerage firm of G. Tower Fergusson and Company. Mr. Fergusson was president of the Toronto Stock Exchange, having been elected to that position four times, 1898, 1899, 1915 and 1916. He is a director of the Canada Landed and National Investment Company and of The Globe Printing Company.

G. TOWER FERGUSSON, TORONTO.
(The Monetary Times Photo.)

FALL WHEAT AND FALL PLOUGHING

The area estimated to be sown to fall wheat for the season of 1918 is 711,112 acres, or 4 per cent. less than the area sown in 1916 for the crop of 1917. In Ontario the hard and dry condition of the soil made it difficult to sow fall wheat, and the area sown is estimated to be about 4 per cent. less than last year. In Alberta there is shown to be a slight increase, or 61,384 acres, as compared with 60,776 acres. There are also small areas sown to fall wheat in Manitoba, 4,129 acres; Saskatchewan, 11,883 acres; and British Columbia, 3,476 acres. The condition of fall wheat on October 31st for all Canada is 80 per cent. of the standard, as compared with 76 per cent. last year. In Ontario the condition is 80 per cent. and in Alberta it is 91 per cent. Of the total land intended for next year's crops 53 per cent. is estimated to have been ploughed by October 31st, the percentage proportions in the West being 40 for Manitoba, compared with 47 last year, 37 for Saskatchewan as against 28, and 38 for Alberta as against 21.

Mr. T. B. Parkinson, who represents the Aetna Life Insurance at London, Ont., and who has made many of the most popular suggestions to the local executive for the successful selling of the Victory Loan and the advertising campaign, headed the list one day last week in individual team work with a total of $10,000 bonds sold, $1,000 better than his runner-up.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 16th, 1917:—

La Rose Mine, 87,441; Kerr Lake, 61,960; Beaver Mines, 66,064; National Mines, 63,955; Mining Corporation of Canada, 307,014; Dominion Reducing Company, 175,600; Buffalo Mines, 479,335; total, 1,241,369 pounds, or 620 tons.

The total shipments since January 1st, 1917, now amount to 23,279,189 pounds, or 16,639 tons.

SHOULD ASCERTAIN "UNKNOWN" CAUSES OF FIRES

"We believe the time has come," says Fire Marshal Heaton of Ontario, "when we should place upon the insurance companies themselves some responsibility in an effort to reduce the "unknown" to the ascertained cause. This can only be done by instructions to loss adjusters to make the ascertainment of the cause one of their primary duties. It is impossible for us to investigate all fires of unknown origin, nor should this be necessary if the adjusters would make it their business to get at the circumstances when they are settling the amount of the loss. Some of the companies reporting to us give the cause "unknown" in most of their reports. The fire marshal has had his particular attention drawn to two companies who have used the word "unknown" in nine out of ten of their reports. Then, in going over the adjusters' reports as they come in to us, it is manifest that some of them wholly ignore any reference to the cause of the fire they have adjusted. We must reduce the "unknown" to the fullest degree possible, and we hope companies and adjusters will render us their aid."

ROOT AND FODDER CROPS

The Census and Statistics office, Ottawa, report that the area this year under root and fodder crops, consisting of potatoes, turnips, etc., hay and clover, alfalfa, fodder corn and sugar beets amounts to about 9,521,500 acres, as compared with 8,843,500 acres in 1916, all crops excepting sugar beets sharing in the increase. In total value, at local prices, these crops amount for 1917 to $267,664,300, as compared with $246,761,200 in 1916. The total yield of hay and clover is estimated to be 13,684,700 tons from 8,225,000 acres, as compared with last year's high record of 14,527,000 tons from 7,821,200 acres, and it is higher than in any year previous to 1916. The yield per acre, 1.66 tons, comparing with 1.86 tons last year, is higher than in any year since 1910, when it was 1.82 tons. The average value per ton is $10.40, as against $11.60 last year. Potatoes yield a total of 79,892,000 bushels, as compared with 63,297,000 bushels last year and 62,604,000 bushels in 1915; but the increase for this year is due to the larger area planted (656,958 acres as compared with 473,000 acres in 1916), and not to the yield per acre, which averaging only 121.61 bushels is the lowest on record, excepting the year 1910, when the average was 119.36 bushels. The average yield last year was 133.82 bushels; in 1915 it was 130.81 bushels and in 1914 180 bushels, the record year. The average value of the potato crop is $1 per bushel as against 81 cents last year, and the total value of the crop is $81,355,000 as compared with $50,982,300 last year.

By provinces the potato yield is highest in Prince Edward Island and Nova Scotia, 175 bushels, the remaining provinces being in order of yield in bushels per acre as follows: British Columbia, 166.55; Alberta, 151.46; New Brunswick, 149.80; Ontario, 133.67; Saskatchewan, 133; Manitoba, 106; Quebec, 80. The prices per bushel by provinces are as follows: Quebec, $1.38; Ontario, $1; Nova Scotia, 92 cents; British Columbia, 91 cents; Saskatchewan, 85 cents; Manitoba and Alberta, 76 cents; and Prince Edward Island, 75 cents. The quality of the tubers is 92 per cent. of the standard in Nova Scotia and 65 per cent. in Quebec; in the other provinces the quality is between 80 and 89 per cent.

The total yield of turnips and other roots is estimated at 63,451,000 bushels from 218,233 acres, as compared with 36,921,100 bushels from 141,839 acres in 1916. Of fodder corn the yield is 2,103,570 tons as against 1,907,800 tons in 1916. Alfalfa yields 262,400 tons against 286.750 tons last year and sugar beets 117,600 tons against 71,000 tons.

Why Burden Your Wife?

If you wish to appoint your wife as executrix or trustee under your will, why not assist her to carry the heavy burden by appointing this Corporation as co-executor?

Your estate will thus have the advantage of the personal direction which she can give, and she will be relieved of the burdensome details necessarily involved in the management of any estate. Also she will receive invaluable assistance in regard to investments.

Our officers will be glad to confer with you in regard to the making of your will or any trust business you may have in mind.

COST OF SELLING VICTORY LOAN

Percentage of Flotation Charges Will Be Less Than in Previous Loans

An official explanation of the organization of the Victory Loan and the basis on which subscriptions are being solicited has been issued from Ottawa as follows:—

"The organization of Canada's Victory Loan is nationwide. There are special committees with chairmen at the head, charged with duty of promoting the success of the loan in each province, city, and county of the Dominion. Honorary committees have also been formed in the larger centres. All the professional bond and stock exchange houses were commandeered by the finance minister some weeks ago in order that their entire organization might be devoted to the loan.

For Work Actually Performed.

"They will not be paid upon a commission basis as in the past, but their remuneration will be fixed later having regard to the work actually performed. The special workers who will be engaged for about a month in canvassing for the smaller subscriptions in cities, towns and rural districts, will be paid for their services and expenses upon a commission basis. Many local chairmen report that the remuneration to these workers will be less than their actual expenses. Reports have come in that many canvassers will devote any commissions to the patriotic or Red Cross work. All the larger subscriptions are in charge of special committees, and upon these no commission is paid. The percentage of flotation charges in connection with this issue will be much less than in the case of the previous war loan. The finance minister decided that it was not necessary to have the banks underwrite any part of the Victory Loan and this will result in a substantial saving."

Arrangements for Previous Loans.

Recognized bond and stock brokers were allowed a commission on allotments on the three previous war loans (made on applications bearing their stamp), as follows:—1915-25 and 1916-31 loans, one-quarter of one per cent.; 1917-37 loan, three-eighths of one per cent.

Arrangements were made with the banks for a commission as under: 1915-25 war loan, one-quarter of one per cent.; 1916-31 war loan, one-half of one per cent.; 1917-37 war loan, nine-twentieths of one per cent.

What Banks Do.

For the above commission the banks agreed to receive on behalf of the government at all their branches subscriptions and payments therefor, deliver provisional receipts, interim certificates and bonds and keep the necessary accounts in connection therewith; to cash at all their branches throughout Canada the coupons of the issues free of exchange; to use their best endeavors through their several offices throughout Canada to obtain public subscriptions to the loans. The banks also agreed to make, if required, cash subscriptions of $50,000,000 to the 1916-31 issue and of $60,000,000 to the 1917-37 issue.

Clerical assistance and office contingencies in connection with the three loans were as follow:—1915-25 war loan, $14,130.36; 1916-31 war loan, $26,998.24; 1917-37 war loan, $19,748.38 to 31st May, 1917.

The cost of advertising the three loans was:—1915-25 war loan, $36,023.16; 1916-31 war loan, $50,626.67—to 31st May, 1917; 1917-37 war loan, $23,367.89—to 31st May, 1917.

Correction of Misconceptions.

Mr. Huntley Drummond, chairman of the Montreal finance committee, Victory Loan campaign, made the following statement at a meeting in that city last week:—"A certain amount of misconception has arisen in the minds of the public, and a certain amount of criticism has been made in regard to the matter of commissions on the Victory Loan.

"These criticisms appear to have arisen from two causes—first, from persons who do not understand that no loan is made by the country, by a city or corporation without some commission being paid, and, secondly, from the fact that a part of the work of this Victory Loan campaign is being done by voluntary organization and part by paid organization.

"As to this, I would say that the commission is being paid by the finance minister and on nobody else's suggestion but his own. The reason the commission is being paid is because in that way you get service you cannot get in any other way. In any event, the finance minister is getting this loan at a nominal cost of only ½ of one per cent.—actually it is much less.

"That he is doing that is a tribute to his sagacity as a financier, as ordinary underwriting as business men know, involves a payment of from one to 5 per cent., so the commission is a very small one."

As to the methods adopted by the Finance Minister, Mr. Drummond proceeded: "If we can show that the gains are enormous and the cost infinitesimal, I think you will agree with me that we had better drop criticism, and work only for the success of the loan.

Twenty Thousand at Work.

"It must be obvious to everybody that in order to ensure the success of this loan an enormous amount of work has had to be done. There are in Montreal alone 60 teams, with from 10 to 20 members apiece, and a grand total of from 1,000 to 1,500 men working on it in Montreal. On this ratio in the whole of Canada there must be anywhere from 10,000 to 20,000 people at work for this Victory Loan.

"These men have given up their businesses to devote themselves for three weeks and more to float this loan. More than that, it is certain that they have hurt their ordinary business for a considerable time to come.

Only Paid on Part.

"The finance minister has recognized that these men must be paid, and he is going to pay them the modest remuneration of ½ of 1 per cent. on part of the subscriptions they get.

"I say 'part' because the general committee has separated the names of all those likely to subscribe the larger sums, and on these larger sums not one cent of commission is being paid, the workers having voluntarily agreed to renounce that commission. This would reduce the small commission really to about ¼ of 1 per cent.

"So on about $150,000,000 of the loan the commission will be between $300,000 and $400,000. You may say that $350,000 is a very large amount. But divide that amongst 10,000 to 20,000 workers, and you will find out that it figures out at about $35 a piece.

Criticism Hurts Loan.

"Put these figures side by side, $150,000,000 and $350,000, and I can confidently ask you whether it is worth while wasting time criticizing that small amount—and remember every criticism hurts the success of this loan.

"But this is by no means the most important part of the matter," continued Mr. Drummond. "Without this organization and army of canvassers it is possible the sum the finance minister has asked for might be just raised, or only partially raised. Contrast such a result with the result everyone of us is confident will come to pass—that with this organization and the plan proposed by the minister of finance, we shall double the loan, and secure at least $300,000,000. It is the difference between a qualified success and a success so great that it must impress everyone, not only in Canada, but throughout the world. Such a comparison puts this minor question of commission in its proper perspective. The overwhelming fact of doubling the loan makes the commission negligible.

"However," proceeded Mr. Drummond, "a large part of the work is being done by people who are being paid nothing, but are working primarily for patriotic purposes, knowing that only with a paid organization can they attain the objects they are aiming at—that is a tremendous success."

ROOSEVELT TO SPEAK FOR VICTORY LOAN

Former United States President Roosevelt will visit Toronto next Monday. He will deliver only one address and that will be in the evening at the Armories. After considering the various methods of accommodating the crowds who will want to hear the speaker, it has been decided that a Victory Loan button will be the recognized admission.

Sir William Hearst, prime minister of Ontario, headed the subscription list for Victory Bonds at the provincial parliament buildings last week, when a team of nine men got 130 subscribers for bonds to the value of $32,550 in one day.

Who Should Buy Canada's Victory Bonds, and Why

WHO wants to help win the war?

Who wants to give our soldiers all the support which their bravery and self-sacrifice and imperative needs demand of our gratitude and our patriotism?

Who wants Canada to do her full part in producing food, metals, ships, munitions and clothing for our fighting men; her full part in winning the war?

Who wants to help Britain to buy in Canada all she wants to buy of the products of Canada's fields and industries and labor?

From the mighty heart of Canada hear the full-throated answer roll from the Atlantic to the Pacific, echo back and up from the southern frontier, far and away into the frosty wastes of the Arctic circle:

"Every Canadian Loves His Country and will do His Full Duty"

AND every woman whose son or husband, or brother or father is fighting in France, because it means support and comfort and victory to him, sends up a prayer that Canada will provide the money to help him win the war for home and freedom.

Every boy and girl, because they want to have a part in winning the war, and in writing Canada's name into a glorious chapter of the world's history, will help Canada to raise the money by buying Victory Bonds.

* * * * *

THEN from the business point of view: The farmer will buy Victory Bonds because it will enable him to continue to supply the armies and the people of Great Britain with live stock, grain and the other products of his fields. The farmer must have a market for his produce, and it is essential to Canada that Britain shall be enabled to pay cash for that produce with money provided by Canada's Victory Bonds.

Canada's Victory Bonds make it possible for Canada and her farmers to continue doing business with Great Britain and our allies, and it is supremely necessary that the farmer shall continue to produce, and that Britain shall continue to buy his products.

Every man in Canada who works for his living or operates a business of any kind can help himself and help Canada to win the war by buying Victory Bonds. When he buys Victory Bonds he helps to maintain that general prosperity which is essential to his own.

And the prosperity of each individual is indispensable to the nation, because it is from individuals that the nation must get the money to win the war.

It is both Good Business and True Patriotism for every Canadian to buy Canada's Victory Bonds to the utmost of his or her ability.

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

15

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

THE ROYAL BANK OF CANADA

Notice is hereby given that quarterly dividends of 1¾% on the Preferred Stock and of 2% on the Common Stock of Lake of the Woods Milling Company, Limited, have been declared, payable on December 1st, 1917, to Shareholders of record at the close of business on Saturday, November 24th, 1917.

By order of the Board.

R. NEILSON,
Assistant Secretary.

DOMINION TEXTILE COMPANY, LIMITED

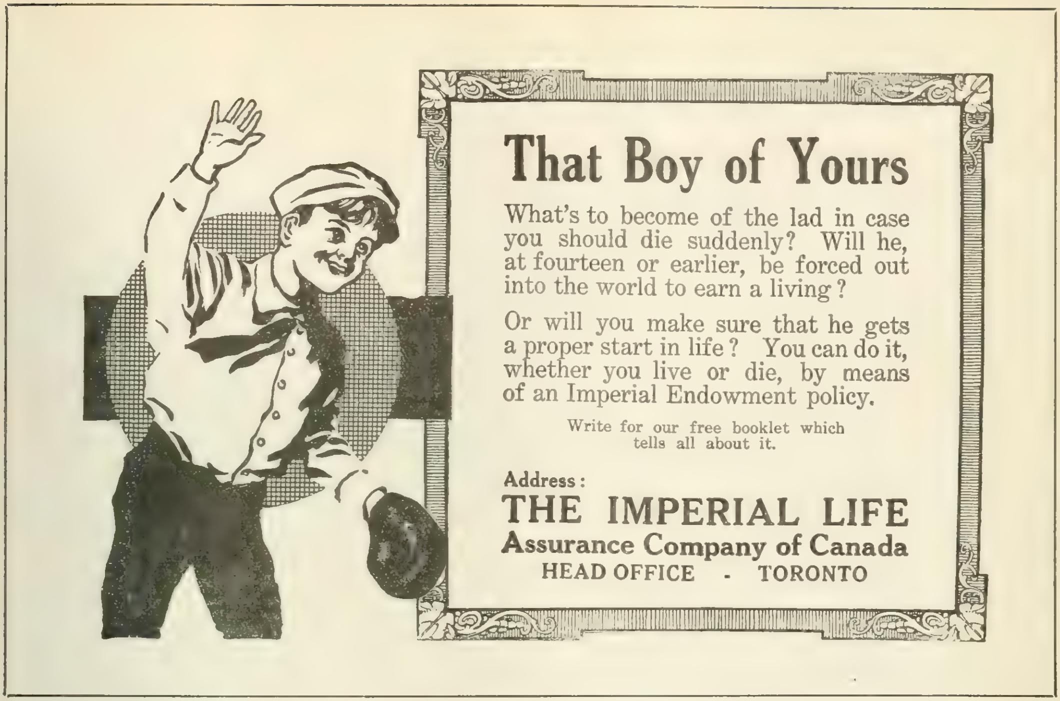
NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Common Stock of the **Dominion Textile Company, Limited,** has been declared for the quarter ending 31st December, 1917, payable January 2nd, 1918, to shareholders of record December 15th, 1917.

By order of the Board.
JAS. H. WEBB, Secretary-Treasurer.

Montreal, 23rd November, 1917.

The Montreal and Toronto stock exchanges are making it easy for any member to get out and work on the war loan campaign. By a general understanding the orders of any broker absent in connection with the loan are being looked after by some other member on the floor. As a result of this arrangement probably more than half the members of the exchanges are busy on war loan affairs. Some are out canvassing with the selling teams and lending their experience to workers less familiar with security business, while others are occupied with organization work at headquarters.



That Boy of Yours

What's to become of the lad in case you should die suddenly? Will he, at fourteen or earlier, be forced out into the world to earn a living?

Or will you make sure that he gets a proper start in life? You can do it, whether you live or die, by means of an Imperial Endowment policy.

Write for our free booklet which tells all about it.

Address:
THE IMPERIAL LIFE
Assurance Company of Canada
HEAD OFFICE - TORONTO

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

INSURANCE PARTNER WANTED.—Wanted, an experienced insurance partner to take a half interest in an established business in a growing northern town; population, seven thousand. Splendid opportunity for a young and active man. Box 125, *Monetary Times*, Toronto.

WANTED.—Permanent Auditor for the Corporation of the City of Brantford. One having a knowledge of Municipal affairs preferred. Apply, stating qualifications, experience and salary expected, to J. S. Dowling, Chairman Finance Committee, City Hall, Brantford. Box 127, *Monetary Times*, Toronto.

FIRE INSURANCE.—Chief clerk in head office wants position with established company as office manager or in similar executive capacity. Long experience with tariff companies; thoroughly competent underwriter, able to take full charge of head office. Legitimate reasons for changing. Highest recommendations as to ability and integrity. Well qualified to hold responsible executive position, and only such would be attractive. Confidential. Box 119, *Monetary Times*, Toronto.

TRANSFER OF BRITISH COLUMBIA LIFE

As noted in *The Monetary Times* last week an agreement has been entered into by the British Columbia Life Assurance Company whereby its business will be transferred to the Sun Life Assurance Company of Canada. In a statement sent to *The Monetary Times* this week, the Sun Life says:—

"The British Columbia Life has met the severe strain imposed by the war in an eminently satisfactory manner, but the increased uncertainty of the future made the management anxious to avoid the necessity of calling up more capital to meet any sudden losses on men who have gone overseas. In addition it was recognized that the extreme youth of the company rendered it impossible to extend to its policyholders in a time of crisis like the present the same liberal treatment that the older companies could afford.

"Senator Shatford, president, is to be congratulated on his action, whereby the policyholders receive the protection of Canada's largest life company, while the shareholders are enabled to withdraw their capital."

Montreal and Toronto Stock Transactions

Stock Prices for Week ended Nov. 21st, 1917, and Sales.

Kitchener	588,650	529,402	+	59,248
Totals	$270,757,203	$268,744,844	+	$ 2,012,359

The Toronto bank clearings for the current week are $57,985,769, compared with $58,307,212 for the same week in 1916, and $45,205,494 in 1915.

For Victory!

You may have applied for military service and been turned down by the military authorities; thus one of your duties is discharged. Another duty remains.

You have a few dollars in a savings account. Lend it to your country to carry on the War. Canada needs the money because the Allies cannot buy more supplies from us unless we accept promises to pay instead of gold.

The cash to pay the expenses of producing war supplies must come henceforth from Canadians. The nation is raising the cash in promoting the Canadian Victory Loan. And Victory Bonds are worth buying and keeping. They yield 5½% per annum.

Buy Victory Bonds

Business and patriotism both urge you. Get your application, if only for a $50 bond, from the local Victory Loan Headquarters, and send it in to-day.

Limited

18-22 King St. East - TORONTO

PACKING COMPANIES' PROFITS

Report of Investigating Commission Proves Post Cure Charges Incorrect

That the profits made by the William Davies Company, Limited, and Matthews-Blackwell, Limited, more particularly the former, were high during the war period and yielded "an extraordinary return upon the capital invested" is one of the statements made in the report of the commission appointed to investigate further the businesses of these two companies.

The commission, which consisted of Mr. G. F. Henderson, K.C., chairman, and Messrs. A. B. Brodie and G. F. Clarkson, has made a unanimous report to Hon. T. W. Crothers, minister of labor. This report, after being under review by a sub-committee of the Cabinet, of which Hon. N. W. Rowell, president of the Privy Council, is chairman, has been made public in its entirety.

The commissioners, in closing their report, draw attention in concise form to its salient features. They say:—

"A.—That the profits made during the war period were exceptionally high and yielded an extraordinary return upon the capital invested. In the year 1916 the trading profits of the Davies company were equal to 80 per cent. on its investment in packing house plants and retail stores. War taxes, however, are repayable out of these profits.

"B.—That these exceptionally high profits were due to an extraordinary expansion in the volume of business done, as well as to an increase in the percentage of profits earned upon sales.

"C.—That the increase in the volume of business done was almost entirely attributable to export sales, principally to the British War Office. These sales yielded a high percentage of profit.

Fixed Minimum Prices.

"D.—That in respect of its export business with the British War Office, the Davies company, for a considerable period of time, enjoyed the advantage of a fixed minimum selling price, a concession granted, so far as we could learn, to no other packer. It was suggested during the enquiry that this concession might have been obtained by Sir Joseph Flavelle, whose occupancy of a public position would facilitate his so doing. The evidence of Sir Joseph is that he took no part in the negotiations which resulted in the granting of this concession, and the cabled correspondence indicates that it resulted from a business negotiation influenced only by business considerations.

"E.—That the present high price of hog products in Canada is primarily due to the high prices paid by packers for live hogs in Canada; that this in turn is the result of aggressive competition between the packers to fill the insistent demand for hog products created by the war.

"F.—That upon the sale of hog products to retail stores and distributors in Canada the Davies Company in 1916 made a profit of three-fifths of a cent per pound, and in 1917 a profit of two-fifths of a cent per pound. The actual profits per pound of the Matthews-Blackwell Company are not ascertainable, but, having regard to its earnings, they could not have exceeded these figures.

"G.—That out of every dollar paid by the public in the purchase of hog products in the Davies company's retail stores, nineteen to twenty-one cents represents the costs of operating such stores and the expense of delivery to the customer.

Public Demand Best Cuts.

"H.—That in considering the present price of bacon in Canada, it must be remembered that the packer has to dispose of the whole animal. During the period of the war it would seem that there has been a larger domestic demand for the choicer cuts, such as bacon. As the demand for bacon has increased, the demand for the other parts of the animal has lessened in proportion, thus throwing upon the parts from which bacon is manufactured an unusual proportion of the cost of the whole. A careful study of the statements already given is necessary to a proper appreciation of this fact."

While during the whole of the period in question the main object of each company appears to have been to do as large an amount of business as possible, and to obtain for itself the profits upon it, no effort would appear to have been made by either, at any time, to come together with a view to keeping down the price of live hogs in Canada.

Post Cure Not Fraudulent.

Dealing with the statements made by a former employee of the Davies company to the effect that the company adopted a fraudulent system of keeping bacon intended for shipment to the War Office, known as the "post cure," the commissioners say that after a thorough investigation into this subject no evidence has been adduced which warrants such a suggestion. The commissioners add:—

"The Davies company had, as far back as 1902 adopted a new and secret process whereby their product could be sufficiently cured for shipment in the short space of two weeks, the completion of the cure taking place while the product was in transit. In view of the fact that the process customarily adopted in Chicago and other packing house centres would seem to require a period of one month, the Davies process obviously gave the company a great advantage over its competitors. The new process, however, had a disadvantage in that it was of such a nature that it required prompt delivery to the smokehouse after arrival in Great Britain. Failing prompt delivery, deterioration would set in, with consequent loss to the company.

Mr. Alfred W. Smithers, chairman of the Grand Trunk, who has just returned to London from Canada, stated that the difficulties of the railways of Canada and the United States are not realized by either the public or the authorities, as, owing to the increase in prices of everything required by the railways, it is impossible to carry at pre-war rates. He hopes that after the elections the government will find time to attend to their difficulties, and also expresses the hope that, as the services of the mercantile marine have been appreciated, so those of the railroads will be.

LOAN RESULTS UP TO LAST NIGHT

The following are the results of the Victory Loan campaign up to Thursday night, November 22nd:—

Entire Dominion	$145,711,200
Ontario's share	83,900,200

To that date, 150,456 had subscribed to the Loan, of which 97,389 are in Ontario. Dividing the total subscriptions in Canada by the number of subscribers, the average subscription is only $905.

The following letter was issued yesterday by Sir Edmund Osler, honorary chairman of the Toronto executive committee, and Mr. E. R. Wood, chairman of the special subscriptions committee:—

"Our canvassers report the impression on the part of the public that we are not publishing all of the subscriptions that have been received; but are holding them back for a spectacular finish of the campaign. We wish the public to understand that this is not the case, and we also wish them to realize that unless those of our citizens who are able to subscribe in amounts of $2,500 and upwards come forward more generally than they are doing at the present the objective set for Toronto of seventy-five million dollars will not be reached.

"The executive committee urgently desire a much more general response from this class in the community."

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	1-64 pm	1-32 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.75.20	$4.75.40	$4.77½
Cable transfers	$4.76.45	$4.76.65	$4.78½

Rates in New York—Sterling, demand, $4.75 3-16.
Bank of England rate, 5 per cent.

At the Revue Theatre, Roncesvalles and Howard Park, Toronto, last night, the proprietors, who have the success of the loan at heart, introduced a scheme whereby every person who purchases a $100 bond at the theatre is presented with a free pass for one month. Mr. Norman Sommerville, general Ontario county organizer, was assured of a $1,500 contribution if he attended last night, and set the scheme going. Mr. Sommerville did so, and bonds of the value of $8,000 were disposed of. The proprietors hope to raise $20,000 in this way.

WAY CLEAR FOR EQUITABLE MUTUALIZATION

Circuit Court Denies Analogy Between Stock Dividends and Society's Purchase of Its Own Stock

The United States Circuit Court of Appeals in affirming the decision of the District Court, denying application for an injunction to restrain the officers, directors and policyholders of the Equitable Life Assurance Society from proceeding with the mutualization of the society, emphasizes two points: First, that the law under which the proposed plan of mutualization is sought, is constitutional, and, second, that the stockholders, as stockholders, are sufficiently protected under the provisions of the plan. These are the main points of contention in the application for an injunction made by the Royal Trust Company of Montreal, as trustee under the will of the late Sir William C. Van Horne and other minority stockholders, pending the trial of a suit entered to prevent the mutualization of the Society.

It is believed that this will end all litigation under the original bill, and that mutualization under the proposed plan will proceed. At all events—the vote of the policyholders, which is to be taken on December 6th, will not be interfered with. This vote will decide whether the policyholders as a body desire mutualization under the proposed plan.

Question is One of Law.

Judges Ward, Rogers and Learned Hand, sitting as the Circuit Court, are unanimous on the two points above stated. In his arguments before the Appellate Court, former Justice Hughes said: "The question is one of law, and the appellant has failed to show a case entitling it to the interposition of equity." Regarding the "grave constitutional questions" referred to in the brief of the appellant, Mr. Hughes stated: "Upon the oral argument in the court below, Judge Hough specifically stated his position with respect to the discussion of constitutional questions, that is, that they should be heard by three judges. This was stated by Judge Hough on his own motion as follows: 'Because this question comes before me as a Circuit Judge holding a District Court, unless the validity under both State and Federal constitutions of the statute so recently passed by our legislature is assumed, I shall call this argument off at once, and summon two other judges.' The appellant was very careful not to press these questions before Judge Hough, upon its motion for a preliminary injunction."

After thus disposing of the question of constitutionality, Judge Hough in an opinion filed with his decision said: "The sole question for my consideration is whether the present plan of mutualization of the Equitable Society is so obviously illegal as to authorize the court in stopping the whole matter. Since constitutionality is assumed, the answer must be in the affirmative, for nothing is pointed out preventing application of the statute to the Equitable.

Stockholders Own Free Surplus.

"The plaintiffs assert the present scheme to be utterly illegal and incapable of ratification for several reasons. First, the stockholders own the assets of the Equitable—the policyholders are creditors—and more particularly the stockholders hold what is called the 'free surplus' of the corporation. Second, the mutualization plan attacked contemplates the application of a considerable part of this 'free surplus' to the purchase of the company's own stock, without providing that the price paid all the shareholders should be the same. Third, a purchase of its own stock by a corporation is in effect a distribution of assets entirely analogous with a stock dividend, wherefore under controlling authorities all stockholders must be treated alike, and to pay more for one man's stock than another's must be contrary to a statute which says nothing on this subject. Fourth, the point may be restated thus: Any distribution of the corporate assets among stockholders must be equal and the contemplated purchase of all the shares of the corporation by the corporation itself is a distribution of assets."

Very Doubtful Proposition.

To these arguments Judge Hough in his opinion holds: "Whether the stockholders of this insurance company own or ever can own anything than the part of their stock with accumulated interest at 7 per cent. is in my opinion a very doubtful proposition. Second, the mutualization plan now proposed carefully refrains from any distribution of the company's surplus by whatever name called. The plan is to make payments out of income almost wholly. Third, what is endeavored to be read into the statute is the admitted rule about stock dividends. I can see no analogy between a stock dividend and the purchase of stock. One gets the stock dividend because he is a shareholder, and after getting it retains the same aliquot portion of interest in the company that he had before. Fourth, the expenditure of assets for the purchase of the company's own shares is not in my judgment a distribution of assets. It may be no more than a reasonable measure of self-protection on the part of the corporate entity.

Measure of Protection.

"An insurance company is not in a large sense a private business, and its relation to the public interest becomes more apparent as the years go on. It may well be that in the case of this insurance company the purchase of its own control for the policyholders out of the general assets of the company is a measure not only of self-protection but of public protection. This furnishes sufficient ground for refusal of a temporary injunction."

In all these joints Judge Hough is upheld by the Circuit Court of Appeals.

PYROXLIN PLASTIC CANDLESTICKS

Fire Marshal Heaton, of Ontario has drawn attention to the danger of using pyroxlin plastic candlesticks. He says: "The Canadian Fire Underwriters' Association have investigated various department stores in Ontario to ascertain if this material had been shipped into the province. They ascertained that in four instances the goods had been under sale, or under order, but on representation each and every one had returned what stock they held, and all promised to disallow such goods into their stores in the future.

"One Toronto store on being visited informed the investigator that an order for the goods had been placed and delivery was daily expected. It had been represented that these goods had been treated in such a manner as to render them non-inflammable. A sample was secured and tested with the result that it burned vigorously. The management immediately recognized the danger of distribution of the goods and promised to cancel the order."

BARN FIRES IN ONTARIO

From January 1st to September 30th, 1917, 788 barn fires, involving a loss of $791.247, occurred in Ontario, according to a report issued by Fire Marshal E. P. Heaton.

Of the total of 211 investigated fires, 13 of the barns affected were equipped with lightning rods, but only two of the fires in such barns were caused by lightning. A particular examination of these two cases determined that in one instance the whole equipment was out of order and it was well known to the farmer that two of the conductors had been completely severed where they entered the ground; the equipment in the case was therefore not only completely useless, but it would have been better had it been altogether removed. In the second case which occurred in Hastings County on the 19th September, 1917, Professor W. H. Day, a recognized lightning rod authority, who had all the reports sent to him, summed up the case in the following words:—

"It brings out very forcibly the value of our instructions that the ground rods should not run from the peak but from the eaves. It appears that this stroke hit the building part way down between the peak and the eaves and in such cases there is absolutely no chance of the current going upward to the peak to get on the ground rod. Rodding men who have been adhering to the old method of ground from the peak have agreed with us time and again that there was no possibility of a stroke occurring part way down the roof as we claim. This example is a concrete answer, and is another case that demonstrates very clearly the importance of our recommendation that buildings should be grounded from the eaves and all water spouts grounded."

The answer to the question, "Do lightning rods protect from fires by lightning?" is unmistakably answered in the affirmative by records and investigations.

RED DEER'S FINANCES

Alberta City Shows Good Banking Balance and No Debentures to Sell

The city of Red Deer, Alta., is in good financial condition, Mr. A. T. Stephenson, the city's secretary-treasurer, in a statement to *The Monetary Times* says:—

"During the past few years we found that the general system of making the assessment in the spring, then holding court of revision, preparing estimates, passing rate by-law and getting out tax notices, threw the taxes late in the year in which they were levied. This necessitated borrowing from the bank until the taxes came in, and the paying of considerable bank interest. We determined to remedy this condition, and last year had our charter changed by which we obtained power to make the assessment in the fall for the following year, and our assessment for 1917 was made out last fall. In the month of January, 1917, we had our court of revision completed, our estimates prepared, and our rate struck, and tax notices were sent out in January, and were all out early in February.

Discounts on Early Tax Payments.

As an inducement for early payment the following discounts were granted:—12½ per cent. if paid by March 31st, 10 per cent. if paid by June 30th, 7½ per cent. if paid by August 31st, 5 per cent. if paid by October 31st. On January 1st a 5 per cent. penalty is added to all arrears, and on July 1st a further penalty of 5 per cent. on all arrears. Lands two years in arrears of taxes are advertised for sale each year.

"As a result of this change of system our tax collections were sufficient to pay all running expenses of the city, schools, and hospital, including debenture coupons due, without borrowing any money from the bank until June 19th, when heavy debenture payments necessitated our borrowing from the bank for the first time on 1917 business.

"For several years past we have also made an extra levy of taxes to build up a reserve fund to provide for uncollectable taxes. In 1916 we made an issue of $55,000 treasury bills, against arrears of taxes, and last year a further issue of $30,000. We have paid all principal and interest on these bills due this year, and have in the bank at present more than enough to pay all treasury bills due in 1918.

No Debentures to Sell.

"All our debentures presented to date are paid in full, also the school debentures, and we have no debentures to issue to cover expenditures made on capital account for which funds were not provided, on the contrary we have cash in the bank, $3,046.06, unexpended balances on debentures issued on capital accounts. No debentures have been issued this year, so that our debenture debt will be reduced by $14,322.19 this year. Our assessment has been made for 1918 and our court of revision will be held this month, so that our estimates can be prepared and our rate struck early in January next year, and we hope to have the same financial results next year.

"Our only difficulty has been due to the arrears of taxes and we are gradually working this into better condition. As Red Deer is the centre of the mixed farming district of Alberta, and the farmers are prospering, the city is indirectly benefited, and we have no fears for our future."

The following officials of Montreal banks walked in the Victory Loan parade in that city on Monday: Sir Vincent Meredith, president Bank of Montreal; Sir Herbert Holt, president Royal Bank; J. A. Vaillancourt, president Banque d'Hochelaga; William Molson Macpherson, president The Molsons Bank; S. H. Ewing, vice-president The Molsons Bank; E. L. Pease, vice-president and managing director Royal Bank of Canada; C. E. Neill, general manager Royal Bank; D. C. Macarow, general manager Merchants Bank; E. F. Hebden, managing director Merchants Bank.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

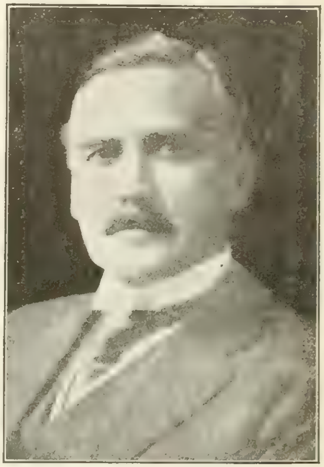
Victory Loan Subscription Lists Close To-morrow, Saturday, December 1st, at Midnight

YOUR LAST CHANCE!

Help To Make It a Real Victory Loan



Sir Thomas White, Finance Minister

"While greatly gratified at the widespread patriotic interest which has been manifested in the Victory Loan throughout the entire Dominion I am disappointed at the total subscription to-day, which has not equalled our expectations and is not as large as it should be, having regard to the urgent national importance of the loan. There are more subscribers than at the same period of previous loans, but the individual average is comparatively small.

"I think many people to show their good will and interest in the loan are taking $50 where they could take $100, $100 where they could take $500, and $1,000 where they could take many thousands.

"I desire to urge as strongly as possible upon the Canadian people the supreme importance of making this loan an overwhelming national success. If we can reach a total of three hundred million dollars, which can easily be accomplished if everybody will do his part, there will be adequate financial support for our military forces, and in addition the prosperity of the Dominion will be secured for the coming year.

"I most earnestly appeal to the people of Canada to give this great and vital national undertaking their most loyal and unstinted support Let those who have already subscribed increase, if possible, their subscriptions, and those who have not yet subscribed immediately make application for as large an allotment as their means will permit. Canada must decisively score in her great Victory Loan."
—Statement issued by Sir Thomas White at the end of last week.

IF You have been waiting to see how the Bonds were going—they have been going well; BUT Your Subscription is needed so that the $300,000,000 objective will be attained

October Bank Statement Makes New Records

NOTICE *Deposits Totalled $985,000,000 and by This Time Will Probably be a Billion—Current Loans of $883,000,000 Were at Their Highest Level Since War Commenced — Circulation Was Also Larger—Strong Position For Victory Loan Payments.*

	Oct., 1916.	Sept., 1917.	Oct., 1917.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	**$489,230,234**	**$451,749,532**	**$495,058,449**	**+ 1.20**	**+ 9.7**
Deposits after notice	**814,297,404**	**965,393,541**	**985,790,850**	**−21.0**	**+ 2.0**
Current loans in Canada	**774,928,222**	**855,306,953**	**883,986,860**	**+14.0**	**+ 3.2**
Current loans elsewhere	**79,459,621**	**87,265,325**	**93,821,865**	**+17.7**	**+ 6.8**
Loans to municipalities	**37,613,530**	**42,721,563**	**41,204,381**	**+10.8**	**— 2.3**
Call loans in Canada	**90,412,023**	**72,421,187**	**71,653,719**	**—21.1**	**— 1.3**
Call loans elsewhere	**189,346,216**	**166,480,004**	**151,018,747**	**—20.1**	**— 9.**
Circulation	**147,132,673**	**178,139,958**	**195,298,212**	**+32.6**	**+ 9.9**

THE above are the changes in the principal accounts of the chartered banks during October. They indicate a strong position for the financing of the Victory Loan which, it is hoped, will be subscribed to the extent of $300,000,000. The first payment of 10 per cent. of this loan is due to-morrow, December 1st. Subscribers on that date, however, will be allowed to discount their future instalments at the rate of 5½ per cent. Assuming that $300,000,000 is subscribed to the loan, payments aggregating $30,000,000 will be due to-morrow. In addition, there will be the sum represented by those who discount their instalments. The notice deposits at the end of October exceeded $980,000,000. This was an increase of $20,000,000 in October following an increase of $12,000,000 in September. Assuming that these gains continue during November, there should be in the banks on this day, Friday, November 30th, not less than one billion of dollars of notice deposits. Deducting the first instalment of a $300,000,000 Victory Loan, the notice deposits would still be $970,000,000 or $5,000,000 greater than they were at the end of September last.

Domestic deposits for the past thirteen months are as follow:—

	Deposits payable on demand.	Deposits payable after notice.
1916—October	$489,230,234	$814,297,404
November	459,277,454	836,593,269
December	458,208,417	845,006,717
1917—January	427,308,520	864,163,344
February	430,331,801	880,456,637
March	448,151,528	888,765,608
April	471,312,285	874,948,724
May	443,839,847	892,562,657
June	449,689,670	900,510,552
July	450,849,356	929,442,340
August	443,317,275	896,774,687
September	451,749,532	965,393,541
October	495,058,449	985,790,850

The October bank statement has made several records. Savings deposits at $985,000,000 is a new high record. Commercial loans at $883,000,000 is the highest point this account has reached during the war period. Circulation, at $195,000,000, is also a new high record.

Deposits payable after notice increased last month $20,000,000 or 2 per cent. They are $171,000,000 or 21 per cent. greater than a year ago. It was only in June last that the total of this account exceeded $900,000,000 for the first time in the history of the Canadian banks.

The course of the deposits account during the past four years is shown in the following table:—

October.	On demand.	After notice.	Total.
1913	$389,856,507	$621,511,207	$1,011,367,714
1914	348,732,830	659,797,682	1,008,530,512
1915	392,042,193	701,330,850	1,093,370,043
1916	489,230,234	814,297,404	1,303,527,638
1917	495,058,449	985,790,850	1,480,849,299

In the past four years, notice deposits have increased $364,000,000 or 58 per cent., demand deposits having increased $106,000,000 or 27 per cent. Total deposits in the same period have increased $469,000,000 or 46 per cent. This is a record which reflects the prosperity due almost entirely to war.

The trend of the bank loans for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1916—October	$774,928,222	$90,412,023
November	813,791,947	89,395,370
December	820,378,557	82,569,983
1917—January	806,470,147	70,737,064
February	813,302,717	78,686,535
March	843,054,466	76,478,708
April	889,523,897	82,737,417
May	844,809,589	78,514,798
June	830,355,782	76,085,220
July	820,560,700	71,276,788
August	836,420,670	71,204,351
September	855,306,953	72,421,187
October	883,986,860	71,653,719

Of the deposit in Central Gold Reserves $21,210,000 is in gold coin: the balance is in Dominion Notes.

Current loans in Canada last month were at the highest total during the past thirteen months. They increased during October by $29,000,000 or 3.2 per cent. They are $109,000,000 or 14 per cent. greater than a year ago. This account is at the highest point reached during the period of war and reflects the financing of the crop movement. Current loans, following an expansion of nearly $19,000,000 in September, rose upwards of $28,000,000 in October. Circulation, which expanded $21,000,000 in September, was $12,000,000 higher at the end of October. With the rise to $883,000,000, current loans passed the high mark of the war period, April last, when the figures were $880,000,000. From that level there had been a sharp descent to $829,000,000 in July, following the opening of navigation and the outward movement of grain and munitions to Europe. A rise coincident with the marketing of the new crop is in progress.

The following table shows the course of the principal loan accounts during recent years:—

Oct.		Current loans in Canada.	Current loans elsehere.	Call loans in Canada.	Call loans elsewhere.
1913		$862,313,[illegible]	$58,171,884	$71,118,255	$ 93,340,810
1914	...	816,023,852	42,[illegible],710	70,201,030	81,261,671
1915	...	780,785,754	49,612,985	74,574,270	120,681,624
1916		774,028,222	79,459,[illegible]	90,412,023	180,340,210
1917	...	883,986,860	93,821,865	71,653,719	151,018,747

Current loans in Canada were higher last October than during any of the past five Octobers. Call loans abroad

Dominion Government---Oct., 1917

LIABILITIES

Loans from other banks in Canada secured, including bills re-discounted	Deposits made by and balances due to other banks in Canada	Due to banks and banking correspondents in the United Kingdom	Due to banks and banking correspondents elsewhere than in Canada or the U.K.	Bills payable	Acceptances under letters of credit	Liabilities not included under foregoing heads	Balances due to the Imperial Government	Total Liabilities	Aggregate amount of loans to directors, and firms of which they are partners	Average amount of current gold and subsidiary coin held during the month	Average amount of Dominion Notes held during the month	Greatest amount of notes in circulation at any time during the month

T. C. BOVILLE, *Deputy Minister of Finance.*

were sharply reduced last month to meet the increased demands of business in Canada. The decrease on this account in October was $15,000,000, following a reduction on that account of $11,000,000.

The course of call loans abroad for the period beginning two months before the declaration of war is of interest and is shown in the following table, compiled by *The Monetary Times*:—

	1914.	1915.	1916.	1917.
January .	....	$ 85,796,641	$134,248,552	$155,747,476
February	....	89,890,982	139,138,651	162,344,556
March	.	101,038,065	141,880,989	161,616,735
April .	.. . .	121,522,071	147,146,443	159,156,054
May	....	136,098,835	163,400,659	168,692,675
June	$137,120,197	124,604,875	182,757,015	159,309,133
July	125,545,287	117,821,174	177,121,733	151,875,676
August ..	96,495,473	120,607,677	171,380,353	176,610,625
September	89,521,859	135,108,412	173,877,586	166,480,004
October .	81,201,671	120,681,624	180,346,210	151,018,747
November	74,450,643	135,530,502	183,250,389	. . .
December	85,012,964	137,157,800	173,878,134	.

Call loans abroad at the end of October were at a lower level than during any month since April, 1916, with one exception, namely, July last, when they were slightly higher.

Help finance the Empire's fight for right.

ONTARIO MINERAL PRODUCTION

Increased Prices in Gold, Silver and Copper Output Balances Decreased Output

The Ontario bureau of mines has issued statistics, which appear at the foot of this page, regarding the production of the metalliferous mines and works of Ontario for the nine months ending 30th September, 1917. For purposes of comparison, figures for the corresponding period in 1916 are also given.

Notwithstanding the falling off in the output of gold, silver and copper, the aggregate value for the nine months was some $2,000,000 more than for the same period in 1916. Increased prices for silver, copper and nickel are largely responsible for this increase.

Table of Production.

Of the total production, the Hollinger Mine yielded 161,702 ounces; McIntyre, 59,779 ounces; and Dome, 58,978. Gold being the standard of value, and having a fixed price, was the only metal which did not share in the general increase of prices. Indeed, the high price of labor and supplies have, for the time being, lowered the rate of expansion for this branch of the industry. The output for the first nine months of this year was some 20,000 ounces less than for the corresponding period in 1916.

Northern Ontario's Gold.

Evidence accumulates that the gold resources of Northern Ontario are extensive. Developments at Porcupine have been satisfactory, and Kirkland Lake shows signs of being a good second. A satisfactory feature is that the newer gold camps are scattered over a wide area of territory.

The average price of silver was 79.758 cents—the low being 71.75 on March 27th, and the high 108.50 on September 25th. The following mines were the leading shippers: Mining Corporation of Canada, 3,831,211 ounces; Nipissing, 2,839,462 ounces; Kerr Lake, 1,708,921 ounces; Coniagas, 976,315 ounces; O'Brien, 925,000 ounces; McKinley-Darragh-Savage, 775,566 ounces; Miller Lake O'Brien, 757,132 ounces.

Nickel and Copper.

Both these metals have risen in price, and are valued in these statistics at 25 cents and 20 cents per pound respectively, for the metallic contents of the mattes produced. Nickel is quoted at 50 to 55 cents per pound, and the United States government has now fixed the price of copper at 23½ cents per pound. The mines of Sudbury are now, and have been for some time, working at maximum capacity. The nickel contents of the mattes for the nine months of 1917 were a little larger than for the same period in 1916, but the copper contents were about 1,000 tons lower. The International Nickel Company's new refinery at Port Colborne is well under way, and is expected to be turning out refined nickel before next spring.

In addition to exported ore, 138,808 tons were shipped to Ontario smelters. Of the total of 983,321 tons of ore smelted, only 93,536 tons, or 9.5 per cent., were Ontario ore. The total pig iron produced was 513,232 tons, worth $9,841,438 as compared with 501,410 tons, worth $6,686,965 in 1916 for the corresponding period. This shows an advance of nearly 50 per cent. in the value of pig iron.

VICTORY LOAN WILL ENCOURAGE THRIFT

"If we can raise a $300,000,000 war loan from 250,000 subscribers, it will be of far more value to the country than if the same amount came from only the large financial institutions, industrial and other corporations and a few individuals. I would like to see 500,000 subscribers to the Victory Loan." This was the statement of Mr. W. G. Watson, general manager of the Toronto General Trusts Corporation, to *The Monetary Times* last week. "The wide subscription of the loan will mean a great deal to the country," he continued. "It will develop thrift and the propensity for saving. I think the benefit in that direction will be immense. There have been a number of people jogging along thinking that they could not save. This war loan campaign is changing their view. Those who buy a little government bond or a similar investment will want to do so again later."

WAR LOANS PER CAPITA

The splendid results of the first, second and third war loans and the excellent prospects for the very heavy oversubscription of the Victory Loan now offered, not only enhance Canadian credit in the international money markets but also give the people of Canada a greater measure of financial self-reliance. The country knows well that it is capable of doing a little lending, besides a lot of borrowing. An achievement which has meant the subscription of two dollars for every dollar asked for by the government, is notable.

With the $350,000,000 subscribed and allotted through the first three war loans, the per capita subscription was approximately $43. A number of small investors subscribed to the previous three loans but the majority of the rank and file had not been reached. Debenture stock issues, convertible into war loans, and war savings certificates are doing their work in attracting the smaller investors in greater numbers. Assuming that $300,000,000 is subscribed to the Victory Loan and allotted, the total war loans subscribed and allotted to date will be $650,000,000 or approximately $81 per capita. In that event, we will have doubled our per capita war loan subscriptions within six months, as in March last the per capita figure was $43.

The record in regard to the number of subscribers is also satisfactory. To the first loan there were only 24,862 subscribers; to the second, 34,526; and to the third, 40,800. At the end of two weeks the subscribers in the city of Toronto alone were more than double that number. By the time the subscription lists close tomorrow, the number of Victory Loan subscribers will probably be at least eight times the number subscribing to the third war loan in March last.

This is the first occasion on which a substantial portion of the savings of the people have been obtained for a Canadian war loan. In the three previous loans the large subscriptions of corporations and individuals accounted for a heavy proportion of the total amount raised. If the Victory Loan is subscribed to the extent indicated at the time of writing, it will probably be unnecessary to seek another war loan until early next fall. If the war continues, and such a loan is necessary, there should be no greater difficulty in obtaining a sum equal to that of the Victory Loan, and from a still larger number of subscribers.

WEALTH FROM PRODUCTION

There is substantial wealth and excellent credit behind the Canadian government's war loan. The value of production in Canada last year from field crops, forests, mines and fisheries was $1,292,904,812, compared with $1,071,219,879 in 1915. The details for the two years are as follow:—

	1915.	1916.
Field crops	$ 825,370,000	$ 886,494,900
Forests	172,880,000	190,000,000
Mines	137,100,171	177,201,534
Fisheries	35,860,708	39,208,378
	$1,071,219,879	$1,292,904,812

The value of production (field crops, mines, fisheries and forest products) each year since 1908 has been as follows:—

Year.	Total.	Year.	Total.
1908	$ 703,500,000	1913	$ 907,311,000
1909	816,274,000	1914	975,379,706
1910	701,085,000	1915	1,071,219,879
1911	601,700,000	1916	1,292,904,812
1912	909,358,000		

The value of manufactured products last year is estimated at $2,000,000,000, compared with $1,392,000,000 in 1915, $1,400,000,000 in 1913, and $1,110,000,000 in 1910. These are a few of the things at the back of interest payments on our war loans.

WHAT VICTORY BONDS WILL COST

If Part Payment is Made in Old War Bonds—Some Interesting Calculations

What does a subscriber to the Victory Loan, who turns in old bonds in part payment, actually pay for his bonds? Mr. Dean H. Pettes, partner in the firm of W. L. McKinnon and Company, the well known Toronto bond house, who has been an untiring worker in the Loan campaign, has furnished the following calculations at the special request of *The Monetary Times*.—

We will take, for example, said Mr. Pettes, the case of an investor who subscribes $20,000, turning in $5,000 each of the first, second and third war loans as part payment. In other words, he is investing $5,000 new money and converting $15,000 old bonds. What he will pay for his $20,000 of Victory bonds by discounting his instalments on January 2nd is shown in the following table:—

On December 1st he turns in his $15,000 old bonds as follows:—

(a) First loan, $5,000, at issue price, 97½	$ 4,875.00
(b) Second loan, $5,000, similar calculation.....	4,875.00
(c) Third loan, $5,000, at issue price, 96	4,800.00
	$14,550.00

Cash Value of Old Bonds.

The cash value of the $15,000 old bonds is, therefore, $14,550, plus the accrued interest to December 1st on each of the three lots of $5,000 as follows:—

(a) First loan, $5,000 at 5 per cent. per annum for the period June 1st to December 1st....	$ 125.00
(b) Second loan, $5,000 at 5 per cent. per annum for the period October 1st to December 1st..	41.78
(c) Third loan, $5,000 at 5 per cent. per annum for the period September 1st to December 1st	62.33
	$ 229.11

The cash value for conversion of $5,000 of each of the three old loans, turned in at their issue price, plus accrued interest, is, therefore, $14,779.11, made up as follows:—

(a) Value of $5,000 of each of the three old loans at issue prices	$14,550.00
(b) Accrued interest on same to December 1st..	229.11
	$14,779.11

Turn in Bonds to Bank.

On December 1st, the old bonds must be turned into the bank and the first payment of 10 per cent. made on the $20,000 subscription which we have taken for an example. The bank will, therefore, have received in old bonds the equivalent of cash to the extent of $14,779.11. From this sum the bank will deduct the first payment of 10 per cent. on the $20,000 subscription thus:—

(a) Old bonds turned in, equal to cash of........	$14,779.11
(b) First payment of 10 per cent. on the $20,000 subscription	2,000.00
	$12,779.11

The subscriber has now made his first payment out of the old bonds on his subscription of $20,000 to the Victory Loan, and has a balance of $12,779.11 at the bank on account of his old bonds.

Discounting Instalments.

The remaining instalments to be paid on a $20,000 subscription would be:—

January 2nd	$ 2,000.00
February 1st	4,000.00
March 1st	4,000.00
April 1st .	4,000.00
May 1st	4,000.00
	$18,000.00

On January 2nd the subscriber has the privilege of discounting all the remaining instalments at $89.10795 per each $100 of his subscription, or $17,821.59. That is to say, by paying $17,821.59 on January 2nd his $20,000 of Victory Bonds will be fully paid for.

As shown above, he has at the bank the unused portion of the value of his old bonds, namely, $12,779.11. The bank will also allow him 5 per cent. interest on this amount from December 1st to January 2nd, amounting to $56. He, therefore, pays all remaining instalments on his $20,000 Victory Bonds on January 2nd as follows:—

(a) Unused portion of value of old bonds.......	$12,779.11
(b) Interest at 5 per cent. per annum on this amount from December 1st to January 2nd..	56.00
(c) Cash	4,986.48
	$17,821.59

Actual Cost of Purchase.

The actual cost to the subscriber for $20,000 Victory Bonds is, therefore, on the above basis, $19,821.59, made up as follows:—

(a) Value of $15,000 old bonds, plus accrued interest as at December 1st	$14,779.11
(b) Interest earned on unused portion of value of old bonds from December 1st to January 2nd	56.00
(c) Cash paid January 2nd	4,986.48
	$19,821.59

SUN LIFE'S LARGE WAR LOAN HOLDINGS

The Sun Life Insurance Company of Canada has subscribed $5,000,000 to the Victory Loan. With this subscription, the company will have a total investment of upwards of $13,000,000 in Canadian government bonds. The company was one of the large subscribers to the first loan and it has supported each successive issue in a substantial way.

In addition to Canadian government loans, the company has also been a supporter of other loans for the Allies. At the last annual meeting in March, President Macaulay stated that the total subscriptions of the company to British and Allied loans amounted at that time to no less than $18,800,000.

(The Monetary Times Photo.)

T. B. MACAULAY, MONTREAL,
President, Sun Life Assurance Company of Canada, which has subscribed $5,000,000 to the Victory Loan.

Mr. Macaulay has taken an active interest in the success of the loan and a number of Sun Life men have acted on loan committees and canvassing teams. Mr. E. A. McNutt, treasurer of the company, is joint chairman (with Mr. A. P. Frigon) of the Victory Loan committee for Quebec province, outside of Montreal. Mr. John A. Tory, the company's manager of Eastern Ontario and Michigan is a member of the Dominion advisory committee of life insurance representatives in connection with the loan campaign. Mr. A. F. Harwood, of the company's Regina staff, is acting on the Saskatchewan provincial committee of life insurance men and Mr. W. W. Hutton, of the Sun Life's Edmonton branch is on a loan committee in that city.

A large number of the Sun Life agents are working on canvassing teams and have met with great success.

CANADA'S VICTORY LOAN

IS issued in bonds of $50 and upwards, pays over 5½% interest and is the safest investment in Canada. Patriotism demands that every one shall purchase to the limit of his means.

The Bank of Montreal

at all its branches is prepared to furnish information and assistance to purchasers, particularly those having small sums and who are not accustomed to the purchase of bonds.

NEW STOCK AND BOND HOUSE

Mr. Æmilius Jarvis and Mr. A. D. Morrow, Toronto, have dissolved partnership, and Mr. Morrow has formed a partnership with Mr. Morgan Jellett, who has also been associated with the firm of Æmilius Jarvis and Company for a number of years. The new firm will be known as Morrow and Jellett, and they will have offices in the Jarvis Building, 103 Bay Street, Toronto, commencing business to-morrow, December 1st.

(International Press Photo)

MORGAN JELLETT, TORONTO,
Partner in new financial house, Morrow and Jellett.

Messrs. Morrow and Jellett, who have taken over all the open stock accounts of Æmilius Jarvis and Company, are members of the Toronto Stock Exchange, and, in addition to carrying on a stock brokerage business, they will also conduct a bond business, dealing in war loans, government, provincial and municipal bonds. Mr. H. L. Somers, late manager of the bond department of Æmilius Jarvis and Company, will be in charge of the bond department of the new firm.

Mr. Jellett was born in Belleville, Ontario, in 1877, being educated at the Toronto Public Schools and Trinity College School, Port Hope, Ontario. He commenced his business career with the Traders' Bank in 1897, and was with that institution for eight years, a part of the time in the Windsor, Ontario, branch. He then went into the bond business, joining the bond department of Æmilius Jarvis and Company in 1905. He is well known in financial circles and has a genial manner which has won him many friends.

Mr. Morrow was born at Milbrook, Ontario, in 1882, and was educated at the Peterboro High School. He commenced business with the National Trust Company at the time of its formation in 1899, where he acquired valuable experience of accountancy and finance. He became a partner in the brokerage firm of Deacon and Company in 1905, joining the firm of Æmilius Jarvis and Company in 1908, with whom he has remained until this time. Mr. Morrow comes of a family which has made its mark in Canadian business and finance. Messrs. Jellett and Morrow have the best wishes of numerous friends for the success of their new firm.

Sherbrooke	842,641	545,854	+	296,787
Kitchener	754.582	572.590	+	181.992
Totals	$280,790.944	$272,156,777	+	$ 8,634,167

The Toronto bank clearings for the current week are $53,841,647, compared with $56.634,145 for the same week in 1916, and $45,933,966 in 1915.

LIFE OFFICERS' ASSOCIATION

The Life Officers' Association of Canada have held their annual meeting, electing the following officers: Messrs. H. C. Cox, Canada Life, president; C. C. Ferguson, Great-West Life, first vice-president; J. B. McKechnie, Manufacturers' Life, second vice-president; D. A. Kilgour, North American Life, secretary-treasurer; J. F. Weston, Imperial Life, and G. B. Woods, Continental Life, auditors. Executive committee—The foregoing officers, the past president, Mr. A. Bissett, London and Lancashire Life; J. E. Kavanagh, Metropolitan Life of New York; A. R. Howell, Gresham Life; A. B. Wood, Sun Life; and Charles Ruby, Dominion Life.

TOWN OF SALTCOATS DOES WELL

The town of Saltcoats, Sask., with 500 population, after one week's canvass, stands at $50,100, with 171 individual applications, making over $100 per capita and one in three of the population, so Mr. H. S. Athey of that town informs *The Monetary Times*. Mr. J. E. Parrott, the energetic chairman, is now expecting the country district tributary to the town, to subscribe a similar amount. The whole town has been canvassed by the ladies of the I.O.D.E., who have made a house to house canvass in teams calling as many as four times to secure an application. The commissions are being turned over to patriotic funds.

Established in 1836. Incorporated by Royal Charter in 1840.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Bridge Company.—The company has received an additional order for 10,000 tons of fabricated steel from the American International Corporation. Some two weeks ago orders from the same source amounting to 40,000 tons were announced, so that the total has now been increased to 50,000. The American International will require 335,000 tons of steel for the construction of 130 boats, contracts for which have been received from the Emergency Fleet Corporation.

Saskatchewan Co-Operative Elevator Company.—At the annual meeting reports were submitted showing a profit of $350,572, after allowing for interest on loans, depreciation, war taxes, etc. A dividend of 8 per cent. is declared. The company, according to the report, is in sound financial condition and the shareholders' interest is now about $2,000,000. During the year 41 elevators were added to the system, and during the season 24,558,637 bushels of grain were handled and 32,359,725 bushels were passed through the 258 elevators.

Dominion Park Company, Limited.—Gross revenue of the company for the year ended October 31 last amounted to $221,972, as compared with $150,982 for 1916. Insurance, general and operating expenses totalled $140,000, against $121,000 for the previous year. After bond interest the net profit for the season was $37,100, compared with $22,307 a year ago. During the year $28,461 was written off for repairs and renewals and $9,332 for depreciation. The balance sheet shows cash on hand of $30,603 and holdings of Dominion war loans, $48,750. Property, buildings, etc., are valued at $624,345.

La Rose Mines.—The directors have called a special meeting of stockholders to be held at Augusta, Me., on December 10 to ratify the dissolution of the United States Holding Company and reduce the capital from $6,000,000 to $1,500,000. The reduction in the capitalization, the directors said, will be made in order to have the nominal value of the capital stock fairly represent the present value of its assets. The reduction in the capitalization will facilitate the distribution of stock of the operating company among the shareholders of the La Rose by enabling the exchange to be made on a share for share basis.

Ontario National Brick Company.—To protect their equity in the property, the bondholders are being asked to participate in a reorganization plan which provides for the raising of $400,000 additional money, an amount equivalent to 25 per cent. of their original bond holdings. If the reorganization plan goes through and the old company, now in liquidation, is bought in on behalf of the bondholders, the new company will have an authorized bond issue of $500,000, of which $400,000 will be issued immediately, and a capital stock of $1,600,000. J. N. Greenshields, K.C., is president of the Ontario National Brick Company, Limited.

Cape Breton Electric Company.—The report of the company for the 12 months ended September 30 shows:—

	Sept., '17.	Sept., '16.	Increase.
Gross earnings	$443,606	$385,443	$58,162
Operating expenses and taxes	274,100	225,937	48,163
Net earnings	$169,505	$159,506	$ 9,999
Interest charges	63,340	63,096	244
Balance	$106,164	$ 96,410	$ 9,754
Sinking fund requirements	15,360	15,410	*50
Balance (for reserves, replacements and dividends)	$ 90,804	$ 80,999	$ 9,805

*Decrease.

Canadian Pacific Railway Company.—Mr. E. W. Beatty, vice-president, has issued the following statement: "My attention has been called to a published statement that there are practically no bids for Canadian lands, and that it is difficult to see how the Canadian Pacific with its large holdings of lands can do anything but drag lower as its earnings drop. The Canadian Pacific land sales for October, 1916, amounted to 45,027 acres, at a price of $580,619; for October, 1917, sales amounted to 82,853 acres, at a price of $1,456,451. For the ten months ended October, 1916, the total sales were 316,796 acres, at $4,963,116; while for ten months ended October, 1917, 543,160 acres were sold for $9,527,636."

Civic Investment and Industrial Company.—The "dual service" idea, which the company puts forward in its selling propaganda, evidently has merits for shareholders as well as consumers, for present indications suggest that losses on the gas end of the business have a substantial offset in gains on the electric end. Electric sales are understood to be phenomenally large, and in the matter of supply the company is well protected by its hydro-electric subsidiaries. These can operate with but minor changes in expenses, while expenses in almost every branch of business have continued to advance sharply. Gross earnings for the first six months of its current fiscal year amounted to $4,822,710 and surplus after expenses and fixed charges to $2,113,685. In more detail the upturn in the curve of earnings from summer to autumn is shown in the following comparisons of gross earnings and surplus after charges for the three months of the past quarter:—

Month.	Gross earnings.	Surplus.
October	$905,216	$412,358
September . .	834,203	373,985
August	783,412	337,552

Windsor Hotel Company.—Comparisons of profit and loss figures for the past three years show the following:—

	1916-17.	1915-16.	1914-15.
Net earnings	$105,713	$ 77,648	$ 38,747
Bond interest	27,000	27,000	27,000
Net profit	$ 78,713	$ 50,648	$ 11,747
Dividends . . .	60,000	60,000	......
Surplus	$ 18,713	*$ 9,352	$ 11,747
Previous surplus ...	437,226	446,577	434,830
Total surplus ..	$455,939	$437,226	$446,577

*Deficiency.

Earnings of the company are still well below the level of five or six years ago, although the tendency has been to improve since the slump of 1914-15. The balance sheet shows a comfortable position. A mortgage of $10,000 on the Stanley Street property has been wiped off and, while no provision is made for depreciation, $96,475 was charged to repairs and renewals. Comparisons of the main features of the balance sheets follow:—

Assets.

	1917.	1916.
Cash	$ 31,595	$ 86,933
Accounts received	27,194	18,782
Inventories	82,749	48,623
Unexpired taxes, etc.	5,854	5,162
Furniture	450,000	450,000
Buildings, etc.	2,118,980	2,118,980
Total	$2,716,374	$2,728,482

Liabilities.

	1917.	1916.
Accounts payable	$ 59,720	$ 45,515
Accrued taxes	17,855	18,193
Accrued wages	11,827	12,004
Accrued interest	9,000	9,000
Dividend payable	30,000	60,000
Mortgage	......	10,000
Bonds	600,000	600,000
Reserve	32,029	36,542
Capital stock	1,500,000	1,500,000
Surplus	455,939	473,226
Total	$2,716,374	$2,728,482

Buy a war bond and bring peace nearer.

WORKING HARD FOR VICTORY LOAN

Imperial Life Subscribed $1,000,000 — Company's Organization Helping Campaign

The Imperial Life Assurance Company of Canada have subscribed $1,000,000 to the Victory War Loan, and have also converted $1,465,000 of previous issues. In addition, the members of the head office staff have subscribed for about $20,000 of bonds, under an arrangement whereby the company finances the purchase and the individual members pay for the bonds respectively subscribed for in 25 monthly instalments.

The company's superintendent of agencies, Mr. G. H. Hunt, is a member of the Ontario executive of the loan campaign, and is also captain of one of the teams engaged in the final three days' drive in Toronto.

Mr. Clifford Elvins, the company's advertising manager, is a member of the Ontario publicity committee and also heads a small sub-committee organized for the purpose of publishing a daily bulletin (named "Ammunition") for the Toronto headquarters. Mr. Stanley Henderson, manager of the Imperial Life for British Columbia, is a member of the British Columbia loan committee and was placed in charge of the organizing of the Okanagan district.

(The Monetary Times Photo.)

J. F. WESTON, TORONTO,

Member, Executive Committee representing Life Officers' Association, Victory Loan Campaign.

Mr. W. M. Ardern, the company's branch manager in Calgary, is a member of the local loan committee and had charge of the organizing of Southern Alberta.

Mr. E. S. Miller provincial manager of the Imperial Life for Saskatchewan, is a member of the Saskatchewan Victory Loan committee and also chairman of the campaign in the city of Regina. Mr. W. A. Peace, manager for Toronto, is captain of a loan team in that city. Mr. E. J. L'Esperance, Montreal, is a member of a local loan committee, and is also captain of one of the teams.

Mr. L. J. Lowe, the Imperial Life's manager for New Brunswick, is captain of one of the teams in the city of St. John. Mr. Victor A. Lemieux, the company's manager for Quebec, occupies a similar position in the city of Quebec. Mr. W. B. Collins, manager for the Imperial Life for Brantford, is also captain of a team in that city.

The entire sales force in connection with a number of the company's branches have given their entire time to the selling of Victory bonds, and throughout the country every man in the organization who could be used by the local committees has volunteered his services.

Mr. J. F. Weston, managing director of the Imperial Life Assurance Company is a member of the war loan executive committee representing the Life Officers' Association and of the honorary committee headed by Sir Edmund Osler. Mr. Weston began his life insurance career in 1889 at St. John, N.B., in the service of the old Temperance and General, which amalgamated with the Manufacturers' Life in 1901. He is one of those men dear to the heart of the field men in life insurance, because of his rise from the ranks of the soliciting agents to a high executive position. When he was a local agent in New Brunswick he showed many signs of that genius for organization which has been so important a factor in his success. He once remarked in referring to that period, that he never closed an application himself if he could get anyone else to do it for him, and the staff of subordinates he soon had around him made inevitable his early appointment as district agent.

Called to Head Office.

In 1905 Mr. Weston was called to the head office of the Manufacturers' Life to fill the position of superintendent of agencies, and in the pursuance of his duties he became known to practically all the life insurance field men of Canada. The Life Underwriters' Association appealed to him very strongly, and his organizing ability was immediately recognized and made use of by that body. Mr. Weston was identified with the movement from its inception. Although in a sense a head office official, he was made secretary, and his valuable services performed on behalf of the insurance business when representing the underwriters before the banking and commerce committee, which held its sessions subsequent to the insurance investigation, gave him a very strong hold upon the esteem and affection of life officers and agents.

On February 19th, 1913, Mr. Weston was appointed general manager of the Imperial Life Assurance Company, and upon the retirement of the president, Mr. H. C. Cox, he became managing director of the company. In addition to his thorough knowledge of agency work, Mr. Weston is so familiar with company management that the Imperial Life cannot do other than prosper under his capable guidance.

BRITISH COLUMBIA LIFE ASSURANCE COMPANY

As previously stated in *The Monetary Times*, the British Columbia Life Assurance Company has sold, subject to the approval of the insurance department at Ottawa, its business to the Sun Life Assurance Company for the amount of $100,000, being the paid-up capital of the former company.

The British Columbia Life Assurance Company's statement, issued in connection with the sale, reads:—

"While the absorption of the British Columbia Life Assurance Company by the Sun Life Assurance, the largest Canadian institution of its kind, will be much regretted from a western and provincial point of view, the directors of the Vancouver company feel that they have acted wisely in recommending and carrying out the sale.

"The outstanding features of the sale are that the insurance in force will all be assumed by the purchasing company, thus fully protecting the policyholders, while the shareholders will have the paid-up capital returned.

"That the British Columbia Life Assurance Company is financially sound is fully attested by the offer of the purchasing company, but at the present time it would be extremely difficult, if not impossible, to obtain the additional capital which would be necessary to continue in business in a progressive way and meet the possibility of a large war mortality."

The sale was made through Senator L. W. Shatford, the president of the British Columbia Life. The other directors and officers are as follows: Vice-presidents, Messrs. T. E. Ladner and J. N. Ellis; directors, J. J. Banfield, J. T. Phelan, C. S. Tompkins, R. H. French, K. D. Simpson and J. L. Guichon.

The insurance in force which is taken over by the Sun is $2,750,000.

"Were I asked what Canada could best do to help the Empire's food problem during these coming months I would support Lord Northcliffe's advice and minimize consumption in order to have larger supplies available for the army and make arrangements to establish credits to enable England to purchase these supplies."—Baron Rhondda, British Food Controller.

CANADA'S VICTORY LOAN

The Bonds of the above Issue run in denominations of $50.00 and multiples thereof.

Yielding in excess of 5½ interest, they provide an absolutely safe and profitable investment and afford at the same time, an opportunity for the exercise of Patriotism and Duty on the part of purchasers.

This Bank is prepared to receive subscriptions for and to make advances, upon favorable terms, against these Bonds.

VICTORY LOAN PUBLICITY WAS RECORD

Everything Possible was Done to Focus Attention on Bond Sale

Tanks, submarine, Roosevelt, Gompers, Harry Lauder, Sousa, Sarah Bernhardt, Canadian troops, United States soldiers and sailors, banners, stickers, flags, posters, pennants, noise, military and naval bands, parades, kites, public meetings—these are a few of the "stunts" arranged as aids to selling Canada's Victory Bonds. Never has anything in this country been so well advertised and sold as the Victory Loan.

To Colonel Theodore Roosevelt goes the honor of having attracted the largest number of people who ever turned out for a single event in the city of Toronto, perhaps in the Dominion of Canada. Forty thousand citizens intended to hear the ex-president of the United States deliver his address at the Armories on Monday night and of that number only twelve thousand were gratified.

Speaking of the Victory Loan, he said: "When I ask you to buy a Victory bond I ask you to do your duty and at the same time to be good to yourselves. Why, every person that has any foresight ought to buy as many of these bonds as he or she can get. It is the safest security that there is. Almost any other security can conceivably turn back, but Canada is going to last for a few thousand years. And as I said to my own people about the purchase of Liberty bonds, those bonds are all right unless the United States smashes up, and if the United States smashes up we won't care, because we won't be here to see.

"I ask Canadians to take up the Victory bonds for they are absolutely certain. They help themselves buying them, because if ever the bonds of Canada become bad, it will be because Canada has gone, and then there won't be any Canadians here. And you have got to help your sons and brothers at the front."

Harry Lauder as Salesman.

At Goodwin's departmental store, Montreal, on Saturday, Harry Lauder demonstrated his right to the title of bond salesman, a reputation that preceded him here from New York, where he went to Wall Street to sell Liberty bonds. In an hour on Saturday morning he sold in Montreal over $45,000 bonds to 600 subscribers. A wounded soldier walked up to buy a bond for his little son who was with him. "Here's a lesson to ye," said Lauder. "Here's a man who has risked his life for his country and is now getting a bond for his wee bairn. That's the spirit will beat the Kaiser." Somebody asked for a song, but that day Lauder had no time for singing. "We're here to sell bonds, and they'll cost you money, too," he replied. Lauder sold a substantial block of bonds from the Toronto city hall steps on Thursday.

Sold on the Train.

Seven United States officers and Mr. E. L. Ruddy, chairman of the Toronto publicity committee of the Victory Loan, sold $20,000 worth of bonds on the Canadian Pacific Railway train coming from Montreal one night last week, when the United States soldiers were on their way from Montreal to Toronto to participate in the loan parade. After the civilian passengers and private soldiers had retired, Mr. Ruddy was rigged out in a combination uniform composed of parts of the uniforms of British and American infantry officers and a United States naval officer. Mr. Ruddy then passed through the car, playing bagpipes, the officers following and selling bonds.

Round Trips in the Tank.

The British "tank" in Toronto last week gave "round trips" at Queen's Park to every man or woman who ascended to a table on the conning tower and filled an application for $1,000 worth of bonds. An elderly lady was the first customer, and altogether seven persons had their first experience of riding in the real "tank," which had taken part in the great war. The subscriptions taken at the park totalled $18,000, the first for $200 coming from the young daughter of a city detective.

Fifty Thousand Raised at Theatre.

Lieutenant H. C. Mathies, a returned officer, who has lost two brothers at the front, addressed the audience at the Royal Alexandra Theatre, Toronto, last week. Previously the United States marine band played "Over There." Lieutenant Mathies said he felt sure his audience could not understand the feeling of the boys "over there" at this time. "On their behalf you should put forth your last ounce of patriotism and your last penny," he said. "I know that your hearts are with the men, and your pockets should be, too." At the conclusion of his address, Mr. Alfred Rogers, in the audience, got up and said he would give $25,000 if Lieutenant Mathies could raise an equal amount. The young officer appealed to the crowd, and Mr. Lawrence Solman was the first to respond, subscribing $10,000. Others in the audience followed, with the result that a total of $50,000 was secured.

VICTORY BOND PRICES WILL RISE

"As Certain as the Sun Shines," Says C. J. McCuaig, of Montreal

"A few days before war was declared Canadian government securities were selling on about a 3½ per cent. basis in London, England. Canada will undoubtedly emerge from this war in a stronger position financially than she was in before the war, in addition to which many manufacturers have opened up new avenues of trade in foreign countries which they will certainly pursue," said Mr. C. J. McCuaig, of Montreal, in a statement issued recently.

"It is therefore reasonable to suppose," he continued, "that within a short time after the war, as world-wide financial conditions gradually become normal, Canada will eventually be able to sell her securities again on a 3½ per cent. basis.

"Estimating, however, that her securities will be saleable in three years on a 4½ per cent. basis, and in five years on a 4 per cent. basis, the twenty-year Victory Loan bonds with seventeen, sixteen and fifteen years respectively unexpired should sell in three years at 111.70, in four years at 114.40 and in five years at 116.80 per $100.

(The Monetary Times Photo.)

C. J. McCUAIG, MONTREAL,

Captain of Team 10, Montreal Victory Loan Campaign.

"It is obvious, therefore, that in addition to the ½ per cent., the investor is assured of a very substantial profit.

"It might be a year or two longer than I anticipate, but the profit is as certain as the sun shines."

Mr. McCuaig is head of the firm of McCuaig Brothers & Company, bankers and stock brokers, Montreal. He is president of the Southern Canada Power Company, Sherbrooke Railway and Power Company, and Simplex Construction Company, and vice-president of the Ottawa Light, Heat & Power Company. He is also a director of the St. John's Electric Company, Northern Ohio Traction & Light Company, and Sawyer-Massey Company, Limited. He was born in Quebec in 1855, and established the firm of Clarence J. McCuaig & Company in Montreal in 1896; McCuaig, Rykert & Company in 1898, and the present firm in 1902. He served in the Queen's Own Rifles, Toronto, about 1885, and was honorary Lieutenant-Colonel, 53rd regiment, in July, 1913.

You Take No Risk Yet You
Serve Your Country by Subscribing to the
Victory Loan of 1917

With our young men willing to offer their lives, the least we who stay at home can do is to lend our money for their support. Victory Bonds are issued in the following denominations:

$50, $100, $500, $1,000

You will render a patriotic service—and your money will be safe.

Going Overseas?

To those going overseas, whether in a military or civil capacity, to do their bit, or to those who contemplate spending the Winter away from home, and who may need a strong, reliable corporation to look after their affairs in their absence, we offer the suggestion that they leave a Power of Attorney in our favor. It will relieve them of all the details and worries incidental to looking after their Estates. Compared with the relief afforded and the service rendered, the charge would be small and the satisfaction great. Interviews invited; correspondence solicited. All business treated as strictly confidential.

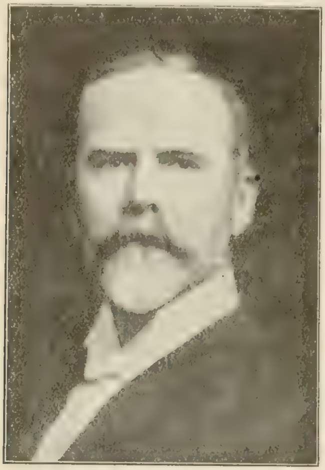
WATERLOO COUNTY MAKING GOOD RECORD

Progress of Victory Loan There—Mutual Life Subscribed Three Million Dollars

"The officers of the Mutual Life Assurance Company of Canada are, of course, profoundly interested in the success of the big Victory Loan campaign, and I am personally acting as chairman of the county organization here," said Mr. Geo. Wegenast, the company's managing director, to *The Monetary Times* last week. "This district is doing excellently. Up to last evening the north and south ridings of Waterloo were running a close race, North Waterloo recording $809,950, and South Waterloo $711,350.



(The Monetary Times Photo.)

E. P. CLEMENT, WATERLOO,

President, Mutual Life Assurance Company of Canada, which has subscribed $3,000,000 to the Victory Loan.

(The Monetary Times Photo.)

G. WEGENAST, WATERLOO,

Chairman, Waterloo County Organization, Victory Loan Campaign.

"Our whole agency staff has been requested to devote itself to the success of the campaign and numbers of our agents have been appointed to especially responsible positions in the various districts throughout the Dominion.

"Everything that this company can do to contribute to the success of the movement will be done. The most practical evidence of the interest felt in it by the directors and management is the company's liberal subscription of $3,00,000.

"A few evenings ago the head office staff met and a full explanation was given them of the nature of the bonds and the desirability of investing savings in them. A generous response is being made.

"The fine British advance in Flanders recently is a happy augury and should put life into the solicitors and lenders. Here is hoping that the loan will yield double the amount called for."

Mr. G. Wegenast, F.A.S., the managing director of the Mutual Life Assurance Company of Canada, has spent his entire business life in the service of the company and has occupied a variety of positions during that long term. In 1898 he was appointed to the managership. At that time, the company had on its books $23,700,000. Mr. Wegenast has had the pleasure of seeing the business grow to nearly $120,000,000 during his tenure of office. The Mutual is among the best dividend payers in America and to-day has a gross surplus of $4,595,000, so that its expansion has not been secured at the expense of stability. The late William Hendry, and Mr. Wegenast are the only two managers the company has had during its long history of nearly half a century.

The president of the Mutual Life of Canada is Mr. E. P. Clement, K.C. Mr. Clement became a director of the company in 1887. Twenty years later he was made vice-president and in the following year succeeded to the presidency, resigning a judgeship to take the position. The continuity of management is shown in the fact that there have been but three presidents and, as stated, two managers. Mr. Clement's legal training has been invaluable to the company during his years of office, while his policy has been one that might be described as at once conservative and progressive. Mr. Clement is identified with many beneficent reform movements in Canada and is a representative Britisher.

$10,000,000 FOR CANADIAN NORTHERN SHARES

An official statement given out by the government, dealing with the agreement recently arrived at with the Canadian Northern Railway to arbitrate the value of the 600,000 shares of the company to become the property of the government, confirms previous reports in regard to the same and adds some new details. No arbitrator is named in the agreement, but the appointment of Sir William Meredith, chief justice of Ontario, to represent the government, is officially confirmed.

The agreement, as has already been stated, provides that no greater sum than $10,000,000 can be paid for the Canadian Northern Railway shares. If the value is found to be less than ten millions, then the less sum will be paid.

"It is understood," says the announcement, "that Mackenzie, Mann and Company, Limited, own approximately five-sixths of these shares. Consequently, the maximum that can be paid to them will be something over eight million dollars. As, however, these shares are pledged to their bankers, as part security for advances of various kinds, the moneys, doubtless, will be paid to the banks."

The announcement states that the agreement does not call upon the arbitrators to adopt any particular method. They are simply instructed to get at the fair value of the stock in the best way possible. It is further provided that if the arbitrators should see fit to take into consideration the reproduction cost of the system, they must not include therein the increase in value due to war conditions. The company will be required to disclose all liabilities of every kind. The arbitrators must commence work at once and announce their award before March 1st, 1918. Pending the award, nothing but ordinary operating obligatons shall be entailed, and no obligation shall be entered into not to be completely executed within six months, except with the approval of the minister of railways. All costs are to be in discretion of the arbitrators and to be taxed by an officer to be named by them.

Every hundred dollar bill helps.

The Hamilton Provident and Loan Society

DIVIDEND No. 93

Notice is hereby given that a Dividend at the rate of Eight per cent. per annum has been declared for the half year ending December 31st, 1917, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Wednesday, the 2nd day of January, 1918.

The Transfer Books will be closed from the 15th to the 31st of December, both days inclusive.

By order of the Board.

D. M CAMERON, Treasurer.

MASSEY-HARRIS COMPANY AND WAR LOAN

Many Hundreds of Employees Subscribed—How the Organization Worked

The Massey-Harris Company has had excellent results in the Victory Loan campaign among its employees. The company undertook for all its employees in Canada—in the Toronto and Brantford works and in their branch offices—to finance the loan on a basis of ten payments, instead of the five payments provided for by the government. This decision was arrived at by the directors a week before the loan was launched, and immediately afterwards Mr. Thomas Findley, president and general manager of the company, organized a canvassing committee of about 25 of the heads of the various office departments to look after the Toronto works and offices. The assistant general manager, Mr. Valentine, and three other members of the staff, went to Brantford on the Monday the loan was launched, to carry out the same plan of organization there that was adopted in Toronto.

(The Monetary Times Photo.)

THOMAS FINDLEY, TORONTO,

Member of Toronto Honorary Committee and of Industrial Executive Committee, Victory Loan Campaign.

The wishes of the loan publicity committee were observed by blowing the whistles of the factory at 9 o'clock Monday morning, and in the meantime, the company had put out printed matter through the works, advising of the terms of the loan, the necessity for its being successful and what the company would do in the way of helping the employees finance their purchases. The company also advised the various departments that, when the whistle blew they were to gather in certain places for a meeting. In Toronto ten separate meetings were organized; in Brantford, two. These were addressed by different officers and in Toronto, as a result of the meetings alone, subscriptions to the amount of $27,000 were handed in before the canvassers began their work at all. In the meantime the committee had organized canvassers for each department getting the foremen of each department to endorse the canvassers' work with the individual men as they went along. The response was splendid. During the first nine days of the campaign, in the Toronto works were secured about 1,100 subscriptions, amounting to, roundly, $125,000. In Brantford were secured something over $40,000, and there was then still much to do in both factories.

The affiliated companies, the Verity Plow Company and the Bain Wagon Company, were also organized. The Verity Plow Company had raised over $30,000 last week. The Bain Wagon Company canvass was not so far forward, but is being satisfactorily carried through. In all of the company's branch houses, the management have organized so as to secure, as far as possible, subscriptions from each of their staff.

In an interview with *The Monetary Times* this week, Mr. Findley, the company's president and general manager, said: "I think we were much more successful in our canvass through our own staff than we would have been through an outside canvassing committee. This kind of investment is entirely new to most of our people and it required the confidence engendered by the matter being backed by the company, the committee and the foremen to make it successful. We believe we will have a very creditable report to make at the end of our campaign in connection with our entire staff."

Mr. Findley is a member of the Toronto honorary Victory Loan committee and a member of the industrial executive committee for the loan.

QUEBEC INSURANCE SUPERINTENDENT

Mr. E. E. Duckworth has been appointed superintendent of insurance for the province of Quebec. He was born at Preston, Lancashire, England, on August 9th, 1883, and was educated at Liverpool University (B.Sc.). He went to Quebec province in 1909. Formerly he was science master at the Langholm Academy, Scotland, and later at the Westmount High School, Montreal. Mr. Duckworth entered the actuarial department of the Sun Life Assurance Company of Canada in 1911, and later took charge of the company's "profits" branch of the actuarial department.

LIFE AGENTS AS BOND SALESMEN

Their Work is Valuable—Great-West Bought $2,000,000 Victory Bonds

One of the largest subscriptions received in Manitoba was that of the Great-West Life Assurance Company, of Winnipeg. The amount was $2,000,000. Mr. C. C. Ferguson, manager and actuary of the company, is a member of the Manitoba life insurance men's committee for the Victory Loan campaign, and has taken a very active interest in the success of the loan. Associated with him on this committee are the following: Messrs. C. W. Strathy, North American Life; H. T. Clarke, Metropolitan Life; D. J. Scott, Sun Life; F. P. Hayden, Great-West Life; J. W. W. Stewart, Monarch Life; E. H. Bissett, Mutual Life; and J. G. Stephenson, London Life.

A number of Great-West Life men have done good work in the loan campaign. Several are acting on the provincial committees of life insurance men, including Mr. J. A. Johnson (Vancouver), C. P. McQueen (Calgary), G. W. Merritt (St. John) and J. O. Hyndman (Charlottetown).

(The Monetary Times Photo.)

C. C. FERGUSON, WINNIPEG,

Member of Manitoba Life Insurance Men's Committee, Victory Loan Campaign.

The Great-West Life Insurance Company has been a heavy subscriber to our various war loans. To the first loan, the company subscribed and was allotted $1,000,000; to the second, $1,000,000 was subscribed and $407,500 allotted; to the third, $1,500,000 was subscribed and $940,000 allotted; and to the Victory Loan $2,000,000 has been subscribed.

Manitoba province is doing well generally. During the first seven days of the loan campaign, that province subscribed $10,445,150 to the loan. This was the total actually reported and listed at headquarters, exclusive of a large volume of country applications not officially reported and a quantity of city business in the same position. By Saturday last, Manitoba's total was nearly $15,000,000, and a substantial sum has been added this week.

Growth of Life Insurance.

In an interesting interview in Vancouver recently, Mr. Ferguson said: "In regard to life insurance, the one striking feature of the year's operations has been the remarkable appreciation shown by the people of Canada towards the business. As a result, practically every company has had a large increase in new business, while lapses have substantially decreased. It is the general impression that mortality claims due to the war have not been so heavy this year as in 1916, but the amounts paid in this way to the soldiers' dependants have been so large that the insurance fraternity have reason to be proud of the contribution they have thus been able to make. Most companies continue their practice adopted at the outbreak of war of not requiring any extra premiums in respect to policies which were then in force.

"The life insurance companies will be large subscribers to the Victory Loan and all head office officials appreciate fully the action of their agents in entering so enthusiastically on the loan campaign as committeemen and canvassers. It is obvious that a trained body of canvassers can in this way perform an important public service."

WILL EXCEED LOAN QUOTA IN THIS DISTRICT

"Indications are that we will exceed $300,000 subscriptions in District 7 in Winnipeg, embracing part of the north end and St. Boniface. This is despite the prediction that $175,000 would be the maximum contributed here." So said Mr. L. M. Fingard to *The Monetary Times* last week. He is captain of the Victory Loan team in that district, devoting his entire time to the job for the three weeks.

(The Monetary Times Photo.)

L. M. FINGARD, WINNIPEG,

Captain of Victory Loan Team, District 7, Winnipeg.

Mr. Fingard is vice-president and general manager of the Merchants' Casualty Company, Winnipeg. He entered the insurance business in Minneapolis in February, 1911, as agent for the Merchants' Life and Casualty Company. In January, 1912, he was given charge of their St. Paul office. In January, 1913, he was promoted to the position of manager of the company's Canadian interests, at that time embracing only Manitoba and Saskatchewan. In April, 1913, the Merchants' Casualty Company was formed, Mr. Fingard being elected vice-president and general manager. The company writes the largest volume and has the greatest income of any similar company in the Dominion.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 24th, 1917:—

Dominion Reduction Company, 88,000; Mining Corporation of Canada, 88,000; O'Brien Mine, 64,940; Nipissing Mining Company, 87,635; La Rose, 87,859; Aladdin Cobalt Mine, 128,728; Buffalo Mines, 321,355; McKinley-Darragh-Savage Mines, 170,459. Total, 1,036,976 pounds, or 653 tons.

The total shipments since January 1st, 1917, now amount to 24,586,165 pounds, or 12,293 tons.

Those who cannot fight must pay.

OXFORD COUNTY VICTORY LOAN ORGANIZATION

"Everything is going with a whirl out here, and I am confident Oxford County will do its share." This was the statement made to *The Monetary Times* by Mr. C. E. A. Goldman, Victory Loan organizer for that county, who is making Woodstock his headquarters for the campaign. Colonel John White is the county chairman and Mr. P. S. Connelley is county secretary.

Mr. Goldman is head of the investment business, Goldman and Company, Toronto. He was born in Toronto in 1875 and was assistant secretary to Dominion Millers' Association for three years. He then became associated with Æmilius Jarvis and Company, stock brokers, for 16 years, the last ten as a partner, retiring from there five years ago

Mr. Goldman then started an investment business on his own account in Toronto, with Mr. G. E. Cork, and opened a branch office in Regina. Makes a specialty of electric railway, steamship and municipal bonds, giving special attention to western securities, such as rural telephone, rural school bonds. His firm handled the bonds of the first two wooden auxiliary five-masted schooners built on the Pacific Coast recently.

(The Monetary Times Photo

C. E. A. GOLDMAN, TORONTO,
Organizer, Oxford County, Ontario, Victory Loan Campaign.

In his younger days Mr. Goldman was a prominent athlete and later a sailor. He was champion in 1894-95 of the Toronto Island Amateur Aquatic Association. In 1897 he won the amateur middleweight boxing championship of Canada, and the junior and intermediate single scull championship at the Canadian Amateur Association of Oarsmen at Brockville. In 1898 he rowed second to Ten Eyck, who won the National Championship of America, and who, in the following year, won the Diamond Sculls at Henley, England. In 1899 he rowed, this time unsuccessfully, for the Diamond Sculls at Henley. In 1900 Mr. Goldman rowed in the Argonaut eight at Philadelphia, which crew won the National Championship, defeating the famous Vesper crew. When war broke out he took out a commission in the Queen's Own Rifles, and had an active part in the recruiting meetings which were held throughout the city.

WESTERN EMPIRE LIFE SUBSCRIPTIONS

The Western Empire Life Assurance Company, Winnipeg, has subscribed $75,000 to the Victory Loan. Mr. W. Smith, president and managing director of the company, in a statement to *The Monetary Times*, said: "Every employee of the head office staff of our company, from the office boy to the managing director, is a subscriber to the Victory Loan."

Mr. R. W. Craig, K.C., a member of the legal firm of Macdonald, Craig, Tarr and Ross, of Winnipeg, has been elected a director and vice-president of the company.

HAIL INSURANCE IN ALBERTA

The following are the preliminary figures of hail insurance, premiums and losses in Alberta during 1917. They have been furnished to *The Monetary Times* by Mr. R. L. Nicolson, deputy superintendent of insurance for the province:—

Canada Security Assurance Company—Note premiums, $116,000; cash premiums, $142,600; losses, $128,600. Western Underwriters—Note premiums, $21,000; cash premiums, $8,500; losses, $11,300. United Assurance Company—Premium income, $80,300; losses, $43,500.

Connecticut Fire—Premium income, $74,200; losses, $42,777. Westchester Fire—Premium income, $84,000; losses, $62,000. Farmers' Fire and Hail Insurance Company—Net premiums, $51,874.80; net losses paid, $20,277.61.

Winnipeg Fire Underwriters — Premiums, $55,997.69; losses, $52,457.69. Home Insurance Company—Premiums, $278,636.37; losses, $174,062.87. Nova Scotia Fire Underwriters—Premiums, $106,201.53; losses, $78,439.81.

Dominion Fire Insurance Company—Gross premiums, $16,582.93; losses, $18,842.30. British Crown Assurance Corporation, Limited—Premiums, $256,078.76; losses, $163,800. The Canada Hail Insurance Company—Premiums, $26,000; losses, $17,500. The Excess Insurance Company—Premiums, $84,520.73; losses, $80,724.29.

Great North Insurance Company—Premiums, $50,189.47; losses, $31,588.85. Hartford Fire Insurance Company—Premiums, $131,000; losses, $90,000. British America Assurance Company—Premiums, $46,170.28; losses, $42,122.01.

Rochester Underwriters—Premiums, $155,249.26; losses, $90,546.32. St. Paul Mutual Hail and Cyclone Insurance Company—Premiums, $34,000; losses, $25,500.

The total premiums were $1,819,101.82; total losses, $1,174,038.75; and estimated expenses, $606,300.

ONE IN 23 SUBSCRIBES IN NORTHERN ONTARIO

Up to Saturday night last, the district of Temiskaming, Northern Ontario, had produced $308,550 out of a minimum objective of $468,362 for the Victory Loan. That district then had 1,200 subscribers out of a population of 27,400.

Mr. C. Wurtele, organizer for Temiskaming County for the Loan campaign, in a statement to *The Monetary Times* this week, said:—"Other sections will beat us in amounts but I think we will do fairly well as to the number of subscriptions. In fact, it figures out about one in twenty-three. When one considers the number of foreigners and French here, I think we have done remarkably well, and the credit is entirely due to the northern spirit possessed by the pioneers in this sction. They are a great people and should get greater assistance from the government to open up this country.

"You remember the two bad forest fires Cochrane had. That section was called for $32,000; up to Saturday night they had produced $90,950. The more one gets towards the edge of the province, the finer one finds the fellows. They have had meetings at eleven o'clock at night and at eight o'clock in the morning. This was necessary on account of the train service in the section. The teams have turned out and the school teachers and clergymen have also attended meetings at these late hours.

"A Russian baker in Cochrane, who delivers his bread in a baby carriage, subscribed for $2,000 of the bonds. A very old section foreman came in and bought a $100 bond. Two days later he came back and bought a $1,000 bond. There are dozens of instances like this.

"In my opinion, the most important feature of the whole campaign is the probable educative effect on the general public. What a difference it will make to our affairs in Canada if we can get our own people to buy our government bonds, instead of sending the interest out of the country!"

The directors of the Gore District Mutual Fire Insurance Company, Galt, Ont., celebrated the opening of the new board room and enlargement of offices last week by subscribing $75,000 to the Victory Loan. The company was established in 1839. Mr. J. N. McKendrick is secretary-treasurer.

BILL JONES CAME UP THE AVENUE.

SINKING FUND SURPLUS

Saskatoon's Application to Use Surplus Earnings Causes Comment

"We are of the opinion that no diversion of moneys from the sinking fund should be permitted until there is an actual cash surplus after all provisions have been made for the accrued payments into the sinking fund for the repayment of the various debts for which the fund was established." This is the opinion of one of the four cities given an invitation by the Saskatchewan local government board, to criticize the application of Saskatoon to use surplus earnings of the sinking fund derived from the investment thereof, for current or other expenditure. The exact circumstances surrounding the application of the city of Saskatoon were as follows: On June 30, 1917, there were arrears of instalments and accrued interest due by the city to the sinking fund amounting to $82,587.27; there were surplus earnings of $13,691.65, which, with debenture premiums amounting to $23,244, make a total of $36,935.65; thus leaving a shortage of cash still due to the fund of $45,651.62. It is understood that the necessary levies have been made to make up the balance owing, but these have not all been collected.

Sections for Interpretation.

Commissioner Thornton, of Regina, however, stated that he understood that when section 328a of the city act was passed, it was the intention of the legislature that such surplus earnings might be used for current or other expenditure under circumstances similar to those in question.

The sections of the city act which call for interpretation are:—

"327. If, after paying the interest of a debt for any financial year, and appropriating the necessary sum to the sinking fund of such debt or in payment of the instalments of principal, there is a surplus properly applicable to such debt, it shall so remain until required in due course for the payment of interest or for the sinking fund or in payment of the principal. Cap. 16, 1915.

"328. No money levied and collected for the purpose of a sinking fund shall be applied towards paying any part of the current or other expenditure of the city. Cap. 16, 1915.

"328a. Notwithstanding anything in this act contained, the local government board may on the application of the council, and on such terms and conditions as may be deemed advisable, authorize the council to use the surplus moneys mentioned in section 327 for current or other expenditure."

Actual Raising of Money.

Prior to the passing of section 328a of the act, the use of any part of the money levied and collected for the purpose of the sinking fund for current or other expenditure was expressly prohibited by section 328.

Section 292 of the city act, which authorizes the issue of debentures under different methods provides "that the by-law shall provide for *raising* each year during the currency of the debentures" a specific sum for interest and sinking fund. The expression used is "raising," not merely levying.

Section 326 provides for the keeping of separate interest and sinking fund accounts and directs the treasurer to exhibit "the state of every debt and the amount of money raised, obtained *and* appropriated for payment of it,"—not *or* appropriated.

Section 338 requires the city to submit to the minister of municipal affairs annually a return showing whether the sinking fund for the year has been "raised," not merely levied.

Section 351 makes provision whereby the council may provide that the annual amount to be levied shall be paid to the provincial treasurer, and section 353 provides that the amount *payable* in any year to the credit of the sinking fund shall be deemed a debt due to the provincial treasurer and in default of payment he may sue therefor.

It would appear, therefore, that throughout the various sections above mentioned, the legislature had in view the actual raising of the money for the sinking fund and not merely the making of the necessary levy.

The question then arises, does section 327 of the act lend itself to a similar or different interpretation. Does the expression "appropriating the necessary *sum* to the sinking fund" mean the necessary sum of money or necessary sum as levied, whether the same has been collected or not. If the levy in itself is sufficient, then has the sum been "raised," as provided by the by-law authorizing the issue of debentures, or has the amount been "obtained and appropriated" as provided by section 326, or is such levy sufficient to discharge the debt due the provincial treasurer and would it be a good defence to any action he might bring? It would appear not.

The board is of the opinion that the "sum" referred to in section 327 has reference to a sum of money and that the mere levy of itself is not sufficient, for the section provides for actual payment of interest, and payment of instalments of principal; the sum required for sinking fund is set aside (appropriated) but it is a sum of money raised, for if this were not the case, then the city would be in the position of being compelled to pay to the bondholder the amount stipulated by the debenture, at maturity, in case of a serial form of debenture, but in the case of a sinking fund form of debenture, the interest only would be required to be paid in cash, and an extended period of credit obtained on that portion of the principal which had been levied but not as yet collected. It is the opinion of the board that such discrimination in the forms of payment was never intended.

In the application now under consideration there is an actual shortage of cash in the sinking fund and therefore no surplus moneys available for current or other expenditure as provided by section 328a. As the board can only exercise the discretionary powers granted it under the provisions of section 328a, when the requirements of section 327 have been fulfilled, and these not having been fulfilled, the board has no alternative but to refuse the application.

CANADA'S RAILWAY SERVICE

"Canada is to-day getting the best and cheapest railway service in the western world," is the opinion of the Canadian Railway Association, expressed in a statement just issued. "In spite of the car shortage created by the abnormal balance south-bound over north-bound traffic, in spite of war requirements, higher labor charges, the necessity of importing coal for engines, and the low efficiency of the coal due to lower winter temperatures in Canada, there is a greater degree of efficiency reached in the operation of Canadian railways than anywhere else in the new world. Car shortage is being reduced day by day. The percentage of freight cars out of service for repairs in Canada is lower than the percentage on United States roads, and the average cost to the Canadian traveller or shipper is less.

"For the year ending June 3th, 1916, the charge for moving an average ton of freight one mile in the United States was .716 of a cent. In Canada it was .653 of a cent. In the United States the average passenger mile cost the passenger 2.006 cents. In Canada it cost him 1.954 cents. At the same time the Canadian railways were hauling their coal from foreign mines and paying duty on it. They were getting less work from the same coal because of the lower winter temperatures in Canada. They paid more for labor, and yet charged the public less for their services than any of the other roads on this continent."

Commenting on the statement at Washington that the United States railways have curtailed passenger service by over 20,000,000 passenger train miles per annum, the Canadian railways, through their association, point to a reduction of over 10,000,000 passenger miles per annum in Canada, which, in view of the lower total mileage in the Dominion as compared to the United States is a vastly greater pro-rata reduction.

"Certainly," they say, "no reduction in freight and passenger rates in Canada are being looked for as the result of railway economies now being effected by the association.

Stop buying luxuries and help win the war.

The Annual Review Publishing Company, Limited, which for sixteen years has published Mr. Castell Hopkins' Canadian Annual Review, has been reorganized as the Canadian Annual Review, Limited, with $75,000 capital, of which $35,000 is preferred and $40,000 common. RESOURCES OF NEW BRUNSWICK

Timber, Coal, Oil and Natural Gas are Abundant—Some Interesting Statistics

Undoubtedly the most important natural asset which New Brunswick possesses is that of lumber, says the Board of Trade Journal. In 1915, for the first time, a classification was begun of the crown lands belonging to the province. About 10,000 square miles were covered, the surveyors having gone far enough to show that the province under reasonable conditions, might expect some thirteen billion feet of sawn timber on the crown land area, the harvesting and marketing of which at present prices would yield more than $200,000,000, and give a revenue of at least $16,000,000. When the reconstruction period after the war begins, this estimate will no doubt be largely exceeded. Such a valuable asset as this emphasizes the need for careful conservation and prudent management.

The commercial species of lumber included in the region under survey are black spruce, white spruce, white pine, balsam, fir, white birch, poplar, yellow birch, hemlock, white cedar, beech and maple.

For the year ending October 31st, 1916, the province received from stumpage $354,042.52, from renewals of timber licenses $83,892, and from timber licenses $6,312.50, against $422,909.26, $81,388 and $1,759 respectively in the preceding year.

The lumber cut on the crown land area in 1916 aggregated 162,132,621 sup, feet, spruce and pine logs; 62,534,376 feet fir; 10,522,370 feet cedar; 1,836,006 feet hemlock; 1,258,165 feet hardwood; 2,927,146 feet poplar; 508 cords wood; 54,086 sleepers, 2,320 telegraph poles and 1,715 posts.

Coal Output Increases.

The output of bituminous coal in 1916 in the Grand Lake region amounted to 118,498 tons, as compared with 109,792 tons in 1915, divided among the following operations:—

	1915.	1916.
Minto Coal Company	72,443	80,414
Harvey Welton	12,840	14,952
Rothwell Coal Company	8,943	5,585
George King	10,015	10,406
Northfield Coal Company	3,807	4,899
Winterport Coal Company	1,093	1,159
A. J. McEvery	650	.....
Robinson & Rigby	...	694
J. Cookley	...	167
Grand Lake Coal Company	...	222

Over 400 men are employed in the Grand Lake region.

At Beersville, Kent County, 3,896 tons were mined in 1916, as against 5,263 tons in 1915.

Production of Gypsum.

The production of gypsum has been considerably hampered by war conditions. About 41,360 tons were quarried at Hillsboro in 1916, while the production in 1915 was 72,000 tons. Of 1916 output 34,560 tons were manufactured into calcined plaster and hard wall plaster, a market being found in Canada for the material.

An interesting development of wolframite or tungsten has been made at Burnt Hill on the South West Miramichi. This metal is extensively employed in the manufacture of high speed steel and armor plate. As the Imperial government has commandeered for its own use all of the metal of this kind in the empire, the successful development of this provincial prospect possesses more than local interest. The company has erected a concentrating mill at the water's edge of the Miramichi River, for the treatment of the ore as it is taken from the mine. A shaft 65 feet deep has been opened up to follow the vein in two directions. The mine is equipped with steam hoisting apparatus, and air compressor for the drills. The vein of ore is about four feet in thickness and is nearly vertical.

Oil and Natural Gas Abundant.

The oil and natural gas development in Westmorland County is making satisfactory progress. During 1916 several of the wells were deepened and increased flow obtained. The natural gas is sold under contract to a Moncton corporation, which acts as distributing agent. The total number of domestic consumers of the gas in Moncton and adjoining territory in 1916 was 2,824. The gas is also used by the Canadian government railways for their gas engines and forges at the Moncton shops, and by the Plaster Works of the Albert Manufacturing Company of Hillsboro. The value of the gas produced is estimated at $7,936.37. Arrangements have been made for the sale of all the company's crude oil to a manufacturing plant at New Glasgow. N.S.

The Intercolonial Copper Company's mine near Dorchester has been opened again and is being operated by the National Copper Company. The company are mining and milling three per cent. ore at the present time at the rate of 50 tons per day, and they claim they can produce copper for less than ten cents per pound. Mine machinery is now on hand to increase the output to 100 tons per day. There are some two miles of underground workings in this mine.

Another copper development on a much smaller scale is being made at East Scotch Settlement, King's County, near Annadale Station on the Central Railway. Four shafts aggregating 186 feet have been sunk.

Game is a very important asset of the province. The receipts from this source during 1916 amounted to $45,133, as compared with $40,730 in 1915. With the counties of Restigouche and Victoria, the game list in 1916 amounted to 1,511 moose, 2,826 deer and 103 caribou.

OCTOBER TRADE STATEMENT

An increase of approximately $273,000,000 for the first seven months of the fiscal year, ending with October, as compared with a similar period last year, is shown in the trade statement for October, just issued. Sor the seven months the trade in the Dominion totalled $1,586,616,258, as compared with $1,313,189,951 last year. For the month of October alone Canada's trade amounted to $238,834,321. In October, 1916, it aggregated $164,330,179.

Exports of domestic goods for the seven months were to the value of $922,195,134, as compared with $622,049,481 last year. These figures include coin and bullion. Imports for the seven-month period amounted to $636,749,263. During the seven-month period last year imports aggregated $483,132,928. Dutiable goods were to the value of $346,108,703, on which the customs collections amounted to $102,106,365. Free goods imported were to the value of $281,992,997. During the same period in 1916 dutiable goods worth $254,530,818 were brought into Canada, and $82,177,312 was collected in customs duties. Free goods importations were valued at $207,630,667. Manufactured goods to the value of $420,380,372 were exported, a big increase as compared with last year, when domestic manufactures to the value of $219,461,054 were shipped out of the country.

SASKATCHEWAN'S NEW CABINET

The departure of Hon. J. A. Calder for the field of Dominion politics threw open the three ministerial positions held by him, and necessitated a reconstruction of the provincial cabinet. He was president of the executive council, minister of railways and minister of highways. On October 20th this reconstruction of the cabinet was accomplished by the swearing in of the new incumbents of the several offices, with the result that the ministerial positions are now held as follows: Premier, president of council and minister of education, Hon. W. M. Martin; minister of agriculture, Hon. W. R. Motherwell; attorney-general and provincial secretary, Hon. W. F. A. Turgeon; minister of public works, Hon. A. P. McNab; minister of telephones, Hon. G. A. Bell; minister of municipal affairs, Hon. G. Langley; provincial treasurer and minister of railways, Hon. C. A. Dunning; minister of highways, Hon. S. J. Latta.

Mr. Latta, who is of Anglo-Irish descent, was brought up in the province of Ontario, and followed the teaching profession for a number of years in that province. Coming to Saskatchewan in 1905, Mr. Latta took up a homestead near Govan, and shortly afterwards established the Govan Prairie News, of which he is still editor and proprietor. He has also had municipal experience, which will stand him in good stead in his dealings as minister of highways with the rural municipalities, having been secretary-treasurer of the rural municipality of Last Mountain Valley. He entered Saskatchewan politics in 1908, and represented Last Mountain constituency since 1912.

Individual vs. Corporation Management

INTEGRITY, responsibility, good judgment regarding investments, knowledge of the law respecting trusteeship, executive ability—and these sustained without interruption — are necessary under modern conditions before a trustee can be considered wholly competent.

All of these qualifications can be rarely found in a friend or individual.

THE STERLING TRUSTS CORPORATION possesses all of these essential qualifications of a competent trustee, including assured existence throughout generations of beneficiaries.

The Company will afford complete protection to your estate if appointed executor and trustee under your will.

Our officers will be glad to confer with you in regard to the making of your will or the management of your estate.

a success by purchasing as many as you can afford. We highly recommend the issue as a safe and profitable investment.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

ROYAL SECURITIES CORPORATION
LIMITED
164 St. James Street, MONTREAL

PUBLICATIONS RECEIVED

Labor.—A review of the labor legislation in Canada for the year 1916. Issued by the Department of Labor, Ottawa.

Municipal Affairs.—Annual report of the department of municipal affairs, Saskatchewan, for the financial year 1916-17. Printed by order of the legislative assembly, Regina, Sask.

Canadian Income Tax.—The Royal Bank of Canada, Montreal, is sending out, with its compliments, a digest of the Canadian Income War Tax Act of 1917 in convenient form for reference. The digest is indexed so that any particular point in the act may be referred to easily and at once.

Government.—A useful and critical study of the postal savings bank system of the United States. The book describes the purpose and usefulness of the system, its organization and administration, regulations governing deposits and withdrawals, interest rates and governmental disposition of funds. An appendix gives a detailed account of the United States postal savings act and its amendments. "Postal Savings," published by the Princeton University Press, Princeton, N.J. Price, $1.25.

Sweden.—One of the most handsome and complete government publications ever issued is the historical and statistical handbook, entitled "Sweden," and published by order of the Swedish government. It is in two volumes of nearly 800 pages each, the first dealing with the land and people, the second with industries. The handbook is printed in English, and has also been issued in Swedish and German. It is an encyclopædia of Sweden, its history and affairs. To the business or financial man specially interested in that country it will prove exceedingly valuable. Issued in Canada from the office of the Royal consul-general of Sweden for British North America, P.O. Box 520, Montreal.

Finance.—An address before the American Institute of Accountants at the annual meeting at Washington, by Herbert C. Freeman, member of the American Institute of Accountants. Mr. Freeman has thrown an interesting light on the rather hazy ideas of the public as to the duties of a "receiver."

"A receiver," says Mr. Freeman, "is an officer appointed by a court of equity to assume the custody of property pending litigation concerning the same." After explaining away in his opening sentence the doubts on the meaning of the word, Mr. Freeman defines clearly and briefly the various duties the position entails, dividing his subject into four heads: (1) Opening of the receiver's books of account; (2) accounting for the administration of the property; (3) forms of reports to be rendered from time to time to the court by the receiver; (4) the closing of the books of the receiver.

"Accounting for Receiverships," by Herbert C. Freeman, C.P.A., of the firm of Touche, Niven and Company.

Statistics.—Essentially a text and reference book for the Canadian citizen. The third edition of the Imperial Year Book is divided into three principal sections: the Dominion of Canada, the British Empire, and the War. The section on Canada comprises statistics dealing with population, immigration, natural resources, federal elections, in which the returns for the general elections of 1904-8-11 for every constituency are given. The trade and commerce section have been improved by two practical articles on "Canada's Foreign Trade," and "The Allies' Economic Conference." A birdseye view of Canadian education is given in the section devoted to municipal government and education. The section devoted to the British Empire gives an interesting article on "Empire Trade" dealing at length with Canada's prospects as a factor in inter-Imperial commerce. The index is especially helpful, being divided into two parts: general and war. To citizens in general and election workers in particular the third edition should prove an invaluable help.

"Imperial Year Book for Canada, 1917-18." Published by the Mortimer Company, Limited, Ottawa, Ont. Price, $3.

Rural Planning.—The latest report of the commission of conservation deals woth the important subject of the planning and development of rural districts and small towns in Canada. It has been prepared by Mr. Thomas Adams, town planning adviser of the commission, who has made a close study of the problems of rural development in this country during the past three years, following twenty-five years' experience in farming, land surveying and town planning in other countries.

The report deals comprehensively with the social conditions and tendencies in rural areas and the prevailing systems of land settlement and development. It indicates the rural problems requiring solution in order to secure the proper development and economic use of land for purpose of efficiency, health, convenience, and amenity. The great injury which land development in Canada suffers, from speculation, neglect of public health, and want of expert business administration of land settlement, is considered. Incidentally, the problem of returned soldiers is dealt with, and the connection between land development and such questions as taxation, unemployment, and high cost of living is clearly shown.

There are five appendices by competent authorities, and the concluding chapter gives an outline of proposals and makes general recommendations to cover the conditions as presented.

Banking.—The career and centenary of the Bank of Montreal is the subject of a well written and handsome little volume just issued by the bank. It deals with the history of the institution since its inauguration in 1817. The bank first made its appearance as the "Canada Banking Company," its promoters being three firms of Scotch merchants. The bank's first investment appears to have been made on September 23rd, 1817, in government exchange. Two weeks after the opening of the institution an agent was appointed at Quebec, and in the following June the agency became an "office of discount and deposit," and was in reality the first branch. This establishment had to face the competition of the Quebec Bank and to live down injurious rumors regarding the standing of the parent bank. The book gives interesting side-lights on the growth of financial Canada and its effect on the bank. It touches briefly on the depression of trade in 1890, the passage of the McKinley Tariff, and the "silver question." At that time the sketch says: "In spite of financial shocks and disasters the bank was able to strengthen its position and distribute annual dividends of 10 per cent. to its stockholders." A flood of prosperity followed in 1900, the bank clearings rose from less than sixteen hundred millions in 1900 to more than eight thousand million in 1913. An appendix gives a list of the directors and executive officers, branches of the bank, presidents, vice-presidents, and general managers from 1817-1917, and a list of the original shareholders in 1817. A statistical table is also given showing the growth of the bank from the period 1867-1917, concluding with a general statement and an honor roll. The whole is made interesting by excellent sepia photos of the men of note in connection with the bank since its foundation.

"The Centenary of the Bank of Montreal," issued by the Bank of Montreal, Montreal.

The British navy is back of our war bond.

HOW Much New Business Should a Life Insurance Company Write?

An exhaustive analysis of this important question

JANUARY, 1918 PRICE 50c

Buying Victory Bonds is Sound Patriotism and Good Business

THE PURPOSE of Canada's Victory Bond Issue, the fourth of Canada's war loans, is two-fold:—

First, to maintain and support the Canadian Army;

Second, to enable Great Britain to purchase in Canada those supplies which she must have to carry on the war and to provide food for the civilian population at home.

Canada has in both those purposes an irresistibly impelling interest. Canada's patriotism demands that our soldiers lack nothing in food, clothing, guns or service, to win the war.

And Canada's own self-interest demands that production shall increase, that commercial activity shall continue, that wages shall be maintained.

What is more—Canada's self-interest in this case is also a patriotic duty—for we must maintain conditions of material well-being in Canada in order to sustain a maximum of war effort.

Great Britain's market offers a sure welcome to the products of Canada's fields, mines, fisheries and factories.

But Great Britain must have credit to buy these products.

So in order to provide the necessary credit the Minister of Finance borrows from the people of Canada, by means of Victory Bonds the proceeds of which will be used to establish that credit.

You, and each of us—up to the greatest sum in our ability to invest; up to the point where it hurts; must all buy Victory Bonds.

The Victory Bond Campaign Closes Tomorrow (Midnight)

Mail or wire your application today.

Issued by Canada's Victory Loan Committee
in co-operation with the Minister of Finance
of the Dominion of Canada.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 123

Notice is hereby given that a DIVIDEND OF TWO AND ONE-QUARTER PER CENT. (being at the rate of nine per cent. per annum) on the amount paid up on the Capital Stock of this Company has been declared for the quarter-year to the thirty-first day of December, 1917, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after **the second day of January, 1918,** to Shareholders of record at the close of business on the fifteenth day of December, 1917.

By Order of the Board,
EDWARD SAUNDERS,
Managing Director.

Toronto, 21st November, 1917.

UNION BANK OF CANADA

DIVIDEND No. 123.

NOTICE is hereby given that a Dividend at the rate of 8% per annum, together with a bonus of 1%, upon the Paid-up Capital Stock of the UNION BANK OF CANADA, has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after Saturday, the 1st day of December, 1917, to shareholders of record at the close of business on the 15th day of November next.

The Transfer Books will be closed from the 16th to the 30th day of November, 1917, both days inclusive.

By order of the Board.
H. B. SHAW,
General Manager.

Winnipeg, October 18th, 1917.

BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED

(Incorporated under the Laws of the Dominion of Canada.)

To the Holders of the 7% Prior Lien "A" Bonds:

NOTICE IS HEREBY GIVEN that the Coupon Number 5 in respect of the interest due and payable on the 1st of December, 1917, on the 7% Prior Lien "A" Bonds of the Company will be paid on and after the 1st of December, 1917, at the Bank of Scotland, 30 Bishopsgate, London, England, and as their Agents, at the Canadian Bank of Commerce, 23 King Street West, Toronto, and at the Agency of the Canadian Bank of Commerce, 16 Exchange Place, New York.

For BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED.
R. H. MERRY,
Secretary.

Dated this 24th day of November, 1917.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Common Stock of the **Dominion Textile Company, Limited,** has been declared for the quarter ending 31st December, 1917, payable January 2nd, 1918, to shareholders of record December 15th, 1917.

By order of the Board.
JAS. H. WEBB, Secretary-Treasurer.

Montreal, 23rd November, 1917.

BANK OF MONTREAL

Notice is hereby given that a **Dividend of Two-and-one-Half per Cent.,** upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, also a **Bonus of One per Cent.,** both payable on and after Saturday, the **First Day of December** next, to Shareholders of record of 31st October, 1917.

FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 19th October, 1917.

WESTERN CANADA'S PROSPERITY

Mr. H. B. Mackenzie, general manager of the Bank of British North America, who returned to Montreal recently from a trip to the Pacific Coast, speaks of the conditions of western Canada at the present time as being satisfactory. "During the course of my trip," he said, "I stopped off at several of the principal cities, and while there it appeared to me that there is no doubt of the prosperity of the West. In Vancouver and Victoria conditions are gratifying. Industry is thriving, but the province seems to see its greatest opportunity for the future in shipbuilding. At the present time this industry is undergoing a period of activity and many wooden vessels have been started and completed."

Economy is necessary to win the war.

DEBENTURES FOR SALE

TENDERS FOR SCHOOL DEBENTURES

Tenders will be received by the undersigned up to and including December 14th for Stouffville School Debentures. Total amount, $24,780.43, bearing 5½ per cent. interest. Debentures dated September 15th, 1917, and approved by the Ontario Railway and Municipal Board. The highest or any tender not necessarily accepted.

For further particulars apply to

J. URQUHART, Clerk,
Village of Stouffville.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

FIRE INSURANCE.—Chief clerk in head office wants position with established company as office manager or in similar executive capacity. Long experience with tariff companies; thoroughly competent underwriter, able to take full charge of head office. Legitimate reasons for changing. Highest recommendations as to ability and integrity. Well qualified to hold responsible executive position, and only such would be attractive. Confidential. Box 119, *Monetary Times*, Toronto.

NEW INCORPORATIONS

Sunloch Mines, Limited, was the Only Million-dollar Company Last Week

The Sunloch Mines, Limited, of Vancouver, B.C., with authorized capital of $1,000,000, was the largest company incorporated last week.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of the paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Mission City, B.C.—Hargitt Motors, Limited, $20,000.

Raymond, Alta.—The O. H. Ranch, Limited, $20,000.

Parksville, B.C.—Parksville Garage, Limited, $15,000.

Cardston, Alta.—The Cardston Motors, Limited, $10,000

Stavely, Alta.—The Stavely Curling Club, Limited, $5,000.

Drumheller, Alta.—The Drumheller Agencies, Limited, $10,000.

Claresholm, Alta.—The Claresholm Garage, Limited, $40,000.

Peace River, Alta.—The Record Printing Company, Limited, $20,000.

Redcliff, Alta.—The Redcliff Development Company, Limited, $100,000.

Pincher Creek, Alta.—The Bridges Taylor Ranch Company, Limited, $25,000.

Lethbridge, Alta.—The Knight Watson Ranching Company, Limited, $500,000.

Village of Teulon, Man.—Woods, Limited, $25,000; A. Wood, D. Wood, I. M. Wood.

Renfrew, Ont.—Renfrew Refrigerator Company, Limited, $100,000; R. Handley, G. Harris, A. Blue.

Mont Joli, Que.—Porter Mallory Company, Limited, $20,000; P. E. Porter, J. Edwin Mallory, G. G. Porter.

Windsor, Ont.—Flanders Realty Company, Limited, $40,000; W. E Flanders, C. A. Guerin, O. LaBounty.

Sorel, Que.—Le Club Nautique de Sorel, Incorpore, $10,000; A. Beauchemin, N. Latraverse, A. Beauchemin.

Ottawa, Ont.—Commercial Chambers Realty Company, Limited, $48,000; A. D. Stewart, A. Haydon, J. P. Ebbs.

Sherbrooke, Que.—J. S. Mitchell and Company, Limited, $500,000; J. S. Mitchell, M. W. Mitchell, J. W. Woodside.

Victoria, B.C.—Sooke Harbor Fishing and Packing Company, Limited, $50,000; the Simon Produce Company, Limited, $10,000

Portage la Prairie, Man.—Lew W. Cochran Company, Limited, $10,000; W. R. Sexsmith, J. O. McLeneghan, J. M. de C. O'Grady.

Calgary, Alta.—The Carbon Construction and Farming Company, Limited, $20,000; the Niagara Sales, Limited, $10,000; the Tokuum Creek Mines, Limited, $300,000.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brockville, Ont.—November 24—The Grand Trunk Railway blacksmiths' and fitters' shops completely gutted. Covered by insurance.

Dauphin, Man.—November 22—Mr. R. Hunt's barn, containing twenty-six horses and several cattle, destroyed.

Florenceville, N.B.—November 18—School building destroyed. Total insurance, $8,500.

Halifax, N.S.—November 18—Naval service department's offices badly gutted. Cause, defective wiring.

Innisfail, Alta.—November 28—Mr. Geo. Oaks' farmhouse destroyed.

Lynden, Ont.—Mr. Geo. Brook's barn. Fire spread to another barn, icehouse, drive-shed and automobile, which were completely destroyed. Cause, gasoline explosion.

Melita, Man.—November 16—Mr. P. Vanleek's barn, containing 40 tons of hay, destroyed.

Milford, N.B.—November 19—Eight houses destroyed. Owners, Mr. Thos. Conway, John Sommerville, John Murphy, Robt. Carrier, James Leahey and And. Cushing. Mr. Robt. Carrier's house was insured for $400 in the Queen, Mr. Leahey's in the Western, Mr. Sommerville's in the Atlas.

Montreal, Que.—November 21—Mr. W. H. Pauze's lumber destroyed. Estimated damage, $90,000; partly covered by insurance.

Nelles' Corners, Ont.—November 17—P. P. Reicheld's grain elevator completely destroyed.

Niagara Falls, Ont.—November 26—Alderman Wm. H Newman's barn destroyed. Estimated loss, $3,000. No insurance carried.

Pipestone, Man.—November 22—Livery barn, containing five horses, one cow and a pig, destroyed.

Quebec, Que.—November 8—The George Tanquay Company's plant completely destroyed. Covered by insurance.

Shellbrooke, Sask.—November 16—Saskatchewan Elevator Company's plant, containing 8,000 bushels of grain, destroyed; also two Canadian Northern Railway cars.

St. Hyacinthe, Que.—November 28—Hotel Dieu Hospital partly destroyed. Estimated loss, $200,000. Insurance carried, $80,000. Cause, lighted match.

St. John, N.B.—November 23.—Block, containing Messrs. Robertson, Foster and Smith's warehouse, Estey and Company, Messrs. Linton and Sinclair and the Crosby Molasses, Limited, badly damaged. The building is the property of the Small estate, for which Mr. W. Gilbert is manager. The estimated loss to this is $12,500. Insurance carried by Messrs. T. B. and H. B. Robertson. Messrs. Robertson Foster and Smith's total insurance is $50,000, carried in the following companies: Northern, $9,500; General of Paris, $5,000; Liverpool-Manitoba, $4,000; Union of Paris, $6,500; Connecticut, $2,500; Royal, $16,500; Caledonian, $2,000; Guardian, $1,500; Occidental, $1,500; Ocean, $1,000. Messrs. Estey and Company's stock is insured for $12,000; carried in the Atlas $7,000, and the New York Underwriters $5,000. Messrs. Linton and Sinclair—Estimated loss, $400; carried in the New York Underwriters and Quebec Fire Insurance Companies. The Crosby Molasses, Limited—Insurance carried in the Montreal Underwriters.

Paris, Ont.—November 25—Alabastine Company's plant destroyed. Estimated loss, $35,000; partly covered by insurance.

Tavistock, Ont.—November 23—Tavistock Milling Company's plant badly damaged. Estimated damage, $15,000. Cause, friction from belt setting fire to shavings.

Toronto, Ont. — November 26—The Canadian Realty Company's building badly damaged. Estimated loss to building, $1,000; to contents, $10,000. Firms who suffered from the fire were the W. H. Smith Company and the R. L. Baker Company.

Winnipeg, Man.—November 17—Empty house, property of the Winnipeg Securities Company. Estimated damage, $400.

For Victory!

Prudent war finance tries to widen the source from which money is drawn and thus to avoid too great a strain at any one point. Figures show that in most countries the success of war loans has been due, in what at first seems surprisingly large measure, to the small investor.

As it is necessary and natural, large blocks of Victory Bonds will be taken by business institutions. Business institutions will subscribe to the Victory Loan because they know it is necessary to keep up Canada's part in the War, and because their business judgment tells them that no other investment is as safe as the Victory Loan; also that no similar investment yields a more attractive interest return.

If the same combination of patriotism and business sense urges the nation as a whole, the Loan will be a success. But everyone must lend a hand—***with money in it.*** You can get a Victory Bond yielding 5½% for $50.

Send in your application to the local Victory Loan Headquarters to-day.

VICTORY LOAN IN BRITISH COLUMBIA

(Staff Correspondence.)

Vancouver, November 24th.

Nowhere, we believe, has the Victory Loan campaign been carried on with greater enthusiasm than in British Columbia, and returns to date would indicate that this province will easily subscribe its quota of the total amount. Organization has been centered in Vancouver, with a provincial executive consisting of the following: Messrs. William Farrell (chairman), H. H. Watson, J. P. Nichols, F. W. Rounsfell, W. H. Malkin, S. Burke, F. W. Marsh, George Buscombe, Wm. McNeill and Mr. L. W. Makovski (secretary). Committees were appointed in all the cities of the province, and workers have been obtained to make the canvass, so that the territory has been thoroughly covered. In British Columbia conditions differed from those in the East, where the organizations of bond houses were commandeered by the minister of finance, but the executive here has been able to call on the services of experienced business men, who have co-operated very effectively.

The campaign in British Columbia has been conducted largely on a patriotic basis, and it has relied on the goodwill of a number of hard-working individuals who have given almost their entire time to the work. The magnitude of the campaign and organization is greater than most people think, and that it was able to get such excellent results in so short a time shows the capability of the executive.

Mr. R. J. Smith, late of Toronto, has been appointed by the Scottish Union and National Insurance Company as special agent in charge of the Western Canada field, and will shortly assume his duties, making his headquarters at Winnipeg.

NATIONAL TRUST COMPANY'S SUBSCRIPTION

The National Trust Company, Limited, has subscribed $3,500,000 to the Victory Loan. Of this $3,000,000 is subscribed by the Toronto office and the remainder by the five other offices of the company.

VICTORY LOAN RESULTS UP TO LAST NIGHT

The total subscribed to the Victory Loan up to last night, Thursday, was as follows:—

	Total.	No. subscribers.
Nova Scotia	$10,514,150	21,874
New Brunswick	5,028,150	11,382
Prince Edward Island	1,344,000	3,314
Quebec	8,670,150	8,079
Montreal City and Island	45,23[illegible]	27,761
Ontario	140,715,000	190,155
Manitoba	18,[illegible],450	35,0[illegible]5
Saskatchewan	11,820,700	33,330
British Columbia	9,6[illegible],150	15,220
South Alberta	6,749,100	17,553
North Alberta	3,185,500	11,054
Totals	$260,087,900	389,658

The Dominion total up to this morning, Friday, with every province except Ontario lagging in its returns is $271,227,350, or $38,772,650 short of the amount which Canada set out to obtain. There are only to-day and to-morrow to get that amount. Subscribers may telephone, telegraph, or mail their subscriptions up to midnight to-morrow, Saturday. All the banks in Canada will remain open until 6 p.m. to-morrow.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the first three weeks of November:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
November 7	$3,031,000	$3,204,000	+ $168,000
November 14	3,051,000	3,575,000	+ 524,000
November 21	2,984,000	3,565,000	+ 581,000

Grand Trunk Railway.

	1916.	1917.	Inc. or dec.
November 7	$1,244,050	$1,287,185	+ $ 42,226
November 14	1,283,901	1,305,511	+ 21,610
November 21	[illegible]	[illegible]	— 64,420

Canadian Northern Railway.

	1916.	1917.	Inc. or dec.
November 7	$ 885,000	$ 895,400	+ $ 10,400
November 14	825,100	1,030,800	+ 214,700
November 21	853,000	931,700	+ 78,700

The article in our issue of November 23rd, under the heading "New Company Organized," under which the firm's name is given as "Lewis Apedante and Hanson.", is an error; it should read Lewis Apedaile and Hanson.

Mr. J. C. Wilson, of Victoria, B.C., has been appointed manager of the Great-West Life Assurance Company in that city. Mr. Wilson was for many years with the Empire Loan Company, of Winnipeg. He is a member of the Hundred Thousand Club of the Great-West Life Assurance Company.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

ONE REASON

men sometimes give for failing to take out Life Insurance is that they are buying a home, and want all their money.

Buy the home, by all means. But remember that a home without an income might be little better than a burden to your wife if you were suddenly removed.

Provide the necessary income by means of Life Insurance. Give your wife a MONTHLY income, as she has been accustomed, by means of the Monthly Income Policy issued by The Great-West Life. Thus the home may be preserved and the funds left for the support of dependent ones be beyond the possibility of unwise investment or loss.

Ask for information, stating age.

Canada's Victory Loan Record

INCREASE *in Number of Subscribers Compared with Previous Issue was 1,663 Per Cent.—Dominion Government Will Not Have to Seek Its Funds Abroad Again, Except for a Lower Interest Rate—No More War Loans Likely for a Year.*

THE record of the Victory Loan is so remarkable that it is difficult to determine its outstanding feature. Possibly the most important phase of the achievement is the ultimate effect on the economic position of the Dominion. For the first time, a real beginning has been made in the art of saving. In future, it will be unnecessary for the Dominion government to seek funds abroad, except to obtain a lower rate of interest. Another feature is the vast improvement over our previous loan records. Again, it is satisfactory to know that the large total subscribed will make another war loan unnecessary for at least a year. The loan has not only postponed further borrowing for a considerable period, but it will also stabilize business conditions and maintain the present prosperity.

Mr. E. R. Wood, chairman of the special subscriptions committee, in announcing the results for the Dominion on Monday, properly reminded us that the American continent has a notorious reputation for extravagance. We are discarding that costly garb, acquiring the more useful and reputable raiment of thrift. The people of Canada are now saving and loaning their money to the government. This will prove to be one of the secrets of success in the tasks of nation building which are before us.

The loan will undoubtedly prove a great national impetus to the habit of thrift. Arrangements were made so that the man or woman who bought even a $50 bond could have it fully registered and the interest paid by cheque twice a year. The small investor need not even trouble to clip coupons. His cheque will arrive on June 1st and December 1st every year. It can be endorsed and, if desired, paid over the counter to the butcher, the baker, or the grocer. These interest cheques are as good as dollar bills. All this means that those who hold our government bonds will desire to buy more of them. When one knows that many of our people who have never been inside a bank, have purchased Victory Bonds, one realizes the educative value of the Loan campaign upon the community and the ultimate effect it will have on the volume of Canadian investments in good securities and in life insurance.

As pointed out by Archdeacon Cody, of Toronto, the political effect of the success of the loan will be marked. Instead of a few thousand bondholders, we now have several hundreds of thousands. These men and women are bondholders of the nation. They are partners in the nation's business. As such, they will take a greater interest in effective and economical government. They will take a larger interest in the affairs of the country and in the national finances. Consequently they will become more useful citizens. As bondholders of the national concern, they will want a proper accounting from the directors (the government of the day) of the national concern.

The effect of the Loan upon Canadian credit in the United States and Great Britain will be of untold value. It will be reflected upon Canadian securities now held in those countries and will create a confidence in Canada at home and abroad to an extent hitherto believed impossible. It will help those of our provincial governments, municipalities, and corporations who find it necessary to borrow abroad, in future years.

Looking to the future, and apart from the exigencies of the war, the Dominion government, as mentioned above, will not again have to seek a Loan in the London or New York money market—or any other market outside Canada—except to obtain a lower rate of interest. The higher rate of interest paid here, however, would more than counterbalance the immense benefits derived by raising the necessary funds in our own country. In future, the Canadian government will be able to borrow its requirements from the Canadian people.

To our first war loan of $100,000,000 there were 24,862 subscribers. To the second loan of $100,000,000, there were 34,526 subscribers. To the third loan of $150,000,000, there were 40,800 subscribers. To our first three war loans, therefore, for a total of $350,000,000 we had only 100,188 subscribers. In those figures are represented many subscribers who purchased bonds of all three loans. Comparing the number subscribing to the third loan, namely, 40,800, with 719,329 subscribers to the Victory Loan (incomplete returns up to Wednesday), there is an increase of 678,529 or 1,663 per cent. in the number of investors. Even should we count the 100,188 subscribed to the Victory Loan 619,141 of our citizens who individual subscribers (which was not the case) there subscribed to the Victory Loan 619,141 of our citizens who had not previously bought a Canadian war bond.

Deducting the number of those serving in the army overseas, it is fair to place our population at 7,500,000 for the purposes of the Loan. Accepting that total as correct, only 1 in 183 of our people subscribed to the third war loan, while 1 in every 10.4 subscribed to the Victory Loan. This compares with 1 in 23 in England's Victory

(Continued on page 45.)

NOVEMBER MUNICIPAL BOND SALES

Victory Loan Campaign Keeps Down Total for the Month

The municipal bond sales in Canada for November as compiled by *The Monetary Times* were $174,191, compared with $398,771 in October and $1,246,480 for November of last year. The Victory Loan campaign, and the monopoly of the money markets by war loans generally, account for the low total sales last month.

Comparing the record of November, 1916, with that of the month just ended, the bond sales are as follow:—

Sold in	November, 1917.	November, 1916.
Canada	$174,191	$1,246,480
United States	....	....

The municipal bond sales in Canada for the first eleven months of the year, according to *The Monetary Times'* bond record, were as follow:—

	1914.	1915.	1916.	1917.
January	$ 1,953,137	$ 1,784,947	$ 1,909,441	$ 1,969,256
February	5,995,336	3,047,011	1,419,009	458,874
March	5,123,176	2,572,357	2,027,741	229,013
April	2,847,953	8,603,094	1,979,852	1,182,974
May	6,400,755	3,464,281	2,649,000	1,375,039
June	4,617,857	2,395,744	3,043,283	1,642,003
July	2,180,758	1,618,422	1,521,525	3,814,489
August	395,395	1,087,415	852,447	4,637,836
September	535,050	2,768,484	960,435	440,268
October	2,874,872	1,245,874	1,361,665	398,771
November	622,049	1,645,892	1,246,480	174,191
Totals	$33,546,338	$30,233,521	$18,971,778	$16,322,714

Sales in the United States for the first eleven months of 1914, 1915 and 1917 were as follow:—

	1914.	1915.	1916.	1917.
January	......	$ 340,000	$ 3,183,215	$2,285,000
February	$ 50,000	6,471,000	899,500	485,725

MANUFACTURE AFTER THE WAR

"If," writes a London financial critic, in discussing England's trade after the war, "we are to produce more ships and bridges we must have more steel, and in order to produce more steel we must have more iron ore and more coal. Ultimately, then, the production of finished goods must depend upon the supply of raw materials, and unless we can obtain those materials in adequate quantities through producers in other countries also working their hardest, our plans for a maximum industrial output will be frustrated."

The above are the Victory Loan returns up to December 5th as announced at Toronto by Mr. E. R. Wood, chairman of Dominion special subscriptions committee. Further returns have yet to be received. Mr. Wood, at a meeting on Monday enumerated many of the large subscribers and added that the small subscribers, the workers in the factories and all classes of the community, were equally entitled to praise in the final result. The result of the Victory Loan, Mr. Wood pointed out, will place the business of Canada on a sound basis for the next twelve months. The campaign had been the means of training the people in economy and thrift and teaching them that they must save during a period of war.

Per Capita Figures.

The approximate per capita subscriptions of the various provinces are shown in the following table, the population figures from the latest census being taken, in order to give uniform comparisons:—

Province.	Population, census 1911.	Per capita subscription to Victory Loan.
1. Ontario	2,523,274	$73.00
2. Quebec	2,003,232	46.00
3. Saskatchewan	492,432	40.00
4. Nova Scotia	492,338	36.00
5. Manitoba	455,614	69.73
6. British Columbia	392,480	45.40
7. Alberta	374,663	42.00
8. New Brunswick	351,889	29.00
9. Prince Edward Island ..	93,728	24.00

The per capita subscription for the entire Dominion is $54.

Canada's Splendid Record.

The subscribers to the Victory Loan, based on a population of 7,500,000—which allows for our soldiers overseas—were 1 in every 10.4, compared with the United States record of 1 in every 10.7.

Similar calculations for the provinces (using the 1911 census figures, in order to obtain uniform comparisons) give the following results:—

Province.	Population, census 1911.	One subscriber in every
1. Manitoba	455,614	6
2. Alberta	374,663	7
3. Ontario	2,523,274	8
4. British Columbia	392,480	8
5. Saskatchewan	492,432	8
6. Nova Scotia	492,338	13
7. Quebec	2,003,232	16
8. New Brunswick	351,889	17
9. Prince Edward Island ..	93,728	19

Fifteen Thousand Workers.

Mr. A. E. Ames, chairman of the Dominion executive, who presided at the Toronto meeting on Monday when the results were announced, extended the thanks of the Dominion executive to the subscribers and all those who helped to make the campaign a magnificent success. The people of Canada more than stood the test, with the result that they to-day stand before themselves and the world a resolute and self-respecting people. The workers, extending from coast to coast, numbered almost 15,000. They had received the hearty co-operation of Sir Thomas White, and the results of the campaign showed conclusively that the organization already created to cover the work of the Dominion had laid a foundation for greater results when another loan campaign is launched at a later period.

Influences of Loan.

Sir George E. Foster, at the same meeting, said that as he surveyed the impressive scene before him, and dwelt upon the amazing response of the Dominion to the great call for help, his mind traveled back many years to a day when he wished to negotiate a loan of $22,000,000 for his country, a proceeding which cost him many sleepless nights, and a trip to Britain.

To-day he realized that no more sleepless nights need trouble him, that whenever in need of another small loan he would have but to turn to Quebec and to the little sisters of Ontario, Prince Edward Island and New Brunswick. The influences of this loan would travel far into the coming history of the Dominion, and the message it told was from not a mere fraction, but from all the people of the Dominion. The loan, too, had inspired in the heart of the nation a new sense of economy, and a new, fine sense of personal responsibility in the administration of the government of the country. During the past three weeks the people of Canada had been knitted together as never before and the effect of the Victory Loan would be felt for the better for generations to come. "What is the lesson you have got from this $400,000,000?" Sir George asked and added: "It is for the purposes of this war and see to it that it goes into the war and goes in quickly."

BANK CLEARINGS

The following are the bank clearings for the weeks of November 29th, 1916, and December 1st, 1917, respectively, with changes:—

	Week ended Dec. 1, '17.	Week ended Nov. 29, '16.		Changes.
Montreal	$ 78,244,242	$ 85,339,725	—	$ 7,095,483

Sherbrooke	549,853	536,648	+	13,205
Kitchener	579 336	483,205	+	96,131
Totals	$268,401,367	$259,025,362	+	$ 9,376,005

The Toronto bank clearings for the current week are $66,511,312, compared with $60,336,754 for the same week in 1916, and $44,519,857 in 1915.

The first freight train crossed the Quebec Bridge on Monday. Composed of 16 freight cars, one van and one private car, the train ran on the bridge from the south shore at 11.53 o'clock and reached the north shore at noon. The total weight of the train was 1,245 tons, and it was just the length of the central span. When the full weight of the train rested on the central span, the expansion of the structure was merely five-sixteenths of an inch.

OUR CHANGING CONDITIONS

Many matters of vital importance were referred to at the annual meeting of the Bank of Montreal this week. Sir Frederick Williams-Taylor, the general manager of the bank, who is properly regarded as one of our foremost financial authorities, pointed out that for the first time since Confederation, the Dominion is cast upon her own financial resources. Little money is coming into Canada except in payment of exports. This will have far-reaching consequences. Industrial development will be checked but on the other hand, as Sir Frederick said, the inability to borrow may prove a blessing in disguise, once we have adjusted our affairs to the change of conditions.

The interest on our debt abroad Sir Frederick put at about $500,000 a day. In view of that fact, it is well for us to learn to do without financial assistance. "It is true," said Sir Frederick, "that the development of Canada could never have reached its present stage but for moneys borrowed abroad and, therefore, Canada is grateful, first, to Great Britain, and secondly, to the United States, for the help they have thus contributed to the remarkable progress which our country has made, particularly during the past twenty years. It is, however, equally true that our misuse of borrowed money is in great measure responsible for some of the chief evils that have come upon us. I refer especially to the inflation which before the war started the increase in the cost of living, and to the creation of debt unrepresented by productive investment. Now that the inflow of money is suspended, we must pull ourselves together, practise economy, till the soil, produce to a greater extent the manufactured goods we require for our own use, until in the fullness of time we emerge a wiser and a better people in a sounder economic position." The full text of Sir Frederick Williams-Taylor's address will amply repay careful perusal.

CONSERVATION OF RESOURCES

Much of the national organization of most countries is to-day engaged in systematic efforts to promote conservation of essential commodities. In Canada, however, we have not yet arrived at a proper conception of the economic utilization of our resources. In an unusually valuable address before the Commission of Conservation at its recent annual meeting, Sir Clifford Sifton, chairman of the Commission, reminded us of our persistence in the crude and wasteful methods naturally characteristic of a country where resources are abundant and where many of those who are engaged in their exploitation are totally lacking in the scientific education which is necessary in order to make the best use of that which is placed in their hands. "We are still largely dominated in Canada," said Sir Clifford, "by the idea that any ordinarily capable amateur can do the work which ought to be done by a trained scientific man, and until we eradicate this fallacy thoroughly, and in its place implant the view that men who are technically trained are the only men competent to deal with technical problems, we shall not begin to attain to general success in making the best use of the materials which are at our disposal."

While it is true that we are still largely dominated by false ideas, it is also true that persistent work and agitation is bringing about substantially beneficial results. When the forestry branch of the department of the interior was established seventeen years ago, there was not at that time known to be a single trained forester in Canada. To-day there are 150 trained foresters in addition to 73 forestry students who have enlisted.

Sir Clifford Sifton stated that with regard to forestry, the various organizations at work have been successful in bringing about perhaps the greatest degree of improvement that is observable in connection with any department or branch of natural resources.

In the conservation of water powers, Sir Clifford said the different agencies at work have been, on the whole, fairly successful, although there is a continual struggle going on against the improvident alienation of power and we are constantly required to be on our guard.

OUR CROP RECORD

This year, for the first time on record, the total value of the field crops of Canada have a value in excess of a billion dollars. According to figures of the census and statistics office, Ottawa, just issued, the value of the field crops for 1917 is $1,089,687,000. That compares with $886,494,900 in 1916 and $825,370,600 in 1915. The increase in value this year is $203,000,000 or 22 per cent. over 1916, and $264,000,000 or 32 per cent. over 1915.

The total of $1,089,687,000 this year is made up of $451,874,000 for wheat, as compared with $344,096,400 in 1916; of $236,142,000 for oats, as compared with $210,957,500; of $145,361,600 for hay, clover and alfalfa, as compared with $171,613,900; and of $81,355,000 for potatoes, as compared with $50,982,300. The aggregate value of other grain crops is $134,006,700, as compared with $84,679,800 and of other root and fodder crops $40,974,700, as compared with $84,165,000.

The large total for 1917 is due to the high prices ruling for farm products. With this substantial contribution from the field crops, the total value of primary production during the current year, from field crops, mines, fisheries and forests, will probably be $1,500,000,000.

NOVEMBER FIRE LOSSES

Two Business Sections Destroyed Last Month — Several Large Fires Reported

The Monetary Times' estimate of Canada's fire loss during November is $959,059, as compared with the October loss of $704,605 and $923,235 for November of last year. The following is the estimate of the November losses:—

Fires exceeding $10,000	$721,506
Small fires reported	112,450
Estimates for all unreported fires	125,093
	$959,040

The Monetary Times' record of the first eleven months of the past four years shows the following monthly losses:—

	1914.	1915.	1916.	1917.
January	$ 2,700,312	$ 1,249,886	$ 1,640,217	$ 1,918,669
February ...	2,920,749	1,010,550	3,275,600	2,009,953
March	2,660,666	1,632,696	1,406,501	2,050,650
April	1,010,235	1,463,747	1,460,437	1,317,714
May ...	1,035,510	881,855	1,850,205	1,163,110
June	1,267,410	1,157,150	494,557	1,184,627
July ...	2,053,130	773,269	3,039,634	1,101,734
August	2,021,379	403,093	1,057,109	1,230,183
September .	1,350,281	1,110,100	981,703	1,301,700
October	1,326,565	1,290,325	1,077,815	704,605
November ...	1,524,032	1,087,989	923,235	959,040
Totals ...	$23,659,190	$12,075,272	$17,156,013	$14,941,985

The fires reported in November at which the losses amount to $10,000 and over were:—

Brockville, Ont., Nov. 3.......	Hotel annex........	$ 25,000
Toronto, Ont., Nov. 3........	Cluff Brothers' shell forging plant ...	125,000
Drayton, Ont., Nov. 12........	Business section of town	20,065
Ingersoll, Ont., Nov. 10......	John Northway & Company's dry goods store	30,500
Ingersoll, Ont., Nov. 10......	Bowman & Company's musical & sporting goods store	23,266
Kingston, Ont., Nov. 5.......	Boyd's garage	10,175
South Bay, N.B., Nov. 6......	Mr. J. E. Moore's lumber plant	100,000
Cobourg, Ont., Nov. 14.......	Public school	33,200
Montreal, Que., Nov. 21.....	Mr. W. H. Pauze's lumber	90,000
St. Hyacinthe, Que., Nov. 28.	Hospital	200,000
St. John, N.B., Nov. 23	Business block ...	12,500
Paris, Ont., Nov. 25..........	Alabastine Company's plant	12,300
Tavistock, Ont., Nov. 23.....	Milling Company's plant	15,000
Toronto, Ont., Nov. 26	Canadian Realty Company's building	11,000
Fort William, Ont., Nov. 24...	Chapples, Limited, stock & fixtures	10,000

Among the reported causes in September were: Overheated furnace, 1; rats nibbling matches, 1; defective furnace, 1; fallen stovepipes, 1; gasoline explosion, 2; fire from cutting box, 1; defective wiring, 1; lighted match, 1; friction from machinery belt, 1.

The structures damaged or destroyed last month were:— Grain elevator, 3; hospital, 1; buildings, 5; plants, 5; cafes, 2; dwelling houses, 23; business sections, 2; barns, 12; ice-house, 1; stores, 3; garage, 1; hotel, 1; forge, 1; workshop, 1; schools, 2; mill, 1; blacksmith shop, 1; office, 1.

The fires at which fatalities occurred were:—

Toronto, Ont., Nov. 7.........	Playing with fire	1
Montreal, Que., Nov. 8	Ignited clothing	1
Massena, Ont., Nov. 9........	Lighting fire with gasoline	1
Cartierville, Que., Nov. 12....	Trapped in burning house	1
Moose Jaw, Sask., Nov. 14 ..	Trapped in burning house	3
Grand Mere, Que., Nov 22....	Falling from steam shovel upon the coal	1
Virden, Man., Nov. 20........	Using coal oil to light fire	2
Dunnville, Ont., Nov. 24.....	Trapped in burning house	1
Port Stanley, Ont., Nov. 27...	Trapped in burning house	1
Welland, Ont., Nov. 27.......	Trapped in burning house	1
Innisfail, Alta., Nov. 28......	Trapped in burning house	5
Port Arthur, Ont., Nov. 28 ..	Trapped in burning house	2
Dauphin, Man., Nov. 27......	Ignited clothing	1
		21

The following table compiled by *The Monetary Times*, shows deaths caused by fire during the first eleven months of 1917, as compared with previous returns:—

	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.

TORONTO SCHOOLS INVEST $750,000

It is likely that when the returns are all in, the Toronto schools, pupils, teachers and parents who bought via the schools will have made a total investment in Victory bonds of $750,000. Detroit raised $400,000 in the schools.

TORONTO RAILWAY COMPANY SELLS NOTES

Messrs. William A. Read and Company, New York, recently offered for sale an issue of $750,000 Toronto Railway Company's one-year 6 per cent. notes, due December 1st, 1918, at 99, to net 7 per cent. The entire issue was sold.

ONTARIO MINING COMPANIES' LOAN SUBSCRIPTIONS

Nine Ontario gold and silver mining companies subscribed $2,200,000 to Canada's Victory Loan. Subscriptions from prominent mining companies were as follow: Mining Corporation of Canada, $500,000; Nipissing Mining Company, Limited, $500,000; Hollinger Consolidated Gold Mines, Limited, $500,000; Kerr Lake Mining Company, $250,000; Timiskaming Mining Company, $200,000; McIntyre Porcupine Mines, $100,000; Dome Mines Company, $50,000; Coniagas Mines, Limited, $50,000; McKinley-Darragh-Savage Mines of Cobalt, $50,000; total, $2,200,000.

ADDRESS:

THE MANAGER, BOND DEPARTMENT,
TORONTO 62

PERSONAL NOTES

MR. A. D. MORROW, of Æmilius Jarvis and Company, investment bankers, has withdrawn from partnership in that firm.

MR R. J. SMITH, formerly of Toronto, has been appointed by the Scottish Union and National to be special agent in charge of the Western Canada field, with headquarters at Winnipeg.

MR. E. E. MOORE, chief clerk to Mr. I. G. Ogden, vice-president of the Canadian Pacific Railway, has been appointed insurance commissioner in charge of all matters connected with the Canadian Pacific Railway Company's fire and marine insurance.

Hon. Charles Stewart, new Premier of Alberta.

HON. CHARLES STEWART has become premier of the progressive province of Alberta, in succession to Hon. A. L. Sifton, who recently entered the Dominion Union cabinet as minister of customs. Mr. Stewart was born at Strabane, Wentworth County, Ont., on August 26th, 1868, and lived there until he was 16 years of age. He then moved to Barrie, Ont., residing there for 20 years, where he was actively engaged in farming operations. While there he took a keen interest in public affairs and held positions of trust in the municipal organizations of his county. He went west in 1905 and settled at Killam, Alberta, where he secured a homestead, and where he has been engaged ever since in active farming operations. In 1909 he was elected by acclamation for the constituency of Sedgewick to the Alberta legislature and rapidly attracted attention by his keen grasp of public affairs, and in 1912 was invited by Mr. Sifton to enter the Alberta government as minister of municipal affairs. Mr. Stewart has left his mark upon that department by placing upon the statute books the towns act, the village act and the rural municipal act. The following year he was appointed minister of public works and has since filled that position with credit to the government and honor to himself. Mr. Stewart attributes his success in public life to his thorough understanding and keen appreciation of the difficulties surrounding settlement of a new country, as well as keeping constantly in touch with the organized bodies representative of the people and their interests.

MR. CHARLES H. NEELY, for many years general manager for Canada of the Ocean Accident and Guarantee Corporation, has been appointed United States manager of the company. Mr. William J Gardner, for several years United States manager for the company, has resigned to accept an appointment as manager of the newly created Pacific Coast branch office at San Francisco. Mr. Neely succeeds him. These changes, which become effective as of January 1st, 1918, will have for their effect the division of the company's business in the United States into separate departments, both of which will report direct to London, England. Mr. Gardner is a native of the Pacific Coast. He has been with the Ocean for about seven years, at first as assistant United States manager and for the past four years as manager. He will have the title, manager of the Pacific Coast department. Mr. Neely will be manager of the New York department. Mr. Neely is one of the best known accident and casualty insurance men in Canada. He has worked zealously for the improvement of conditions in the business in the mutual interest of the companies and their policyholders. His expert knowledge, combined with an unusual degree of tact and a pleasing personality, have given him a well deserved and prominent place in the insurance business on this continent. In assuming his new and important appointment, he will carry with him the good wishes of innumerable friends here, who regret his departure from Canada.

Superintendent of Agencies

Wanted by well-established Life Insurance Company with Head Office in Toronto. Must be capable of organizing and handling Agencies throughout Canada.

APPLY BOX 129 MONETARY TIMES

MR. W. R. BROCK, who has died recently, leaves an estate the gross value of which is $2,464,185. The Toronto General Trusts Corporation and Mr. R. S. Cassels, K.C., are associated with the executors in an advisory capacity. The gross value of the estate is $2,464,185.83, with liabilities of $307,-878.24. The succession duties will be large, and a bond for $250,000 to secure payment of them has been given. The more important items of the assets are as follows: Warehouse, Bay and Wellington Streets, Toronto, $350,000; warehouse, King and Duncan Streets, Toronto, $125,000; warehouse, Montreal, $250,000; warehouse, Calgary, $150,000; leasehold interest in No. 21 Queen's Park, Toronto, $15,000; 6,315 shares of the W. R. Brock Company, Limited, $631,500; deposit account with the W. R. Brock Company, Limited, $552,-133.41; 324 shares Dominion Bank, $65,448; 340 shares Canadian General Electric Company, $34,510; 72 shares Toronto General Trusts Corporation, $14,688; 50 shares Gurney Foundry Company, Limited, $3,750; 607 shares (common) Western Assurance Company, $3,642; 5,000 shares (preferred) Western Assurance Company, $100,000; 499 shares Stanstead Granite Quarries Company, Limited, $49,900; 100 shares Great-West Life Assurance Company, $22,500; Canada war loan, $53,075; rent (accruing) of warehouses, etc., $10,505.-50; life insurance, $8,196.25; household goods and furniture, $5,000.

The name of the **HILL AGENCIES, LIMITED**, of Saskatoon, Sask., has been changed to Hill and Kemp, Limited, under the same management.

NEW PRESIDENT OF WESTERN ASSURANCE COMPANY

At meetings of the directors of the Western Assurance Company and of the British-America Assurance Company recently, Mr. W. B. Meikle was elected president of each company in succession to the late Mr. W. R. Brock, who died on November 1. The British-America Assurance Company was incorporated in 1833, and the Western Assurance Company in 1851. Mr. Meikle began his insurance career in the head office of the late Scottish Commercial Fire and Life Insurance Company, and was afterwards for many years with the Manchester Fire Insurance Company at Manchester, Birmingham and London. Later on he went to Calcutta to take charge of the Manchester's business in India and the Far East, combining with this position the duties of marine underwriter of the Triton Insurance Company and manager of the Eastern Fire Insurance Company—the two leading local companies in India.

In 1900 he returned to England to become manager of the British and foreign branch of the Western and British-America Assurance Companies, and in 1907 he was appointed the general manager of these two companies at their head office in Toronto. In 1914 he was also elected vice-president of both companies. Mr. Meikle is also a director of the Canada Life Assurance Company and the Imperial Guarantee and Accident Insurance Company.

CRITICISM OF ONTARIO POWER COMMISSION

British Forgings Plant Should Have Gone Near Shawinigan Falls, Says Fitzgerald

It is little more than 22 years ago that the first electrochemical plant started in Niagara Falls, N.Y., manufacturing aluminum, to be followed in a few weeks by the manufacture of carborundum. A little later we had calcium carbide, caustic soda, chlorine, sodium, phosphorous, potassium chlorate, alundum and numerous other manufactures all attracted by the cheap and convenient power made available by the falls. A full recognition of the immense importance of this development was not reached, however, until after the great war began. Then it was recognized that there was not a centre of industrial activity, the products of which were of more importance to a country at war. These statements were made by Mr. F. A. J. Fitzgerald, B.A., S.B., past president of the American Electro Chemical Society in an address last week to the Board of Trade, Niagara Falls, Ontario. He outlined the importance in modern warfare of the various products of the factories in that enterprising town and showed how industries in that section are dependent on Niagara power.

"Some years ago," said Mr. Fitzgerald, "an attempt was made to introduce the cyanamid industry into the Southern States, but the policy of the government in relation to water power made the scheme impossible, hence the development of the plant in this city.

Power Famine at Falls.

"The Canadian government has generally shown a much more rational attitude towards the use of Niagara Falls for power purposes than has the government of the United States. It has not allowed itself to be stampeded by the propaganda of MacFarlands and such like. The disastrous policy of the United States government is now demonstrated by the power famine at Niagara Falls, a power famine which seriously handicaps the most important work we have to do at the present, the thorough beating of Germany. The Canadian people and the Canadian government have so far as I have observed been strongly in favor of making the fullest possible use of Niagara Falls power and I have always rejoiced at this because in the long run this would make the people and government of the United States see the wisdom of following your example.

"This power shortage is now felt acutely, not only in New York State but here. The Canadian Aloxite Company has been forced to go to Shawinigan Falls to build a great 20,000 horse-power plant for the manufacture of its artificial abrasives, because it could get no power here. The Norton Company has been forced to get what power it can from three different companies, always a most unsatisfactory arrangement, in order to get enough for its requirements. Even at that its power has been curtailed from time to time. The Cyanamid Company so far from being able to develop its plant to the great size originally contemplated, has had its power cut down. One of the natural results is sure to be that the really great cyanamid plants of the future will not be in Niagara Falls. These, then, are some of the results of the shortsighted policy of the United States government as regards Niagara power. The bitter experience caused by the great war will correct these errors and I want to bring to your attention a contributary cause to the present power shortage due to a purely Canadian policy, one which, on account of its subtle danger is apt in the future to cause more trouble than the former policy of the United States government."

Is Responsible for Shortage.

Mr. Fitzgerald stated that he was not interested in any power company and that his work was altogether with people who had to buy power from power companies. He did not believe in the policy of the Ontario Hydro-Electric Commission, although the activities of the commission had been beneficial to him, because the difficulties caused by power shortage at Niagara Falls required his assistance to overcome them. Mr. Fitzgerald dubbed as "nonsense" the assertion that the Hydro-Electric Commission is not responsible for the power shortage.

"Anyone who takes electric power supplied by Niagara Falls, is in part responsible for the power shortage," he said. "Anyone who sells power is responsible for the power shortage, so that the commission shares the responsibility for power shortage with the power companies. The real criticism of the commission is that it has sold power which it did not have to deliver and that now factories, like the Canadian Aloxite Company, the Cyanamid Company and the Norton Company, must have their power supply cut down, or cannot get what they need. No doubt, the situation might be relieved to a certain extent by cutting off power from factories in the United States; but then, again, this means cutting down on the production of materials necessary for the successful prosecution of the war.

Water and Coal.

"At first sight the idea of using electric power generated from a water fall looks as though it was obviously the cheapest way of getting electricity that there is. Your water costs you nothing, while if you generate your electricity by steam you have to buy coal. Obviously, then, the cheap way to make electricity is by water. There is an element of truth in this, but like a great many statements that are partly true, it is even more dangerous than an absolute untruth. Hydro-electric power is only economical where you have a high load factor."

Mr. Fitzgerald elaborated this point and then considered the items which make up the cost of generating electric current. After comparing the steam electric and the hydro-electric plant at some length, he continued:—

"When the first power developments were started in Niagara Falls, the general feeling was that the big use would be found in the ordinary factory, in running street car lines, in lighting, etc., but we now know that the big use is in electrochemical work and the war has brought forcibly to our attention the enormous importance of electrochemistry. Private power companies, undoubtedly, like to get the kind of load taken by companies which supply the ordinary factory, trolley lines, lighting, etc., because the consumer in this case is not so much interested in extremely cheap power as the electrochemist and, consequently, as a business proposition, the supply of power to the electrochemical factory does not look so interesting. But with the wonderful advance in steam engineering which we have had in the last 15 years or so it is now realized that for these attractive low load factor propositions hydro-electric power is not the economical source. You know the great steam plant built by the Buffalo General Electric Company is very generally supposed to have been built simply on account of the shortage of power at Niagara Falls, and very likely power shortage may have stimulated its construction; but it really should be regarded as an auxiliary to the Niagara Falls power, a plant constructed to take care of that part of the load having a low load factor.

Not Run for Profit.

"When we consider public ownership of power generating plants, we know the theory is that the plants are not run for profit, but even so, the economic considerations are just the same as though the plants were run by a private company. What is false economy in the private plant is false economy in the public ownership plant."

"Before the war," he continued, "we had here in Ontario one of the greatest experiments in public ownership ever attempted in the Hydro-Electric Commission, and it is, therefore, important to examine how it has worked under war conditions. The commission, in order to gain the support of the people of Ontario, has pushed the sale of electricity without due regard to the real economic conditions which we have just been considering. The attempt has been made to sell hydro-electric power generated at Niagara Falls all over the province of Ontario without any regard to whether or not that is the best and most economical way of supplying the people with electric current. Plants where power was formerly generated have been scrapped and war has been declared on the private company.

To Secure Monopoly.

"In fact, the general impression gained from a view of the commission's activities is that its primary object has been to secure a monopoly of the business of supplying electricity for all purposes. With this end in view economic consideration, such as those we have discussed have been forgotten, and no matter whether the people or a private company owns a business if this is run in a wasteful and uneconomical way it injures the people as a whole. The mere fact that the people own the power plants at Niagara Falls will not change the economic laws, hence the tremendous development of the use of Niagara Falls power for municipal purpose is not beneficial. This has been brought home to us most forcibly in the effect it has had on industrial Niagara Falls since the war began.

"It is true that the commission also furnishes much power to munitions plants, but has it done this always with a re-

gard for the best interests of the people? Take the big electric steel plant in Toronto, British Forgings. Is it economical to put a plant like this, using large amounts of power at such a great distance from the source, where it was well known that there was already a power famine? Why could not a plant of this kind have been put near Shawinigan Falls, where there is a large amount of power at a very low price available?

"The fact is that a public owned business will not be a success unless the owners, that is, the people generally, will set themselves the task of studying the business and see that the officers whom they put in charge, run the business in a proper way. Remember, too, that those in charge of a publicly owned business have far more dangerous powers than the officers of the privately owned company. Thus, just as the commission is apt to disregard economic considerations, it will secure legislation which is almost incredible in a country professing to be democratic."

WAR LOAN VALUES AND THE MARKETS

Readjustment of Prices Will Probably Follow Quotations on the New Government Issue

A question of considerable interest to holders of the three old Canadian war loans is the status of their bonds since the lists to the Victory Loan closed and the conversion value of the three previous loans disappeared.

"One may reasonably presume," writes Mr. Victor Ross in the Toronto Globe, "that the previous loans will not now command any better price than that which will show the same yield on the investment as is afforded by the bonds of the Victory Loan of like maturity.

First and Second Loans.

"The first Canadian war loan, maturing in 1925, now has eight years to run, which places it, in so far as maturity is concerned, midway between the Victory five-year and ten-year bonds. These two, under their terms of issue, were offered to yield 5.81 per cent. and 5.68 per cent., respectively. On this basis the first war loan is worth a price to yield 5¾ per cent., which is approximately 95¼ and interest.

"The second Canadian war loan has now 14 years to run, and as such is midway between the ten-year and 20-year maturities of the Victory Loan, which were, under the terms of issue, offered to yield 5.68 and 5.61 per cent., respectively. Accordingly, the second war loan should sell to yield approximately 5.65 per cent. This would be a price of 93¾ and interest.

Third War Loan.

"The third Canadian war loan now has 19⅙ years to run, and as such is approximately identical with the 20-year maturity of the Victory Loan, the issue price of which gave a yield of 5.61 per cent. Proportionately, the bonds of the third loan on this basis should sell at a price of 92¾ and interest.

"It will probably be some time before the department of finance is in a position to announce what amount of the three previous loans was tendered for conversion into bonds of the Victory Loan.

Transactions in Victory Bonds.

"Transactions in Victory Bonds themselves will probably, for a time at least, be made on a 'flat' basis, that is, interest included in the price. Logically, this should be the method of trading until early in January, when, and not before, fully-paid certificates of the loan will be obtainable. Likewise transactions in these bonds in the meantime will, of necessity, need to call for the delivery of fully-paid certificates, deliverable on and after January 2 next. After that date, the price of these bonds will, no doubt, ultimately subdivide into a price of principal alone, with accrued interest as a separate item.

"From a market point of view it will be most interesting to see what benefit, if any, will be derived from the exceptionally wide distribution secured in the Victory Loan campaign."

An advertisement of interest to life insurance men appears in another column (Box 120, page 12). Those interested are asked to communicate in the first instance with Jas. J. Salmond, president of *The Monetary Times*

LATEST VICTORY LOAN RETURNS

Total Subscriptions Exceed $415,000,000 from 781,756 Subscribers

The following reports of Victory Loan subscriptions, to 10 a.m. yesterday, December 6th, have been furnished to *The Monetary Times* by Mr. W. S. Hodgens, chairman, Dominion business committee of the Loan campaign. His work and that of his committee and staff on the Loan records, has been notable for speed and accuracy, and has elicited congratulations from all parts of the country.

Dominion Reports to 10 O'clock a.m., Thursday, December 6th, 1917.

	Grand total.	Subscribers.

	7,891,000	780,098	10.1	$413,333,800	

Toronto's Splendid Record.

Toronto's total to the morning of December 6th was $77,975,500 from 128,048 subscribers, which is equal to 1 in every 3.71 of that city's population. On the day the subscription lists closed, 20,000 applications for $7,240,000 were received in Toronto.

AUSTRALIA'S WAR LOANS

A Melbourne, Australia, cable says: The Liberty Loan of Australia has been successful. The applications numbered 35,000, totalling £19,651,000, which will be augmented by applications coming from distant centres Since the prospectus of the loan was issued war savings certificates, valued at £554,000, have been sold. Including the Liberty Loan, altogether £100,000,000 has been subscribed in Australia for war purposes.

SERIOUS FIRE AT POLSONS, TORONTO

Breaking out shortly after six o'clock last evening, a fire of unknown origin totally destroyed the pattern works and carpenter shop of the Polson Iron Works, at the foot of Sherbourne Street, doing damage which is estimated in the neighborhood of $200,000 by the president of the company, Colonel J. B. Miller. The loss is fully covered by insurance. The buildings were totally destroyed along with their contents, but the loss will not have a great effect upon the contracts of the company for ocean-going vessels. The cause of the fire is unknown.

LAKE SUPERIOR TO THE SEA

Advocacy of Ocean Steamship Highway—Winter Traffic for Lake Carriers

BY A. T. DRUMMOND, LL.D.

In *The Monetary Times* four years ago, in a discussion on the relative merits of the Georgian Bay-Ottawa River route from Lake Superior to Montreal, and that by way of the Welland Canal and the St. Lawrence River, I drew attention to the fact that with the inauguration of construction on the New Welland Canal, a carefully planned river and canal system between the foot of Lake Ontario and Montreal, with wide channels and a capacity in locks and depth of water commensurate with those features in that canal, must necessarily follow. Presently, vessels in length not exceeding about 250 feet and drawing not more than fourteen feet of water, can pass through the river channels and canals of this part of the St. Lawrence River, whilst the New Welland Canal, with its locks of 800 feet long, 80 feet wide, and carrying 30 feet of water on the sills, will admit of the largest cargo steamships on the Upper Lakes reaching Lake Ontario. Under the existing system, these great grain carriers, whose capacities for freight vary, but, in cases, are as high, this year, as 480,000 bushels, must continue to discharge at Kingston into barges, which will carry the grain to Montreal for retranshipment there into ocean steamships. There are certain advantages which the barges possess in that they can be easily handled in harbor, and that if the ocean liner is not ready for cargo, the grain can, at light expense, remain in the barge.

Toronto and Fort William, Ocean Ports.

These are, however, small matters compared with the importance of making it possible, through these river improvements, for Toronto, Buffalo, Cleveland, Detroit, Chicago, and other cities on the Great Lakes, and especially the grain shipping ports of Fort William and Duluth, to become ocean ports, accessible to ocean steamships of very considerable size; and, further, of enabling the lake carriers to reach Montreal, and, if of suitable construction, to themselves cross the Atlantic, and discharge their Fort William and Duluth grain cargoes at the docks of Liverpool, Glasgow, London and Bristol. The idea is not a dream, but both as an engineering and as a commercial proposition, is quite practicable, if the capital cost is at all within reason, and the canals are, as hitherto, free from tolls.

From the ocean vessel owner's point of view, questions to be considered would be the additional time involved in the round trip through the lakes and river, and whether the double freight rates arising from the combined ocean and lake voyages, outward and homeward, would be ample compensation. The probability is that passenger liners, which are bound down to schedule time, would still make Montreal their terminus, and that those lake carriers which from their build are not suitable for ocean traffic, will continue to tranship their cargoes for Europe at the same port, but British cargo steamers, especially of the tramp class, making the through voyage to the head of Lake Superor for grain cargoes for Europe, will be, without doubt, a common sight. Steamships ascend the Amazon River as far as Manaos towards one thousand miles from its mouth, but the great water highway of the St. Lawrence from the Straits of Belle Isle to Duluth would exceed two thousand miles in length.

New Importance for Toronto's Harbor.

The deepening and enlargement of the harbor at Toronto, undertaken almost simultaneously with the works on the New Welland Canal, in order to serve the needs of the large craft from the upper lakes, will, like that canal itself, serve another purpose of equal, or of even greater importance, of accommodating steamships from Great Britain and the continent, when, through the deepening of the St. Lawrence River above Montreal, these steamships can reach Lake Ontario. To transform Toronto, Fort William and other lake cities into ocean ports, is well worthy the ambition of the people of Ontario and the western provinces. Canada has this natural water highway, from the sea across one-half of the continent. Why should it not take advantage of it?

But more than this. A proposal that would make it possible for every large American city situated on the coasts of the Great Lakes, to become also a seaport, may well excite the imagination of our friends in the rich and populous bordering states to the south of us, where agriculture and manufacturing would be greatly stimulated by the large savings over the present railway freight rates on their products shipped to export points. It might well lead to Americans taking important interests in the loans issued for construction purposes, in view of the probability of their having, jointly with Canadians, the use of the route for their vessels for commercial objects.

The proposal also brings before them and us new solutions to problems in transportation, especially of western products. The wheat and other grains which passed eastwards through the Sault Ste. Marie Canals in 1916 amounted to 319,252,876 bushels, and the flour to 10,239,841 barrels, a part going to Ontario points and to Montreal for export, but much the larger share finding its way through Buffalo and the Erie Canal to the Eastern States, and to New York also for export. In both cases, the grain for Europe would undergo transhipment twice prior to the ocean voyage. It is quite conceivable that cargo steamships could profitably take through to Europe, without transhipment, much of this export grain presently shipped from Lake Superior ports, not only in quicker time than is now effected, but at rates perhaps even lower than the existing combined lake, canal and ocean rates, whether by way of Montreal or New York.

Winter Traffic for Lake Carriers.

These improvements in the St. Lawrence navigation would be of great service in two other important directions. Presently, with the approach of winter, the large grain carriers, many of which even now are in construction suitable for the ocean voyage, are dismantled and their crews paid off until the following spring. With an improved St. Lawrence, those vessels which are adapted to the work, could, on the close of the lake traffic, continue their business on the ocean, returning to the lakes in May, when navigation reopened there. This would mean continuous employment throughout the year for the vessel and for the seamen, and would lead to the construction of a type of vessel which could be adapted to both the lake and the ocean service. It would also probably mean that, with business no longer restricted to seven months in the year, vessels could be operated at a less average monthly cost, and that freight rates could be correspondingly lowered.

But the St. Lawrence improvements would have another important result. They would enable the shipbuilders at the Great Lakes' towns and cities to construct steamships of a large type, probably up to sixteen thousand tons carrying capacity, for the permanent ocean service. The iron ores of Lake Superior and the coal of Pennsylvania and other states, brought together, have furnished the basis for the operations of the great rolling mills and engineering works of Pittsburg, Buffalo, Cleveland and Chicago, which could with facility supply the construction material for the largest ocean passenger and cargo ships. Ontario is less favorably situated for iron shipbuilding, but when a process has been discovered to profitably smelt, either electrically or with imported coal, its vast stores of magnetite—and the government might well offer tempting inducements for this discovery—this province will also be in a position to economically produce ship's plates and other construction material for this purpose.

Surveys Needed to Ascertain Cost.

Many important engineering and commercial problems are involved in the carrying out of these improvements in the St. Lawrence River above Montreal, but a primary consideration must be that of so adapting the facilities, which nature has so amply furnished, that the time taken by the large ocean and lake craft in passing between Lake Ontario and Montreal will be the minimum possible. A careful investigation of all of the problems by competent engineers on behalf of the Canadian government is needed without delay, as the improvements will complete a general scheme of through, deep water navigation, from Lake Superior to the ocean, begun at the Sault Ste. Marie Canals, and now being continued in the new Welland Canal. The shallowness at points immediately above and below Gananoque, and the heavy work involved in excavation in the Laurentian floor of the Canadian channel there, may lead to the adoption of the American channel at the outlet of Lake Ontario into the river, but on the Canadian side farther down, there are, at places, depths of forty feet and more. The most important problems to be faced will be met between Prescott and the junction of the Ottawa River and the St. Lawrence.

They involve the shortening, widening and deepening of the canal system; the large reduction of the number of

164 St. James Street, MONTREAL

locks and their reconstruction to the new Welland Canal capacity; the increase, by dams across the river, and by dykes along the shore, of the general depth of the water; and the utilizing of the surplus water everywhere for power purposes; whilst throughout the river from Kingston to Montreal there must be secured a minimum depth, at all stages of the water, of at least twenty-five feet. Between the mouth of the Ottawa River and Montreal harbor, surveys have already been made in connection with the Georgian Bay—Ottawa Ship Canal scheme. Our desire is to retain the grandeur of Niagara Falls as a permanent asset of the country, but it seems inevitable that the scenic effects of the rapids of the St. Lawrence and the excitement enjoyed by the tourist in descending them, must be curtailed, if we are to attain the great purposes of uninterrupted navigation for large modern steamships between Lake Superior and the ocean, and utilize for industrial purposes the great powers which nature has provided.

FLOTATION PROCESS FOR ORE

Sir Clifford Sifton Refers to Dispute—Says Case Demands Prompt and Careful Examination

A method of concentrating ore, known as the flotation process, has come into great importance of late years, and an acute situation has arisen in Canada within the last few months with respect to the use of this process. Sir Clifford Sifton referred to this matter in an address at the recent annual meeting of the commission of conservation.

"The process has developed within late years to such an extent," he stated, "that it is said that over 100,000 tons of ore are treated every day in the United States by his process. It is becoming known in Canada and has been largely introduced. Undoubtedly, the process can be used much more extensively in Canada with great profit. A company, known as the Minerals Separation Company, claims to be entitled to all rights to this process, and it is said that this company is making exorbitant and unreasonable demands with respect to the use of the process.

"A Washington dispatch quotes the Journal of American Mining Congress as follows: 'It, that is the Minerals Separation Company, demands that its licensees shall give it the full benefit of any invention or discovery made by them which may be an improvement or modification or addition, and the right to patent such inventions for the company's own use, and further requires the licensees to bind their employees in the same way. Its licensees are also required to pay a royalty which, it is claimed, is computed in an entirely unsatisfactory way. It is claimed that the royalty which the company desired to collect from the Cobalt mines is in excess of the total revenue derived by the government from the taxation of these mines.'

Interfere with Production.

Apart from the legal and financial questions, under present circumstances, the claims which are being made undoubtedly tend to interfere with production of essential minerals, and, therefore, are a detriment to our operations in connection with the war. It is not my province to express an opinion in regard to the merits of the dispute which has arisen or the suggestion that the Minerals Separation Company has alien enemy affiliation, but I have no hesitation in saying that the whole case is one which demands prompt and careful examination by competent and unprejudiced authority on behalf of the government, in order that the situation may be satisfactorily cleared up.

"I am told that the Canadian patents of the Minerals Separation Company are all granted under section 44 of the patent act. An examination of this clause makes it quite clear that it, in connection with section 52, gives the government quite sufficient authority to take any action which may be determined to be at once just and in the public interest.

"When the question is dealt with it should not be dealt with simply from the standpoint of the Cobalt Mines. The question should be definitely settled in its application to the whole of Canada, so that the mining industry will know exactly where it stands with regard to this most important matter."

Mr. Louis A. Gosselin's subscription of $200,000 was the largest individual subscription from a French-Canadian.

COMPULSION MAY REDUCE FIRE WASTE

Recommendations of Commission of Conservation in Report to be Issued Shortly

That an extensive report on fire waste in Canada is now in the hands of the printers, and will be issued at an early date, was the statement made by Sir Clifford Sifton at the recent annual meeting of the commission of conservation. This report is the result of an investigation which occupied more than a year. Sir Clifford summarizes the conclusions of the report as follows:—

(1) Fire losses in Canada are chiefly due to (a) individual carelessness; (b) poor structural conditions; (c) arson. About 70 per cent. are believed to originate from the first cause.

(2) Fire losses can be materially reduced by attacking the problem at its source. Experience shows that by the enforcing of proper fire prevention and protection measures an immediate and enormous reduction in the fire loss can be made.

(3) It is clear that property owners in Canada are not sufficiently influenced by their own interests to use effective means, and compulsion must therefore be resorted to.

Compulsion is Necessary.

It has been shown that public efforts and propaganda without compulsion will not bring about any substantial improvement. Municipalities organize and maintain fire departments, and incur large expenditures for water supplies, but the results of these activities are disappointing. Fire waste not only continues but increases. Existing conditions in Canada point to the need of legislation on the following lines,—

(1) Proper planning and laying out of cities and towns with the object of restricting hazardous pursuits to certain delimited areas.

(2) Provision of adequate water supplies and fire-fighting facilities.

(3) Proper building requirements.

(4) Control of hazards and suppression of dangerous nuisances, close inspection and ruthless enforcement of regulations.

(5) A fire marshal law of the strictest character.

(6) Enforcement of personal liability, with heavy penalty where negligence is proven.

Losses are Increasing.

"It has been conclusively shown by the experience of England and other European countries," said Sir Clifford Sifton, "that proper measures of prevention have immediately beneficial effects, but in Canada we have not taken any such steps. Losses do not diminish. They increase. During the four years from 1912 to 1915, the average fire loss was $21,250,000 per annum. In 1916, the loss was $25,400,000. The 1916 figure will be exceeded during the present year. Fires are not gaining in frequency. The increased destruction is due to appreciation in values and to extensive fires.

"As an indication of the difference which exists in countries where proper precautions are taken, the total loss by fire in the whole of the United Kingdom, apart from fires caused by the enemy, amounted from August, 1914, to December, 1916, to $41,000,395. During the same period, losses in Canada, exclusive of forest fires, amounted to $52,027,000. These figures disclose a situation which calls for active and vigorous measures of prevention, and we shall continue to call attention to them until some steps are taken to apply a remedy."

GOOD LOAN RECORD FOR COCHRANE DISTRICT

The total subscriptions for the Victory Loan from the Cochrane district amount to $235,600, leaving out Iroquois Falls, for which place the number of subscribers is not yet available. The rest of the Cochrane district shows a total of 981, or one out of 3.72, with an average subscription of $189, which means that $51 has been subscribed on an average for each man, woman and child in this district. These figures are based on an estimated actual population of 3,600, and include, besides the town of Cochrane itself, the unorganized district along the Transcontinental Railway. Figuring the total population of Canada as 8,000,000, the result of the entire Dominion should show a total subscription of $408,000,000 to equal the result in the Cochrane district.

Experienced Service for Real Estate Owners

The proper management of Real Estate requires experience and close attention. The Real Estate Department of this Corporation is well equipped to give exceptional satisfaction to persons who wish to place the management of their property in competent hands. Owners of Western Real Estate can secure excellent service through our Western Branches.

Will Making

THE average human being is very much averse to making a Will; and yet it is absolutely necessary that it be done, if we would dispose of our Estate as we would wish, instead of leaving it to the disposition of the Law.

The making of a Will TODAY will not accelerate death a single instant, but rather tend to make us satisfied with an act timely and properly done.

The Corporate Executor is the only ideal Executor. Consult with us as to the making of your Will. Will Forms Free.

December . ..	38,256,947	30,878,028	24,056,797	....

Quebec, Que.—The borrowing powers of the city will probably exceed $1,500,000. It is proposed to increase from 6 to 7 per cent. the interest now charged by the city on tax arrears.

Montreal, Que.—The terms on which the Bank of Montreal has taken up the city's loan of $6,900,999, falling due on December 1st, were made last week. The city will sign a demand note for the amount of the advance made by the bank, and this note will carry interest at 6 per cent. per annum, payable monthly. At a later period, when market conditions are more favorable, the bank will handle the city's debentures to cover the amount. At a special meeting of the city council a project was presented for raising a temporary loan of $4,000,000 in anticipation of revenue for the purpose of carrying on the municipal business.

Montreal, Que.—Official figures, subject to further revision, supplied by Mayor Martin, on the property valuation for 1917, show an increase of $6,000,000 in the assessed valuation. But this is practically due to the annexed municipalities of Cartierville and Sault-au-Recollet, which appear in the rolls for the first time, now forming part of Ahuntsic-Bordeaux Ward. The valuation of this ward has gone up from $18,874,000 to $24,978,000 in consequence. There are other changes in different wards as well which have to be taken into consideration in forming an estimate. The increase of $6,000,000 will likely be further reduced by several millions by the revision in progress.

The total valuation of property in Montreal for 1917 as indicated by the city assessors is $824,630,229. The property exemptions amount to $206,931,108, which gives the assessed value at $617,699,121.

The net valuation of property for 1916 was $611 294,255. The property exemptions for last year amount to $205,124,326, and as the value of property exempted from taxation in 1917 amounts to $206,931,108, the increase under that head is $1,806,782.

Saskatchewan.—The following is a list of authorizations granted by the local government board from November 19th to 23rd, 1917:—

School Districts.—Lamb Hill, $2,000 10-years not ex. 8 per cent. instalment; Geo. Holmes, Wiwa Hill. Glentworth, $2,000 10-years not ex. 8 per cent. annuity; G. Fortnum, Glentworth. Garvelle, $3,700 10-years not ex. 8 per cent. instalment; Robt. Barrie, Cabri. Lens, $1,865 10-years not ex. 8 per cent. instalment; Peter Heinrich, Bickford.

Rural Telephone Companies.—Antelope Lake, $7,800 15-years not ex. 8 per cent. annuity; C. C. Williams, Antelope Lake. Blucher, $2,900 15-years not ex. 8 per cent. annuity; W. J. C. Hall, Blucher. Lloyd George, $5,400 15-years not ex. 8 per cent. annuity; Jos. Andrews, Colgate. Colgate, $1,600 5-years not ex. 8 per cent. annuity; George. Baker, Colgate.

The following is a list of debentures reported sold from November 19th to 23rd, 1917:—

School Districts.—Westland, $1,800; Goldman and Company, Regina.

Rural Telephone Companies.—Dublin, $4,600; O. L. McQuay, Regina. Wood End, $2,800, Meota, $1,800, Bounty, $9,000; Nay and James, Regina.

Saskatchewan.—The following is a list of authorizations granted by the local government board from November 12th to 16th, 1917.—

School Districts—Wideview, $2,000 10-years not ex. 8 per cent. annuity; Chas. Kretlow, Wideview.

Rural Telephone Companies.—Lorndale, $2,750 15-years not ex. 8 per cent. annuity; D. Woodard, Colgate. Moose Creek, $3,200 15-years not ex. 8 per cent. annuity; M. Hooper, Wordsworth. Lewiswyn, $3,800 15-years not ex. 8 per cent. annuity; J. S. Humphries, Raymore. Vawn, $11,300 15-years not ex. 8 per cent. annuity; W. B. Comerford, Vawn. Sceptre, $1,500 15-years not ex. 8 per cent. annuity; W. E. Gatenby, Sceptre. Senlac, $8,000 15-years not ex. 8 per cent. annuity; E. C. Hatley, Senlac.

Village.—Esterhazy, $1,000 10-years not ex. 8 per cent. instalment; V. Flook, Esterhazy.

The following is a list of debentures reported sold from November 12th to 16th, 1917 —

School Districts.—Kingsley, $1,600; Mary Evans, Broadview. Rolling Ridge, $2,000; Waterman-Waterbury Manufacturing Company.

Rural Telephone Companies.—Avon Hill, $6,400, Wurtzburg, $4,500; Wood, Gundy and Company, Saskatoon. Shell River, $9,900; Mrs. Shackelton, Prince Albert. McDonald Hills, $15,000; James Dalrymple, Cupar.

Saskatchewan.—Hon. Geo. Langley, minister of municipal affairs, in submitting the annual report for the year ended April 30th, says:—

The municipal prosperity referred to in the last report of this department has not diminished, but has rather increased at an accelerated rate during the past twelve months. This fact is demonstrated by the substantial cash surpluses shown by so many of our municipalities at the end of the last calendar year, and by a general clearing of debts and taxes hitherto not experienced during a similar period of the existence of the province

Debts are not now undertaken with that freedom from foreboding which characterized borrowing when real estate values were soaring and credit was so easy to secure. Comparatively few municipalities attempted to borrow by debenture during the past year, while temporary loans were usually brought down to a minimum. Our municipal councils, as a rule, soon fell in line with the policy of "thrift and economy," thereby observing the necessity of conserving resources for a time of stress which, it is feared, must follow close after the war.

The following cash balances, selected from a number of rural municipalities in different parts of the province, may prove of interest. Name of municipality, number and cash balance for December 31st, 1916, as in order below: Excel, 71, $12,309.66; Fillmore, 96, $15,225.62; Lac Pelletier, 107, $17,191.39; Lajord, 128, $15,088.12; Pense, 160, $18,278.79; Miry Creek, 229, $18,560.09; Fairview, 258, $19,309.23; Mariposa, 250, $18,145.83; Douglas, 436, $12,826.74; Eldon, 471, $12,551.08.

The average cash balance for each rural municipality is $7,500, according to the 1916 annual financial statements.

Notwithstanding obstacles thrown in the pathway of municipal progress by the decline of demand for real estate and the existence of a world-war, Saskatchewan's municipalities have almost altogether avoided financial hardships. It is true, as mentioned in a previous report, that there are three towns which had difficulty in meeting their debenture coupons and for which a rearrangement of their funded indebtedness was necessary, but, it may be repeated, no municipal institution in Saskatchewan has repudiated its debts nor shown an inclination to disregard its creditors. It speaks for Saskatchewan's stability as a province when it is recognized that out of six hundred and ninety municipalities only three are at present in actual difficulty, particularly so when the province came through an era of optimism which encouraged borrowing in every possible way.

Municipal life in the province is assisted by the existence of two associations known as the "Union of Saskatchewan Municipalities" and the "Saskatchewan Association of Rural Municipalities." As already intimated, the first is representative of cities, towns and villages, the latter of rural municipalities. These are made up of elected and appointed officials of our municipal institutions. Annual conventions are called, where municipal problems and legislation are discussed. The two organizations perform a real service for the province.

The incidence of taxation generally, but more particularly in our cities, towns and villages, is a subject that has

The Hamilton Provident and Loan Society

DIVIDEND No. 93

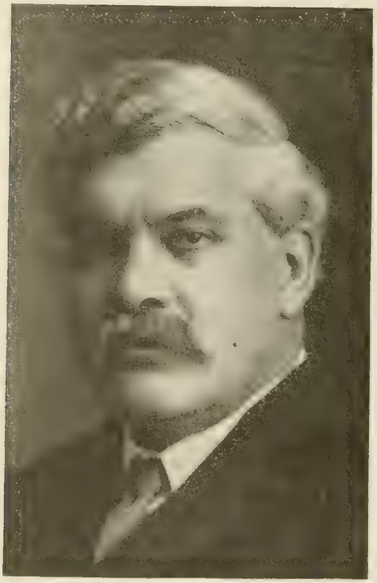
18-22 KING STREET EAST, TORONTO

engaged the attention of many prominent citizens of the province. Some of them claim that too much of the tax burden now falls upon the land. Herein is noted a marked change from a somewhat general attitude prevalent in the province for many years, for it is not so long ago that cities, towns and villages gave [illegible] a strong desire to levy taxes on land, exempting from taxation rates, so far as possible, individual thrift as found in buildings and structures which improve the property itself as well as the community as a whole. To meet the wishes of many taxpayers the government has entered into negotiations with a tax expert of continent-wide fame with a view to having him make a general survey of the incidence of taxation in our urban municipalities and to issue a report thereon. The expert to whom reference is made in this paragraph is Professor Robert Murray Haig, of Columbia University, New York. His findings, which should be issued in due course, will be read with more than ordinary interest.

In the seven cities of the province the percentage value of buildings and improvements on which taxes were levied in 1916 is as follows: Moose Jaw, 45 per cent.; North Battleford, 30 per cent.; Prince Albert, 15 per cent.; Regina, 30 per cent.; Saskatoon, 25 per cent.; Swift Current, 15 per cent.; Weyburn, 30 per cent.

CHAIRMAN, BRITISH COLUMBIA LOAN COMMITTEE

Mr. William Farrell is chairman of the British Columbia provincial committee, Victory Loan campaign. He is manager of the British Columbia Telephone Company, and has other interests in the province.



(The Monetary Times Photo.)

WILLIAM FARRELL, VANCOUVER,
Chairman, British Columbia Executive Committee, Victory Loan Campaign.

British Columbia made a splendid record in the Victory Loan campaign. Its per capita subscription was fourth among the provinces, despite the fact that it is sixth in the matter of population.

The New York Life Insurance Company which has subscribed $2,000,000 to the Victory Loan, had already invested since the war, $8,000,000 in Canadian securities, $18,000,000 in France and $15,000,000 in England, practically all in what may be called war loans.

MARYLAND ASSURANCE CORPORATION

Under the revised insurance law of the Dominion the Maryland Assurance Corporation intend to qualify for the accident and health business, and are taking steps to do so They expect their license will be issued as of January 1st, 1918, when they hope to begin the actual issuance of accident and health policies in the Dominion.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines during the month of November:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
November 7	$3,031,000	$3,204,000	+ $168,000
November 14	3,051,000	3,575,000	+ 524,000
November 21	2,984,000	3,565,000	+ 581,000
November 30	4,086,000	4,598,000	+ 512,000

Grand Trunk Railway.

	1916.	1917.	Inc. or dec.
November 7	$1,244,959	$1,287,185	+ $ 42,226
November 14	1,283,901	1,305,511	+ 21,610
November 21	1,202,291	1,266,711	+ 64,420
November 30	1,689,929	1,612,502	+ 77,427

Canadian Northern Railway.

	1916.	1917.	Inc. or dec.
November 7	$ 885,000	$ 895,400	+ $ 10,400
November 14	825,100	1,039,800	+ 214,700
November 21	853,000	931,700	+ 78,700
November 30	1,159,200	1,183,300	+ 24,100

The following is the Canadian Northern Railway statement of earnings and expenses for the month of October:—

	1917.	1916.	Increase.	Decrease.
Total gross earnings	$ 3,941,600	$ 3,716,800	$224,800	.
Operating expenses	3,350,500	2,496,500	854,000	......
Net earnings ...	591,100	1,220,300	......	$ 629,200
Aggregate gross earnings from July 1st	14,533,400	14,423,800	109,600	...
Aggregate net earnings from July 1st	2,515,100	4,222,300	..	1,707,200

Gross earnings of the Canadian Pacific Railway for October rose to a new high record mark for the year, standing at $14,733,774, comparing with the previous high for the year, established for May, when gross earnings were at $14,355,149. The October record is approximately $2,500,000 larger than were the September figures, when the gross stood at $12,244,341. Operating expenses for the current month amounted to $9,679,072, which was exceeded only during May. The operating costs of June and July run close to those of October at $9,671,073 and $9,617,853, respectively. Net earnings for the month amount to $5,054,701.

Canada holds the only large forests in the British Empire. Australia and New Zealand and South Africa have sacrificed most of their original timber to the fire fiend and ruthless exploitation. These facts emphasize Canada's strategic position as containing the only "woodpile" available to the Empire except those of Russia. Sixty per cent. of John Bull's huge timber demand is supplied by the Russian people to-day, for the British Isles provide only one log out of eight actually needed for home use. What part Canada's forests will play in British trade after the war is problematical, but there is no lack of prophets to predict that every square mile of growing timber will double in value under the strain of post-bellum demand from the devastated districts of Europe. Meanwhile Canadian governments can prepare to take full advantage of increasing timber values by thorough fire protection and scientific control of wasteful lumbering

Alberta Subscribed Over $14,000,000 to Victory Loan

THE accompanying chart, shows the large territory covered by the Southern Alberta general committee for the Victory Loan campaign. This section was under the chairmanship of Mr. W. Toole, of Toole, Peet and Company, financial agents, Calgary. The territory was divided into thirteen districts. A number of the general committee, designated as district deputies, were in charge of each district. The district deputies were carefully selected from the best business men in the community and they met with splendid receptions in travelling through the country. The names of the committees are also given in the chart. Mr. James Ramsey was chairman of the Northern Alberta committee, which also had Hon. C. R. Mitchell, provincial treasurer, as hon. chairman. Mr. Ramsey had the assistance of excellent committees and hard working canvassing teams which produced splendid results. In the province of Alberta there were 45,958 subscribers. They invested $14,110,200 in the loan, although the objective for the province was only $12,000,000. The total subscriptions in Alberta, based on the population given in the 1911 census, are $37.63 per capita.

The Sun Life's net surplus has more than doubled in the past six years, has more than trebled in the past eight years and has more than quadrupled in the past 11 years.

Bank of Montreal Receives Centenary Balance Sheet

Annual Meeting Also Marked Completion of Fifty Years of Uninterrupted Services in the Bank by Sir Vincent Meredith, Bart.—Sir Frederick Williams-Taylor Draws Attention to the Developments That Have Had Special Effect on Canada's Economic Position During the Past Year—Tribute to Men Overseas.

The 100th Annual Meeting of the Bank of Montreal proved one of the outstanding historical events in the long career of the Bank.

The reports presented indicated that the Bank is in a stronger position to-day than perhaps it has ever been.

Coupled with the celebration of the 100th anniversary was the completion of fifty years of uninterrupted service in the Bank by Sir Vincent Meredith, the President.

The high esteem in which Sir Vincent is held by the shareholders was manifested by warm tributes made to him by the shareholders present.

Mr. Nelles, one of the oldest shareholders, in drawing attention to the 100th anniversary, referred particularly to the stalwarts of to-day at the head of the Bank, mentioning particularly Sir Vincent Meredith, R. B. Angus, and Lord Shaughnessy, and hoped that when the history of another 100 years was ended that they would be included among the stalwarts.

Sir Frederick Williams-Taylor referred particularly to the great number of men the Bank had already sent overseas and made the statement that at the present time 42% of the staff of the Bank were women clerks.

The members of the staff overseas have established a most honorable record and in conclusion Sir Frederick referred particularly to the great loss both the Bank and Canada had sustained through the death overseas of Captain David Jellett Barker, who had been assistant to the General Manager of the Bank. His loss had been a deplorable one.

The annual meeting of the Bank of Montreal always attracts a good deal of interest owing to the important announcements made at it regarding commercial and trade conditions in Canada. This should be particularly so this year, as it is recognized that the Dominion has been thrown on its own resources almost entirely as the result of the developments in connection with the European war.

Owing to the 100th anniversary, Sir Vincent Meredith, the president, drew attention to some of the features of expansion the Bank had enjoyed, and expressed the view that he was warranted in stating, that never during the Bank's long course was its prestige higher, its business in sounder or more elastic condition, and its earning power greater than he believed them to be to-day. He also expressed pleasure in believing that the Bank had never enjoyed a wider measure of public confidence.

BUSINESS CONDITIONS IN CANADA.

Sir Vincent referred particularly to the general conditions in the country, stating that business conditions in Canada continued buoyant.

ABNORMAL TRADE ACTIVITY.

The large expenditures by our own Government in providing munitions and foodstuffs for Great Britain and our Allies, supplemented by the Mother Country's expenditures and the unexpectedly large orders which have recently been placed in Canada by the United States Government, all point to a continuance of prosperity and high prices, but it must not be forgotten that the prosperity we are enjoying is in a large measure due to the abnormal disbursements in Canada in connection with the war, and may, therefore, prove transitory. The funds which make possible these expenditures are largely obtained from British and Canadian Government borrowing and constitute an obligation which one day must be provided for. What will happen if these expenditures are curtailed, or when peace is declared, no one can foretell. Personally, I am hopeful of prosperous business conditions being continued for some time during the readjustment period after the war.

In this connection, the desirability of the extension of Canadian trade in all directions during the period of post-bellum reconstruction, either through Commercial Intelligence Agents acting directly for the Government, or a Board approved by the Government, should not be lost sight of.

Since I last addressed you, the scourge of war has continued with unabated violence. The number of belligerents has increased; fortunately, they are all accessions to the side of the Allies.

The entry of the United States into the conflict, though tardy, is whole-souled, and with their enormous recources in men and money, which are being given generously and unhesitatingly to the Allies, cannot but be an important factor in bringing the war to a speedy and successful conclusion.

No one can tell how long the war will last. The imperative need, therefore, for efficiency and increased production, together with economies in all public and private expenditure, is obvious and cannot be repeated too often or urged too strongly.

The unbounded prosperity of Canada, to which I referred a year ago, is fully reflected by the abnormal trade figures.

In the seven months to October 31st last, the aggregate value of imports and exports was $1,586,616,000, or $273,000,000 more than in the corresponding period of the preceding year. Eliminating the item of coin and bullion, as well as that of foreign produce in transit through Canada, our foreign trade was $1,550,000,000 for the period as compared with $1,084,000,000 last year, an increase of fifty per cent.

HEAVY EXPORT BUSINESS.

In point of value our trade has never been so great as now, and in point of volume has never been exceeded. We are sending abroad more of agricultural products, both of animals and the soil, but the striking factor in exports continues to be manufactures, of which we shipped in the seven months to the value of $420,380,000 as against $219,450,000 in the like period a year ago.

It is well to remember, however, that nearly one-half of this export trade consists of munitions of war, and is therefore to that extent unstable.

I may further point out that the balance of trade continues favorable. Imports of merchandise during the seven months amounted to $628,100,000 and exports of domestic products to $921,957,000, giving a favorable balance of nearly $300,000,000.

A continuance of this progress depends in great degree on increased immigration of a satisfactory class. While no large influx can be expected under existing conditions, all the avenues from Great Britain and Europe being closed, the Government returns indicate that Canada is still attracting from the United States a very considerable number of desirable settlers, no fewer than 33,134 having crossed into the Northwest during the first ten months of the year, being double the number of last year. Indications point to a continuance of this immigration and to a largely increased demand for farm lands.

The results of the harvest have been on the whole satisfactory, the yield being about equal to that of last year. Wheat, the most valuable of our grain crops, produced 250,000,000 bushels, of which one-half was grown in the Province of Saskatchewan, while the yield of oats, barley and rye was substantially larger than in 1916.

The high prices prevailing for all farm products have enabled many farmers to reduce, where they have not paid off, mortages, and to become depositors instead of borrowers. In money value, at present market prices, the season's grain crops will exceed $900,000,000, conservatively estimated. The exportable surplus of wheat, or its equivalent in flour, will reach 150,000,000 bushels, an item of importance when the requirements of Great Britain and her allies are considered.

The dairying industry has been well sustained, the production of cheese, butter and milk having been marketed at unprecedentedly high prices throughout the season.

TRANSPORTATION PROBLEMS.

The railway situation is a matter of some concern in its bearing upon the trade as well as the credit of Canada. While the gross earnings of the roads have, with few exceptions, shown gains from week to week, the greatly increased cost of operation, due to higher wages and materials, has caused a diminution in net earnings and here, as in the United States, the railways have sought authority to raise rates so as to meet in part at least the augmented charges.

The whole commerce and prosperity of the people are so intimately dependent upon efficient railway service that this request appears reasonable and should, in my opinion, receive a sympathetic response. The two newer transcontinental roads have been unable to meet their obligations, for reasons with which you are familiar, and the Government has decided to take over the operation of the Canadian Northern, with its attendant obligations, and a similar procedure in respect of the Grand Trunk Pacific has been under discussion. The immediate burden thus imposed on the country is considerable, but we must hope that with the restoration of normal conditions and a revival of immigration on a large scale, the situation will improve materially.

In Great Britain trade is good and the banking situation is sound, in spite of the large amounts being invested in War Loans.

The outstanding event of the year as affecting financial London has been the entry of the United States into the war on the side of the Allies, whereby large sums are being placed at the disposal of Great Britain and her allies for the purpose of purchasing foodstuffs and raw materials, as well as munitions in the United States. These purchases, it is believed, will have a direct favorable bearing on the American exchange situation and afford relief, if not a solution, of a long unsolved and difficult problem.

Another important event has been the unqualified success of the Great War Loan, a sum of no less than two thousand million pounds sterling having been subscribed, of which nearly one-half was fresh money.

General trade in the United States, as in Canada, is active and prosperous. Large crops and high prices have undoubtedly created an enormous buying power throughout the West and South, and stocks of commodities, as a rule, in first hands, are light.

The situation in regard to labor is not satisfactory, and it is not probable that conditions in that respect will improve while the great demand for help remains unsatisfied.

GROWING PUBLIC DEBT.

The net public debt of Canada has assumed large proportions, now amounting to $948,000,000, exclusive of guarantees, and is growing at the rate of $1,000,000 daily. Large as these figures are, they must continue to grow while the war endures, and some concern is being shown as to how they are to be provided for.

The recent Victory Loan, so splendidly taken up by all classes of the people, should suffice, with the surplus on consolidated revenue account, to meet the financial requirements of the Government until well on to the end of next year, before which time many things may happen. What is now imperatively required is that no unwise expenditures be made, no new financial obligations undertaken, and that the burden of taxation be distributed equitably.

Whether our debt is to be included in a huge Allied funding operation, or we provide for it by funding our own liabilities, is a matter that need not concern us at the moment.

Our country is one of the most productive in the world. Our gold holdings per capita almost equal those of the United States. Our natural resources are unbounded and our credit is irreproachable. There are no doubt difficulties and anxieties ahead which we shall still have to face, but I think we may look forward with confidence to providing without undue strain for the burden of our patriotic endeavor.

THE GENERAL MANAGER'S ADDRESS.

Sir Frederick Williams-Taylor, the General Manager of the Bank, then made his annual address, as follows:—

Mr. Chairman and Gentlemen:—I feel it a great privilege to present to-day for your approval the centenary balance sheet of the Bank of Montreal.

Coincident with this anniversary, our President, Sir Vincent Meredith, has completed fifty years of uninterrupted service in this Bank, and it is fitting that we should extend to both our heartiest congratulations.

As the President has dealt with the banking and financial situation in general terms, my preliminary remarks will be confined to specific incidents and influences bearing upon the business of your Bank.

Above all other events the entry of the United States of America into the war stands paramount and bears upon the Canadian economic and banking position with a force the effect of which is only now commencing to be felt.

Shortly after the outbreak of war, Wall Street, as everyone knows, took the place of the London market for our country's public loans, and continued in that place until a few months ago. Now the influx of American capital is scanty, the inflow of borrowed money from the United States—which we had come to look upon as a matter of course—is suspended, it may be until the end of the war; and Canada is "on her own."

In other words, little money is coming into Canada except in payment of exports, and therefore, for the first time since Confederation the Dominion is cast upon her own financial resources.

By some this will be regarded too seriously, by others not seriously enough. Actually, the stoppage will have far-reaching consequences. On the one hand, industrial development will be checked, but, on the other hand, the inability to borrow may prove a blessing in disguise, once we have adjusted our affairs to the changed conditions. It is surely well for us to learn to do without financial assistance, especially as the country at large already has a debt abroad the interest on which runs into the great sum of about $500,000 per day. So long as the stream of money flowing into the country was uninterrupted, it was difficult, if not impossible, for our people to see the necessity for economy. Personal extravagance is still conspicuous in many directions, but presently economy will become general—from high motives, we hope; if not, then from stern necessity.

It is true that the development of Canada could never have reached its present stage but for moneys borrowed abroad and, therefore, Canada is grateful, first, to Great Britain, and secondly to the United States, for the help they have thus contributed to the remarkable progress which our country has made, particularly during the past twenty years.

It is, however, equally true that our misuse of borrowed money is in great measure responsible for some of the chief evils that have come upon us. I refer especially to the inflation which before the war started the increase in the cost of living, and to the creation of debt unrepresented by productive investment. Now that the inflow of money is suspended, we must pull ourselves together, practise economy, till the soil, produce to a greater extent the manufactured goods we require for our own use, until in the fullness of time we emerge a wiser and a better people in a sounder economic position.

Having learned our lesson, this is clearly no time for us to brood over the errors of the past score of years, but rather to take stock of our resources and with stout hearts to set about the work of conservation and rehabilitation.

At the beginning of this Armageddon, England admittedly made mistakes that would have demoralized any other nation. These mistakes have been corrected, until to-day the British Empire has an army in the field whose equal in combined morale, size, equipment, organization, tenacity of purpose and fighting qualities, the world has never known. Canada has played no inconspicuous part in this re-creation, and we shall be equally successful in recovering our economic balance.

We are the fortunate possessors of a splendid, healthful and beautiful country, abounding in natural wealth; and, what is equally important, we can properly claim to be a virile, industrious, and ambitious people.

LONDON.

In London, where we continue to employ important balances at call, the interest returns have been continuously favorable, though our profits at this point have been diminished by a burden of taxation that may increase.

Our Waterloo Place Branch, which has been of such invaluable assistance to our overseas soldiers and their relatives, has become inadequate for the business offered, and we have been compelled to establish another branch office in the West End, chiefly for the convenience of our military clientele. Suitable quarters have been secured at Cockspur Street, Trafalgar Square, and will be maintained until the war ceases and our Canadian troops are withdrawn from Europe.

UNITED STATES.

During the past twelve months rates in New York for call money have covered a fairly wide range. The average interest rate was 3.24 per cent., as compared with 2.30 per cent. for the previous twelve months. The existing demand for money has a favorable influence on our earning power in that market, but, as in London, we must pay tribute by way of taxation on a rising scale.

As indicated elsewhere, the immediate need of the United States Government for money to carry on the war now precludes Canadian borrowers from financing their requirements in that country. In the early part of the year it was otherwise, and during the twelve months under review sales of Canadian securities in the United States were $152,000,000, compared with $153,000,000 for the previous year. The former amount includes the $100,000,000 Dominion Government loan floated in July last on terms which then seemed high, but have at no time since been obtainable. Of this money $20,000,000 was required for refunding purposes. It is indicative of Canada's preferential standing in the American market that during the past six months no other foreign Government has floated a public loan in the United States.

For the first time in many years, the automatic flow of funds between Canada and the United States recently became hampered by the dollar exchange situation that arose in consequence of the prohibition of exports of gold by the United States. As New York is the international clearing house of Canada on this Continent, the free movement of gold is essential to stabilize exchange.

Fortunately the American Government were quick to recognize the logic of the arguments the Canadian Bankers' Association were able to present to them, and the disadvantages to free trading that would follow unless this condition was rectified, and promptly relieved the situation by modifying their embargo on gold shipments in favor of Canada. Due partly to this wise action, exchange has since become normal, obviating the necessity of gold importations.

PROFITS.

In times like these, when the fate of Empires is at stake, full satisfaction from monetary profits alone is impossible. As, however, the business of the nation must proceed, and the strength of financial institutions be maintained in order that the war be more quickly won, it has doubtless gratified you to learn that the Bank made substantial profits during the past year.

The abnormal prosperity of the community as a result of the production of war supplies still continues, helped materially by munition orders from the United States; but profits thereon are smaller, and we know that Great Britain's ability to buy from us is limited by our ability to finance her purchases. Our wheat output is the outstanding exception.

The balance of trade in Canada's favor created by munition exports is opportune and adds permanently to our national wealth, but as the available resources of Canada are not such as we can rely upon to provide peace exports in full substitution, we should stand prepared to meet the declension in trade which must start when the war is over.

Before the war is ended Canada may have to cope with inability or unwillingness on the part of potential purchasers to provide payment for our surplus productions. Moreover, on the conclusion of peace our merchants and manufacturers may be confronted both by diminished demand and falling markets.

For these reasons good banking profits are needed. I do not hesitate to state that there has never been a time in Canada when banking credits, in my opinion, required such careful consideration. It is impossible to gauge the business future, and, therefore, what seems like sound banking business to-day may, under post-war conditions, easily develop into lock-up or doubtful loans.

QUICK ASSETS.

Thanks mainly to the soundness of our banking system and to the healthy condition of our banks, Canada can still hold up her financial head. Our own Bank's ratio of quick assets to liabilities is 75½ per cent. compared with 75 per cent. a year ago and 64 per cent. the preceding year.

We have heard it remarked by certain friends that the Canadian Banks are too strong, and your own Bank particularly so, but permit me to express my clear conviction that the sheet anchor of our Canadian national ship is the Canadian Banks and that the anchor must be strong to hold against wind and tide. The Banks have kept strong in an endeavor to prevent currency inflation, while, at the same time, they have made war advances to the Canadian and Imperial Governments to an amount that would have been regarded as impossible three years ago. Such advances are naturally included among liquid assets. The loans made by the Banks to the Canadian and Imperial Governments have enabled the business of the country to be carried on to an extent otherwise impracticable.

The great London Clearing Banks have increased their holding of Government securities from 12 per cent. of their deposits before the war to about 40 per cent. at present. This compares with a trifling pre-war percentage and a present percentage of 20 per cent. held by Canadian Banks. As Canada has no bill market or other market for these securities, our percentage compares favorably with theirs. Canadian Banks can rediscount only with our Government, and such operations involve inflation of currency. For your information I may state that 22 per cent. of the liquid resources of this Bank are represented by British and Canadian Government securities.

TRIBUTE TO STAFF AND MEN OVERSEAS.

Sir Frederick Williams-Taylor in responding to the vote of thanks to the management and staff took occasion to pay a special tribute to the services of the men at home and to the record of the members of the staff overseas, saying:—

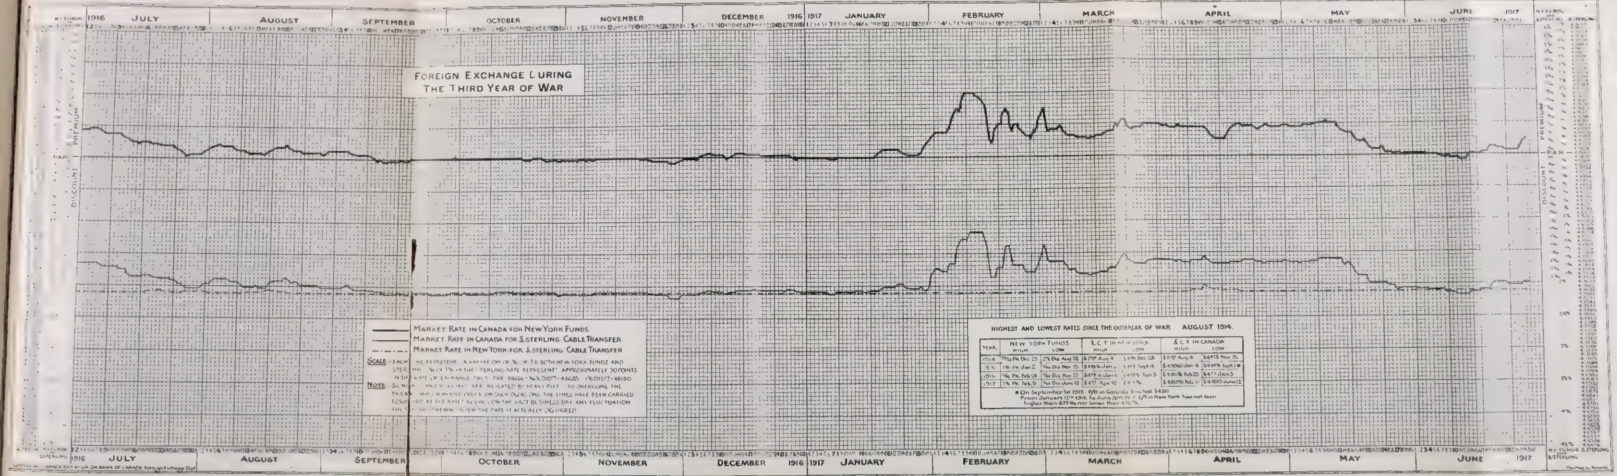
As an indication of the extent to which our male officials enlisted, I may mention that 42% of our present staff are women clerks.

Both our men and women clerks have worked ungrudgingly early and late, with but the briefest holidays, actuated by a high sense of patriotism and by an admirable sense of duty to our Bank. It may truly be said that we enter this, the second century of our institution, with a staff whose loyalty has never been surpassed, not only in our history, but in the history of business corporations in this country.

As for our splendid contingent with the colors, they are above praise. We follow their future in France with anxious pride, and will welcome them back when the war is won. Many have been wounded. No less than 100 lie under the reeking sod of shattered Flanders. The names of these splendid patriots will stand forever both in the records of our Bank and of our Empire, which they have served so well. It would be remiss not to refer to the great loss we have sustained in the recent death at the front of Captain David Jellett Barker. I can find no words with which to express my personal regret, while to the Bank and his country the untimely closing of a career such as his is deplorable indeed.

FOREIGN EXCHANGE DURING THE THIRD YEAR OF THE WAR

(Compiled for The Monetary Times by E. M. Dawson, Manager, Foreign Exchange Department, Union Bank of Canada).



HIGHEST AND LOWEST RATES SINCE THE OUTBREAK OF WAR AUGUST 1914.

What Will Happen to Business if We "QUIT"?

BUSINESS MEN!—stop and think! If we quit the war—and that is where Laurier and Bourassa lead—we simply invite ruin financially. The civilized world would stamp us with the same brand as Russia!

Foreign credit would suffer and internationally we would become a cipher—a nation without honor. And make no mistake, A Referendum means ***quitting.***

SUPPORT UNION GOVERNMENT

Today we are dependent on the United States for such essential supplies as cotton, hard coal, tin plate, the largest proportion of our iron, steel, brass, copper, and other commodities. The United States admires Canada's stand so far and facilitates exports to this country. Imagine how quickly she would reverse her attitude if Canada failed to continue her effort in the war.

To Quit Would Set the Country Back Fifty Years

Be guided by the fact that the United States is now refusing to send supplies to Russia. Why? Would Great Britain send us any more war orders? Remember the part munition-making has played in Canada's commercial prosperity since the war began. Think of the Victory Loan and how a large part of the proceeds were destined to finance British war orders.

Does any sane business man believe that if Canada refused to do her duty and send the necessary reinforcements to support our men in France, that Great Britain and our Allies would be disposed to continue to place orders for munitions in Canada?

Aside from the national honor, and the call of our men for reinforcements, which are the main reasons why Union Government must be returned, the commercial future of the Dominion demands Canada's continued participation in the war.

Unionist Party Publicity Committee.

ONTARIO'S VICTORY LOAN RECORD

Old Province Subscribed Over $200,000,000 or $73 Per Capita

The province of Ontario, with some returns yet to be made, subscribed $201,555,500 to the Victory Loan. There were 303,866 investors. Taking the highest official estimate of population, this is equal to a subscription of $73 for every man, woman and child in the province. Mr. G. H. Wood, chairman of the provincial executive, announced the preliminary totals for the province at Toronto on Monday. On Tuesday, the total was $201,555,500.

The details of the sales in Ontario, which are as yet incomplete, are as follows:—

	December 3.	Total to December 3.
Toronto	$13,286,350	$76,256,300
Hamilton and London Division—		
Hamilton	$ 2,651,250	$12,623,800
Wentworth	366,000	2,212,900
London	883,050	6,505,600
Middlesex	358,400	2,075,450
Total		$23,417,750
Ottawa and Welland Division—		
Ottawa	$ 1,114,850	$10,111,450
Carleton	129,300	867,000
Renfrew	....	1,241,700
Prescott	64,800	404,650
Russell	30,800	164,000
Total		$12,788,800
Southern Division—		
Lambton	$ 490,400	$ 2,525,000
Kent	500,000	2,500,000
Essex	491,150	4,905,150
Elgin	482,750	2,063,650
Norfolk	235,000	1,060,000
Lincoln	300,100	3,005,450
Haldimand	265,900	1,075,000
Welland	2,054,250	4,743,500
Total		$21,877,750
Western Division—		
Bruce	$ 386,500	$ 1,783,700
Huron	346,400	2,483,250
Perth	319,550	2,150,000
Oxford	1,006,450	2,800,000
North Waterloo	275,300	4,897,100
South Waterloo	232,000	1,939,900
Wellington	769,050	2,608,200
Brant	838,550	3,545,000
Total		$22,207,150
Central Division—		
Grey	$ 377,100	$ 2,400,000
Dufferin	179,200	769,750
Simcoe	1,119,200	4,002,650
Halton	279,750	1,399,050
Peel	210,000	1,237,250
York	557,300	2,907,750
Ontario	346,500	1,702,400
Victoria-Haliburton	234,700	1,260,000
Total		$15,678,850
Eastern Division—		
Durham	$ 219,450	$ 1,388,700
Peterboro	289,000	1,681,000
Hastings	265,200	2,206,250
Prince Edward	221,600	1,103,450
Lennox-Addington	153,400	1,020,050
Frontenac	413,750	2,569,150
Lanark	425,050	1,773,450
Leeds and Grenville	450,000	3,050,000
Dundas, Stormont and Glengarry	417,800	2,217,000
Northumberland	172,500	1,403,550
Total		$18,412,600
Northern Division—		
Muskoka	$ 70,000	$ 441,300
Parry Sound	212,450	933,850
Timmins	562,100	739,450
Cochrane	40,550	235,600
Nipissing	110,650	633,850
Timiskaming	[illegible]	1,027,600
Algoma	475,000	1,500,000
Sudbury	488,800	1,500,000
Kenora	96,350	424,100
Port Arthur	145,750	782,100
Fort William	200,100	1,257,350
Rainy River	142,200	310,400
Total		$ 9,785,600
Grand total	$37,033,150	$200,424,800

Messages From Province.

Among the messages of congratulation received from Ontario points were the following:—

Mr. R. Meek, chairman Frontenac County committee: "Frontenac has been true to its name and history and the Victory Loan. Ours has been a glorious campaign. Nothing like it was ever experienced here in the way of consolidating the classes and calling out their more enthusiastic service. Results to-night call for the Doxology and Rule Britannia as best expressing the minds and hearts of a loyal and grateful people."

Mayor Murphy and the chairman of the Fort William committee extended heartiest congratulations. Fort William has a record of a bond for every 5½ people and a $70 per capita subscription.

Welland wired that they would show better than one in five subscribers. "Welland is determined to remain in front rank in all patriotic efforts. Congratulations to Toronto and old Ontario on the splendid results."

Inspiration to Canada.

Mr. G. W. McLaughlin, Oshawa, wired Mr. Wood: "The untiring, unselfish, intelligent lead in the campaign given by your good city has been an inspiration to all Canada, especially Ontario."

Mr. A. K. Bunnell, Brantford: "The magnificent result of the Victory Loan campaign is largely attributable to the organization having been the first to mobilize the savings and the future earnings of the masses as a "win-the-war" force and as a financial support to the continued prosperity of the country."

Mr. Geo. C. Coppley, Hamilton: "This loan is a national success beyond our dreams. Hamilton congratulates Toronto upon her splendid achievement and Ontario upon its wonderful organization and result. You may count upon Hamilton every time to go over the top with Toronto."

CONDITIONS GOOD IN SASKATOON

"Business in Saskatoon and the surrounding district has shown a decided improvement in every line during this year," said Mr. W. B. Kemp to *The Monetary Times* recently. "Considerable improvements have been made on old buildings, while buildings which were commenced in 1912 and 1913 are now being completed as their space is in demand. One hotel which has been closed for some time, has been remodelled as an apartment block and the entire space has already been requisitioned by tenants. Another large hotel is about to undergo similar alterations. A number of houses, formerly on the outskirts of the city, have been moved in, placed on sewer and water services and made modern. There have been several new buildings of high-class construction erected here this summer. Wholesalers and retailers report an excellent increase in their business, while our bank clearings show an increase over 1916. The crops in this district were somewhat patchy, but on the average were good. On the whole this city and district have enjoyed a successful year."

The finance minister specially desires to thank the several provincial governments, who, through their prime ministers and treasurers, have taken such an active part in assisting in making the Victory Loan a success, also to the various municipalities who have assisted by investing their sinking funds.

NEW INCORPORATIONS

Weekly List of Companies Which Have Obtained Charters

The largest company incorporated last week was the Indian Trail Mines, Limited, (no personal liability), Toronto, $1,000,000.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of the paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Nanaimo, B.C.—Straits Fish Company, Limited, $40,000.

Penticton, B.C.—H. B. Morley & Company, Limited, $20,000.

Victoria, B.C.—Sooke Harbor Fishing and Packing Company, Limited, $50,000.

Edmonton, Alta.—Gillespie Elevator Company, Limited. J. Gillespie, M. Gillespie, H. Jackman.

Hamilton, Ont.—Hop-Malt Company, Limited, $40,000. J. E. Day, J. M. Ferguson, J. P. Walsh.

Quebec, Que.—Gauvreau, Beaudry, Limitée, $750,000. J. A. Lefrancois, O. E. Gauvreau, J. E. Beaudry.

Ottawa, Ont.—Ottawa Paper Box Company, Limited, $150,000. A. C. Fleming, W. S. Mackenzie, J. E. McVeigh.

Ville Laval de Montreal, Que.—Laval Chemical Company, Limited, $100,000. C. E. Laurion, J. C. V. Roy, J. A. Guy.

Iona Station, Ont.—The Southwold and Dunwich Telephone Association, Limited, $6,720. W. H. Morrison, W. R. Pollard, J. H. Sells.

Wilberforce, Ont.—Paudash Lake Molybdenite Mines, Limited, (no personal liability), $150,000. M. A. Boyd, D. A. McCrimmon, G. A. Sullivan.

Toronto, Ont.—The Indian Trail Mines, Limited, (no personal liability), $1,000,000. U. J. Mangan, P. J. Burns, W. Nash; W. A. Stone & Company, Limited, $25,000. G. H. Bortz, W. A. Stone, E. P. Seon; Canadian Adjustment Bureau, Limited, $40,000. J. P. Walsh, C. J. McLaughlin, H. R. Armstrong.

Montreal, Que.—West End Garage, Limited, $49,500. P. Bercovitch, E. Lafontaine, N. Gordon; Colborn & Company, Limited, $20,000. H. F. Colborn, G. L. Alexander, J. Jenkins; Jas. A. Ogilvy's, Limited, $750,000. E. Day, J. P. Walsh, C. J. McLaughlin; Was Mop Company, Limited, $35,000. W. W. Skinner, W. G. Pugsley G. G. Hyde; Eagle Smelting and Refining Works, Limited, $40,000; P. Bercovitch, E. Lafontaine, N. Gordon.

Vancouver, B.C.—The Malkin-Pearson Company, Limited, $100,000; Premier Lumber Company, Limited, $10,000; People's Theatre Company, Limited, $10,000; Aeroplane Spruce Lumber Company, Limited, $25,000; National Fish Company, Limited, $10,000; British Columbia Electro Metals, Limited, $100,000; Canadian Feeds & Fertilizers Company, Limited, $10,000; Caledonia Realty, Limited, $25,000; the Hall Match Company, Limited, $9,000; British Japanese Trading Company, Limited, $25,000; Wootten-McConnan, Limited, $10,000.

TORONTO'S LOAN RESULTS

Mr. J. W. Mitchell, chairman of the Toronto central executive committee, Victory Loan campaign, announced at a Toronto meeting on Monday, the official returns for Toronto as 126,390 subscribers, for a total of $76,256,315. The result gave Toronto an average of 1 subscriber for approximately every 3½ of the population, and a subscription of $160 for every man, woman and child in the city. Mr. Mitchell believed that no other city in Canada could surpass Toronto's per capita record. He concluded by returning his thanks to everyone associated with him during the campaign. "What Canada has done for the Victory Loan will give a greater feeling of pride of country in the hearts of the boys overseas," said Mr. Mitchell.

The last bond sold in Toronto was secured at 12.30 Sunday morning by a member of Thos. Rennie's division, who sold Mr. A. D. Fisher a bond for $5,000

DIRECTORY OF NATURAL RESOURCES

The first comprehensive and authoritative directory of Canada's natural resources is to be published without delay by the commission of conservation. Sir Clifford Sifton, the chairman, gave the first intimation of this at the annual meeting of the commission last week and the details respecting the mammoth undertaking are now made public. The task was begun in 1910 as being fundamental to the work with which parliament expressly charged the commission—viz., to consider all questions relating to the conservation and better utilization of the natural resources of Canada and to "make inventories, collect and disseminate such information." The inventories will be arranged and published geographically, provinces having similar or identic resources being grouped together. One division, for instance, will cover the Maritime Provinces, another the Prairie Provinces, another Ontario, etc.

The securing of this information was a heavy task. Some of it was obtained from unpublished government documents that had lain dormant for years, some from the study of numerous reports, many of which are now out of print, while much of it, hitherto unavailable, was secured by the commission's field parties, who underwent considerable hardship and danger in little-known regions; an engineer, in one instance barely escaping with his life when his canoe upset and was carried down the rapids, while he was gauging a water power in northwestern Canada.

The information now to be published will be of the utmost importance in the solution of after-the-war problems, in the utilization of natural resources and in ensuring the enactment of intelligent legislation regarding them. Its publication will mark another stage in the valuable work the commission of conservation is carrying on.

RECOLLECTIONS OF VISCOUNT MORLEY

The "Recollections" of Viscount Morley, which have just appeared in two volumes, constitute one of the most notable works of these times. "Honest John" Morley's fame as a biographer has been well earned. His record of the lives of Cobden and Gladstone and his studies, particularly of Voltaire, Rousseau, Burke and Diderot, have marked him as a distinguished man of letters. In his present volume he records the recollections and reflections of his own remarkable career. The incidents and movements of the past half century are described by one who played an unusually prominent part in them. Those foremost in literature and politics are pictured by the familiar of the greatest of them.

He tells of his association with W. T. Stead in the preparation of Gladstone's biography; of his visit to Stead in Holloway prison; of the help of Blake, "a prominent lawyer and politician from Canada," with the Home Rule Bill in 1893; of events connected with the Boer war, the Franco-Prussian war and the American civil war; of Booker Washington's visit to Skibo Castle; of the influence of Charles Dickens; of Bismarck as a fellow-traveller; of the value of after-dinner conversations; of the "strain of management" of the House of Commons compared with Congress at Washington; and so on.

One of the most interesting references is to William II., German emperor. Viscount Morley records the emperor's visits to England, discusses his personality and his talk as to peace. Morley's general impressions of the Kaiser's visit to England in 1911 are also noted. His pen-picture of that crowned criminal is striking. Writing in his diary on July 9th, 1891, he says of Kaiser William: "Energy, rapidity, restlessness in every movement, from his short, quick inclinations of the head to the planting of the foot. But I should be disposed strongly to doubt whether it is all sound, steady, and the result of a—what Herbert Spencer would call—rightly co-ordinated organization."

Morley's "Recollections" contain a wealth of historical anecdote, intimate sketches of celebrities, dry humor, the philosophy of a far-seeing statesman. It is a work which will be found on the bookshelves of all those who claim to have a real library. Substantially bound, enclosed in a neat cardboard case, the two volumes will make an ideal Christmas gift.

"Recollections," by John, Viscount Morley, O.M. Published by the Macmillan Company of Canada, St. Martin's House, Bond Street, Toronto; in two volumes, 770 pages, completely indexed. Price, $7.50.

ADVANTAGES OF PAR OF EXCHANGE

Peace, Economy, Industry and Intelligence, Without Legislation Will Bring Them, Said Writer in 1868

The following letter, signed Jonathan Oldbuck, appeared in the New York Herald on July 31st, 1868:—

"I have asserted and proved over and over again that it is the balance of debt due to Europe which causes the high prices of exportable articles, and that, as gold is an exportable product of our country, it rises and falls in price with the demand for shipment, like every other article of export. I hold that, whatever may be the 'appearance' to the minds of casual or unscientific persons, there is no other cause that can produce the effects we are witnessing every day in our market; and here I will again group a few facts that should be kept in mind by all writers on subjects of currency.

"During the time that our country was increasing the issue of greenbacks and bank notes—and the increase was steady up to the present volume—the price has varied and sunk from 290 to 130. The premium on gold has in no case been governed by the quantity of our currency or the credit or want of credit of our government. No facts have been produced to show that gold has been influenced by currency, but all the facts show that the foreign demand takes from us all the gold that is produced in our country. And this flow of gold at the high premium would not take place, and could not take place, if there was not a demand at this high price.

Export of Gold.

"Suppose Congress should pass an act prohibiting the export of gold, what would be the effect? Gold would accumulate and become a drug in all our centres of trade; no one would want it. It would be of no use in trade, because everyone would, from convenience, prefer the greenback and bank note. But what would be a further effect? By stopping the export of gold the price of all exportable articles would immediately rise in value and exchange would advance from its present price of 140 to probably 170 or 180. Thus you would bring down the price of gold to the par of greenbacks, and you would advance the price in the same proportion of all farm produce that is now exportable.

"Gold has varied in price with all exportable produce, and since 1862 the price of exchange and gold has been invariably the same. And, again, suppose our foreign debt was paid and no foreign demand existed for our farm and mine products, would not exchange fall to par or below? The great law of supply and demand must not be ignored by intelligent men, or they will be inclined to agree with the Indian, that the sun, not the earth, moves.

Demand and Supply.

"Prices are governed by demand and supply. If the demand for flour is greater than the supply, flour will increase in price, and if the supply is in excess of the demand, the price will fall. This rule is invariable.

"As long as a foreign demand shall continue the price of exchange will remain high, and, as a matter of course, all the products of the farm and the mine that command a market abroad will remain high. In this connection we may remark that the constant complaints made by thoughtless persons about the evil effects of dealings in the gold room is not founded upon public interest. Instead of being injurious to trade, it must be advantageous to all who are dealers in exchange, for they can see from hour to hour the demand and supply. Why not complain of public tea sales or of the monthly coal sales? This plan of market overt prices has always been held to be favorable to consumers or purchasers. The price of exchange should always be tested in this way by the great law of supply and demand. The variations by these open sales will be much less than if left to the monopolizing action of large capitalists.

Debt to Europe.

"All attempts to bring the rate of exchange, the high price of farm produce and gold to the standard they were at before the war will prove of no avail until our great debt to Europe is paid. The demand from abroad is so great and pressing that everything that will sell in Europe will be exported. No secretary of the treasury can retard or advance the payment of our great foreign debt, no local means by legislation can influence it unless Congress shall enact a prohibitory tariff upon all foreign products, prohibit the export of gold, or prevent our wealthy people from travelling or residing in Europe and draining from our country one hundred millions per annum.

"These objectionable measures are the only ones that government can do to bring about the par of exchange and gold. But, we may ask, why this ignorant or wicked cry for 'specie payments'? What great material interest would be benefited by a speedy return to the exchange with Europe? Is the farmer injured? No; his produce brings 40 per cent. more by it. Is the manufacturer? no; or mechanic? no; his interests are promoted. Who, then, is injured? No one but the foreign manufacturer; and shall our country be convulsed in all its material interests to benefit the foreign manufacturer of silks and wines? The true interest of our nation is to believe that the sun is stationary, and that, although the earth moves, it does not throw us off; and that if we look to the great laws of our creation and being, we shall see that we are controlled by equivalents, and that any attempt to counteract their force can only add to our pain and perplexity without any resulting advantage.

"Peace, economy, industry and intelligence without legislation will bring about for us in due time the great advantages of a par of exchange."

Canadian Banker's Comment.

A copy of the above letter has been sent to *The Monetary Times* by Mr. F. L. Appleby, manager of the foreign exchange department at New York of the Union Bank of Canada, with the following comment: "This letter is not only descriptive of conditions in the United States at that period, but also of present conditions in Great Britain and Europe generally, with the exception that in certain cases the high premium on commodities (which would also have existed on gold if there had been a free market) has been ameliorated by the large credits granted by Washington."

BRITISH COLUMBIA'S SUBSCRIPTIONS

British Columbia's total subscriptions to the Victory Loan were $17,820,500, with a few more returns to be received. This was $5,820,500 over the objective of $12,000,000 set for that province. There were 45,834 subscribers on our Pacific coast, where the loan campaign was carried on with great enthusiasm. Conditions there differed from those in the East, where the organizations of bond houses were commandeered by the minister of finance, but the executive in British Columbia was able to obtain the services of experienced business men, who co-operated effectively.

British Columbia Victory Loan Executive.

Reading from left to right—Mr. L. W. Makovsk, secretary; H. H. Watson; P. G. Shallcross, Vancouver city chairman; J. P. Nicolls, George Buscombe, W. H. Malkin, F. W. Marsh. Unavoidably absent when photograph was taken—Wm. Farrell, chairman, and Stanley Burke.

The campaign in British Columbia was conducted largely on a patriotic basis, and the goodwill of a number of hardworking individuals, who gave almost their entire time to the work, was the biggest factor.

The New York Times Company has purchased the Tidewater Paper Company mills, located at Bush Terminal, Brooklyn, having an annual output of 30,000 tons of newsprint. The property was purchased from the North American Pulp and Paper Company and Mr. J. E. A. Dubuc, of Chicoutimi, Quebec, delivery to take place January 1st, 1918.

Service for Women

IN the management of property and the investment of money, women often find themselves handicapped by inexperience. Mistrusting their own judgment, they appeal to friends for financial guidance. Such a course is not safe nor businesslike.

Insure your property against mismanagement, and relieve yourself of worry by enlisting the services of this company. You will receive the benefit of experience gained in the management of many estates, both large and small.

Our office will be glad to explain—by letter or interview—about the making of your will or any matters regarding a trust or banking business.

VALUE OF THE TRUST COMPANY

Day of Individual Trustee is Past — Many Estates Have Been Frittered Away

(This material was supplied at the request of MacLean's Magazine a few weeks before the death of Sir Mortimer Clark, of Toronto. It was a subject on which he had strong convictions and it is fortunate that his views were put on record.)

For over forty years I have acted as a private trustee, handling an extensive number of estates, many of which are very large. In addition, I was active in the formation of the first trust company in Canada, and have been closely concerned with its direction ever since. Consequently I am in a position to speak with a certain degree of authority on both sides of the question of the proper administration of trust funds. Without hesitation, I declare my firm conviction that all trust funds should be administered by properly incorporated trust companies. This is the only method that assures absolute safety.

Any individual is liable to make mistakes, and this rule applies to private trustees. There are so many cases on record where estates have been frittered away through the carelessness, the incompetence or even the dishonesty of trustees, or have been swallowed up in ill-advised investments that have been made by trustees that I am convinced the system of entrusting estates to individuals is wrong in principle and dangerous in practice. It is not so much the chances of dishonest handling of funds that I fear, although there is probably plenty of evidence to be found on that score. It is rather the carelessness and incompetence that so often are found in the transactions of the private trustee. Unwise investments are made through the poor judgment of the trustee, or as a result of lack of thoroughness in the matter of investigation. Men selected for trusteeships are generally engaged in business for themselves, and cannot give as much thought and time as are absolutely essential in placing trust funds to the best advantage. Frequently they are men who are not well versed in the principles of investment, and who as a result make mistakes that prove very costly.

Organization of Experts.

In the other hand, the trust company is an organization of experts. All investments are made by men whose business it is to invest money and who know bonds and mortgages and the principles of investment generally from every angle. In addition to that no investments are made by a single official. Each transaction must come before the board of directors for ratification and thus pass the survey of many keen and experienced minds. As a further safety measure the trust company must lay its books before the court each year and thus render an account of its stewardship.

There has been a steady increase of confidence in the trust company method in Canada. I remember well how skeptical people were when the question of the first trust company was mooted in Toronto. It was an uphill fight to get people interested and the necessary amount of capital pledged. I know this because I took an active part in the work of organization and, as a matter of fact, I prepared the charter under which the company was finally incorporated. Let me say in this connection that the charter was prepared with a view to rigidly restricting the operations of the company to the most conservative forms of investment. The charter has been retained with but few changes and the principles established therein have been adhered to most conscientiously.

Charter Finally Obtained.

The difficulties met with in launching the first trust company extended even to the matter of incorporation. We found it hard to get our charter through the Ontario legislature. It was a new idea for Canada, and the members were inclined to regard it with doubt. It was, I believe, largely through my personal influence with the premier, John Sandfield Macdonald, that the charter was finally obtained.

Since that time, of course, the scope of trust company operations in the country has grown and developed. We have quite a number of companies now. I am so convinced of the soundness of the principle underlying the trust company that I anticipate a still more marked development as time goes on. It is the safe, the reasonable, the logical way to place estates and trust funds. I believe that every man, in making his will should provide for the placing of his estate with an established trust company for the safeguarding of those whose living will depend upon the proper handling of the property left. This applies to estates of all sizes, even to the smallest. There is really the most need for the safeguarding of the few thousands that the average man leaves because it is all that stands between the widow and poverty. It must be borne in mind also in connection with the small estate that it will probably all be placed in one investment. If an inexperienced executor or an indifferent trustee has the placing of that all-important legacy, there is the danger of a mistake being made—and the sole barrier between the dependent family and poverty is swept away. Placed with a trust company that amount would be conservatively and sanely handled and the revenue each year would be absolutely assured.

One of Strongest Arguments.

Perhaps one of the strongest arguments in favor of the trust company is the fact that to-day all money paid into court is placed with trust companies. The amount of money that comes into court pending decisions or the settlement of estates and in trust for minors is very considerable. The total is gradually increasing and much of it must be in court for long terms. The problem of investing this money has been solved by placing it with trust companies. I am pleased to be able to add that the companies handling court funds have resolutely refused to be influenced in favor of investments which would bring larger yields and have continued the investment of court moneys on the most conservative basis.

There is one word of warning, however, that must be uttered. The operations of trust companies should be confined within certain well-defined bounds to assure the utmost degree of safety. In the United States, companies have failed because they have launched out beyond their rightful province and entered into transactions of a speculative nature. Such a course is dangerous and in Canada is illegal. Nothing in the nature of speculation should be permitted in the administration of trust funds.

The solution, I believe, is in granting only charters which are rigidly drawn and which limit the investments of trust companies on the most conservative lines.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 30th, 1917:—

Mining Corporation of Canada, 54,327; Dominion Reduction Company, 87,000; Hudson Bay, 65,680; McKinley-Darragh-Savage Mining Company, 86,311; La Rose Mining Company, 62,921; Buffalo Mines, 305,520. Total, 661,759 pounds, or 330 tons

The total shipments since January 1st, 1917, now amount to 25,247,924 pounds, or 12,623½ tons.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

DOMINION TEXTILE COMPANY, LIMITED

By order of the Board.
JAS. H. WEBB, Secretary-Treasurer.

Montreal, 23rd November, 1917.

THE REAL ESTATE LOAN COMPANY OF CANADA, LIMITED

DIVIDEND No. 62

Notice is hereby given that a Dividend at the rate of three and one-half per cent. for the half-year ending 31st inst. has been declared upon the Capital Stock of the Company, and that the same will be payable at the Office of the Company in Toronto on and after 2nd January, 1918. The Transfer Books of the Company will be closed from 15th to 31st December, both days inclusive.

By order of the Board.
E. L. MORTON,
Manager.

Toronto, 1st December, 1917.

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 74

Notice is hereby given that a quarterly Dividend of two per cent. (2%) for the three months ending the thirty-first day of December, 1917, being at the rate of eight per cent. (8%) per annum, has been declared on the Common Stock of the Company.

The above Dividend is payable on and after the first day of January, 1918, to Shareholders of record at the close of business on the fifteenth day of December, 1917.

By order of the Board.
J. J. ASHWORTH,
Secretary.

Toronto, December 4th, 1917.

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a Dividend of Two Dollars and Twenty cents per share has been declared on the Capital Stock, called and paid up, of this Bank, and will be payable at its Head Office, in this City, on and after Wednesday, the second of January next, to Shareholders of record the 15th of December, at 1 o'clock p.m.

By order of the Board.
A. P. LESPERANCE,
Manager.

Montreal, November 26th, 1917.

NORTHERN CROWN BANK

Head Office, Winnipeg

DIVIDEND No. 18

Notice is hereby given that a Dividend at the rate of 5 per cent. per annum on the paid-up Capital Stock of this Bank has been declared for the six months ending November 30th, 1917, and that same will be payable at its Banking House in this city, and at all its Branches on or after the 2nd day of January, 1918, to shareholders of record at the close of business on the 15th day of December, 1917. The Transfer Books of the Bank will be closed from the 17th day of December to the 31st day of December, both inclusive.

By order of the Board.
ROBERT CAMPBELL,
General Manager.

Winnipeg, November 13th, 1917.

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY

(Incorporated A.D. 1876)

Authorized Capital	$1,000,000.00
Paid-up Capital	711,983.00
Reserve Fund	687,122.50
Total Assets	4,142,716.78

Notice is hereby given that a Dividend of Five Per Cent. for the current half-year (being at the rate of Ten Per Cent. per annum) upon the paid-up Capital Stock of this Institution has been declared, and that the same will be payable at the Society's Office, corner Wyndham and Cork Streets, Guelph, Ontario, on and after WEDNESDAY, JANUARY 2nd, 1918.

The transfer books will be closed from the twentieth to the thirty-first day of December, 1917, both days inclusive.

J. E. McELDERRY,
Managing Director.

Guelph, December 5th, 1917.

DIVIDENDS AND NOTICES

THE ROYAL BANK OF CANADA

ANNUAL MEETING

THE ANNUAL GENERAL MEETING of the Shareholders of the Bank will be held at the Head Office, 147 St. James Street, in the City of Montreal, on THURSDAY, the 10th DAY OF JANUARY, 1918, at 11 o'clock a.m.

C. E. NEILL,
General Manager.

Montreal, December 1, 1917.

DEBENTURES FOR SALE

TENDERS FOR SCHOOL DEBENTURES

Tenders will be received by the undersigned up to and including December 14th for Stouffville School Debentures. Total amount, $24,780.43, bearing 5½ per cent. interest. Debentures dated September 15th, 1917, and approved by the Ontario Railway and Municipal Board. The highest or any tender not necessarily accepted.

For further particulars apply to

J. URQUHART, Clerk,
Village of Stouffville.

TENDERS WANTED

Sealed Tenders, addressed to the undersigned and marked on outside of envelope "Tender for Debenture," will be received up till noon on the 14th day of December, 1917, for the purchase of the following debentures of the City of Windsor, Ontario:—

$46,024.95, five per cent., local improvement, twenty years, annual instalment, semi-annual interest coupons;

$8,439.18, five per cent., local improvement, ten years, annual instalment, semi-annual interest coupons.

$97,193.81, five per cent., local improvement, ten years, annual instalment, semi-annual interest coupons;

$32,178.00, School, five and one-half per cent., thirty years, annual instalment, semi-annual interest coupons;

Tenders must be for each block separately.

Debentures and coupons payable at Windsor. Delivery of debentures to be made purchaser at Windsor.

Debentures may, as far as practicable, be made of the denomination of one thousand dollars each.

No tender necessarily accepted.

Further particulars on application to

M. A. DICKINSON,
Acting Clerk.

Windsor, Ont., December 4, 1917

VICTORY LOAN PUBLICITY

Mr. R. A. Stevenson, chairman of the publicity committee, Victory Loan campaign, stated at a Montreal meeting on Monday, that more than 49,000,000 pieces of literature had been sent out over the Dominion in connection with the campaign. The express companies and post offices by their prompt and willing co-operation had made the work possible. In preparing and forwarding and distributing the literature 20,000 people in Canada had had employment. Canada had gone over the top again, this time with her money, and with this loan she was putting a bond behind every soldier. That total is known in Berlin and would notify the Kaiser that Canada to the last man and the last dollar was still out to win the war.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word: all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

TRADE WILL NOT SUFFER FROM LOAN

Mr. J. D. Chesney, general manager of Almy's, Limited, departmental store, Montreal, stated in an interview that the government's wisdom in allowing purchasers of Victory Loan bonds to spread their payments over a term of months, had resulted in trade suffering no bad effects from the money expended in this way. The facts that the money had all been borrowed in the country, would be expended for the most part in the country and that the interest would be paid in this country, also boded well for a continuance of good trade conditions. As the departmental store is an index of trade conditions generally, he was glad to report well of his company's business.

NEW YORK FUNDS

For some time New York funds ruled at a discount, owing to the large favorable trade balance and the embargo upon gold shipments from the United States, says the Canadian Bank of Commerce in its monthly commercial letter. The latter has, however, been relaxed at the instance of a committee of bankers which recently visited Washington. Arrangements were made to release $10,000,000 in gold during November, $10,000,000 in December and $5,000,000 in January next, and, in addition, the gold held on account of Canadian banks in the United States may now be withdrawn. During the time of harvest and the period preceding the close of lake navigation the strain upon the financial resources of the country is at its height, and this is markedly the case this year. As previously indicated, the value of the field crops is $400,000,000 in excess of that of any previous year, and there is, therefore, a corresponding increase in the value of the exportable surplus which is now being bought readily by Great Britain and her Allies. British payments under credits arranged in Canada do not, for the time being, affect the rate of exchange, but these credits cover only part of the government purchases. There will remain a balance, usually large at this season, and exceptionally so this year, which will normally be paid for in New York funds.

The Standard Trusts Company, Winnipeg, at a recent meeting of the board, declared a dividend of 9 per cent., payable January 2nd next.

RAILROAD COSTS

The railway situation is a matter of some concern in its bearing upon the trade as well as the credit of Canada. While the gross earnings of the roads have, with few exceptions, shown gains from week to week, the greatly increased cost of operation, due to higher wages and materials, has caused a diminution in net earnings and here, as in the United States, the railways have sought authority to raise rates so as to meet, in part at least, the augmented charges.

While operating costs have greatly increased, the railways have not been allowed to increase their charges for freight and passenger transportation. Sir Vincent Meredith pointed out at the annual meeting of the Bank of Montreal this week that the whole commerce and prosperity of the people are so intimately dependent upon efficient railway service that the request of the railways appears reasonable and should, in his opinion, receive a sympathetic response. Those who give the matter unbiased judgment will agree.

VICTORY LOAN ALLOTMENTS

In a statement to *The Monetary Times* this week, Mr. T. C. Boville, deputy minister of finance, said: "Some time will elapse before absolutely definite figures as to the amount of Victory Loan subscriptions can be arrived at. In the meantime, the minister of finance has decided to allot in full all subscriptions up to and including $1,000,000."

FIRST BOND OFFERING AFTER VICTORY LOAN

The first municipal bond offering since the Victory Loan subscription lists closed is $183,834 of Windsor, Ontario, bonds. An official advertisement appears on another page. There is one block of 5 per cent., 20-year bonds; two blocks of 5 per cent., 10-year bonds; and one block of 5½ per cent., 30-year bonds. Tenders are invited for purchase up to December 14th.

CANADA'S VICTORY LOAN RECORD

(Continued from page 5.)

Loan in February and 1 in 10.7 in the second Liberty Loan of the United States.

In Ontario, with an estimated population of 2,742,000, there were 303,866 subscribers or 1 subscriber for every 8 of population. In Toronto, which raised $76,256,315 from 126,390 subscribers, the record was 1 in every 3½ of population.

The subscription of $411,891,750 by 719,329 investors gives an average subscription of $572, while the total subscriptions were equal to one of $54 for every man, woman, and child in the Dominion. Ontario subscribed nearly half of the total, namely, $201,555,500, the number of investors being 303,866 of a population estimated at 2,742,000. The per capita subscription in that province was $73. In Toronto, the per capita subscription was about $160.

The government, the finance minister, the national organization of committees and teams responsible with Sir Thomas White, for the actual selling of the loan, have every reason to be gratified with the overwhelming success achieved. The people of Canada have good reason to be proud of their Victory Loan record.

The revenue of the Ontario department of lands, forests and mines during the fiscal year ended October 31, reached the record total of $3,579,196, compared with $1,865,557.37 last year. Of this increase approximately $1,500,000 came from the new nickel taxation, but apart from the levy made upon the nickel industry there was a revenue increase.

LOAN MOST POPULAR AND SUCCESSFUL

Many of the Allied Borrowing Records Beaten by Victory Loan

Sir Thomas White, minister of finance, in a statement issued on Sunday night thanks the Canadian people for their splendid efforts in connection with the Victory Loan. Sir Thomas said:—

"The overwhelming success of the Victory Loan is a great national triumph for the Canadian people. While it will be a week or more before final returns come to hand, we should not be surprised if the aggregate of cash subscriptions would amount to three hundred and fifty million dollars, or more, from four hundred and fifty or even five hundred thousand subscribers.

Is a Stupendous Achievement.

"The result can only be regarded as a stupendous achievement for Canadian patriotism and for the high efficiency and zealous enthusiasm of the Victory Loan committees and workers throughout the Dominion which called it into play in this great and vitally important national undertaking. I do not think that any of us adequately realize the magnitude of the result which has been accomplished. Before the war the largest loan ever issued by the Dominion of Canada in London, the great money market of the world, was six million pounds, or thirty million dollars. I recall that in 1911, when a Dominion-guaranteed issue of seven million pounds, or thirty-five million dollars, was offered in London, something like a temporary panic was caused in governmental securities. Yet, now we have Canada itself, which was a borrowing country before the war, subscribing ten times the amount of that loan out of accumulated savings.

Most Popular and Successful.

"In this Victory Loan, Canada has certainly gone 'over the top.' Having regard to population and the number of our subscribers, it would appear that this loan has been the most popular and successful launched by any of the Allies since the outbreak of the war, with the possible exception of the second American Liberty Loan. (Later returns show that we have surpassed that record.—Editor, *The Monetary Times.*) On the average, one in every three or four families throughout Canada have subscribed for Victory Loan bonds. The credit for this wonderful achievement is due, of course, primarily, to the splendid spirit of patriotism pervading the great Canadian people—never so great as during the struggle and sacrifice of this awful war. Once again, and more unmistakably than ever, they have proclaimed to the world, through the Victory Loan, their essential unity of purpose and determination to persevere until final and conclusive victory is attained.

Response of Masses.

"The outstanding feature of the loan is the splendid response of the great masses of the people. Industrial workers, operatives, artisans, farmers, business and professional men, great manufacturing, commercial and financial institutions, all have contributed patriotically and magnificently to a result which will surprise the world. As for myself, I have not words to express my deep appreciation of the wonderful response of our wonderful Canadian people. On behalf of the government, I desire to convey to all our most sincere thanks for this great aid to the accomplishment of the national purpose in the war and the maintenance of Canada's prosperity. The success of this loan was vital to Canada.

"We have now the means of carrying on the war and for the establishment of needed credits for Great Britain. This means that business will be maintained and will help in turn to support the war and furnish fresh credits when they are again needed towards the end of next year.

Tribute to Workers.

"I have to express my most grateful thanks to all those persons and agencies whose splendid and untiring work has done so much for Canada in making this loan so successful. It is impossible to particularize, but I must specially mention the press, the clergy, the Boy Scouts, the Victory Loan executive, publicity, provincial and local committees throughout Canada and the splendid organizers at their head who have given their time, day and night, unsparingly to the great work. It has been a great triumph, not only for Canadian patriotism, but also for Canadian organization ability, which is, I believe, second to none in the world. The fine organization of the banks in their three thousand and more branches throughout Canada has greatly assisted in promoting the success of the loan and facilitating its handling. I feel I should speak a word of the staff of the finance department and the generous assistance rendered by members of the civil service in other departments in coping with the tide of subscriptions pouring into Ottawa by every mail.

Work of Ladies.

"I desire specially to pay my tribute to the work of the ladies throughout the Dominion who, by their energy, zeal and enthusiasm, have so greatly assisted in the great result. I cannot speak in too generous or appreciative terms of the untiring efforts they have put forth and of the splendid service they have rendered. I am inexpressibly proud of the achievement of the Canadian people in the great and notable success of the Victory Loan."

HARD WORK ON LOAN RECORDS

Mr. W. S. Hodgens, chairman of the Dominion business committee, Victory Loan campaign, expressed his thanks for the splendid support given the committee in their work of recording the results, not only from the members of the committee in Toronto, but from the chairmen in charge of the different headquarters throughout the Dominion. Every night during the campaign the committee in Toronto had a report from every unit in Ontario and every morning from every unit in the other provinces. On Saturday, the last day of the campaign, over 15,000 applications were received to 12 o'clock midnight, and the staff of girls at headquarters worked through until 5 o'clock Sunday morning, when they were sent home in taxis. The men worked until 9 Sunday morning in order to have their report ready for the opening of the banks Monday morning.

The members of the Dominion business committee were: Messrs. C. W. Fleming, of the Dominion Securities; Harold Green, of the Bankers' Bond Company; Alex. Mackenzie, of W. A. Mackenzie Company; Harry Somers, of Jarvis and Company; and M. Williams, of A. E. Ames and Company.

Total, $140,000. Loss will be $600,000. On contents—Strathcona, $5,000; British Dominions, $5,000.

Wallace, N.S.—November 19—Mr. Thos. Cochrane's barn containing eight head of cattle and three horses destroyed. Cause, incendiarism.

Welland, Ont.—November 27—Mr. J. Burden's house destroyed.

Winnipeg, Man.—November 17—Empty house, property of the Winnipeg Securities Company, Limited. Estimated damage to building $400. Insurance on same, $2,000, carried in the Hartford Fire Insurance Company.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Imperial Tobacco Company of Canada.—The statement of the company for the year ended September 30th shows net profits of $2,455,224. After preferred and ordinary dividends, the surplus was $353,274. The total surplus stands at $1,328,704.06. The balance sheet shows cash in bank $686,716 and total assets of $39,314,859.

Nova Scotia Steel and Coal Company.—The net profits for October were about $400,000, which is equal to profits for the $15,000,000 common stock at the rate of $30 a share. This balance is net for dividends, because in making up its figures the company does not strike its net until after deduction of the war taxes The company is expected to continue a $5 a share dividend disbursement. This would entail the payment to stockholders of $750,000 per annum, leaving an estimated $3.500,000 to $4,000,000 to be used in the property.

Toronto Railway Company.—The company has had a successful year, as its gross receipts to date are $267,125 in advance of the receipts for the corresponding period last year. The city benefits accordingly, as its percentage has been increased by $50,007. The figures were for first eleven months of 1917, $5,623,235, as compared with $5,356,110 in 1916. The city's percentage was $896,850, as compared with $846,843. The gross receipts for last month were $537,505, as compared with $489,987 in November last year. The city's percentage was $55,823, as compared with $48,890.

Canadian Pacific Railway.—Preliminary returns of the company's gross earnings for November show that a new high record for any month in the company's history has been established. The weekly statements for November give a gross of $14,942,000; when the usual adjustments are carried out in the monthly statement it is probable that the figures will exceed $15,000,000.

The previous high record for a month was $14,733,774, established in October. These were the figures given in the corrected monthly statement; but the preliminary weekly figures were $140,774 less. On the same basis, November may give a final total of about $15,100,000 in the monthly report.

ROYAL BANK APPOINTMENTS

Mr. W. B. Torrance, who has been superintendent of branches for the past 17 years of the Royal Bank of Canada, retired at the end of the bank's fiscal year, November 30. Mr. Torrance is succeeded by Mr. M. W. Wilson, heretofore holding the position of chief inspector. Mr. N. Hilary, supervisor of western branches, is on his way to Montreal to take the position of general inspector. Two other general inspectors have also been appointed, these being Messrs. G. W. MacKimmie and S. R. Noble. Mr. S. D. Boak, who has been chief accountant for a number of years, has been appointed secretary, and is succeeded by Mr. J. McKerchar.

TORONTO'S SOLDIERS' INSURANCE

Important Statement Made by Finance Commissioner Bradshaw

The following statement was presented to the Toronto city council this week by Mr. Thomas Bradshaw, finance commissioner:—

(1) The total number of Toronto soldiers covered by company and civic insurance is 44,217. The number of deaths which have been reported in respect to soldiers who enlisted from the city of Toronto, is 2,836. In 960 of these cases the city had effected insurance in different insurance offices. In the remaining 1,876 cases the city carried the insurance itself.

(2) The liability to the city in respect to the deaths which have taken place amounts to $2,798,000, made up as follows:—

Civic insurance	$1,876,000
Premiums paid to companies for insurance	922,000
	$2,798,000

Number of Deaths.

You will thus see that the amount of premiums paid to companies is practically the same as the amount of the insurance received from the companies.

(3) The deaths which are now being reported number about 235 per month, involving a monthly liability of $235,000. Already for the first five days of December we have been advised of no less than 47 deaths.

(4) At the present time 300 claims are being held in abeyance by the insurance committee awaiting the decision of council as to what shall be done with them, in view of the question now raised. These claims aggregate in amount $300,000, and have accumulated since August 10th last. They represent about 35 per cent. of all the deaths which have taken place since that date. Previous to August 10th all claims were paid, no matter what degree of relationship the claimant bore to the deceased soldier.

(5) In reviewing all the 2,836 claims which have, thus far, taken place, it will be found that about one-third, or say 1,000 in number—representing $1,000,000—would not have been recognized if they had been considered along the lines laid down in the proposal now being considered by council.

Has Weakened Ability.

(6) At the present time the city is paying 1,697 death claims in monthly instalments. An analysis has been made of the places to which remittances are being sent by the city from month to month, and it is found that in no less than 563 cases, or practically one-third of the whole, they are being forwarded to relatives, etc., outside of the city of Toronto.

How far this war will yet go we do not know. The number of our own soldiers who will yet be called upon to lay down their lives, is also unknown. The city of Toronto's liability for insurance is consequently also unknown. We do know, however, that there will be many more of our brave men called upon to pay the great price, and that our liability will be very greatly increased.

My plea, therefore, is that we shall keep faith with those with whom we have covenanted, who have dependants, but that we shall not so weaken ourselves financially that we shall not be able to do this.

The city of Toronto passed, on August 9th, 1915, a by-law, and it is the only authority we are empowered to act under, which provides "that a grant of $1,000 each be made for the benefit of the dependants of every resident of the city of Toronto, who may be killed, or die, while on active service overseas." The city of Toronto has never yet undertaken to make a grant to any others but dependants, but, unfortunately, the authority has been disregarded, and grants have been made to many, other than dependants, and this has weakened the ability of the city to carry out its promise to those to whom it has definitely promised protection.

The proposal which is now submitted to council is intended to bring us back to the point from which we started, and to eliminate all claims, other than such as can prove dependency. We should be just before we attempt to be generous.

QUEBEC PROVINCE LOAN RECORD

Total was Over $94,000,000 — Montreal and Island Contributed More Than $76,000,000

Quebec province subscribed $94,157,100 to the Victory Loan, to which Montreal City and Island contributed $76,769,000. Mr. J. W. McConnell, chairman of the loan campaign executive in that province, announced the figures at a meeting on Monday night. The Montreal and Island totals were as follow:—

English ladies' teams	$ 3,477,150
French ladies' teams	709,550
Total ladies	$ 4,186,700
Men's English teams	16,465,700
Men's French teams	2,587,250
Total men's teams	$19,052,950
Employees' committee	4,778,100
Special names committee	43,351,050
Other sources	5,400,200

Number of Subscribers.

To make the total of $94,157,100, subscriptions were secured from 98,001 persons in Montreal and Island district, and 25,411 in the rest of the province, making a grand total of 123,412 persons, who purchased the Victory Bonds in Quebec province, not counting various subscriptions which, for certain reasons, had been allocated to other provinces.

Many head office subscriptions, which belonged by right to Montreal, according to arrangement, said Mr. McConnell, had been allowed to go away from the city because other parts of the Dominion thought their totals would be too low otherwise. The $3,000,000 subscription of the Dominion Steel Corporation had been divided for that reason, so that $1,500,000 could go to Sydney. The employees of that corporation at Sydney had subscribed for $700,000 worth of bonds. Montreal would have had four million dollars more in her total if she had insisted on these subscriptions.

Lord Shaughnessy stated that the Canadian Pacific Railway, having started the Victory Loan on its way toward the $300,000,000 mark, was prepared to implement its agreement with its second $5,000,000. This company's subscription is the largest single subscription to the loan in the Dominion.

Should Keep Organization.

"This campaign," said Mr. J. M. Mackie, a vice-chairman of the Dominion executive, "has been carried on from the start with no thought of self, of religion, or of party politics. It has represented patriotic effort of the highest sort, and it would be a thousand pities if, now that the loan has been brought to a successful close, this organization should be allowed to disband.

"Even when the war is over we are going to have big national problems to solve, and in grappling with them, I am absolutely confident that this Victory Loan organization could be made a power for the greatest possible good. It might be called the Loyal Victory Loan Legion, or some name of the sort. But whatever it is called I would suggest that it embody in its by-laws from the start the cardinal principles which have been in effect through the recent campaign—namely, the exclusion of everything suggesting race, religion or politics."

DISASTER AT HALIFAX

As a result of a terrific explosion aboard the munition ship "Mont Blanc" in Halifax harbor on Thursday, a large part of the north end of the city and along the waterfront is in ruins and the loss of life is appalling. Early estimates place the number of dead at between eight hundred and one thousand, but late on Thursday the Chief of Police placed the killed at possibly 2,000. On one ship alone, forty persons were killed. Thousands have been injured. The property damage is enormous, and there is scarcely a window left in a building in the city.

The insurance companies have little reliable information as to losses yet.

Practical sympathy and assistance of the other provinces and of several neighboring States is being extended to the people of the stricken city.

ONTARIO'S VICTORY LOAN ORGANIZATION

Statement of Mr. G. H. Wood, Chairman of Provincial Executive

Ontario's grand total contribution to the Victory Loan stood at $201,555,500 on Wednesday from a total of 303,866 subscribers, or one in eight of the population of the province. This represents a new record war loan contribution.

Mr. G. H. Wood, chairman of the Ontario executive, stated this week that the brains and driving force of the organization under the leadership of Mr. Norman Sommerville and Dr. Abbott and the divisional organizers, were the triumvirates established in each of the fifty-four counties and large cities—namely, the chairman, secretary and organizer.

Give Sixteen Hours Daily.

"These men have averaged sixteen hours a day," said Mr. Wood. "They have been ably assisted by the members of their local executives and the chairman and members of the various sub-committees, such as publicity, teams, transportation, etc. Of course, the teams really obtained the subscriptions, and all credit is due to them for their thorough and tireless canvassing at all hours and all kinds of weather for three long weeks. That they have done their work well these grand records show.

"All classes of the community have co-operated cheerfully," continued Mr. Wood, "but special mention must be made of the co-operation with the committees of bankers, life insurance men and manufacturers' associations. The Speakers' Patriotic League rendered admirable service in providing speakers. Municipal councils, boards of trade, women's organizations, school boards, teachers and children, even politicians, became interested in the campaign, and worked as if their lives depended on it.

Gave Time and Space.

"To the members of the provincial executive committee, Mr. G. Tower Fergusson, vice-chairman; Mr. R. A. Daly, secretary; Mr. T. E. Griffiths, treasurer; and Mr. C. W. Fleming, secretary of the business committee, whose fifty assistants have kept headquarters' records in order, a word of real appreciation is due. To all who gave their time so generously, to those who allowed the organization the free use of offices for headquarters (and this includes many municipal council buildings), and especially to those who donated page after page of gratuitous advertising, we tender our sincere thanks. Mr. J. J. Gibbons should be particularly mentioned for his invaluable work in publicity.

"The press in Toronto and throughout the province have splendidly supported our efforts in spite of the pressure of election, war and other news, and in no small measure is the success due to their co-operation.

Thanks to the Subscribers.

"But, most of all, must we do homage to the public, who have offered their dollars so freely for Canada and to support Canada's sons.

"Reports indicate that all classes participated generously —the farmer for the first time had a real opportunity, and took advantage of it—the business man and people of small means responded nobly, but I believe the real palm must be handed to the industrial workers, who in an amazing manner have put their savings into Victory bonds. This wonderful response was made possible by the generous assistance given by almost all industrial and commercial concerns by subscribing on behalf of their employees and allowing them ten or twelve months in which to make payment. We were never so proud of Ontario as to-day, with a record better than the United States in their recent marvellous Liberty Loan. Ontario has given two hundred million reasons why the war must go on until the Huns are conquered and our boys can return with victory," Mr. Wood concluded.

FOREIGN EXCHANGE DURING WAR

On pages 29 to 32 appears an interesting article, written for *The Monetary Times* by Mr. E. M. Dawson, manager of the foreign exchange department of the Union Bank of Canada. The article deals with foreign exchange during the third year of war and is illustrated with a chart.

BRITISH AMERICA NICKEL COMPANY

Plant Will Not Likely Operate Before Summer of 1919—Demand for Molybdenum

According to a statement of Sir Clifford Sifton at the annual meeting at the Commission of Conservation, the smelter of British-America Nickel Corporation's new smelter and refinery, under construction near Sudbury and about one mile distant from the company's principal mine, the Murray mine, will produce a matte carrying 80 per cent. copper and nickel. This matte will receive final treatment in the refinery.

The plant will have a capacity of 2,500 tons of ore per day and a nickel production of 20,000,000 pounds of nickel per annum. Power will be obtained from the Ontario Hydro-Electric Commission and all machinery will be operated by electricity.

Owing to war conditions causing great scarcity of labor and rendering it extremely difficult to get supplies, the plant will probably not be in operation before the summer of 1919.

International Company's Plant.

The International Nickel Company is constructing a nickel refinery at Port Colborne, Ontario, thus obtaining rail transportation and water transportation, via the Welland Canal. Construction work is well advanced, and it is expected that it will be in operation in a few months. The estimated cost of the plant is $4,000,000. The initial capacity of the plant will be 15,000,000 lbs. of nickel per annum, but it has been designed for expansion to 30,000,000 or even 60,000,000 lbs. within a few years.

The company has stated that the new plant will be able to supply the needs of the British Empire. The Orford Company's plant, at Constable Hook, New Jersey, will supply the United States.

The question whether the requirements for export to other countries shall be permitted to be refined outside of Canada will require further attention from the governments of the Dominion and Ontario.

Demand for Molybdenum.

The demand for molybdenum for use in the manufacture of special steels has greatly stimulated prospecting and development of our molybdenite resources. Numerous discoveries have been made which vary in importance from mere mineral occurrences to deposits which have already given rise to considerable production. The most important deposit yet proven is that near the village of Quyon, Quebec.

The Federal Department of Mines has done much to encourage the concentration of these ores. After trial shipments had been made for test runs in United States, the ore from Quyon mine was principally sent to the concentrating plant of the mines branch. The company has recently completed a concentrating plant to take care of their output.

Recovery of Metallic Magnesium.

The establishment at Shawinigan Falls of an electrolytic process for recovering metallic magnesium from magnesite, has greatly stimulated the production of this mineral. Magnesium is used in connection with the war for the manufacture of star shells and flares and as an alloy with aluminum for the manufacture of aeroplane parts.

In addition to the above, production of the following minerals and metals has been stimulated by the war: Copper, nickel, asbestos, zinc, silver, lead, chromite, cobalt, pig iron and graphite.

OLEOMARGARINE COMING ON MONDAY

The food controller announces that oleomargarine should be on sale to consumers in all parts of Canada by Tuesday of next week. Licenses have been issued from the office of the veterinary director-general to 300 applicants for permission to import oleomargarine, and these will become operative on Monday next, December 10. Entry will not be permitted until Monday morning, but as consignments are already reported to be lying in bond at some points, chiefly from United States manufacturing concerns, the expectation is that these will be on sale to household consumers by Tuesday. The date on which licenses become operative has been so arranged as to be the same for every province.

APPROVAL OF MUTUALIZATION PLAN

Policyholders of Equitable Life Assurance Society Voted on Proposal Yesterday

Decisions of the United States District Court and the Circuit Court of Appeals having removed all legal barriers to the holding of a special meeting of the policyholders of the Equitable Life Assurance Society for the purpose of deciding for themselves whether they approve the present proposed plan of mutualization, the special meeting was held yesterday. Policyholders entitled to vote on the question are only those insured in at least $1,000, whose insurance shall then be in force and shall have been in force for at least one year prior to the date of the special meeting. The society has decided that policyholders may vote in person, by proxy, or by mail, and that all votes shall be cast by ballot.

It was expected that the vote would be unanimously in favor of the plan of mutualization. This plan involves the purchase of the entire capital stock of the society, by the society, on the following terms: Payment of $5,400 a share for 501 shares, being a majority of the 1,000 shares capital stock; and $1,500 a share for the remaining 499 shares of the capitalization. The majority shares belong at present to T. Coleman du Pont, together with 63 shares of the minority remainder. The terms upon which Mr. du Pont has offered his entire holdings to the society for mutualization purposes do not require the immediate payment of any sum and will not at any time involve a diminution of the surplus of the society. Payment is to be made by the Equitable to du Pont by credit to him semi-annually of a certain amount on interest charge to be paid by him to the society on a mortgage loan on security of the Equitable building, so that of the $2,799,900 to be allowed him for his 564 shares of stock, no payments will be made out of the surplus or funds of the society.

Superintendent's Sanction Necessary.

Should the vote of the policyholders favor the present plan of mutualization, the last step toward the perfecting of that plan will be at once taken, namely, that of obtaining the sanction of the state superintendent of insurance. Then the Equitable mutualization will be practically accomplished, as arrangements have already been made for the acquisition of nearly three-fourths of the entire capital stock.

Whether the suit of the Royal Trust Company, of Montreal, and other minority stockholders against the Equitable Life Assurance Society, to prevent mutualization under the proposed plan, will be carried to the Supreme Court of the United States on appeal from the decision of the Circuit Court of Appeals, depends upon the decision of the Royal Trust Company, of Montreal, acting as trustee for the estate of the late Sir William C. Van Horne. Counsel in New York are awaiting the decision on the question. Mr. Greer, of Pierce and Greer, counsel for the Royal Trust Company, said to Dow, Jones and Company: "The question of beneficial ownership of the surplus of the society has been squarely decided as belonging to the policyholders. This has always been a mooted question, and lies at the foundation of this proceeding. While we have held differently, four judges have decided that the Equitable is a corporation in a class by itself, different from every other stock corporation, in that its stockholders do not own the surplus and have no right in its distribution. The constitutionality of the legislative acts under which the society mutualization is to be worked out has been attacked on the ground that you cannot take away from a man something that belongs to him. The policyholders might claim that the surplus belongs to them, but here we come right back to the question, 'Did the court decide rightly when it decided that the surplus belongs to the policyholders?' "

Did Not Oppose Plan.

In reference to the attitude of the plaintiffs toward mutualization, Mr. Greer said: "We do not oppose mutualization. We do not want to take the position of obstructionists. If mutualization is the order of the day, as it seems to be, we want to co-operate as far as we can to bring about the mutualization of the Equitable Society. The court has held that mutualization can be accomplished under the present plan." Counsel for the plaintiffs stated that as the courts have decided the question of ownership of the surplus, and have practically admitted the constitutionality of the law authorizing the mutualization of the society, they will advise their clients accordingly, and in all probability further litigation will be avoided.

CONSCRIPTION OF CAPITAL

It Is Destructive of Production—Government Should Not Tax Beyond Ability to Pay from Current Earnings

"A good deal is said about the 'conscription' of capital," says the National City Bank in its December circular, "and it is well to have a clear idea of what is meant, and of just what it is practicable for the government to do in this respect. The phrase is often used as though the authority of the government to take property as it takes men was disputed, and with the implication that capital is spared through influence or favoritism.

"This idea is due largely to a mistaken conception of capital, and of the service which capital renders, whether in public or private hands. The capital of the country does not exist in forms that permit of its being seized and turned into the treasury. Capital exists for the most part in productive property, i.e., in farms, mills, railways, machinery and all the equipment for carrying on industry. The greatest service to the country from these properties is obtained by having them operated with the highest possible efficiency. The government doesn't want property in these forms, but the products that come from them. It would be a great boon to have production increased and a disaster to have it generally decreased.

It is Impracticable.

"The seizure, or conscription, of these properties in the sense of taking them out of the hands of the present owners is utterly impracticable. The government could not assume their management. It has no staff competent to operate them. If it took them over it could do no better than arrange with the present owners to go on operating them. It would have to make terms which would enable the management to satisfy wage-earners, provide working capital to buy materials and supplies, and make repairs, replacements, improvements and enlargements, as these were necessary to keep the industries up to the highest efficiency.

"In short, the 'conscription of capital,' when reduced to practical terms, means the fixing by governmental authority of the terms under which private property and private managerial ability will be devoted to public work. This is being generally done. In some cases fixed prices are agreed upon; in others, the government pays cost, plus a percentage for the services of plant and organization. In some instances the latter is the only practicable plan, but its weaknesses are well known. Experience has always shown that, as a general rule, the best results are obtainable under the private management of industry. It gives an incentive to individual effort, stimulates efficiency and promotes progress.

Would Reduce Production.

"The seizure of properties by the government would not put money in the treasury, or increase the supply of what the government wants. A levy of taxes so heavy that it could not be paid out of current earnings would reduce the working capital of industries at a time when they need it all, compel them to borrow while impairing their credit, and in many instances force the sale of properties on a market without buyers. In short, it would bring ruin and panic upon the country, demoralize industry when the country's salvation depends upon the industrial output, and destroy values at a time when of all times it is important to sustain confidence. It would be literally killing the goose that lays golden eggs. Nothing can take the place of men in the armies, and rich and poor alike are conscripted for that service, but capital in the form of productive property must be used as it exists and must be handled by people who know how to produce results from it. 'Conscription' cannot be applied to it in any other sense than as applied to current earnings, and enough of current earnings must be left to finance the business adequately; otherwise efficiency will decline, production will fall off; the ability to pay taxes will diminish, and the war power of the country will be lowered."

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

Insurance Superintendents Discuss Problems

NOTABLE *Gathering of Government Officials—Important Draft Bill Submitted by Sir James Aikins to Provide for Uniformity in Canadian Business Legislation—Some Instructive Addresses.*

THE conference of provincial insurance superintendents at Winnipeg last week was one of the important insurance events of the year. Several valuable papers were read by the superintendents and others and Sir James Aikins, lieutenant-governor of Manitoba, presented a draft bill to provide for the appointment of Commissioners for the promotion of uniformity of legislation (not only respecting insurance, but business generally) in Canada. This being a conference of the provincial insurance superintendents, the Dominion department of insurance was not represented. The meeting dealt largely with provincial matters, sometimes raising the vexed question of provincial as opposed to Dominion rights. One speaker, for instance, stated his opinion that uniformity with regard to the legislation respecting preferred beneficiaries could be best secured by having the subject dealt with in the Dominion insurance act. Another speaker discussed provincial rights and Dominion laws.

Mr. H. G. Garrett, insurance superintendent of British Columbia, acted as chairman of the conference, the holding of which was due largely to the efforts of Mr. A. E. Ham and Mr. A. E. Fisher, superintendents of Manitoba and Saskatchewan, respectively. Sir James Aikins welcomed the delegates as also did Mayor Davidson of Winnipeg, who referred to the importance of the duties of insurance companies and agents, and stated that it was the duty and privilege of everyone to carry life insurance.

Hon. Edward Brown, provincial treasurer of Manitoba, expressed the sympathetic attitude of his government towards improvement of insurance methods in the public interest and towards greater uniformity of legislation throughout Canada. "The provinces and the Dominion should get together," he said. His government, said Mr. Brown, had agreed at the instance of the Bar Association of Canada to appoint a Commission for the purpose of seeing how best to proceed. He paid a tribute to Mr. Ham, Manitoba insurance superintendent, referring to his "great wealth of experience." He added that Mr. Ham had "the entire confidence of the administration."

At the conference, it was decided to form a national body to be known as the Association of Provincial Superintendents of Insurance of the Dominion of Canada. Mr. A. E. Ham, the Manitoba superintendent, was elected the first president; Mr. Vale, deputy superintendent of Ontario, vice-president; and Mr. A. E. Fisher, Saskatchewan superintendent, secretary. These officers, together with Mr. H. G. Garrett, British Columbia, and Mr. Nicolson, Alberta, will constitute the legislative committee of the new Association. The next conference of the provincial insurance superintendents will be held in Montreal, probably in 1918.

The results of the conference will be watched with interest by the Dominion insurance department at Ottawa and by the insurance companies. It is to be hoped that the provincial and Dominion insurance departments will be able to agree on a policy which will remove, rather than accentuate, the differences and difficulties in our insurance legislation. To encourage the business of insurance, uniformity and simplicity of legislation is necessary, and co-operation between the Dominion and provincial insurance departments. A summary of the principal addresses of the convention is printed on the following pages.

PREFERRED BENEFICIARIES LEGISLATION

Uniformity Could Best Be Secured in Dominion Insurance Act

"Legislation in connection with preferred beneficiaries," said Mr. C. C. Ferguson, manager and actuary of the Great-West Life Assurance Company at the insurance superintendents' conference at Winnipeg last week, "now exists in all the provinces. The general principle involved is that when a policy is issued or is declared to be in favor of a preferred beneficiary, a trust is thereby created and the ownership or control of the policy no longer exists solely in the assured. In other words the beneficiary becomes part-owner of the policy. A similar situation results when a house or other property is registered jointly in two names. There is this difference, however, that a man usually knows what he is doing when he puts his property in his wife's name. But when he names his wife as beneficiary in his policy, he does not always know that he is creating an irrevocable trust in her favor. There is no great difficulty in this, since where man and wife are living amicably together, as they ought to do, they can jointly deal with the policy as freely as the assured could in the case of a policy issued in favor of his estate. But trouble sometimes arises where family feuds arise or where the beneficiary is an infant since under those circumstances it occasionally proves impossible to obtain a loan or cash surrender value and the assured of course blames the insurance company for this impasse on the ground that he should have been warned against having his policy issued in that, to him, absurd way.

"In the United States they do not have this legislation in favor of preferred beneficiaries, but the assured is asked to elect in his application whether or not he shall have the right to change the beneficiary. If he does not reserve the right to change, a trust is practically created, but if he reserved the right to change, he, of course, may freely do so. A point comes up here which is worth mentioning. If the assured has reserved the right to change, it has been decided that his creditors may force him to change so that the policy in that event it not secured against creditors during the lifetime of the assured. In Manitoba alone among the provinces the act gives the assured the right to revoke the appointment of even a preferred beneficiary, and while so far as I am aware, there has been no legal decision on the subject it is possible that creditors may in Manitoba be competent to force a policyholder to reclaim his policy for the benefit of his estate, and if this is the case the purpose of the legislation would be in large part rendered null.

"The preferred beneficiary legislation is on the whole very desirable. It enables a man to make a provision for his family which he knows will be theirs, no matter how involved his personal estate may be at his death and it protects his family against his own carelessness and possibly even his enmity in later life. A life insurance policy in favor of the wife would be an excellent adjunct to every marriage contract.

"The legislation in the various provinces with respect to preferred beneficiaries is very similar in general principles, although there is a number of differences and inconsistencies which might well be eliminated. I have found it impossible in the limited time at my disposal to prepare a comprehensive paper discussing all the differences and inconsistencies and pointing out the merits and disadvantages of the various clauses which have been adopted. However, it might be useful to set our here a list of the preferred beneficiaries in the various provinces. These are as follow:—

"In Nova Scotia, Ontario, Saskatchewan and Alberta the preferred beneficiaries are: Husband, wife, children, grandchildren and mother." "In Quebec, the preferred beneficiaries are: Wife, children and step-children. In New Brunswick, the preferred beneficiaries are: Husband, wife, children, grandchildren, mother, father, brothers and sisters. In Manitoba, the preferred beneficiaries are: Husband, wife, children and step-children.

"In British Columbia, the preferred beneficiaries were: Husband, wife and children. In Prince Edward Island the act originally included, husband, wife, children, grandchildren, mother, father, brothers and sisters, but the three last mentioned were cut out in an amendment to one section of the act, but unfortunately the amendment was not carried throughout the whole act, so that probably father, brothers and sisters should still be regarded as preferred beneficiaries in Prince Edward Island. This is a matter which might well receive the immediate attention of the legislature of the province.

Relatives in Preferred Class.

"So far as the life insurance companies are concerned it makes little difference to them how wide or narrow the preferred class may be, but it is perhaps unfair to creditors that father, brothers and sisters should be included as is the case in New Brunswick and Prince Edward Island. There should be no difficulty at a meeting of provincial superintendents of insurance of arriving at a unanimous agreement as to what relatives should be included in the preferred class. Not only would this remove a great deal of inconvenience and possibility of a mistake, but it would also avoid a difficulty which is frequently experienced where a policyholder moves from one province to another and the question of what law governs comes up for consideration. The laws of Saskatchewan and Ontario are identical in phraseology with the exception of perhaps a word or two.

"The act in Alberta is very similar in effect to the legislation of Saskatchewan and Ontario, but in it a certain independence in the matter of phraseology which while excellent with respect to literature generally is undesirable in matters of legislation."

Ontario Act Preferable.

Mr. Ferguson selected the Saskatchewan act for particular review. Dealing with it he said: "Section 178 of that act provides that the sections to follow shall deal with contracts of insurance made before the passing of the act as well as to contracts made after the passing of the act. This is advisable. Section 179 provides that any person of the full age of twenty-one years is competent to deal with life insurance matters in certain connections. The Ontario act differs in this respect since it gives such powers to persons of the age of 15 and over. The Ontario act is preferable, inasmuch as it facilitates the insurance of young people at ages when it is very desirable that they should begin to make provisions. Sub-section 2 of section 179 makes a satisfactory provision for the case where insurance premiums are paid with intent to defraud creditors, but it is doubtful whether a man's income to the extent of the premiums on a limited amount of insurance in favor of wife or children should not be free from the claims of creditors. Sub-section 3 is also quite satisfactory. It makes provision for the mode of designating beneficiaries and subject to the restrictions with regard to the preferred class permits change of beneficiary. This is important because in some of the provinces there is no clear provision for changing the ordinary beneficiary.

"Sub-section 4 provides that where the beneficiary under an insurance policy is affected by the will of the assured, any change so made will be deemed to be made at the date of the will and not at the death of the testator. Sub-sections 6, 7, 8 deal with minor matters and are satisfactory.

Before Maturity of Policy.

"Sub-section 9 provides that should the ordinary beneficiary die in the life-time of the assured, the insurance shall revert to the benefit of the estate of the assured. This is satisfactory, but in lieu of the words, 'In the life-time of the assured' it would perhaps be better to use the phraseology of the Alberta act which is 'Before maturity of the policy.' This would cover better the case of an endowment policy. Where there are several beneficiaries, the share of a deceased beneficiary shall accrue to the surviving beneficiaries, if no other disposition is subsequently made by the assured. Sub-section 10 provides that the insurance company shall not be responsible for any change of beneficiary of which it is not notified. This is necessary, and, of course, satisfactory." Mr. Ferguson passed several sections dealing with other matters and came to section 186 dealing specifically with preferred beneficiaries. Continuing he said: "The first subsection of this section enumerates the preferred beneficiaries as husband, wife, children, grand-children and mother. Subsection 2 deals with the creation of the trust in favor of such beneficiary. Sub-section 3 provides that where two or more beneficiaries are designated without apportionment, all of them shall share equally.

Proceeds to Wife.

"Sub-section 4 deals with the case where the insurance is made payable not to a designated beneficiary but to a beneficiary described simply as wife, or as wife and children. The wording is satisfactory but the practice of so describing the beneficiary should be deprecated and possibly the act should state clearly that where a policy is made payable to the surviving children, the obvious meaning would apply. Sub-section 5 is badly worded and the meaning is by no means clear. The attention of the superintendents for Ontario and Saskatchewan might be directed to that sub-section in their consideration of any amendments. On close analysis it would appear that where a policy is in favor of a wife designated by name the proceeds of the policy shall nevertheless be paid to wife and children, which seems absurd. Sub-sections 6 and 7 deal with minor matters and are satisfactory.

"Sub-section 8 is a long affair and probably it cannot be shortened. It makes provision for the death of the preferred beneficiary in the life-time of the assured and authorizes the assured to appoint by declaration a new beneficiary whether such new beneficiary belongs to the preferred class or not and proceeds to designate to whom the proceeds of the policy shall be payable should the assured fail to make any such declaration. It would be well here to provide that if the policy contract itself states that the insurance shall revert to the estate in the event of the death of the beneficiary such provision in the policy shall apply. The corresponding section in the Manitoba act is satisfactory. Section 187 authorizes a change of beneficiary within the limits of the preferred class. Section 188 deals with the case where the assured is unable to continue the insurance and permits him to borrow the premiums as they fall due or to accept a paid-up contract in lieu of the original insurance.

Greatest Variety Appears.

"Section 180 permits the assured in writing to require the company to pay him the profits or allot them as bonuses or premium reductions without consulting the beneficiary. This is satisfactory, but it would perhaps be better, as appears to be the case in Manitoba, to definitely make the profits belong to the assured without the necessity on his part of making application to the company in writing therefor. Subsections 2, 3 and 4 of this section deal with the question of surrendering or assignment of the policy and in general provide that this may be done jointly by the assured and beneficiary if the beneficiary is full age.

"A few points in the other acts differ from the similar legislation in Saskatchewan. The list is by no means complete and perhaps some important points have escaped my attention. The greatest variety appears to exist in the clauses making provision for the death of the beneficiary, but none of the provinces appear to think that the assured and the company have any right to contract between themselves in this important particular.

Beneficiaries Protected.

"Manitoba has a peculiar provision which seems to make it illegal for a man to insure his life in favor of a preferred beneficiary under an endowment policy for less than ten years or under a five-payment or single premium life policy. No doubt the intention was that the beneficiary under such a policy would not be regarded as preferred, but the wording has lamentably failed to express this idea. In Quebec the situation is complicated by the fact that the intricacies of the civil law have to be taken into consideration. The preferred class of beneficiaries is protected as in Ontario and changes may be made subject to practically the same restrictions. But in the case of ordinary beneficiaries, an acceptance of the benefit by the beneficiary removes the policy from the exclusive control of the assured. The difficulty is that 'acceptance' may be consummated in various ways and without necessarily coming to the attention of the company. The utmost care has thus to be exercised in recording any change of the ordinary beneficiary. In British Columbia, one section of the act stipulates that a policy may only be made payable to a trustee with his assent, while another section dispenses with this restriction. The restriction is unnecessary."

Uniformity Keynote of Convention.

Mr. Ferguson said in conclusion that he thought uniformity with regard to the legislation referred to could best be secured by having the subject dealt with in the Dominion Insurance Act. "That act," he said, "does not now deal with beneficiaries, and under the British North America Act cannot deal with them. If the latter act were passed now, undoubtedly insurance, like banking, would be relegated to the exclusive jurisdiction of the Dominion. However, there is no use in discussing this point, as an amendment to the constitution of Canada could not be expected in the immediate future and the best omen of uniformity is the fact that the provincial superintendents are able to meet in conference as they are doing. These gentlemen will largely control the form of the insurance laws in their respective provinces and it will be extremely easy for them to co-ordinate their efforts with the work of the commissioners proposed by the Dominion Bar Association." Mr. Ferguson was delighted to observe that uniformity was the keynote of the convention from beginning to end, and congratulated the superintendents on their coming together and wished them every success in their laudable undertakings.

CONFLICT IN INSURANCE LEGISLATION

British Columbia Insurance Superintendent Talks of Privy Council Decision

"The conflict in the field of insurance legislation," said Mr. W. G. Garrett, superintendent of insurance of British Columbia, at last week's Winnipeg conference of insurance superintendents, "furnishes a typical instance of a problem, which has yet to be solved, namely, the mutual recognition and adjustment by the Dominion and the provinces of the rights and duties which can be exercised by or are imposed on them respectively by the British North America Act. The problem is generally composed of several factors. There is a technical side, a historical aspect, and the standpoint of expediency, by which I mean, whether it is in the best interests of the community that the Dominion or the provinces or both should pass legislation. It will be my object to treat the matter from the standpoint of jurisprudence, and so far as my knowledge and time for studying the question goes, to review the position mainly as it affects companies and the business of insurance. The principles at issue can be well illustrated by insurance legislation. Any opinion I express is quite personal and no authority whatever has been delegated to me to say anything on behalf of the British Columbia government."

Effects of Judgment

Mr. Garrett then referred to the "Insurance Reference Case," and the judgment of the Privy Council rendered therein. "In the upshot the decision of their lordships was," he said, "a victory for neither side. It was, unfortunately," he continued, "a victory without peace and not peace without victory. Perhaps one can summarize the consequences in this way, namely, that the Dominion loses control over individuals and provincial companies, and the provinces lose control over Dominion companies and foreign companies, in the sense that neither authority can prohibit from carrying on the business of insurance. Admitting this view to be sound, the future has yet to determine what are the full and precise effects of the judgment, and it is very probable that further litigation will be inevitable unless a via media can be discovered by mutual consent."

Barred from Regulation.

By way of summary, Mr. Garrett then submitted, that while parliament has authority to legislate for aliens and Dominion companies and in reference to trade and commerce, it is barred from the regulation of any single trade like insurance. "The new act," he said, "is an act for regulation in the full meaning of that word and to the same extent as the former act. Mr. Newcombe, himself, admitted that such was the character of the repealed act. In that light it does not appear to be properly framed legislation within the meaning of the Privy Council's judgment in the 'Insurance Reference.' It may be described as colorable legislation. Mr. Lefroy, in his book on 'Canada's Federal System,' lays it down as a leading proposition that parliament cannot under color of general legislation deal with what are provincial matters only. Such an exercise of power constitutes an attempt to do indirectly what there is no authority to do directly. In certain other respects the legislation would seem to fall within another of Mr. Lefroy's propositions—viz., that if parliament does not possess the legislative power, neither the exercise nor the continued exercise of such power can confer it or make its legislation binding. This is not to say that the Dominion has no rights at all in the field of insurance matters. I have quoted from a judgment the pronouncement that a matter may in one aspect belong to the Dominion and in another to a province. The task is to discover the limits of our respective jurisdictions."

Not to Assail Legislation.

Mr. Garrett, in conclusion, repeated emphatically that he held no brief to assail the legislation because it was concerned with insurance matters; nor should we in any way impeach its motives—with those we are not concerned. It may quite well be that the insurance act for example was a most expedient measure in the interests of the public generally. It was manifest, however, that the Federal government proceeded on the motto "What we have we'll hold," and clung tenaciously to jurisdiction which it has exercised for a long period almost unquestioned. The large issue at stake involved a fundamental principle of the constitution under which we lived; the question was not merely academic, or theoretical, or even one of policy or expediency. Legislation of this class goes to the root of the autonomy in the sphere assigned to the provinces by the "British North America Act." The passage of any such legislation as invades a provincial area was a danger signal and a province would be derelict in its duty to the trust imposed on it, if it failed to mark the peril. Legislation of that type which could not be sustained because it encroached on provincial rights, should be challenged. Obviously, it was only a step to the infringement of one right after another, and that would ultimately entail the subversion of the Federal system.

Mr. J. Burtt Morgan, president of the Life Underwriters' Association of Canada, 1917, died at a home in Victoria, B.C., on November 28th. He did valuable work in the association and in endeavoring to have the subject of life assurance made part of the curriculum of the various universities throughout Canada.

VICTORY LOAN SUBSCRIPTIONS

List of Subscribers Whose Names Have Been Announced —Many Montreal Subscriptions Recorded

The following is a further list of subscriptions to the Victory Loan. The fourth list appeared in *The Monetary Times* last week:—

INDUSTRIAL AND OTHER COMPANIES.

Canada Cement Company, Montreal, $2,[illegible]; Robins Dry Dock & Repair Company, Montreal, $5[illegible],000; Williams & Wilson, Montreal, $5[illegible], Lymans, Limited, Montreal, $25,000; John Murphy & Company, Limited, Montreal, $25,000; Burnett & Company, Montreal, $25,000, Barnard & McKeown, Montreal, $10,000; Saymour Manufacturing Company, Montreal, $5,000; D'Allaird Manufacturing Company, Montreal, $10,000; Gouceht Canada, Limited, Montreal, $10,000; United Marine Contract Corporation, Montreal, $5,000; Dood-Simpson Press, Limited, Montreal, $1,500; Northern Fur Manufacturing Company, Montreal, $3,300; Dominion Brake Shoe Company, Montreal, $5,000; Dominion Brake Snoe Company, Toronto, $5,000; Dominion Brake Shoe Company, Winnipeg, $5,000; Dominion Brake Shoe Company, Vancouver, $5,000; Canadian Electric Railway, Montreal, $2,000; Southern Canada Power Company, Limited, Montreal, $10,000; Colonial Hide Company, Montreal, $7,000; A. Hollender & Sons, Limited, Montreal, $5,000; Montreal Pressed Brick Works, Limited, Montreal, $12,500; Edwin Crabtree & Sons, Limited, Montreal, $8,000; Thornton Davidson & Company, Montreal, $5,000 E. W. Gillett Company, Montreal, $5,000; Craig & Luther, Montreal, $6,000; Fenwick & Ryan, Montreal, $1,000; D. Cream & Company, Montreal, $5,000; Danforth Brothers, Montreal, $1,000; Chartrand & Turgeon, Montreal, $2,000; Legare Automobile, Limitee, Montreal, $1,150; Hector Lamontagne, Incorporated, Montreal, $4,000; Dominion Mutual Travellers' Association, Montreal, $2,000; Kaplan Samuelson & Company, Montreal, $2,000; Bell Telephone of Canada, Limited, Montreal, $153,900;

Canada Steamship Lines, Limited, Montreal, $440,650; Canada Malting Company, Limited, Montreal, $2,000; B. Gardner & Company, Montreal, $5,550; Canadian Converters Company, Limited, Montreal, $18,950; Mark Fisher & Sons Company, Montreal, $8,300; McIntyre Son & Company, Montreal, $12,000; Canada Cement Company, Montreal, $165,000; James Strachan, Limited, Montreal, $6,450; Alex. McArthur & Company, Montreal, $1,450; Greenshields, Limited, Montreal, $48,000; National Breweries, Limited, Montreal, $13,300; Canada Box Board Company, Limited, Montreal, $1,450; Electrical Equipment Co., Limited, Montreal, $2,550; Alfred Lambert, Incorporated, Montreal, $1,000; Canada Stove & Foundry Company, Montreal, $6,500; Castle Blend Tea Company, Montreal, $1,950; Hydraulic Machine Company, Limited, Montreal, $1,050; Salada Tea Company, Montreal, $4,500; the Tetrault Shoe Company, Montreal, $2,500; Jenkins Brothers, Limited, Montreal, $25,000; Canadian Vickers, Limited, Montreal, $172,250; Canadian Allis-Chalmers, Limited, Montreal, $19,050 Lawrence A. Wilson Company, Limited, Montreal, $1,200; Ogilvie Flour Mills Company, Limited, Montreal, $117,950; Hanson Brothers, Montreal, $100,000; Singer Manufacturing Company, Montreal, $50,000; Ogdensburg Coal & Towing Company, Montreal, $50,000; Canadian Appraisal Company, Limited, Montreal, $9,000.

Union Carbide Company, Welland, $250,000; Plymouth Cordage Company, Welland, $100,000; Electro Metals, Welland, $100,000; Electric Steel & Metals, Welland, $100,000; Standard Steel Company, Welland, $11,000; M. Beatty & Sons, Welland, $10,000; Provincial Gas Company, Welland, $20,000; Canadian Union Furnace Company, Welland, $100,000; Canadian Niagara Power Company, Welland, $250,000; American Cyanamid Company, Welland, $100,000; Credit Foncier Franco-Canadien, $100,000.

INDIVIDUALS.

A. C. Gour, Montreal, $20,000; E. Beaudry, Montreal, $1,000; E. P. Guy, Montreal, $3,000; H. R. A. Viau, Montreal, $1,000; L. A. Lessage, Montreal, $1,000; Gideon Constantimeau, Montreal, $5,000; J. Marquette, Montreal, $1,000; Henri Kieffer, Montreal, $1,000; Alph. Raymond, Montreal, $250; Mde. Alph. Raymond, Montreal, $250; Jacques Raymond, Montreal, $100; Eug. Raymond, Montreal, $100; Paul Raymond, Montreal, $100; Jean Raymond, Montreal, $100; Alph. Raymond, Jr., Montreal, $100; Dame T. E. Marot, Montreal, $1,700; E. R. Decarie, Montreal, $1,000; S. Henry Miles, Montreal, $10,000; Jean L'Archeveque, Montreal, $1,000; C. Wilkinson, Montreal, $2,500; C. E. Burrough, Montreal, $1,000; I. Dugas, Montreal, $4,000; Blanche Desautels, Montreal, $1,000; J. A. Adam, Montreal, $2,000; W. H. Biggar, Montreal, $5,000; Fred. J. Schnaufer, Montreal, $1,000; Robt. E. Schnaufer, Montreal, $1,000; Geo. J. Robinson, New York, $5,000; J. A. Mann, New York, $1,000; J. McNaught, New York, $1,000; W. T. Niven, New York, $1,000; Miss V. E. Macdonald, Montreal, $2,500; W. D. Robb, Montreal, $5,750; J. B. Knox, Montreal, $3,000; Frank H. Cole, Montreal $3,000 Albert Workman, Montreal, $1,000; T. L. Marler, Montreal, $10,000; Rev. Hugh Pedley, Montreal, $3,500; Z. Peter J. Diemer, Montreal, $4,000; Arthur Hough, Montreal, $2,000; C. McBurney, Montreal, $1,000; W. E. Hudson, Montreal, $1,000; Leon Celester, Montreal, $1,000.

A. E. Abbott, Montreal, $2,000; H. Wild, Montreal, $5,000; T. M. Anderson, Montreal, $1,000; C. C. Anderson, Montreal, $1,000; Mrs. Mary A. Hanna, Montreal, $1,500; Mrs. Retta Hanna, Montreal, $1,000; Duncan McLennan, Montreal, $1,000; J. McConnell, Montreal, $1,000; B. W. Coghlin, Montreal, $2,500; T. E. Hodgson, Montreal, $15,000; Sir H. Montagu Allan, Montreal, $20,000; Bryce J. Allan, Montreal, $5,000; F. F. Rolland, Montreal, $25,000; Mrs. F. F. Rolland, Montreal, $25,000; C. S. Phelan, Montreal, $25,000; Aug. N. Bedard, Montreal, $25,000; W. R. Stavert, Montreal, $10,000 E. Archibald, Montreal, $5,000; W. A. Wilson, Montreal, $5,000; Mrs. A. W. Allan, Montreal, $15,000; Thos. A. Wood and family, Montreal, $2,650; R. Walsh and family, Montreal, $20,000; T. O. Davidson, Montreal, $5,000; J. P. Myres, Montreal, $5,000; Mrs. Hastings, Montreal, $15,000; H. D. Dwyer, Montreal, $10,000; A. H. Chave, Montreal, $2,500; Alex. F. Graham, Montreal, $5,000; Walter Marshall, Montreal, $3,000; F. W. Sharpe, Montreal, $5,000; Marion W. Thompson, Montreal, $10,000; C. I. DeSola, Montreal, $5,000; Henry Black, Montreal, $2,000; Andrew Baxter, Montreal, $1,000; Jas. J. Esplin, Montreal, $2,000; H. E. Hebble, Montreal, $1,000; M. G. Isdale, Montreal, $1,000; Geo. G. Raymond, New York, $5,[illegible]; H. B. Smith, New York, $5,[illegible].

E. Deshaies, Montreal, $1,000; Emile Martineau, Montreal, $2,500; J. M. Fortier, Montreal, $5,000; Tancrede Leduc, Montreal, $1,000; Hon. Rodolphe Lemieux, Montreal, $1,[illegible]; Patrick J. Burns, Montreal, $1,[illegible]; Mme. Nar[illegible] Perodeau, Montreal, [illegible]; [illegible], Montreal, [illegible]; Rev. L. H. Filiatrault, Montreal, $2,000; Yves Bazin, Montreal, $2,000; Mme. Lea Lepine Dal[illegible], Montreal, [illegible]; [illegible] Ruddy, Toronto, [illegible]; J. Allan Ross, Toronto, $100,000; Dr. Herbert Bruce, Toronto, $5,000; O. H. Moore, Toronto, $5,000; Hamilton B. Wills, Toronto, $15,000; L. J. West, Toronto, $11,000; Hamilton B. Wills, Toronto, $35,000; Mrs. A. J. Lyal, Toronto, $1,000; Geo. Wright, Toronto, $10,000; Lol. Solman, Toronto, $5,000; H. H. Williams, Toronto, $50,000; Gordon Osler, Toronto, $1,000; Unity Lodge No. 47, R.T., St. Thomas, $1,000; John G. Sullivan, Winnipeg, $1,000; Mme. OUR SERIOUS COAL PROBLEM

A serious warning as to the necessity for national organization was uttered by Sir George Foster at a Victory Loan meeting in Toronto last week. Just as we are now dependent on our own financial strength, so we may, as the war continues, be thrown upon our own resources in other directions. Sir George mentioned the multiplicity of regulations governing exports, including coal, from the United States to Canada. The time might come, comparatively soon, he said, when the United States, because of the exigencies of war, might have to ask us to depend upon our coal resources. As the neighboring republic assumes a larger share of the conflict, it would require more and more of its resources for carrying on the war. The lesson for Canada is the immediate organization of national resources for application to war conditions.

The statement of Sir George follows closely a similar plea of Sir Clifford Sifton at the recent annual meeting of the Commission of Conservation. War conditions have brought home to the people the critical position in which they stand with regard to fuel and the necessity for applying intelligent study to the whole question. Sir Clifford said that upon the whole question of coal, Canada is woefully behind the times. "Wasteful methods of mining are permitted throughout Western Canada," he said, adding: "No serious attempt has been made to grapple with the problem of preventing the serious and irreparable waste which is constantly going on in the mining of our coal areas. Provisions for inspection to prevent the loss of human life has been made by the provinces; but the permanent waste of very large quantities of valuable coal still goes on. What is required is a competent public service of technically trained men who will undertake the supervision and control of the mining of coal upon Dominion lands and put an end to the waste."

This waste, in peace time, is bad enough; in war time, it is almost criminal. In national organization, the Dominion government must lead the way. The question of our coal supply is a matter for their immediate attention in co-operation with technically trained men.

In his article in *The Monetary Times Annual*, 1917, Mr. Arthur V. White, a well-known consulting engineer who has made a special study of this problem, repeated statements made from time to time by various United States authorities which cannot allow us to forget how dependent we are upon the United States for our coal supply. The situation presents a serious national problem for solution.

HALIFAX

To the city of Halifax, in its great disaster, the practical sympathy of the entire Dominion is extended. While the organization and work of national reconstruction is proceeding, the immediate task of relief is well in hand. Halifax will not be allowed to want or to appeal in vain. Every province will do its share in helping to mitigate suffering, to provide the immediate necessities, and to rebuild the devastated portion of that historic city.

To those States, municipalities, and other organizations in the neighboring republic, and to Congress, the Dominion expresses thanks for the assistance which they rendered so quickly. In a manner which typifies the splendid spirit of our neighbors, relief trains and ships were on their way to Halifax before even the advice of their despatch.

The explosion of the munition ship in Halifax harbor may not have been due to German machinations. At the same time, many will believe that the arrest of Germans in Halifax was delayed too long. After reading the evidence at the Kaltschmidt trial at Detroit, we cannot afford to allow enemy aliens much freedom of movement in this country. The testimony of one of the witnesses was that Kaltschmidt had conspired to blow up munition ships in New York harbor in 1915. At another German agency trial at Concord, N.C., a witness stated he had told United States Secretary Daniels of a plot to burn the Parliament Buildings at Ottawa four weeks before it occurred, and told him also just how it was to be done. If the Halifax disaster is devoid of Hun devilment, yet it reminds us of the dangers which war brings to a belligerent country even though distant from the battlefields. One of those dangers is the German agency system on this continent headed by cut-throat ambassadors, criminal diplomats, and their lawless gangs.

BUYERS OF VICTORY BONDS

Those who sold Victory Bonds were impressed particularly by the response of the farmers and factory workers. To the three previous loans, their subscriptions were comparatively few. To the Victory Loan these two groups of subscribers supplied many millions of dollars and represented many thousands of subscribers. In numerous large and small plants throughout the Dominion 100 per cent. of the workers purchased bonds. Like many other subscribers, they appreciated an excellent investment, the phase of patriotism and the fact that our present prosperity and active business conditions depended upon the substantial oversubscription of the Loan.

Had it not been for the large volume of war orders placed here during the past three years, we should have experienced a serious business depression owing to the dislocation caused by the war. Industrial workers would have been among the first to have felt the adverse affects. War orders received in Canada to date exceed $1,500,000,000.

In Western Canada, the bond salesmen report that if another war loan is necessary, the farmers will subscribe $5 for every $1 subscribed to the Victory Loan. Mr. E. R. Wood recently pointed out that the farmer is particularly interested in helping to subscribe our war loans, thus creating credits here for British purchasers. British investors before the war had invested in Canada $2,914,000,000, many millions of which were placed in farm mortgage loans throughout Canada. Not only have the people of Britain loaned their funds in generous amounts to the Canadian farmer, through our various loaning institutions; they have also purchased the bulk of Canada's farm products. In short, Britain has largely financed the Canadian farmer and at the same time has been his best customer.

BANK PROFITS AND BUSINESS

In his address at Toronto, announcing the Victory Loan results for the Dominion, Mr. E. R. Wood last week gave a long list of substantial corporation subscriptions to the Loan. He concluded the list with the remark that "after all, it is sometimes useful to have a few big institutions around." Financial institutions and big business have always been the butt of criticism, much of it unwarranted. Without a sound financial and business foundation, however, national activities would be lessened and our continued participation in the war endangered. This point was emphasized by Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, at the annual meeting of that institution last week. In times like these, he said, when the fate of Empires is at stake, full satisfaction from monetary profits alone is impossible; but there is gratification in knowing that the bank made substantial profits during the past year "because the business of the nation must proceed and the strength of financial institutions be maintained in order that the war may be more quickly won."

The balance of trade in Canada's favor created by munition exports is opportune and adds permanently to our national wealth, but as the available resources of Canada are not such as we can rely upon to provide peace exports in full substitution, Sir Frederick reminded us that we should stand prepared to meet the declension in trade which must start when the war is over. "Before the war is ended," he said, "Canada may have to cope with inability or unwillingness on the part of potential purchasers to provide payment for our surplus productions. Moreover, on the conclusion of peace our merchants and manufacturers may be confronted both by diminished demand and falling markets."

For these reasons good banking profits are needed. Sir Frederick did not hesitate to state that there has never been a time in Canada when banking credits required such careful consideration. This is very true, for it is impossible to gauge the business future. Therefore, what is sound banking business to-day may, under post-war conditions, easily develop into lock-up or doubtful loans.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Bashaw, Alta.—December 1—House, Ira Hatfield, destroyed.

Brandon, Man.—December 8 Paint shop of N. J. King, sign and auto painter, was damaged.

Fingal, Ont.—December 11—Public school destroyed. Cause, overheated pipe. Estimated loss $18,000. Insurance carried, $11,000.

Halifax, N.S.—December 6—Explosion and conflagration. Details of fire losses not yet available.

Hamilton, Ont.—December 4—Barn and contents of Patrick Boyd destroyed. Estimated loss, $2,000. Cottage and contents of Alex. Laidman, damaged. Estimated loss, $600.

December 6—Residence of George Carrick damaged. Estimated loss, $1,000.

December 10—The central market hall destroyed. The chief losers were the Fowlers Canadian Company, John Duff and Son, Will. J. Lord, W. and B. Bessey, T. J. Tshann, Armour and Son, Swift Canadian Company. Estimated loss, $85 000.

Ingersoll, Ont.—December 9—Barn and contents of R. Ellis destroyed.

Kinsella, Alta.—December 2—Post office and large quantity of mail destroyed. Mrs. D. Corbett, acting postmaster in charge. Cause, explosion of gasoline lamp.

Quebec, Que.—December 5—Blacksmith shop beside residence of Mr. George Gore, destroyed.

December 6—Unfurnished house damaged. Estimated loss, $1,500.

December 8—Church of St. Anne de la Focatière damaged.

St. John, N.B.—December 4—House and furniture of Mr. Ben Groundwater destroyed.

Toronto, Ont.—December 6—Polson's Iron Works destroyed and large 4,000-ton freighter greatly damaged. Estimated loss, $300,000.

December 9—Building and contents of Ideal Bread Company damaged. Estimated damage to building, $100; to contents, $50. Building is owned by W. Johnson, and rented by the above company.

December 10—Building and stock of Canadian Auto Sales Company damaged. Estimated loss, $17,000. Building and stock of Crawford Brothers, tailors, damaged. Estimated loss, $1,500.

December 11—W. E. Dillon and Company's manufacturer's building and contents damaged. Estimated loss, $7,000. John Crane Company, occupants of the fourth floor, lost about $5,000, of which about $1,500 is machinery. The damage to the building is placed at $1,500. The remaining $500 is divided among other tenants. Two sheds, rear 24 D'Arcy Street destroyed. Estimated loss, $275.

Wainwright, Alta.—December 7—The oil house and contents of the Grand Trunk Pacific was destroyed. Estimated loss, $1,000.

Wallaceburg, Ont.—December 10—Dominion Sugar Company's plant and contents damaged. Estimated loss, $100,000.

Winnipeg, Man.—December 10—Three-story Gordon apartment block destroyed. Estimated loss, $25,000.

Mr. C. H. Easson, general manager of the Standard Bank of Toronto has been elected as one of the directors of the American Foreign Banking Corporation of New York. The Standard Bank of Canada has become a stockholder in the corporation, and will act as its agent and correspondent. It brings to the banking corporation the facilities of its 129 branches and agencies in Canada. The Standard Bank's capital is $3,333,242; its surplus $4,486,835.

HEALTH AND ACCIDENT INSURANCE

Contracts Should Be Standardized—Assured Would Benefit

Mr. A. E. Fisher, superintendent of insurance for Saskatchewan, speaking at the Winnipeg conference last week regarding the standardization of health and accident contracts, read a portion of the report presented by the casualty managers in November, 1916, to Justice Masten, chairman of the Ontario commission, as follows:—

"The question of a standard policy has been the subject of discussion between the managers of the casualty companies in Canada for some years past, culminating in the appointment by the Casualty Insurance Managers' Association in December, 1915, of a committee to draft a standard policy for presentation for adoption by the association. The policy now filed with the commission was finally adopted by the association and recommended to be used.

"The companies have postponed bringing the standard policy into general use for the reasons that the subject of standard provisions is now being one of enquiry by this commission, that the Dominion superintendent of insurance has been, and is, contemplating legislation regarding accident policy provisions, and the superintendents in some of the other provinces are also considering such legislation.

Joint Conference Desirable.

"At the request of the Dominion superintendent of insurance our committee had interviews with him and discussed this subject. During the course of discussion we have pointed out the advisability of a joint conference of the Dominion superintendent of insurance with the superintendents of insurance of the provinces with the object of securing uniformity in any legislation which may be enacted. This course we urge on your lordship as very desirable. Otherwise, we fear that if varying legislation in the several provinces is brought into effect the object of a standard policy would be largely defeated and might leave the companies, which carry on business in all the provinces of the Dominion, in a continual state of chaos regarding policy forms.

"We not only advocate standard provisions but strongly urge, in addition, the adoption of standard benefits in accordance with the standard policy filed with your lordship, a copy of which is also appended hereto.

Provisions are Liberal.

"The provisions in the policy we recommend are, for the most part, those conforming to the requirements of the New York Standard Provisions Act, 1913. As previously stated, acts following closely the same texts are also in force in seven other states. We have made our provisions even more liberal than the New York provisions, and some changes were necessary in order to comply with Canadian conditions. The provisions are equally applicable to sickness insurance when covered under an accident policy.

"The superintendent of insurance at Ottawa," said Mr. Fisher, "has incorporated in the insurance act of 1917, section 134, a requirement relating to health and accident policies, 'that every such policy shall contain in substance the terms or provisions hereinafter specified.' Subsection 4 of section 134 states as follows:—

" 'Any of the foregoing terms or provisions which are inconsistent with terms or provisions required to be contained in the policy by the law of the province in which the policy is issued, shall not, to the extent to which they are so inconsistent, be required to be contained in the policy.'

Standardize, How Far?

"To-day," said Mr. Fisher, "the majority of the provincial superintendents are in conference assembled, the main object being the standardization of health and accident contracts. The question that naturally follows for us to decide is, how far shall we standardize

"The first thing that we must consider is the standardization of the statutory conditions which shall, as against the insurer, be deemed to be part of every contract in force within the province adopting this standardization. All seem to be agreed on this point. Personally, I am of the opinion that those parts of the contract dealing with the subject of what is commonly known as benefits should be left to the companies themselves.

"However, there are certain points that are arising in connection with the business that should be brought to the attention of this conference and dealt with here. May I draw your attention to a few items which have been brought to my attention through conversation with the agency force engaged in the sale of health and accident contracts?

The Word "Accident" as Applied to Insurance.

"What is an accident? Section 180 of the Saskatchewan insurance act, and the same section contained in the Ontario act, reads as follows:—

" 'In every contract of insurance against accident or casualty or disability, total or partial, the event insured against shall include any bodily injury occasioned by external force or agency, and happening without the direct intent of the person injured, or as the indirect result of his intentional act, such act not amounting to voluntary or negligent exposure to unnecessary danger and no term, condition, stipulation, warranty or provisio of the contract varying the obligation or liability of the assurer shall as against the assured have any force or validity.' "

War Risks Non-Insurable.

Mr. Fisher continued: "There are certain risks which have never been considered insurable by accident companies, and it has been customary for accident policies to exclude such risks, but the section may be construed as preventing the company from such exclusion in its policy. The most common example of this clause is the matter of war risks. In our fire contracts we absolutely state that the company is not liable for loss caused by invasion, insurrection, riot, civil commotion, military or usurped power. Shall we accord the same privilege to the accident companies by statute? We should be definite in this and have the same legal wording in all our acts.

When Does a Contract Take Effect?

"Mr. Finlayson in section 134 of the act requires every policy to contain in substance the provisions that in default to meet any of the payments of the agreed premium the subsequent acceptance of a premium by the company or by any of its duly authorized agents shall reinstate the policy to cover accidental injury thereafter sustained.

"Our insurance law stated in section 198 that where a contract of insurance other than life insurance has been delivered, it shall be as binding on the insurer as if the premium had been paid, although it has not in fact been paid, and although delivered by an officer or agent of the insurer who had not authority to deliver it. I know of cases where the assured held a policy, but his claim was not entertained because he had not paid a premium. Had this later action been tried the company would have certainly had to pay the loss. This is another point that must be dealt with.

Accident and Health Period Definite.

"When does a policy take effect on reinstatement? According to Mr. Finlayson's conditions, the accident and health period of reinstatement are definite. Are these periods standardized?

"What notice shall there be in the case of cancellations? Shall we allow cancellations by the company to be forthwith on receipt of notice, or shall we allow the insurer an opportunity to procure other insurance so that his insurance may be continuous.' "

Superintendent of Agencies

Wanted by well-established Life Insurance Company with Head Office in Toronto. Must be capable of organizing and handling Agencies throughout Canada.

INSURANCE COMPANIES AND STOCK NOTES

They Should Be Entirely Eliminated Within a Reasonable Time—Need for Better Regulations

In an address at the provincial insurance superintendents' conference, Winnipeg, on provincial insurance laws and admitted assets, Mr. S. R. Tarr, editor of Canadian Finance, referred to a recommendation drafted by the Association of Western Insurance Superintendents in 1914. This recommendation was to the effect that the full amount of the legal reserve of any provincial company (such reserve to be computed as though provisions of Dominion Insurance Act applied) should be held at its head office, in the form of such intact and available securities as are authorized under the Dominion Trustee Act—this to be certified to annually by the insurance superintendent of the home province. The introduction of legislation in accordance with the foregoing would go even further than the Dominion Insurance Act relative to investments by insurance companies. "On account of the practical benefits that would arise from uniformity in this regard," said Mr. Tarr, "it would seem best on the whole that various provinces should adopt in effect the investment provisions of the Dominion Insurance Act. In this connection there is to be borne in mind the following among other amendments passed at the last session at Ottawa, namely, that Canadian companies, other than life, are prohibited from investing in or lending on the security of the shares of any company transacting, or authorized by its charter to transact, the same class of business.

Opinion of A. E. Ham.

"During the session of 1915 Mr. A. E. Ham, superintendent for Manitoba, in his report to the legislature, said: 'I am of the opinion that the matter of stock notes requires attention. Many of the companies organized in this province sell their stock and accept notes for payment in lieu of cash. While this is a great benefit to the companies, in aiding them in selling stock and helping the promoters, it is a very dangerous practice, as many of these notes on due date are repudiated and worthless; thus a false impression is given as to the correct value of a company's assets. The Manitoba Insurance Act should place a strict limitation on the asset value of these notes or totally disallow them as an asset. Again in 1916 Mr. Ham reiterated his opinion as to this.

"It might be unfair," said Mr. Tarr, "to demand from existing companies a full and immediate compliance with proposed new standards after years of more easy-going regulations. But it is to be hoped that there will be revision of legislation in all the provinces which will prevent any new company's repeating the old mistakes and will within a reasonable period of time bring about the entire elimination of stockholders' notes from the admitted assets of existing provincial companies.

Need for Better Regulations.

"The past few years have made apparent the need for legislative strengthening of regulations applying to the chartering and supervision of provincial insurance companies. Particularly have recent financial conditions emphasized the unwisdom of the practice whereby companies have all along been allowed to regale the public—and satisfy (officially) the superintendents of insurance—with ambitious totals of assets largely made up of stockholders' notes, often long overdue.

"While new companies are not likely to be formed under existing financial conditions, the present is the best of times for careful overhauling of legislation. No new company should in days to come be licensed without adequate capital paid up in hard cash. Organization and stock-selling expenses of every description (paid or promised to be paid) should not be allowed to exceed a low specified percentage of the paid-up capital (excluding premiums thereon). Further the prospectus should contain a full statement of all contracts or agreements of any kind with promoters or others. Also, it might be a good idea to have the prospectus contain a detailed statement showing the paid-up capital stock and premium paid thereon of all Dominion and provincial life companies, together with the date of their organization, and the dividends (if any) paid by each company during preceding ten years. The past too general practice has been to pick out for prospectus use only proved 'winners' in the life insurance field, and base dividend prospects upon their showing.

"The point is generally overlooked by the investor in life company stocks, that his payments on stock premium do not count at all in the reckoning of the amount of his stock calling for dividends when the company does begin to pay them. I well remember the indignant surprise expressed by a leading Winnipeg business man when he found that a six per cent. dividend (for which he had waited many years) meant only 4 per cent. on a long-idle investment.

"The tale of woe told by unsophisticated dabblers in blue-print subdivisions has nothing on the plaint that is chanted in unison by nine-tenths of the purchasers of stocks in provincially chartered western insurance companies. The few provincial companies that have made good, with one or two exceptions, have taken out Dominion licenses by this time, or been absorbed. The majority of the others have ceased doing business altogether—the shareholders losing practically all their investment and the policyholders being reinsured, in some instances barely by the skin of their teeth. It is not necessary here to go over the long roll-call from Great Lakes to Pacific Coast. Please understand that this frank statement of facts is not intended as a reflection upon the work done by provincial superintendents of insurance. In large measure their hands have been tied. Their authority was circumscribed by legislation utterly inadequate in some respects to safeguard the business.

Cause of Disaster.

"One prime cause of disaster has been the practice of allowing shareholders' notes to count among assets—giving a false sense of security to policyholders and a fictitious feeling of affluence to shareholders. Gross advantage has too frequently been taken of the latter by promoters and company managers to run riot in organization and current expenses. You will remember that when the Manitoba Public Utilities Commission issued a report on the ill-fated Prudential Life of Winnipeg in the fall of 1915, it stated that the company had been going behind from the day it was born, back in the year 1907—though public, provincial authorities, and the press were hoodwinked by uninforming or cooked statements.

"The admission of shareholders' notes as assets is a fruitful source of gross misrepresentation in the publication, through the press and otherwise, of "cooked" annual statements issued months before the sworn returns are published in the little-read official blue books of the superintendents of insurance. To digress for a moment, may I say that in the matter of preventing serious divergences between preliminary published statements and blue book figures, some of the provinces (Ontario, Saskatchewan and Alberta), have taken a step in advance of the Dominion. Of course, under the Dominion Act shareholders' notes are not admitted as assets, but some Dominion licensed companies (for example the British Columbia Life) made a practice of including such items in their annual statements to shareholders and policyholders. Then there are other ways in which the actual standing of a company is sometimes glowingly over-stated. There is certainly need for legislative enactment, alike by the Dominion and the provinces, which will prevent the issuing of any statement of accounts that does not in all important particulars agree with the annual returns filed with the insurance department. Of course there are practical difficulties, which need not be here detailed, in the way of securing an absolutely rigid correspondence in all details, but this does not preclude the requirement of substantial consistency."

Should Introduce Legislation.

Mr. Tarr concluded with the hope that the provincial superintendents of insurance would continue to urge strongly upon their respective governments the absolute necessity of introducing legislation which will back up the departments supposedly responsible for the protecting of the insuring public.

Mr. Thomas E. Warren, manager of the Ticonderoga Pulp & Paper Company, Ticonderoga, N.Y., has been elected to fill the vacancy on the board of directors of the Riordon Pulp & Paper Company, Limited.

Mr. E. E. Hall, president and manager of the Dominion Loan and Securities Company of Winnipeg, has been elected a director of the A. Macdonald Company, Limited. He takes the place of Mr. A. Badenoch, who is now vice-president of the subsidiary company in Vancouver.

UNIFORMITY OF BUSINESS LEGISLATION

Proposed Appointment of Commissioners for Its Promotion

"Our Fathers of Confederation had a conception of the unifying force of a standardized law in Canada relating to property and civil rights, but it was only a partial conception," said Sir James Aikins, lieutenant-governor of Manitoba," at the conference of provincial insurance superintendents last week at Winnipeg. "Though originally only four provinces became confederated, they seemed impliedly to think that Quebec should be differentiated from the other provinces. This appears in section 94 of the British North America Act:—

" 'Notwithstanding anything in this act, the Parliament of Canada may make provision for the uniformity of all or any of the Laws relating to Property and Civil Rights in Ontario, Nova Scotia and New Brunswick, and of the procedure of all or any of the Courts in those three Provinces, and from and after the passing of any Act in that behalf the power of the Parliament of Canada to make Laws in relation to any matter comprised in any such Act shall, notwithstanding anything in this Act, be unrestricted, but any act of the parliament of Canada making provision for such uniformity shall not have effect in any Province unless and until it is adopted and enacted as Law by the Legislature thereof.'

Interference with Autonomy.

"Obviously those provinces did not act under its provisions nor are the newer provinces likely to for that would interfere with provincial autonomy. The effort which you are making towards uniformity of insurance law and the steps which the Canadian Bar Association are taking to that end will not either expressly or impliedly interfere with the jurisdiction of the provinces on those matters of legislation committed to them under section 92 of the British North America act. The association has made progress. Many, however, have considered that the work would be more certainly and effectively done if there was adopted in Canada what has been found so effective in the United States—namely, the appointment by the several provincial governments of earnest and experienced lawyers as a board of commissioners in each province and to represent those several provinces in a conference of all such commissioners. The result of this system in the United States has been of great advantage to the business men of the nation. What it has done for the United States it will certainly do for Canada. I cannot say that the association has, as such, adopted the principle, but the councils of the association in several provinces have expressed approval, as also has the bar generally of the province of Manitoba. There has been, therefore, prepared a form of act based upon the form of acts passed by states to the south of us, and which for your information I now lay before you. The association does not wish to have this passed for its own benefit, but because it is influenced by that broad spirit which hopes for the improvement of business conditions and the advantage generally of the Canadian people. Therefore, it is desirable to have the approval of leading business organizations in Canada so that the governments of the several provinces may feel that in the introduction of the bill they have behind them the opinion of the people who are interested generally in the commercial life of the country.

Copy of Draft Bill.

"The draft bill is as follows:—

" 'BILL

" 'To provide for the appointment of Commissioners for the Promotion of Uniformity of Legislation in Canada.

" 'WHEREAS to facilitate the carrying on of business in Canada it is desirable that there should be uniformity of Provincial legislation of subjects relating thereto

" 'WHEREAS His Majesty by and with the advice and consent of the Legislative Assembly of the Province of .... enacts as follows:—

" '1. The Lieutenant Governor in Council shall from time to time appoint three suitable members of the Bar of the Province of .... who with their successors are constituted a Board of Commissioners for the Promotion of Uniformity of Legislation in Canada and who shall hold office for a term of three years from the date of appointment or until their successors shall be respectively appointed. Any vacancies in said Board caused by resignation, death, removal from the Province or otherwise shall be filled for the remainder of the said term by the Lieutenant Governor in Council appointing others having the qualifications aforesaid.

" '2. It shall be the duty of the Board to examine the following subjects: Incorporation of Companies, Insurance, Assignments for the benefit of Creditors, and the discharge of debtors, Frauds on Creditors, Extra Provincial judgments and their enforcement, partnership, sales and transfer, mortgage and pledge of property real and personal, the execution and probate of wills, and other subjects upon which uniformity is desirable, to meet annually in conference with the Commissioners appointed for the same purpose by any other Province and the Canadian Bar Association where expedient concerning the matters above mentioned and concerning the drafting of uniform laws to be submitted for approval and adoption by the Legislatures of the several Provinces and to join with said other Commissioners and where expedient with said Association in such measures as may be deemed most expedient to advance the purposes hereinbefore mentioned.

" '3. The said Board of Commissioners shall keep a record of all its transactions and shall make a report thereon with recommendations to the Lieutenant Governor in Council for submission to the Legislature at each session thereof.

" '4. No member of the Board shall receive any compensation for his services but the Board shall be paid out of the Consolidated Revenue Fund upon Certificate of the Board approved by the Provincial Auditor the amount of the travelling and other personal expenses necessarily incurred by the members of the Board in the discharge of their official duties. There shall also be annually paid out of said Consolidated Revenue Fund upon the recommendation of the said Board approved by the said Auditor the expenses of printing and clerical assistance incurred by the Board in its work, and a sum not exceeding Five hundred dollars ($500) to meet together with appropriations from other Provinces for a similar purpose the Province's share of expenses of the work carried on by said National Conference of Provincial Commissioners.'

"We require in Canada," said Sir James in conclusion, "in order to accomplish this great purpose of union, hearty co-operation between all. All should unite in getting that unity that will alone bring strength to Canada, prosperity and progress."

ESTIMATES OF INSURANCE LOSSES AT HALIFAX

Rough estimates of the insurance losses at Halifax on the basis of information received in Toronto with regard to buildings, etc., and with calculations regarding insurance of piers, docks, cargoes, etc, are as follow:—

	Loss.	Insurance.
Buildings	$20,000,000	$10,000,000
Shipping loss	6,000,000	6,000,000
Goods in transit	5,000,000	5,000,000
Piers and docks	4,000,000	unknown
	$35,000,000	$21,000,000

A former resident of Halifax has made the following estimate of the loss in Halifax as follows:—

Two large manufacturing plants in destroyed district	$ 2,000,000
Loss of goods in transit	5,000,000
Loss of piers and docks	5,000,000
Loss of ships and cargoes	6,000,000
Loss of buildings, approximate	25,000,000
	$43,000,000

The estimated value of property in Halifax based on recent values is $150,000,000.

Whether or not all the property is covered by insurance is impossible at present to ascertain. Probably much is uninsured.

The companies involved will be able to bear the losses and remain in a liquid position. The ability of the companies to pay, however, does not mean that they may care to pay losses caused by explosion to persons who have only fire insurance policies. The contention may reasonably be advanced that a building shattered by an explosion with the valueless ruins afterwards devastated by fire is not a building which has, in the first instance, been destroyed by fire, and may, therefore, not render the companies liable under fire insurance policies. The companies, however, will probably take a generous view of the situation. Technical disputes as to the rights of fire policyholders to be reimbursed for their losses are not likely to be numerous.

Marine and explosion insurance claims will probably all be paid, as will the insurance on freight at Halifax.

HYDRO-ELECTRIC POWER DEVELOPMENT

St. Lawrence River Powers Should Be Fairly Divided, Says Sifton

The development of hydro-electric power in Canada, and especially in the provinces of Ontario and Quebec during the last ten years has been almost incredible, said Sir Clifford Sifton at the recent annual meeting of the commission of conservation, at Ottawa. "At the beginning of the work of the Ontario Hydro-Electric Commission," he continued, "the late premier, Sir James Whitney, stated that the commission would not require so much as 10,000 horse power. At this moment, the immediate requirements of the Hydro-Electric Commission in Ontario may be conservatively stated at 296,000 horse power, upon which demand there is a present shortage of about 70,000 horse power. A conservative estimate of the amount of power actually in use in the city of Montreal and its environs, is 225,000 horse power. The position with respect to the province of Ontario, and especially with regard to Niagara Falls, is one which should be considered with great care. At the present time, the Hydro-Electric Commission is about 70,000 horse power short, and it is not too much to say that this shortage will very rapidly increase.

Producing War Supplies.

"Sir Henry Drayton has reported to the federal government that it is not practicable to withdraw this 70,000 horse power, which is presently in demand, from the United States to which it is now being exported, for the reason that the power is necessary for the use of plants which are producing essential war material for Great Britain and her allies. The position is, therefore, that, whereas, 12 or 15 years ago, it was not thought that the Hydro-Electric Power Commission could make use of 10,000 horse power and accordingly permits to export were more or less freely given, there is now, in round figures, an immediate demand for 300,000 horse power, and the demand cannot be satisfied.

"A situation analogous to that in which Niagara power stood fifteen years ago now exists on the St. Lawrence River. A very large capacity for the development of power exists upon the St. Lawrence. There is a considerable development in the neighborhood of Montreal, but the greater portion of the power still remains undeveloped. Attempts are constantly being made to fatally complicate the position with respect to St. Lawrence power by securing the privilege of private development which will be followed by contracts for the exportation of the power developed.

"The Cedar Rapids Company exports something like 60,000 horse power per annum. An attempt was made some years ago to secure the privilege of developing the Long Sault power, the purpose being to export the greater portion of the power in the interest of a manufacturing corporation on the American side of the line. This project was defeated, largely through our efforts. A similar project is now being promoted, and we are resisting it with all our energy, and we trust with fair prospects of success. It is almost incredible that any responsible man should be so shortsighted as to favor this project in the face of the experience which we are now undergoing at Niagara. Within a few years there will be a demand for every horse power that can be developed on the St. Lawrence River to which Canada is entitled for use upon the Canadian side. The situation with regard to Niagara will undoubtedly be duplicated, and if we are foolish enough to allow vested interests to be created upon the other side of the line we shall inevitably find ourselves handicapped and embarrassed as we now are with respect to Niagara power.

St. Lawrence River Power.

"I have no doubt at all what ought to be done with respect to the great powers dormant in the St. Lawrence River. The United States government is not interested in the corporations that are endeavoring to get possession of the St. Lawrence powers from the other side. Neither is the Canadian government interested in the fortunes of the gentlemen who are promoting their projects on the Canadian side. They are very few in number, and their interests are confined entirely to themselves

"What the United States government and the Canadian government alike are interested in is that there should be a fair division of this power, that it should be developed in such a way that the neighboring and tributary population should have the use of it upon fair terms. A thorough study of the whole question inevitably leads to the conclusion that there is only one sound and satisfactory method of developing these powers, and that is by an international commission, under which the greatest and the best use of the powers will be made, the most economical development will be effected, a just and equitable division of the power will take place and the governments concerned will be able to administer the power as the Hydro-Electric Commission administers the power of Niagara for the benefit of the people who are directly concerned in its use. This bold and progressive policy, if adopted by the government of Canada, will undoubtedly command the support of our people.

"It is not a case of advocating what is generally described as public or government ownership. We have here a peculiar set of circumstances giving rise to a problem that is capable of being solved in only one way, and common sense indicates that we should solve it in that method. Let me on this point add a word of warning. The institution of this commission of conservation arose as one of the consequences of a conference which was called by Mr. Roosevelt, then president of the United States, at Washington, some time ago. At or about that time, Mr. Roosevelt pointed out in prophetic language how the people of the United States were being threatened with a water power monopoly, and to the best of his ability he projected methods of resisting the efforts which were being made to bring about that monopoly. Since that time, water powers have been monopolized in the United States to an extent that is almost incredible. I think that when the real figures are known, revealing the extent to which the available and easily developed water powers of the United States have been monopolized by a very few corporations, the people of that country will suffer a shock such as they have never experienced before with regard to the transaction of any of their public business.

Greatest of all Factors.

"It has become very plain within the last few years that hydro-electric power is the greatest of all factors in modern industry, and where any people endowed by nature with a vast supply of this essential element in modern manufacture, allow it to be monopolized and controlled in private interests a sad awakening awaits them. Fortunately in the Dominion of Canada, we got down to serious business in time, and there has been no serious monopolization of great powers. While large powers have been developed by private companies, they have served a very useful purpose, and in most cases their rates have been reasonable. A serious danger, however, would arise if, at that stage of development which we are now entering, these companies were allowed to combine their interests and by acquiring a few great powers which are easily accessible, to institute a monopoly. This would be the most serious of all mistakes and must be prevented at any cost. With respect, specifically, to the application which is now before the minister of public works for leave to dam the St. Lawrence River at the Coteau Rapids, I purpose suggesting that our committee on waters and water powers should give the matter attention and if possible wait upon the minister of public works and prime minister to emphasize the protest which has already been lodged."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 7th, 1917:—

Penn Canadian Mines, 55,761; Trethewey Mines, 41,521; Dominion Reduction Company, 88,000; Kerr Lake Mines, 60,647; McKinley-Darragh-Savage Mining Company, 167,761; total, 413,690 pounds, or 206⅘ tons.

The total shipments since January 1st, 1917, now amount to 25,661,614 pounds, or 12,830⅘ tons.

Montreal claims to have lost more than it gained in the Victory Loan campaign through the splitting of large subscriptions of corporations with headquarters there and crediting part to other localities. Notwithstanding that fact, the aggregate sent forward to the Dominion special subscriptions committee was $44,249,050, new money, made up of a total of 180 applications, making the average application $245,828.

STATUS OF AMERICAN DOLLAR

Review of Exchange Field — Swiss Comment on Anglo-American Exchange

The status of the American dollar as affected by war conditions is discussed in a recent bulletin of the Swiss Bank Corporation, which reviews the foreign exchange field.

"The sudden fall of the dollar below par in Switzerland," says the bulletin, "surprised many who had begun to regard it as an almost universal monetary instrument, and as shielded from the abrupt variations to which European currencies have become subject. Everything seemed to favor the dollar. The United States had accumulated huge reserves, had the commercial balance immensely in her favor, had bought back great quantities of her own securities, and had lent enormous sums to the Allies."

The bulletin rejects the suggestion that since the United States went to war she has lost the confidence of other neutrals, who in any case had no such balances in America that their withdrawal could vitally disturb the exchange. The Swiss commentator finds in the almost complete fixation of the Anglo-American exchange a sufficient reason for the dollar moving with the pound sterling in a purely neutral atmosphere.

Status of the Pound.

With respect to the pound, the bulletin remarks on the success with which depreciation was so long fended off by ways and means that are enumerated. It is implied that this success might have been continued had not Great Britain put her credit and financial power so freely at the service of her overseas dominions and her Allies. Despite the enlargement in the depreciation of the French franc, the bulletin counts that it has been relatively well sustained in Switzerland, considering how the balance of indebtedness has worsened. The Swiss writer remarks how incomplete the mobilization of French holdings of foreign securities has been compared with the vigor with which similar measures were enforced in Britain and Germany, which he attributes partly to the greater liberalism of the French government, coupled with the conservatism of "l'epargne Francaise."

Anglo-American Exchange Fixation.

It is judged that the solidarity now existing between the pound and the dollar may communicate itself to the currencies of all the Allies. Meanwhile the Swiss bulletin commiserates with the commission which has been charged with the work of studying and remedying the exchange situation, and says that the proposed system has no remedial quality.

The principal movements in the rates of exchange on the Swiss market are shown in the following table, on the basis of francs:—

	Parity.	July 31st. 1917.	Dec. 31st. 1916.
Paris	100	79.30	86.75
London	25.22	21.65	24.10
Berlin	123.45	63.50	84.60

This shows that the depreciation of the mark this year has been very heavy, from 84.60 francs to 63.50 francs per 100 marks, or over 25 per cent. The bank points out that Germany has now mobilized all her foreign securities in an effort to stay the fall in the mark; while her chief exports, coal and iron, have had to be curtailed more and more.

Although no statistics are available, it is evident that Germany's adverse trade balance is considerable, and very noteworthy is the indebtedness to Switzerland. The mark has now fallen 48½ per cent. despite the drastic effort made at the end of 1916 to rehabilitate it. But, as the bank points out, the causes of the depreciation still remain, and the mark must continue on its downward course.

Swiss Paper Money.

The position of the Swiss franc has been well maintained throughout the war. The paper circulation of the country has nearly doubled during that period, but has had a correspondingly strong metallic backing. Though Swiss industry has been hampered by lack of materials, on whose import the belligerents have imposed daily growing restrictions, the republic has exported on a scale which created credits acting in support of the national currency, and enabling Switzerland to amass considerable quantities of securities. So far as the tables and the chart appended to the bulletin show, the curves representing the relation of foreign to Swiss moneys are all descending. It is pointed out that, as Switzerland is a relatively small monetary reservoir, little causes may produce notable and rapid effects on the level of the exchanges.

Of the Allied currencies, those of Italy and Russia have fared worst. Italy had no mass of securities to realize, but has been able to enlarge her exportations to Switzerland. The bulletin says the lire will be among the first to revive after the war, because the old temporary and periodical emigration will be resumed, tourists will pour in with gold, and exports of silk, wine, fruits, and so forth, will take their old course.

The prospect of a restoration of the heavily depreciated rouble is much more remote. The bulletin acknowledges the great natural resources of Russia, which might lead to a development of exportation on a grand scale, provided security and regular work are re-established among a population diverted from its customary ways by revolution.

As regards Austro-Hungarian currency, the bulletin has little to say. The suppression of bank returns obscures the situation and the expedient of centralizing dealings in exchange works haltingly. External operations are rare, and the official quotations of the krone at home rarely correspond with those in neutral centres.

Commercial Balance Against Germany.

At an early stage Germany sought means of balancing the loss of her export trade by obtaining credits in neutral states and realizing her holdings of foreign securities. Her remaining exports, chiefly coal and iron, consistently decline as war needs grow at home. The commercial balance is against Germany with her neighbors, and in particular Germany becomes every month more deeply indebted to Switzerland. The establishment of a monopoly of exchange was of temporary service; "soon natural law asserted itself and the causes of depreciation not having disappeared, the influence of the monopoly was evanescent, for no arbitrary regulation of the market can produce or increase the indispensable instruments of exchange."

The exchanges of three neutral countries are discussed in the bulletin. It is observed that the Dutch florin was at a premium in Switzerland during 1915 and 1916, but is now at a discount, apparently temporary. It is asked whether this may be due to Holland importing more largely than Switzerland is able to do, or to her giving accommodation more freely to belligerents. In the absence of trustworthy data the question is left unanswered.

The Swedish crown attained a premium of 17 per cent. over Swiss currency in May, 1916, but did not long retain that elevation, though it remains over parity. On this the comment is that, as exemplified by timber, cellulose and minerals, Sweden has, more than other neutral states, been able to enlarge her exportation. Similarly, in the case of Spain, an improved commercial balance accounts for a favorable exchange, "and only political and social troubles can disturb the situation."

NEW INCORPORATIONS

International Business Machines Company Has Head Office at Toronto

The largest company incorporated last week was the International Business Machines Company, Limited, Toronto, with authorized capital of $2,000,000.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of the paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Victoria, B.C.—United Financial Brokers, Limited, $10,000.

Golden, B.C.—Yoho Mining Company, Limited (no personal liability), $200,000.

Maisonneuve, Que.—Star Shoe Company, Limited, $300,000; J. Nicol, W. Lazure, J. S. Couture.

Montreal, Que.—The Russell-Murray Cocoa Mills, Limited, $100,000; A. Wainwright, A. H. Elder, M. C. Lalonde. The Perfect Fit Company, Limited, $20,000. P. Schnabel, E. Greenspont, F. Perron.

Vancouver, B.C.—The Emporium Company, Limited, $100,000. The Vancouver Tobacco Company, Limited, $50,000. E. E. Devlin Business Service, Limited, $25,000. Hardwood Lumber Company, Limited, $15,000. The Amancipation Mining Company, Limited (no personal liability), $120,000. The Century Logging and Lumber Company, Limited, $10,000.

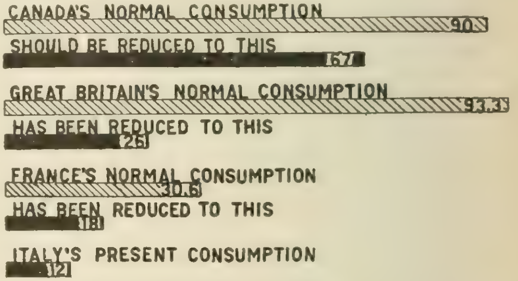
Winnipeg, Man.—Allied Grain, Limited, $40,000; A. W. Lewis, W. S. King, W. J. Donovan. Canadian Distributing Company, Limited, $5,000; M. Rosenthal, N. Adilman, J. M. Isaacs. Northland Milling Company, Limited, $100,000; A. T. Hawley, B. W. Thompson, H. Polson. Canadian Drug Corporation, Limited, $500,000; A. J. Bullock, J. F. Wallar, T. C. Parkin.

Hamilton, Ont.—Dominion Lumber and Coal Company, Limited, $40,000; E. S. Smith, H. P. S. Brennen, W. H. Hunt. The Dufferin Land Corporation, Limited, $40,000; H. D. Petrie, H. G. Ogg, M. E. Smith. The Duke Street Realty Company, Limited, $40,000; T. B. McQuesten, H. S. Archibald, J. Chisholm. Walsh's Garage, Limited, $40,000; L. F. Stephens, H. J. McKenna, H. Walsh. Fendal, Limited, $100,000; G. H. Levy, C. H. Higgins, A. M. Herriman.

Toronto, Ont.—Edward Clark and Sons, Limited, $500,000; G. H. Kilmer, H. H. Davis, E. H. Brower. International Business Machines Company, Limited, $2,000,000; F. E. Mutton, E. B. Ryckman, J. S. Denison. Joe Lowe Company, Limited, $10,000; M. B. Lowe, J. Price, L. G. Bell. Walsh's, Limited, $40,000; J. J. Walsh, F. J. Walsh, J. J. Walsh. The (British) Young High Velocity Carburetor Company, Limited, $250,000; H. H. Davis, E. H. Brower, L. A. Landriau. Bulmer's, Limited, $25,000; J. M. Glass, M. A. Bulmer, M. C. Bulmer. The Edwards Manufacturing Company, Limited, $40,000; R. E. Edwards, W. H. Whitehouse, J. M. Waterman. Manitoulin Sheep Ranching Company, Limited, $100,000; G. E. Barkley, W. H. Woulfe, D. Finemark. Millards Products, Limited, $40,000; A. Whitehead, R. J. Smyth, I. A. Cooper. Security Bond Corporation, Limited, $100,000; C. A. Stone, W. W. Dunlop, E. B. Schroeder.

CONSUMPTION OF SUGAR

This diagram, issued by the food controller, shows how Canada's present consumption of sugar compares with the present and the pre-war consumption in the countries of the European Allies. Before the war Great Britain consumed an average of 93.3 pounds of sugar per capita per annum. This has been reduced to 26 pounds, and the people of Great Britain are now on sugar card allowances. If the people of Canada and the United States will use only 3 ounces instead of 4 ounces per day per capita the Allies will have sufficient sugar. This would still leave us an average per capita consumption of 67 pounds of sugar per annum, which is more than 2½ times as much as in Great Britain and 3⅔ times as much as in France.



MONTHLY PRODUCTION OF COAL IN CANADA, by Provinces, 1917

(IN SHORT TONS)

Compiled by the Division of Mineral Resources and Statistics, Department of Mines, Ottawa

Month	Nova Scotia	New Brunswick	Saskatchewan	Alberta	British Columbia	Yukon	Total

OUR FINANCIAL PRESTIGE WILL AMAZE

So Says Sir George Bury in New York Interview—Value of C.P.R. Stock

Sir George Bury, vice-president of the Canadian Pacific Railway, was in New York last week with officials of the Canadian Railway Association, to see what can be done toward the release of 20,000 excess Canadian cars held by United States roads.

"Canada's best big thing just now," said Sir George in an interview with The Wall Street Journal, "is the great over-subscription to our last loan. Canadians have subscribed more than $400,000,000 to the pending $150,000,000 issue. Our people have tendered at least $1,000,000,000 to the government in bond subscriptions since August, 1914, and will give as much more money as the situation requires. Last fiscal year the government had a surplus of $60,000,000 applicable to capital expenditure or liability, and an equally good showing will be made at the end of March, 1918.

Amazing Financial Prestige.

"Our money is in most active circulation and our financial strength seems to grow on the demands upon it. We will come out of this war with financial prestige which will amaze your people down here. We are already a creditor country, despite the fact that Canadian business interests have studiously given first place to service and not to profit. Our income and profits taxes are in terms onerous, but a great deal of sound common sense has been shown in carrying out the law, and there has been fair play all round. The very best men have been selected to assess our special war taxes. In the west, for instance, the official in charge is a retired bank manager of forty years' experience, a first-class business man in all respects.

"Canada's labor problem is mainly one of shortage, but we are not denuded of man power and will manage to get along. If we can get back our 20,000 excess cars from this side of the line, we will find train crews to man them. Labor is the big cost item in every product. I believe in the ancient principle of freedom of price. If you are going to regulate prices, however, you must set a price on every commodity, product or service and then on the labor which goes into it."

Canadian Pacific Stock.

His attention being here called to the strength shown by Canadian Pacific stock at 131 and 132, Sir George said: "No Canadian sells that stock unless he needs the money." Without going into details I will say the operating end of the system is in condition to meet all demands, and possibilities. As a physical proposition the security behind the stock is even greater than when it sold at 280, but stock markets may be sentimental as well as old maids.

"As you know we now have a joint board of war administrators for all our railways. They were co-operating in a very full way before, but it was thought best to centralize authority for all eventualities much in the way it has been done here and in the old country."

Of the Dominion election he said: "From the very commencement of the war many of us favored coalition. It would have been an accomplished fact two years ago but for the conscription issue. We have a coalition cabinet now. It does not represent all elements of the Liberal party but it does voice the judgment of a large and patriotic Liberal interest. The present government has placed Canada on the political and commercial map of the world and has united the east and west from coast to coast on something more than a confederation on paper. There may be misunderstandings but Conservatives and Liberals equally are sacrificing everything to meet the present crisis."

Sir George Bury was in Petrograd as a member of the Milner Mission during the worst days of the first revolution. It is not now a breach of faith to say he was then emphatically of opinion that Russia's sole hope was in the extremely unlikely formation of a government by men of affairs who would brave the risk of re-establishing law and order with a mailed fist. His forecast of developments has been verified day by day since. He believes one of the main reasons of Russia's industrial and political collapse was the breaking down of her railway system, and says that without essential changes we may some day face a Russian railway collapse on the American continent

ELECTRIC SMELTING IN CANADA

It is in Full Operation Now—Steel for Shell Making—Recovery of By-products

Shortly after Dr. Haanel, the present director of mines, became connected with the public service at Ottawa, he was authorized to make an investigation into the question of electric smelting. The investigation was conducted in a most thorough and scientific manner, and its results were published in a report which has become a standard work in all technical libraries which aim to keep on their shelves up-to-date works upon modern industrial processes. At the time when this investigation was held, the general opinion prevailed that, while the investigation was interesting, the time was distant when electric smelting would be carried into practical operation in Canada. It is, therefore, worthy of special mention that the fruition of the efforts which were made in connection with that investigation has arrived and that electric smelting is now in full operation in Canada. Discussing this matter in an address at the recent annual meeting at the commission of conservation, Sir Clifford Sifton said there are, at the present time, 32 Heroult electric furnaces in Canada and 22 of other eypes—in all 54 furnaces using the electric process. These furnaces have a capacity of 173,000 tons of iron and steel, 50,000 tons of ferro-silicon, and 8,000 tons of other ferro-alloys per annum. The British Forgings plant at Toronto has 10 electric furnaces of the Heroult type and a total capacity of about 72,000 tons per annum, making it the largest electric process steel plant in the world.

Steel For Shell Making

An interesting development has also taken place with respect to steel for shell making, which has an important bearing on conservation.

"At the beginning of the war," said Sir Clifford, "all shells manufactured in England were made from acid steel. Practically all steel made in Canada was basic steel. The Canadian steel manufacturers had never made shells. It was not absolutely certain that they could meet the requirements of the war office and changing from the manufacture of acid to basic presented many serious difficulties.

"Colonel Cantley, with whom the first shrapnel shell order was placed, made a basic steel shrapnel sheet that met the war office requirements and thus demonstrated its practicability. In December, 1914, Colonel Carnegie, ordnance adviser to the Imperial Munitions Board, took to the war office the first machined shell ever made in Canada.

Recovery of By-Products.

"Later, he was able to convince the war office that high explosive shells made of basic steel would also meet their requirements. These munition orders have tremendously stimulated the metal and many other industries, notably the recovery of by-products from the coke oven plants. Incidentally also we have derived great benefit from the standardizing of methods and processes and the high degree of skill required to produce a product that is gauged to within one three-thousandth part of an inch and check-gauged to one ten-thousandth part of an inch. Over 250,000 workers have become skilled in such processes and in the use of such tools and gauges."

NORTHERN ONTARIO'S GOOD RECORD

"The final Victory Loan results from Northern Ontario were remarkable," said Mr. Charles Wurtele, of Messrs. A. E. Osler & Company, stock brokers and financial agents, Toronto, to *The Monetary Times* this week. Mr. Wurtele was Loan organizer for Temiskaming county. "Not taking into account any of the mining company's subscriptions, we got well over $1,250,000 while our objective was $468,000. I think that we were about 1 in 4 of the population, including the mines who subscribed in the north. Excluding about $2,000,000 which came to Toronto, the local subscriptions amounted to well over $2,000,000."

Is a United Quebec to Rule All Canada?

This, the most tremendous question in Canada's history, is to be answered within four days.

Our answer involves Canada's honour, her freedom and her future. Old-time party questions are being advanced to obscure the gravest issue ever placed before a nation. Canada is in real danger. The clouds that obscure her vision must be brushed aside so that the great issue stands forth clear and distinct.

"Is a United Quebec to Rule All Canada?"

To-day, in our national crisis, Quebec alone among all the provinces stands more united than ever before. She knows what she wants:—

(1) Withdrawal from the war.
(2) Bilingual schools everywhere.
(3) Weakening of the ties of British connection.
(4) Political control of Canada.

From the Ottawa River to Labrador and the Gulf, a common purpose actuates Quebec in her determination to profit by the factional divisions of Canada and to impose her will upon all the people of Canada.

Within the last few weeks, Quebec has mobilized all her forces to dominate Canada under the unified leadership of Bourassa and Laurier. Canada knows that these two men in their earlier days were personal friends and political associates. Canada knows how in recent times they gradually drew apart, until in 1911 Bourassa opposed Laurier and helped to bring about his defeat at the polls. Canada knows that from that time forward, until a few weeks ago, the breach between them steadily widened until envy and hatred, each toward the other, became the possession of both. Bourassa and his followers were anathema to Laurier.

Should not the people of Canada ask themselves, before it is too late, why these two men have suddenly agreed to bury the past, why this sudden embrace, each of the other? If we will but let the scales drop from our eyes, the answer is obvious. The all-compelling influences of Quebec have combined to force the union of Laurier and Bourassa in the common purpose of French-Canadian domination.

We concede the right of French-Canadians to make common cause of anything they think it is in their interests so to do. This is a free country. But as the French-Canadians have **already** combined to assert their views, it is the duty of the hour that we English-speaking Canadians get together and present to Quebec a united front in the defence of our rights. This is imperative.

With sixty solid seats, Quebec is about to accomplish her designs. Bourassa, the real master and idol of Quebec, is in sight of his goal.

To attain her purpose, Quebec has not scrupled to ignore British traditions and to suppress freedom of speech. So thoroughly organized is her campaign to prevent even the discussion of the war that Unionist candidates are prevented from holding public meetings throughout that Province. The Unionist minority in Quebec are the victims of organized obstruction.

To be successful in her determination to rule all Canada, Quebec has but to secure a few seats in each of the other Provinces. Quebec leaders now seek to divide the rest of Canada into factions by insidiously bringing into political discussion old-time party questions to divert the public mind from Quebec, her purpose and her ambitions.

United in her determination to quit the war, Quebec would compel a divided Canada to do likewise. By union only can the English-speaking people prevent this calamity.

However well-meaning Laurier candidates in Ontario may be, they will be helpless against a united Quebec.

Apart from the splendid work of the small English-speaking population, Quebec has failed the Red Cross, has failed the Patriotic Fund, has failed in recruiting, and has failed in the Victory Loan. Dare we trust our soldiers, their wives, their children, their pensions and their allowances to Quebec, that will neither give, enlist nor invest, and which will resist taxation for the support of our men and their dependants?

Canada must decide whether she will become a deserter and quit with Russia, or fight to the end for liberty with Belgium. This decision must not be dictated by the only Province which has shirked its obligations throughout the war.

All Canada knows that Germany has been working through agents, spies and bribes in every country in the world. The latest evidences are the revelations recently made to the world by President Wilson. Do we Canadians think the Kaiser has overlooked Canada? If we do, what a fool's paradise! He cannot be upon the side of Union Government, which is pledged to remain in the war.

Germany benefits by division among her enemies. Upon whom would she look in Canada as furthering her designs? Not Sir Robert Borden, Mr. Rowell and their colleagues in the Union Government. That is certain. But can the same be said with respect to the leaders in the Province of Quebec, whose attitude in this war is against Canada's continuation in the war? We regret to be compelled to say these things, but we must not shut our eyes to facts.

The Citizens' Union Committee, anxious for the maintenance of British ideals and traditions, views with alarm the menace of French-Canadian domination with its inevitable influence upon the home, the school and the state.

We, therefore, call upon all English-speaking men and women to realize that—Canada, divided by political factions and old-time party questions, is at the mercy of a united Quebec. Union Government alone can save Canada from the menace of French-Canadian domination.

WORLD'S GREAT BANKS

Three Canadian Banks are Among the Leading Eighty-four Institutions

Measuring their size by the volume of deposits, Canada has three banks among the leading 84 of the world's great banks. These are:—

		Deposits and current accounts. 1916.
1.	Bank of Montreal	£60,214,000
2.	Canadian Bank of Commerce	46,417,000
3.	Royal Bank of Canada	40,141,000

The figures are given in pounds sterling as in the original list, in which a number of English banks appear The other 81 banks are as follow:—

		Deposits and current accounts	
		1916.	1880.
1.	State Bank of Russia	£285,333,000	£37,971,000
2.	Imperial Bank of Germany	233,355,000	8,663,000
3.	Bank of England	178,865,000	33,809,000
4.	Deutsche Bank	175,169,000	3,215,000
5.	London City and Midland Bank	174,621,000	2,227,000
6.	Lloyds Bank	151,368,000	5,785,000
7.	National City Bank, New York	125,825,000	3,249,000
8.	London County and Westminster	120,368,000	....

83.	National Bank of India	20,808,000	3,287,000
84.	Glyn, Mills, Currie & Company	20,120,000	....

The Bank of Montreal is 24th in the list; the Canadian Bank of Commerce, 38th; and the Royal Bank of Canada, 44th.

LARGE EXPENDITURE SINCE WAR BEGAN

Canada's war expenditure during the month of November totalled $18,714,472, making a grand total of war expenditure to November 30th of $151,969,271. The total net debt on November 30th was $958,000,[illegible], as compared with $705,128,082 on November 30th, 1916. Revenue for the month on consolidated fund account was $24,322,046, and expenditure for the month $12,922,635. Revenue for the eight-months period to November 30th was $170,042,006 and expenditure $79,566,862.

Accurate figures regarding life insurance claims arising from the Halifax disaster are not yet available. The total of claims may be from $500,000 to $1,000,000. Considering the heavy insurance that has been paid on the lives of soldiers, however, this loss will not be an important item with most companies.

MOOSE JAW FINANCES AND REAL ESTATE

Reduction of Gross Assessment on Land — Arrears and Collections of Taxes

On the strength of fictitious assessments, the city of Moose Jaw in 1913 reached its maximum in real estate activity. Subdivision properties were assessed at sums which did not and never could bear any relation to the intrinsic value of these lands. This is a statement in the Moose Jaw city commissioner's report just issued, which continues:—

"The city launched into large expenditures, with the result that when the real estate boom collapsed the city found itself with a large per capita debt and an enormous area of unimproved land within its boundaries which had no value other than as agricultural property. As a consequence the resident owner of the city found himself saddled with heavy rates to pay for the debt created, as the owners of this outside subdivision property, the majority of whom were non-resident, were in many cases unable to pay taxes on the altogether fictitious value of these lands, and in a great many cases the city had to buy in these lands for the taxes.

"The city, whenever it realized the absurdity of this high assessment, at once took steps to have it reduced, with the result that the gross assessment on land has been reduced from $52,987,413 in 1913 to $23,470,355 this year, a reduction of 55.7 per cent. in four years. With the object of bringing the outside subdivision property down to an acreage value an even larger reduction has been made in this class of land, as for example "Highland Park" Subdivision, situated at the extreme western boundary of the city, was reduced from an assessment of $1,113 per acre in 1913 to $258 in 1917, a reduction of 76 per cent.; and Connaught Gardens to the north of the city was reduced from $1,065 per acre in 1913 to $192 in 1917, a reduction of 82 per cent. Proportionate reductions were made in all other lands within the city limits, the reduction in the original townsite "Old 96," amounting to $14,605,945, or 54 per cent., while the reduction in "Rosemount," a typical residential subdivision, figuring nine lots to the acre, was from $1,835 per lot in 1913 to $1,172 per lot in 1917.

City's Debts and Loans.

"The debenture debt of the city at the end of the period under review was $5,740,278. From this amount, however, has to be deducted sinking fund payments amounting to $454,358, which leaves a net debt of $5,285,920, or a per capita debt of $312. The net debenture debt for the corresponding period last year was $5,297,466.

"The only debentures sold during the year were in connection with the light and power plant, $44,000 being disposed of. The proceeds of this sale were used to repay current accounts of 1915, 1916 and 1917, from which money had been used in order to carry out capital works in connection with the plant, the balance being used in connection with power house alterations and improvements and in line extensions in various parts of the city.

"The sinking fund moneys are deposited with a board of trustees appointed by the city. The investments held by these trustees as at October 31st, 1917, were as under:—First mortgages on city property, $124,986.54; city of Moose Jaw debentures, $27,055.50; Dominion of Canada war loan, $85,000.00; Saskatchewan Rural Telephone debentures, $224,848.63; cash in bank, $3,558.25; total, $465,448.92.

"The city is due the sinking fund $88,101. The practice in former years was to borrow from the bank sufficient money to meet the sinking fund payments as they fell due, but as these payments are not urgently required to be met at the ments, and accordingly payments are made to the sinking fund payments of which are kept up-to-date, it was deemed unwise to borrow from the bank in order to meet these payments, and accordingly payments are made to the sinking fund only as the taxes are collected. As an offset to the amount due the sinking fund there have been surplus earnings earned by the sinking fund amounting to $30,66[illegible]. Investments made by the trustees since October 31st, 1916, are:—

Dominion of Canada war loan, $65,000; Saskatchewan Rural Telephone debentures, $87,000; total, $152,000.

"The city's liability to the Canadian Bank of Commerce as at October 31st, 1917, compared with the corresponding period of last year was as follows:—

Account.	1916.	1917.
1915	$154,000	$ 40,000
1916	280,000	96,500
1917	....	250,000
Total	$434,000	$386,500

"At the date of this report the loan from the bank on the 1915 account has been reduced by $6,000; on the 1916 account by $50,000, leaving an overdraft at this date of $330,500. The city has no floating liabilities on capital account.

Arrears and Collections of Taxes.

"The municipal tax rate for the last five years was, in mills, as under:—1913, 13; 1914, 13.35; 1915, 16.80; 1916, 17.80; 1917,, 17.50. The product of one mill on this year's assessment is fully $26,000, which is just one-half of what it yielded in 1913.

"The tax collections for 1916 were as under:—Arrears, $283,642.50; current, $496,338.50; total, $779,981. As compared with $808,834 in 1915 and $712,351 in 1914.

"The arrears of taxes at October 31st, 1916, was $250,866, and at the same date this year $376,946. As a result of the sales in 1915 and 1916 tax certificates were bought in by the city amounting to $264,910 and by private parties amounting to $35,704. $49,888 of the certificates held by the city have been redeemed and $28,866 have been redeemed from private parties, so that the total amount of $300,614 for which property was sold has been reduced at this date by redemption to $221,859.

"During the past year 3,600 parcels of land were exposed for sale under the Arrears of Taxes Act, but the sale was not concluded at the date of this report.

"The period for redeeming property sold for 1914 taxes has now expired and the city will have to take into consideration the question of acquiring titles to the properties purchased by it; as the city has twelve months in which to apply for title, the original owners of the property still have an opportunity of redeeming same if they so desire."

Finance.—Pamphlet issued by Arthur J. Eddy, Chicago, Ill., dealing with a new and scientific method of national finance.

New Brunswick.—Annual Report of the St. John Board of Trade, 1917.

LARGE AREA FOREST REGION DESTROYED

Professor A. Zavitz, chief forester of Ontario, at the recent annual meeting of the commission of conservation reported the following figures regarding forest fires in 1917:—May, 441; June, 317; July, 152; August, 115; September, 66; making a total of 1,091. The causes were as follow:—Settlers, 91; camp fires, 98; railways, 541; lightning, 28; Indians, 54; logging operations, 45; miscellaneous, 40; unknown, 194; making a total of 1,091.

The areas destroyed in acres were:—Timberland, mainly coniferous, 71,910; timberland, mainly hardwood, 110; cutover, some coniferous timber left, 148,368; cutover, some hardwood left, 2,160; young growth, mainly coniferous, 60,625; young growth, mainly hardwood, 13,202; barren, 82,922; grassland, 2,332; making a total of 381,629 acres.

There were also destroyed: Feet board measure, 15,278,000; cords, 90,446; ties, 781,685; posts, 150; and poles, 125; besides $2,727 worth of private property.

The forest region of Ontario over which the forester's organization has jurisdiction, covers an area of over 100,000,000 acres. The greater part of this region is covered with coniferous growth. Large areas have been cut over leaving inflammable slash. Three transcontinental railways pass through this territory over one thousand miles in length opening it to prospector, timber cruiser and scattered settlement, bringing in their wake problems of fire protection. Over 4,000 miles of railways cut through this forest region.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Nipissing Mines Company.—An extra dividend of 5 per cent. in addition to the regular quarterly dividend of 5 per cent., payable January 21st, has been declared by the company.

Dominion Steel Corporation.—Mr. Mark Workman states that the company's employees at Sydney, Glace Bay and Springhill subscribed for $785,000 of Victory bonds. Subscriptions from employees in Montreal and elsewhere brought the total to over $800,000. The company itself subscribed for $3,000,000 and Mr. Workman for $100,000.

Canada Bread Company.—A dividend on the common stock of $2 per share was declared by the directors recently. This is the initial dividend of the company, which was incorporated in 1911. The stock has been offering at 15, but advanced to 20 on the news of the disbursements. The dividend is payable January 2nd to shareholders of record December 17th.

Nova Scotia Tramways & Power Company.—The Nova Scotia Public Utilities Board has filed its decision on the application of the Nova Scotia Tramways & Power Company for approval of a bond and stock issue. While not a final decision, the board approves of the majority of the expenditures made, and to be made by the company, and has reserved a number for further consideration. The total amount of the items approved is $845,642.

Teck-Hughes Mining Company.—The proposal to increase the capital stock from $2,000,000 to $2,500,000 was unanimously approved. The directors have been given authority to issue up to 500,000 new shares at a discount of 70 per cent. In order to make the new financial appeal to shareholders, the plan will be to issue bonds at $700 each, though of a face value of $1,000, and bearing interest at the rate of seven per cent., and each bond subscriber will be privileged to buy 1,000 shares of stock for $300, or at the rate of 30 cents per share.

Sherwin-Williams Company of Canada.—The company has reached a new high level in the year ended August 31st last, and despite some extraordinary appropriations, the surplus balance carried forward was also a new high record. Earnings at $945,272 were $98,328 ahead of the total for the best previous year—1915-16—the gain amounting to about 12 per cent. After allowing an increased appropriation for depreciation, reserve and paying bond interest and preferred stock dividends, the balance remaining was $511,302, against $423,180 the previous year. From this balance, however, there was charged off a total of $118,965, representing donations to patriotic funds, allowances to employees on active service, the British war tax on the Berger Companies and Canadian war taxes for two years on the Canadian companies.

The corresponding deduction a year ago was only $49,807 which did not include the Canadian tax for the year ended August 31st, 1916, now provided for in the present statement. Despite the heavier deductions, the surplus balance remaining, $392,336, was the largest ever carried forward by the company, and represented 9.8 per cent. earned on the common shares.

The balance sheet reflects activity in the company's business, combined with the higher cost of materials. Current liabilities have increased from $1,046,688 to $1,906,763, but in the latter total is included a sort of inter-company account—namely, $700,111, due the parent company, the Sherwin-Williams Company of Cleveland. The increase in current assets, as a result of profitable business, has been larger than the increase in liabilities, the total having risen from $3,367,044 to $4,415,150. Inventories at $2,417,613 are nearly double the total of two years ago. The net change in the working capital position in the year is an improvement of about $190,000, working capital being in excess of $2,500,000.

Mr. Walter H. Cottingham notes in his report as president, with regard to the company's new subsidiary in Australia: "I am pleased to state that the plant at Sydney has been completed, and is now in operation. No returns, however, from this plant were received during the last fiscal year. The outlook for satisfactory results from the Australian company is promising.

"Substantial gains in sales have been made in all departments of your business during the past year, and your directors consider the outlook for the present year satisfactory."

Earnings and deductions compare as follows with the previous year:—

	1917.	1916.
Net earnings	$945,272	$846,944
Reserve for depreciation and renewals of plant	80,746	76,710
Interest on bonds	133,092	136,470
Dividends on preferred stock	220,132	210,583
Donations to patriotic funds, etc., and provision for British war tax	118,966	49,897
Balance to surplus account	392,337	373,373

CANADA MUST CONSERVE COAL

The United States fuel administration authorizes the following: "Canada must place herself upon the same basis as the United States with reference to the conservation of coal. This has been made plain to the Dominion government by the United States fuel administration. In an official communication to the Canadian fuel controller, the fuel administration pointed out that Canada would be expected to resort to the same measures to save coal as are being adopted in the United States.

"In the communication to the Canadian authorities the fuel administration calls attention to the fact that an intensive campaign is being carried on in the United States for fuel economy. It is suggested that Canada conduct a similar campaign for the limitation of the uses of coal and the cooperation of the United States government in such a campaign is offered.

"Most of the Canadian coal supply is derived from the United States, and the fuel administration has undertaken to give Canada a pro rata share of the United States' supply on the same basis as the various states of the Union. The fuel administration, however, demands that Canada safeguard this supply by conservation measures in line with those undertaken in the United States."

OPERATION IN CANADA EFFECTED ECONOMIES

Commenting on the statement from Washington that the United States railroads have curtailed passenger service by over 20,000,000 passenger train miles per annum, the Canadian Railway Association, a war-time body, asserts that the Canadian railways can point to a reduction of over 10,000,000 passenger miles per annum in Canada, which in view of the total mileage is a greater pro rata reduction. The association further states that Canada is to-day getting the best and cheapest railway service in the western world. In spite of car shortage created by the abnormal balance of southbound over north-bound traffic, in spite of war requirements, higher labor charges, the necessity of importing coal for engines, and the lower efficiency of the coal, due to lower winter temperatures in Canada, there is a greater degree of efficiency reached in the operation of the Canadian railways than anywhere else in the new world. Car shortage is being reduced day by day. The percentage of freight cars out of service for repairs in Canada is lower than the percentage on United States roads, and the average cost to the Canadian traveller or shipper is less. For the year ending June 30th, 1916, the charge for moving an average ton of freight one mile in the United States was .716 of a cent. In Canada it was .653 of a cent. In the United States the average passenger mile cost the passenger 2.006 cents, and in Canada it cost him 1.054 cents. At the same time the Canadian railroads paid more for labor and charged less for their services than any of the other roads on this continent.

Consider the Cost

A FACT not generally understood by those drawing up a will, is that the highly specialized and competent service rendered by a Trusts Corporation costs no more than the uncertain service of an individual trustee.

When you consider that your estate will receive the benefit of experience gained in the management of many estates, your heirs will be assured the utmost protection.

When you make your will, why not insure efficient and economical management of your estate by appointing this Company as Executor and Trustee?

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Commenting upon *The Monetary Times'* records (published in these columns last week), of Canadian municipal bond sales, the Montreal Gazette says:—

In Canada itself the money market was monopolized in November by the Victory Loan. Some small issues placed by Saskatchewan municipalities aggregated $134,191, and the balance of the month's total was made up of a $40,000 issue by Dorval, Quebec.

The outlook for any extensive financing by the municipalities in the closing weeks of the year can hardly be considered encouraging. The investment market here is likely to continue limp for a while because of the extraordinary effort made in enlisting available resources to the support of the Victory Loan. There are no indications of any raising of the barriers in the United States markets. Only very urgent demands from high class borrowers, and for the most part from borrowers engaged on war work, are being considered by the bankers there. The situation, it may be hoped, may change at least slightly for the better in January, when the end of the year tension has relaxed and the large disbursements of dividends and interest become a factor in the money market.

If, as seems probable, the Canadian total for the year will not exceed $25,000,000 it may be a couple of millions less it will be less than half the total of 1916 and less than a quarter the total of 1913. In the latter year, Canadian municipalities sold securities to a total par value of no less than $111,350,642; British investors alone absorbed $69,639,350, although only six years before the grand total of Canadian municipals sold had been only $14,430,540. The heavy inflow of new money for municipalities around the 1911-13 period, was one of the influences which imparted a somewhat artificial prosperity to the close of a period of national expansion. Taking *The Monetary Times'* figures of sales of Canadian municipals for the first 11 months of the year, and setting them against the figures of the big year of 1913, the following striking comparisons are offered:—

Where sold.	1917.	1913.
Canada	$16,322,714	$ 20,550,230
Great Britain	....	69,639,350
United States	5,538,925	21,168,053
Total	$21,861,639	$111,350,642

Bankers are inclined to view present restrictions on borrowing as having good features as well as bad. Deficits in municipal budgets can no longer be viewed lightly and programmes of unnecessary improvements gone ahead with regardlessly. If economy in municipal expenditure still falls short of what might be considered desirable, at least necessity is stimulating some effort to live within income. But there is some expenditure of a necessary sort probably awaiting a better money market.

Stratford, Ont.—A by-law for $20,000 has been passed by the council for the British Red Cross, to be raised by three-year debentures.

Carleton, Ont.—Tenders for an issue of $60,000 5½ per cent. 40-year debentures are invited by Mr. Chas. MacNab, county clerk, Ottawa, Ont.

Vancouver, B.C.—It will be necessary to offer $100,000 5 per cent. debentures in order to obtain the net sum of $75,000, which is needed for school purposes.

Campbellton, N.B.—J. T. Reid, town clerk, reports the city's assessed value of real estate and personal property for 1916 as follows: Real estate, $1,970,450; personal property, $277,100; making a total of $2,247,550. The bonded debt was $415,000.

St. Andrew, N.B.—Mr. F. H. Grimmer, town treasurer, reports the city's assessed value of real estate and personal property as follows: Real estate, $557,300; personal property, $114,100. The bonded debt was $25,000, rate of interest 5 per cent., sinking fund, $1,403.

Windsor, Ont.—Tenders up till December 14 will be received for the following local improvement debentures: $46,024 5 per cent. 20-years; $80,439 5 per cent. 10-years; $97,193 5 per cent. 10-years; $32,178 1½ per cent. 30-years. Acting clerk, M. A. Dickenson, Windsor, Ont

Edmonton, Alta.—An issue of treasury bills for $750,000, against debentures issued for public improvements and work which had already been completed, was authorized by the city council. These were considered attractive, but the city was only successful in placing about $350,000 of these notes. The balance was taken by the Imperial Bank, and against them the bank advanced sufficient money to pay the coupons for interest on debentures for the balance of the year.

Moose Jaw, Sask.—At a recent meeting of the private bills committee of the Saskatchewan legislature a bill was passed to extend the time for issuing debentures under certain bylaws of the city of Moose Jaw. Moose Jaw desires the extension and the legislature has adopted the principle that there should be submission to the people should they desire to go ahead. Exception is made in the case of two by-laws providing for the extension of certain water mains and sanitary sewers in River Park and Wellesley Park, owing to the fact that the city is under contract. The committee accepted the recommendation of the local government board in this connection and the time for issuing debentures is extended from four to six years.

Saskatchewan.—The following is a list of authorizations granted by the local government board from November 26th to 30th, 1917:—

School Districts.—Kandahar, $1,000 10-years not ex. 8 per cent. annuity; R. J. Pringle, Kandahar. Bausley, $2,000 10-years not ex. 8 per cent. annuity; P. H. Lewis, Perdue.

Rural Telephone Companies.—South Ceylon, $400 15-years not ex. 8 per cent. annuity; R. L. Beal, Ceylon. Storthocks, $2,400 15-years not ex. 8 per cent. annuity; C. A. Handsfield. Storthocks. Marine, $2,600 15-years not ex. 8 per cent. annuity; J. A. Meyer, Torquay. North Ceylon, $1,300 15-years not ex. 8 per cent. annuity; S. Bean, Ceylon. North Webb, $2,100 15-years not ex. 8 per cent. annuity; C. Williams, Webb. Ruddell, $15,300 15-years not ex. 8 per cent. annuity; A. E. Steele, Maymont.

The following is a list of debentures sold from November 26th to 30th, 1917:—

School District.—Middagh, $1,800; J. H. Kern, Moose Jaw.

Rural Telephone Companies.—Engelfeld, $44,700; S. L. Ross, Regina. Shackleton, $800; Indian Head Sinking Fund. Lockwood, $1,500, East Lockwood, $500; Mrs. Mary Hislop, Lockwood. Glenavon South, $3,700; Saskatchewan Life Insurance Company. Long Creek, $3,200; W. D. Craig, Regina. Antelope Lake, $7,800; Nay and James, Regina.

FOREIGN EXCHANGE DURING WAR

In connection with the article in *The Monetary Times* last week on "Exchange During the Third Year of the War," by Mr. E. M. Dawson, manager of the foreign exchange department, Union Bank of Canada, we omitted to state that the chart illustrative of exchange fluctuations in Canada and New York was compiled by Mr. W. J. Little, late of the foreign exchange department, Union Bank of Canada. This chart was the third in the series compiled by Mr. Little and which illustrates the course of exchange from July, 1914, to June 30th, 1917.

WAR ORDERS FOR CANADA

$1,800,000,000

Some facts and figures as to our War Business.

SEE

The Monetary Times Annual

JANUARY, 1918. PRICE 50c

To Maintain Canada's Standing in the World of Business

The world recognizes the practical patriotism of Union Government, with its policy of raising reinforcements under the Military Service Act, 1917, and of directing all resources and energies toward the winning of the war.

If Laurier and Bourassa succeeded in the election British and Allied purchases would in all probability be diverted from Canada.

SUPPORT UNION GOVERNMENT

The material aspect of the present campaign cannot be overlooked. Canada has had no cause to complain of the volume of war orders placed with her by Great Britain and latterly by the United States. All indications at present are for the continuation of this prosperity, but the prospect would be shattered in the event of a Laurier victory at the polls.

CANADA'S FUTURE BORROWING POWER

There can be no question in the mind of the clear-headed business man that Canada's future history is being shaped in these strenuous days.

So far our Allies have nothing but admiration for us. Canada's credit is good and she has well earned the confidence she enjoys. The war will not last forever and there will come a day when Canada will want to borrow money abroad. If for no other reason, we must keep right with our Allies.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including the seventeenth day of December next for the right to cut pulpwood and pine timber on a certain area situate in the vicinity of the Kapuskasing River in the Districts of Timiskaming and Algoma.

Tenderers are to offer a flat rate per cord for all classes of pulpwood, whether spruce or other woods. The successful tenderer shall be required to pay for the Red and White Pine on the limit a flat rate of $10 per thousand feet board measure.

The successful tenderer shall also be required to erect a mill or mills on or near the territory, and to manufacture the wood into pulp and paper in the Province of Ontario in accordance with the terms and conditions of sale which can be had on application to the Department.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honourable the Treasurer of the Province of Ontario, for Twenty-five Thousand Dollars ($25,000.00), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said Twenty-five Thousand Dollars ($25,000.00) will be held by the Department until such time as the terms and conditions of the agreement to be entered into have been complied with and the said mills erected, equipped and in operation. The said sum may then be applied in such amounts and at such times as the Minister of Lands, Forests and Mines may direct in payment of accounts for dues or of any other obligation due the Crown until the whole sum has been applied.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, September 19th, 1917.

N.B.—No unauthorized publication of this notice will be paid for.

THE ROYAL BANK OF CANADA

By Order of the Board.

H. H. CHAMP,
Treasurer.

Hamilton, Ontario, November 29th, 1917.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

HAIL AGENCY WANTED.—Responsible firm at Regina open to take Saskatchewan Agency for reliable Company. For firm name apply Box 131. *The Monetary Times*, Toronto.

FINANCIAL COMPANY requires a general agency for Toronto, for a strong tariff Fire Insurance Company, writing fairly large lines. Can give from $10,000 to $15,000 per year in premiums; first-class business. No objection to one other agent representing same company. Box 133, *The Monetary Times*, Toronto.

IRON AND STEEL PRODUCTION

Increased Output in Canada This Year — Tables Giving Monthly Production for 1916 and 1917

The mines branch of the Department of Mines, Ottawa, has received from the producers complete returns of the production of pig iron in Canada, and, with the exception of two small plants, complete returns of the production of steel ingots and direct steel castings during the first nine months of 1917.

The total production of pig iron during the first nine months was 895,307 short tons, as against 844,717 tons during the first nine months of 1916. The average monthly production in 1917 was 99,478 tons, as against an average monthly production throughout 1916 of 97,438 tons.

The total production of steel ingots and direct castings during the first nine months was 1,265,183 short tons, as against 911,054 tons during the first nine months of 1916. The average monthly production during the first nine months of 1917 was 140,576 tons as against an average monthly production throughout 1916 of 106,268 tons.

The production of steel in electric furnaces included above was 30,960 tons during the first nine months of 1917 as against a total of 19,639 tons produced throughout 1916. The production of steel in electric furnaces in September was over 5,000 tons or at the rate of over 60,000 tons per annum.

The monthly production, exports and imports during 1916 and 1917, are shown in the accompanying tables:—

Totals	$1,127,994,129	$1,169,551,967	+	$58,442,162

Sir John Aird, general manager of the Canadian Bank of Commerce, was elected at the annual convention of the American Bankers' Association, recently held at Atlantic City, N.J., vice-president of the association for Canada. The American Bankers' Association was founded in 1875 and over 17,000 banks, comprising all the foremost institutions of the United States, are now members. The annual convention at which the election took place was attended by over 2,200 delegates from all parts of the United States, and included almost all the prominent bankers of the country.

Working Capital

¶ That all important factor in a company's position.

¶ As an investor or trader in Canadian listed stocks you should know the ratio of current assets to liabilities and the ratio of net working capital to the stock outstanding.

¶ These items, with many others equally interesting, are given in our new edition "Analysis of Canadian Stocks."

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Dauphin, Man.—November 22—Robert Hunt's horses, cattle, feed, harness and building. Estimated damage on stock, $7,000; on building, $3,750. Insurance on building, $600, carried in the Accidental Insurance Company.

Saskatoon, Sask.—The following is the fire report for November; the details given being in the order named as follows: (1) date of fire; (2) description of property damaged or destroyed; (3) name and address of occupants; (4) name and address of owner; (5) cause of fire; (6) estimated damage on stock; (7) estimated damage on building; (8) names of insurance companies; (9) insurance on stock; (10) insurance on buildings; (11) total insurance.

November 8—Barn and stable, Mr. Simpson, Catholic School Board, spontaneous combustion, $350, $300, nil, nil.

November 11—Dwelling house, unoccupied, Mr. A. Babyizuk, incendiary, nil, $150, nil, nil, nil, nil.

November 16—Coal bunkers, University of Saskatchewan, provincial government of Saskatchewan, unknown, nil, $290, numerous blanket policies, $44,000, $3,000, $47,000.

November 29—Dwelling house, Mr. Lorrey, Mr. Best, children playing with matches, nil, $25, nii, nil, nil, nil.

Shellbrooke, Sask.—November 16—The Saskatchewan Elevator Company's modern 30,000 bushel elevator. Estimated damage on stock, $15,000; on buildings, $8,200. Insurance on stock, $15,000; on buildings, $8,000, carried in the St. Paul Fire and Marine Insurance Company.

Vancouver, B.C.—Fire Chief Carlisle reports the fires for November to *The Monetary Times* which are as follow:—

The fire department responded to 43 alarms during the month of November, as follows: Fires where damage occurred, 11; fires where no loss resulted, 3; false alarms, 12; chimney fires (no loss), 8; services not required, 7; smoke scares, 2. The estimated total damage resulting from fires for this period amounts to $4,850, of which $4,642 was covered by insurance, leaving the property loss above insurance at $208. The total value of the property involved was $1,498,623. On November 12th, at 7.41 p.m., a fire occurred in a planing mill and storage shed, at the foot of Dunlevy Avenue, owned and occupied by the British Columbia Mills, Timber and Trading Company. This fire, which is presumed to have been the work of incendiaries, occurred at the time when the fire department was about to take part in the Victory Loan parade, ample provision having, however, been made for such emergency calls, the apparatus from six fire halls was promptly on the scene. Damage to the amount of $3,650 resulted, but was fully covered by insurance. The following shows the cause of fires and alarms for the month: Backfire (carburetter), 1; carelessness with cigarettes, matches, etc., 1; children playing with matches, lighted candles, etc., 3; chimney fires, 8; defective furnace, 1; electrical origin (crossed wires), 1; false alarms, 12; flying sparks, 2; incendiary origin, 1; oil pan bottom falling out and upsetting oil on stove, 1; overheated furnace, 1; services not required, 7; smoke scares, 2; spontaneous combustion, 1; and light near gasoline tank, 1.

November 13—The British Columbia Mills Timber and Trading Company's frame building and moulding stock. Estimated damage on stock, $3,500; on buildings, $150. Insurance carried in the Lumbermen's Indemnity Exchange.

Victoria, B.C.—Fire Chief Davies reports the following losses by fire for the month of November: Loss, buildings, $15; contents, $35; total, $50. Insurance, nil.

Viking, Alta.—November 1—Stock and feed barn of S. A. Place. Estimated damage on stock, $3,000; on buildings, $2,000. Insurance on stock, $1,080; on building, $960, carried in the Wawanesa Insurance Company.

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Oct., were: imports 1915, $56,531,364; 1916, $49,464,853; 1917, $15,757,950; and exports 1915, $118,782,516; 1916, $206,126,802; 1917, $3,290,894. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

HALIFAX INSURANCE PROBLEMS

Danger of Catastrophe Apparently was Not in Mind—Companies Dispute Payment

Representatives in New York of fire insurance companies which have insured property at Halifax expressed the belief to-day, because later reports indicated a smaller area swept by flames, that the fire losses would be less than had been feared, although mounting well into the millions. The possibility of such a disaster had not been even remotely taken into account by American insurance companies which did business in that harbor. This was due to the absence of any precedent for such vast destruction by explosion and to the fact that no munitions ship had ever before blown up in North American waters.

In the absence of experiences like those of December 6, little insurance had been written with the possibility of such a disaster in mind. Insurance rates at Halifax had not been increased on the supposition of such a danger and residents and business men in Halifax had in only a very few instances specifically insured themselves against explosions, as apart from fire.

Companies Dispute Payment.

One thing regarded as certain by local insurance men is that complicated legal questions will arise in the settlement on insurance claims at Halifax, in determining what losses were caused by shock and what by fire. On a smaller scale this question was fought out in New York state and New Jersey after the Black Tom explosion, when it was held that fire insurance companies were liable for losses by fire, but not for destruction caused when buildings were shaken to pieces or when they were damaged by missiles. After the Black Tom disaster many firms took out insurance specifically against explosions, but very few such policies were in effect at Halifax, it is said, because of the comparative freedom from explosions which that port has enjoyed, in spite of the great flow of munitions through it.

Mr. Frederick C. Bushwell, vice-president of the Home Insurance Company and a member of the National Board of Fire Underwriters, said: "Fire insurance policies cover loss due only to fire. Property which was destroyed by an explosion and then burned belongs to a different class. Fire insurance does not have to be paid on property lost in that way. The fire insurance policy does not cover debris.

"This matter was agitated at the time of the San Francisco fire. Insurance companies were not obliged to pay insurance for buildings which were destroyed by the shock before they were burned. However, it was incumbent on the insurance companies to establish that it was the earthquake which did the damage and not the fire, and at Halifax insurance companies will have to pay fire losses except where they can show that the explosion produced a total loss before fire burned the wreckage. This is very difficult to do where it is necessary to trace the fate of individual buildings which were destroyed in a great disaster.

"The loss will be divided among United States, Canadian and London companies, United States insurance companies paying the least. The Home, Phœnix, Aetna and Hartford companies have, however, all considerable liabilities in Halifax."

Insurance Losses not so Large.

From reports received it was unofficially estimated at the Canadian Fire Underwriters' Association, that the value of property destroyed by the explosion and fire in Halifax would very likely be in the neighborhood of $2,500.000. Of the buildings damaged or levelled about 60 per cent. would be insured. A new rating of risks is being made in Halifax, so that the losses of the insurance companies is all the more difficult to estimate. "At first it looked as if the losses of the insurance companies would be tremendous," said the manager of a large insurance company to-day. "The latest reports, however, make it look as if the claims which the companies will be liable for will really be very small. Most of the damage seems to have been done in the north end of the city. In this section the houses were mostly frame and chiefly occupied by the middle classes, therefore there were not many of the more valuable homes destroyed or that any considerable portion of the business district was burned.

UNIFORMITY OF INSURANCE STATEMENTS

Western Provinces are Now Using Practically Identical Forms

"The uniformity of statement blanks is so obviously desirable," said Mr. R. L. Nicolson, insurance superintendent of Alberta, at the Winnipeg conference, last week, "that no elaborate argument is necessary. Moreover, most of the forms used by the provinces represented here are practically uniform now. The joint stock companies' form, the mutual fire and the fraternal society forms used by Ontario and the prairie provinces are so nearly identical that a few minutes discussion with the blanks before us would adjust all differences. That is, provided we adhere to the present form. If we decide to adopt an entirely different style of blank, such as the national convention blank used by the United States, for one or all of the various forms, further consideration would be necessary. There is little to be gained by such a change. Our companies are familiar with the style of blank now used, and while the convention form is an admirable one—it is probably more elaborate than we need at this time. The same reasons apply to the mutual fire and fraternal forms.

Majority under Dominion License.

"The majority of the companies operating in our provinces do so under Dominion license. The information we require from them is mainly statistical and could be reported on a single sheet. In the three western provinces we have been using forms practically identical and of a size that can be placed in the typewriter and filled in. In Alberta, we have been using two forms, that is, one for the reports of life companies, and the other for fire and miscellaneous insurance. In the life companies' statement we have asked for the usual information with regard to premiums collected, the claims paid and matured policies, the amount of insurance written during the year, and the amount in force at its close, with a note on the form that the company shall specify whether this is reported on a 'written' or 'paid-up' basis. The system was found satisfactory and is here recommended for consideration as a basis on which to establish uniform Dominion statements.

Investments of Provincial Companies.

"The question of investments of provincial companies," Mr. Nicolson said, "brings up that of investment regulations by statute, for only by statutory regulations can there be any measure of uniformity—not only in the investments of companies in different provinces—but also the investments of companies in the same province. Certain regulations are now in force but are not general throughout Canada. Companies under Dominion license are, of course, regulated by the provisions in the Dominion Insurance Act. The insurance acts of Quebec and Ontario also contain regulations of this nature, but in the western provinces there have not, so far, been any such provisions included, although certain clauses containing restrictions to that end have, of late years, been placed in the charters granted to provincial companies."

The regulations were briefly compared in the several acts, and it was found that the first part of the conditions in all of them provided: "Investment in real estate is restricted to the actual needs of the company for the carrying on of its business, although no attempt is made to set a limit on the proportion of the company's assets that may be tied up in head office buildings." "It is provided that any real estate acquired by foreclosure settlement of a debt, etc., shall be disposed of within a certain number of years." "Permission is given to invest in securities under the trustee act, excepting debenture stock, in municipal government or school debentures, in debentures of trust and loan companies, and in debentures of public service corporations."

Divergence of Acts.

"Here the acts diverge," said Mr. Nicolson. "Ontario and Quebec stipulate that investments in debentures of corporations shall be limited to one-fifth of the paid-up capital of the company. Quebec permits investments in real estate and mortgage loans—providing such loans do not exceed 60 per cent. of the value of the property. The Dominion act goes still further, and permits investment in the preferred and guaranteed stocks of companies that have paid a certain rate of dividend for a certain number of years; and with certain restrictions, investment in dividend-paying common stocks. It also enacts that no company shall invest in its own shares or in the shares of a company doing the same class of insurance business, excepting under exceptional circumstances or authorization given by the treasury board. For instance, in the case of an amalgamation between two companies, permission is given to loan funds on bonds and debentures to a certain extent, and also on real estate, with the restriction that the company shall not loan any of its funds to any director or officer of the company, excepting in the case of a life company on the security of its own policies. The Ontario act further provides that the trustees, directors or executive officers shall be responsible for the investment of any of the corporation's funds, and should they authorize such investments or loans as are contrary to the law, those who voted in favor or assented to such investment shall be personally liable therefor, jointly and severally, and shall restore the funds. Action for the recovery of such money may be brought, and the burden of proof 'that he did not vote for the investment,' shall be on the defendant."

Requirements for Class of Investments.

He then turned to the requirements best suited to Alberta. There the class of investments permitted by the Ontario and Quebec acts were more suitable than the wider powers given by the Dominion—although several of the restrictions imposed by the Dominion act might, with profit, be introduced in Alberta's regulations. The class of investments mentioned in section 110 of the Ontario act, briefly trustee and guarantee securities and the debentures of public service corporations, were admissible without question. As to the admission of mortgages, particularly on farm property, there was a large amount of investment offered in the west at an attractive interest rate and, generally speaking, good security.

The company felt it was doing something towards helping production and aiding an important industry, when it invested in mortgages on farm property, besides appealing to local sympathy in investing a part of its funds in a district where some of the premiums come from. It seemed, therefore, that a certain amount of mortgage investment should be allowed, even though restricted to some extent, say by provisos similar to that in section 110-c of the Ontario act, or according to the class of insurance transacted.

Power to Invest.

The power to invest in preferred and common stocks is not desirable, nor for that matter necessary, to a provincial company, at least for some time to come. Such powers are doubtless necessary for older and larger companies having an immense premium income which, at certain times, they find difficult to invest profitably, but at present, no such difficulty confronts any provincial company that I can think of and the investment market has never been so full of such high-class investments yielding a good rate.

The restrictive provisions already mentioned—namely, those fixing the responsibility of the directors for illegal investments; those prohibiting the loaning of money to directors and officers; those restricting investment in real estate; and those affecting the disposal of real estate required for foreclosure; and those relating to investments in the company's stock or in the stock of companies doing a similar class of business, are to a certain extent provided for either in provincial acts or included in charters granted to insurance companies. It is, however, of the utmost importance that these provisions should be included in any provincial investment laws. They are, in fact, more important than the permissive regulations.

Draft be Shortly Prepared.

Owing to the short time available, it was not possible for Mr. Nicolson to give the subject the thorough study and analysis that it demanded. For that reason he did not undertake to frame any draft legislation, but merely indicated the basic principles underlying the present legislation of this kind in Canada. A draft of such regulations, however, will shortly be prepared by the legislative committee of the association, which will embody these principles and be framed so as to adequately protect the interests of the policyholder, which is the first consideration of the insurance department, and also, in so far as possible, the investing public.

Mr. C. B. Thorne, manager Hawkesbury Mill, has been elected member of the board of directors of the Riordon Pulp & Paper Company.

LATEST VICTORY LOAN RETURNS

The Victory Loan returns to date show $416,000,000 subscribed by 800,000 people.

NEW DIRECTOR OF TORONTO GENERAL TRUSTS

Mr. H. H. Williams, head of the well-known Toronto real estate house, has been elected a director of the Toronto General Trusts Corporation in the place of the late Mr. W. R. Brock.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	1/8 pm	5-32 pm	....
Mont. funds	par	par	....
Sterling—			
Demand	$4.75.80	$4.76.10	$4.78
Cable transfers	$4.77.10	$4.77.30	$4.79

Sterling demand in New York, $4.75 3-16.
Bank of England rate, 5 per cent.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines for the first week of December:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
December 7	$3,139,000	$3,289,000	+ $150,000

Grand Trunk Railway.

December 7	$1,151,306	$1,218,138	+ $ 66,832

Canadian Northern Railway.

December 7	$ 917,900	$ 916,000	— $ 1,900

New high figures were established in the gross earnings of Canadian railroads during the month of November. Canadian Pacific Railway and Canadian Northern both set new records, but Grand Trunk figures have been exceeded several times during the past two years. November figures for the three roads, compiled from the weekly statements of gross earnings, are as follow:—

	Nov., 1917.	Increase.	%
Canadian Pacific Railway ..	$14,942,000	$1,785,000	13.6
Grand Trunk Railway	5,549,336	205,683	3.8
Canadian Northern Railway	4,050,200	327,900	8.8
	$24,541,536	$2,318,583	10.4

DIVIDEND NOTICE

THE CANADIAN CROCKER-WHEELER CO., LIMITED

DIVIDEND NOTICE

NIPISSING MINE COMPANY

The summary of production of the Nipissing Mine Company for eleven months ended November 30, is as follows: January, $172,983; February, $271,527; March, $256,953; April, $259,082; May, $261,663; June, $269,469; July, $272,490; August, $293,116; September, $349,258; October, $306,167; November, $305,572; total, $3,018,280.

The greatest record attained by the Nipissing was in 1913, when a net value of $2,920,714 was received. The production during the eleven months of the current year exceeds that of any twelve months by $95,566, and by the end of December will have established a record of upwards of $400,000 more than the previous banner year.

SOUTHERN CANADA POWER COMPANY

The Southern Canada Power Company has grown into an important enterprise. Mr. C. J. McCuaig, the president, organized the company nearly five years ago. The system supplies light and power to 47 cities, towns and municipalities in the district between Montreal and the International boundary line, and controls five developed and six undeveloped water powers, with an ultimate capacity in excess of 150,000 horse-power. The directors have felt that the time has come when it was essential that the executive head should be a man of wide experience in the administration of public utilities. The company has therefore secured the services of Mr. W. C. Hawkins, who has been a director for the past year, the managing director of the Dominion Power and Transmission Company of Hamilton, Ont., one of the most successful public utility corporations in Canada. Mr. Hawkins has accepted the position of president.

Among other new directors elected at the recent annual meeting were Colonel J. R. Moodie, of Hamilton, Ont., and president of the Dominion Power and Transmission Company, James Davidson, president, Thomas Davidson Manufacturing Company, Montreal, Charles E. Read, director of the Riordon Pulp and Paper Company, Ottawa, George Parent, K.C., Quebec, and W. H. Miner, president, Miner Rubber Company, of Granby, Que.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

The Mutual Life Assurance Co. of Canada

TO GUARD THE HOME

At the root of all true prosperity lies the security of the home. There can be no real sense of well-being without the certain assurance that loved ones will be well provided for when the breadwinner is taken away from them.

To guard the home and the home-folk is the province of Life Insurance. There is no other way so sure, and under a Great-West Policy the way is altogether easy. Plans are available to meet every need and circumstance. The cost is low, and this cost is made still lower by the high profit returns paid to policyholders.

Let us explain the best Policy for YOUR needs. State age and ask for the leaflet "OUR SAVINGS."

Victory Loan Bonds, With Conversions

TOTAL *Issue Will Thus be About $500,000,000—About $400,000,000 of $418,000,000 Subscribed is Likely to be Allotted—Support of the Market is Likely—Latest Returns Show 802,000 Subscribers to Loan.*

THE latest figures in connection with Canada's Victory Loan show that a sum of $418,000,000 was subscribed in three weeks by 802,000 subscribers. The final revised returns from six of the nine provinces have yet to be received, but the amount noted will be found approximately correct. This represents an oversubscription of the $150,000,000 loan by 178 per cent. or $268,000,000. The increase in the number of subscribers, compared with our previous war loan in March, is 761,200 or 1,685 per cent., a remarkable record and a testimony to the value of the organization which co-operated with the finance minister in selling the bonds. Of the total amount raised, about $10,000,000 was subscribed in the United States. To our previous three war loans aggregating $350,000,000, United States investors purchased approximately $75,000,000. Aside from the subscriptions in the neighboring republic, there was therefore raised in Canada alone the sum of $408,000,000.

The only announcement made as to allotments is that the finance minister has decided to allot in full subscriptions up to $1,000,000. Comparatively few of the subscriptions were in excess of that amount. Those above $1,000,000 probably may expect a cut of at least 25 per cent. When the final allotments are made, it will likely be found that approximately $400,000,000 of the $418,000,000 will have been allotted. This, together with about $100,000,000 of conversions of previous loans and debenture stock will create a total of $500,000,000 Victory Loan bonds, a total for any one issue hitherto unequalled in this country.

Interested in the market for these bonds will be 802,000 holders, in addition to many thousands who may later be expected to buy. With an issue of $500,000,000, which is equal to the Anglo-French loan made in the United States in 1916, there is naturally anxiety as to the market for the Loan during the coming year. The prospectus stated that the bonds would be listed on the Montreal and Toronto stock exchanges. There are some who believe that this is unwise. The condition in the prospectus, however, will undoubtedly be carried out. The Anglo-French loan has gradually dropped, point by point, from its issue price of 96 until on Tuesday last it reached the low figure of 82. With such a large number of Victory bond holders new to the ranks of bond buyers, it would be unfortunate, to say the least, were our first large national issue (in the truest sense of the term) subject to wide fluctuations. First-class securities during the past few weeks have suffered in the New York market on account of largely illogical war sentiment, even a German victory over the Allies being one of the influences depressing the market.

Serious consideration is being given this phase of the Victory Loan flotation. An announcement may possibly be made in the near future but in any event we may reasonably count upon the proper support of the market for Victory bonds, even if it is necessary to set a minimum price changing maybe with conditions, at which these bonds may be sold.

Among the first payments out of the Loan proceeds will be those to the banks. During the last six months, the finance minister has been borrowing from the chartered banks from time to time in amounts of $20,000,000 to $25,000,000. It is probable that $100,000,000 or more is due to be repaid as soon as the government is in funds.

That repayment will simply consist of the banks marking off, say, $100,000,000 from the government's credit balance and cancelling a like amount of government notes. In other words, the banks' assets are reduced by $100,000,000, likewise their liabilities. Technically the wiping out of bank liabilities helps the money market through releasing the cash reserves—say, 25 per cent., or $25,000,000—which were held to protect the liabilities.

Perhaps a considerable proportion of the government's debts to Canadian manufacturers and others furnishing war supplies would have been paid off by means of the loans above mentioned, which it negotiated with the banks, but the chances are, as pointed out recently by Mr. Victor Ross, that there would be a large amount of other accounts owed by the government maturing from week to week. Some of these, perhaps, would be due to firms resident in the United States. In many cases the Canadian producers, merchants and manufacturers to whom these accounts are owed will have procured loans from their respective banks assigning to the banks as security their claims on the government.

Settlement of these claims, again, would improve the banking position, inasmuch as it would mean repayment of commercial loans and discounts granted by the banks, accompanied by cancellation of a like amount of bank liabilities—thus further releasing cash reserves. Such part of the loan proceeds as is applied to settle debts of the government to Americans would, of course, tend to affect the exchange market adversely—since the finance minister would be obliged to requisition upon the banks for New York funds, and if his requirements are large the premium rates for American exchange might register a sharp advance. This illustrates the advantage of settling debts due to American exporters by means of credits negotiated in New York.

Finally, after the outstanding debts are cleared off, there would be the matter of new contracts and purchases. Canadian manufacturers and merchants as a result of liquidation of their special bank loans and the clearing up of the government accounts would be in good position for undertaking new contracts. The banks, having contracted their liabilities, will be in good shape to finance them.

Commenting upon the results of the Loan, Sir Vincent Meredith, president of the Bank of Montreal, stated two weeks ago that the funds thus raised should suffice, with the surplus on consolidated revenue account, to meet the financial requirements of the government until well on to the end of next year, before which time many things may happen. "What is now imperatively required," he said, "is that no unwise expenditures be made, no new financial obligations undertaken, and that the burden of taxation be distributed equitably. Whether our debt is to be included in a huge Allied funding operation, or we provide for it by funding our own liabilities, is a matter that need not concern us at the moment.

"Our country is one of the most productive in the world. Our gold holdings per capita almost equal those of the United States. Our natural resources are unbounded and our credit is irreproachable. There are, no doubt, difficulties and anxieties ahead which we shall still have to face, but I think we may look forward with confidence to providing without undue strain for the burden of our patriotic endeavor."

In its monthly commercial letter, the Canadian Bank of Commerce also referred to the Victory Loan as follows:

"The payment of so large an amount, so widely distributed and extending over several months, may be expected to curtail personal expenditures very considerably. Economy will be necessary to enable large numbers to meet their payments, and this is wholly desirable. The purchasing of unnecessaries, usually so general at this season, it is hoped will be considerably curtailed. So much that is bought at Christmas time is of foreign origin, and the proportion which is produced at home employs labor that from a national standpoint could be employed in work which would add to our effectiveness in the war. This self-imposed obligation to save should also result in greater economy in the use of food and clothing, and thus aid further in the conservation of our resources. As national consumption decreases and production increases, the greater will be the amount of goods we can place at the disposal of our own and of the Allied governments; and they have dire need of them. The success of the Victory Loan ensures the full employment of our industrial resources, and a ready market for our farm products. In both factory and farm the needs of those fighting for our cause must have first consideration.

"The immediate object of the Victory Loan was to provide for the financial needs of the nation, but a most important and more permanent result has also been attained in that the widespread distribution of the loan has brought into the ranks of investors large numbers who hitherto have not given any thought to making sacrifices in order to save. If this new group of investors can be induced to continue to save, both during the war and subsequently, not only will this benefit the individual, but the resulting conservation of the national resources will so add to the financial strength of the Dominion as to go far towards making it independent of outside aid."

FRUIT TRADE REGULATED

On and after February 1, 1918, no person or firm dealing, wholesale, in fresh fruits or fresh vegetables, either at producing points or in distributing centres, shall be permitted to operate without a license from the food controller. Any attempt at speculation, or the taking of undue profits by any license holder, may result in the immediate suspension or cancellation of such license. Such is the effect of an order issued by the food controller upon the recommendation of the fruit and vegetable committee of his office.

As a result of a careful study of the distribution of fruit and vegetables in Canada, and after conferences with representatives of the wholesale trade, the dealers have been divided into a number of classes and sub-classes, and their operations have been made subject to the following regulations:-

1. No license holder shall charge more than a reasonable profit or commission, or make any contract for future delivery or store in order to acquire speculative profits from a raising market.

2. No license holder shall sell to any other license holder of a like class and division except on a split profit or split commission, and only one such sale of the goods may be made.

3. No holder of a broker's license shall charge any brokerage or commission on goods shipped to him for sale, if such goods are transferred by him to any wholesale commission merchant to be sold on commission.

4. No holder of a commission packer's or a wholesale commission merchant's license shall sell to himself any goods received by him to be sold on commission.

5. Every license holder shall keep such books, invoices, vouchers and other papers and records as will enable the food controller or any person by him thereto authorized to verify any report or statement that such license holder is required to make to the food controller.

This regulation of the wholesale trade is expected to result in the more efficient and less costly distribution of fresh fruit and vegetables, to eliminate speculation, and to protect the legitimate dealers against unfair competition by those employing improper methods. A license fee of $10 or $20 will be charged, depending upon the class or sub-class in which the applicant belongs.

GRAND TRUNK ISSUE OVERSUBSCRIBED

A cable received at Grand Trunk headquarters, Montreal, from London this week, stated that the issue of £1,000,000 three-year 6 per cent. notes, recently issued by the Grand Trunk Railway Company in London, had been oversubscribed, notwithstanding the present unfavorable conditions of the money market, due to the war situation. The result of the issue is another proof of the excellent credit which the Grand Trunk Railway holds in financial circles. There have been but rare instances recently of the underwriters being relieved of responsibility with the offering of a new loan. The new notes were issued at 98½ and replace a maturity of like amount falling due next month.

BRANCHES OF CANADIAN BANKS

In November the chartered banks of Canada opened two branches and closed two.

The branches opened were: Plymouth, Montserrat, British West Indies, Royal Bank of Canada; Toronto, Ont. (College Street), Merchants Bank of Canada. The branches closed were: Athalmer, B.C., Imperial Bank of Canada; Hebertville Station, Que., Banque d'Hochelaga.

The branches of the various banks are now distributed as follows: In Canada—Ontario, 1,171; Quebec, 820; Nova Scotia, 119; New Brunswick, 83; Prince Edward Island, 17; Manitoba, 203; Alberta, 266; Saskatchewan, 445; British Columbia, 184; Yukon, 3—3,311. In Newfoundland, 28; elsewhere, 90; total, 3,429.

OLD NOTES OF CANADIAN BANKS

Where They Can Be Redeemed—List of Insolvent Banks Since Confederation

During the past three years, Canadian banking has been untroubled by failures among their number, such as was the case with several weak banks in previous years. The liquidation of the Bank of Vancouver, which suspended operations in December, 1914, is progressing very slowly, and it will take a considerable time to realize the assets and collect the amounts due by the various contributories. There is still the sum of $200,000 due the Bank Circulation Redemption Fund, while the notes not yet presented for redemption amount to approximately $7,000. The liquidator is Mr. Ewing Buchanan, Vancouver.

The following information regarding the redemption of notes of Canadian banks no longer in existence, has been furnished *The Monetary Times*:—

Issued by.	Redeemed by.
Bank of Acadia	Worthless.
Bank of British Columbia	Canadian Bank of Commerce.
Bank of Liverpool, (N.S.)	Worthless.
Bank of London in Canada	Worthless.
Bank of New Brunswick	Bank of Nova Scotia.
Bank of Prince Edward Island.	Worthless.
Bank of Vancouver	E. Buchan, Liquidator, Vancouver.
Bank of Yarmouth	Department of Finance.
Bank Internationale du Canada	Home Bank of Canada.
Banque du Peuple	Department of Finance.
Banque de St. Hyacinthe	Department of Finance.
Banque de St. Jean	La Banque Provinciale du Canada.
Banque Ville Marie	Department of Finance.
Central Bank of Canada	Worthless.
Commercial Bank of Manitoba.	Department of Finance.
Commercial Bank of New Brunswick	Worthless.
Consolidated Bank of Canada.	Worthless since 1890.
Crown Bank	Northern Crown Bank.
Eastern Townships Bank	Canadian Bank of Commerce.
Exchange Bank of Canada	Worthless.
Exchange Bank of Yarmouth.	Bank of Montreal.
Farmers' Bank of Canada	G. T. Clarkson, Liquidator, Toronto.
Federal Bank of Canada	Worthless since 1893.
Halifax Banking Company	Canadian Bank of Commerce.
Jacques Cartier	La Banque Provinciale du Canada.
Maritime Bank of the Dominion of Canada	Worthless since 1893.
Mechanics' Bank of Montreal.	Worthless.
Merchants' Bank of Halifax	Royal Bank of Canada.
Merchants' Bank of Prince Edward Island	Canadian Bank of Commerce.
Metropolitan Bank of Montreal.	Worthless.
Metropolitan Bank, The	Bank of Nova Scotia.
Northern Bank	Northern Crown Bank.
Ontario Bank	Bank of Montreal.
People's Bank of Halifax	Bank of Montreal.
People's Bank of New Brunswick	Bank of Montreal.
Pictou Bank	Worthless.
St. Lawrence Bank	Standard Bank of Canada.
St. Stephens Bank	Department of Finance.
Sovereign Bank of Canada	G. T. Clarkson, Liquidator, Toronto.
Stadacona Bank	Worthless since 1890.
Traders Bank of Canada	Royal Bank of Canada.
Union Bank of Halifax	Royal Bank of Canada.
Union Bank of Prince Edward Island	Bank of Nova Scotia.
United Empire	Union Bank of Canada.
Western Bank of Canada	Standard Bank of Canada.

The table at the foot of this page, revised to date by *The Monetary Times*, gives a list of insolvent banks and

INSOLVENT BANKS AND THOSE HAVING GONE INTO LIQUIDATION IN CANADA SINCE 1867

25	(5) Bank of Vancouver, Vancouver	March 16, 1910.	Dec. 14, 1914	587,400	446,105	1,120,862	725,721	Now in course of liquidation.	

(1) This bank was only in existence 3 months and 26 days. It re-opened for a few days and redeemed a few thousands of its notes. This lasted only a day or two, and the remaining note-holders with the exception of the Government got nothing. The Dominion Government received 25 cents on the dollar on several thousand dollars' worth of the notes which it held. (2) The figures for the Bank du Peuple are as at July 31, 1895, sixteen days after actual date of suspension. (3) Figures from January, 1910, Government statement—the last published figures of this bank. (4) There are about $94,530 worth of notes still outstanding but it is expected that they will be paid in full out of the assets of the Bank. Some time may elapse, however, before this is done. In the meantime, there has been no dividend paid to depositors and it is difficult to say if there will be a dividend. (5) All the notes presented have been redeemed, but this was made possible largely by recourse to the Bank Circulation Redemption Fund, which the liquidator will have to reimburse as the assets are realized, and the liabilities of the contributories collected.

these having gone into liquidation in Canada since 1867 The bank notes of eight institutions are now worthless. The Central Bank of Canada had its head office at Toronto and suspended in 1887. Since 1890 its notes have been worthless. The Consolidated Bank of Montreal suspended in 1879. The Exchange Bank of Canada was another Montreal institution, chartered in 1871. It suspended in 1883. The Federal Bank of Canada, at Toronto, changed its name from the Superior Bank of Canada. It went into voluntary liquidation in 1888. The Bank of London in Canada, had its head office at London, Ont., and failed in 1887. Its notes have been worthless since 1893. The Maritime Bank of the Dominion of Canada had its head office at St. John, N.B., and suspended operations in 1887. The Pictou Bank, a small institution of Pictou, N.S., ceased operations in 1887. It paid its depositors in full. The Bank of Prince Edward Island had a local charter of the provincial government and suspended in 1881. The notes of all the above institutions are now worthless.

LARGEST BOOK IN THE WORLD

This book was made by the government printing bureau at Ottawa and erected in Connaught Place in connection with Ottawa's Victory Loan campaign. The book was 15 feet high, 8½ feet in breadth and 3 feet thick. The two gentlemen standing at the platform are the book-makers, Mr. W. C. Allen, foreman bookbinder (left), and Mr. C. J. Baldwin, chief mechanic (right).

MAKE IT
OTTAWA!

ELECTRICAL PRODUCTION GROWING

The electrical production of such products as fine steel, calcium carbide, carborundum and other substances requiring high heat, is growing, and will undoubtedly utilize an increasing share of the electric energy derived from Ontario's water powers. The high prices now prevailing for coke and coal and for steel products make the electric furnace very attractive, and there is every indication that electric steel production in Ontario will grow rapidly during the next year or two. It is anticipated that the electric furnace will not only be applied to the production of high-speed tool steels, but that it will also be used to smelt the coarser grades now produced in the open-hearth furnace. There is also every indication that electric smelting of iron, copper and other ores will be an important factor in the mining districts of the province.

The British Forgings, Toronto, has installed ten electric furnaces of a capacity of 6 tons per heat each, or an annual capacity of 72,000 tons. This is the largest electric steel plant in the world, and uses electric energy generated at Niagara Falls. This, therefore, furnishes an additional reason why our water-powers should be kept under public control to ensure power to industries at the lowest possible cost.

CANADA REPRESENTED AT CONVENTION

Presidents of Canadian Insurance Companies at New York Gathering

Canada was well represented at the recent annual meeting in New York of the Association of Life Insurance Presidents, the following delegates attending from Toronto, London and Montreal:—Canada Life, Toronto, Herbert C. Cox, president; E. M. Saunders, treasurer; C. R. Acres, secretary; T. G. McConkey, general superintendent. Continental Life, Toronto, George B. Woods, president; New York Life, A. Homer Vipond, Montreal; North American Life, Toronto, L. Goldman, president; and Northern Life, London, T. H. Purdom, president. A large number of interesting addresses were delivered. Mr. William A. Hutcheson, vice-president and actuary of the Mutual Life of New York, delivered an address on "Life Insurance and the War." He touched upon the work of the agents and companies in the Liberty Loan campaign and also alluded to the work that had been done by the company managers in aiding the government in its insurance scheme for soldiers and sailors.

Military or Naval Service.

He said, in part:—"Let us now consider the amount of insurance in force under policies on lives which may enter military or naval service. We should divide these policies into two classes, (1) those on which the company cannot charge any extra premium for war service, and (2) those on which an extra can be charged. Meantime we shall pass over the second group because the war extra premiums payable on these policies must be considered sufficient to cover the extra mortality under them. As to the first group—those under which the companies have to pay any death claims due to war service without receiving any consideration therefor—I have estimated the maximum amount insured on the lives of men of military age in this country by comparing the aggregate amount insured at conscription ages, 21 to 30, with the total amount insured in my own company, and by using this ratio to the amounts insured in all companies. This, of course, is a very rough method, but, as I am not aiming at exactness, it is sufficient for my purpose.

"Many at these ages will be unfit fo service, but, on the other hand, many of other ages will enter military or naval service before we are through with this war. Taking the figures of my own company—and they are doubtless typical of the older, but not of the younger, companies—we had about $1,370,000,000 of insurance on the lives of males in the United States in force on December 31st, 1916; i.e., shortly prior to the date of our entry into the war; of this amount about $172,000,000 (or about 12½ per cent. of the total sum insured) was on the lives of males of conscript ages—21 to 30.

Free From Restrictions.

"This is the maximum amount we could have at risk if all males of conscript ages were in the service. It is impossible to state what proportion of the holders of these policies will see service either at home or abroad, but in any case practically all of this vast amount of insurance is free from all restrictions as to, or payment of extra premium for, military or naval service either at home or abroad. Coming now to policies under which an extra premium is required for such service, in the year 1916 we issued about $163,000,000 of new insurance, and over $44,000,000 (nearly 27 per cent. thereof) was on lives aged between 21 and 30. This latter percentage 27 per cent.) probably indicates more or less the percentage of insurance now issued by all companies at conscript ages, and it further indicates very roughly, in the case of newly formed companies, the percentage of the total insurance in force which is on the lives of men subject to military or naval service.

"At the end of the year 1916 there was $16,800,000,000 insurance in force in companies doing ordinary business and reporting to the New York Insurance Department. Some of the business so reported is on the lives of females, and still other insurance so reported is on the lives of foreign residents. Taking thee facts into account and assuming that only 10 per cent. thereof was on male lives in the United States between ages 21 and 30, we see that no less than $1,680,000,000 ordinary insurance was on male lives subject to military or naval service, and practically all of it was absolutely free from all restrictions as to such service."

CONSERVATION OF FOOD

The outlook for production of foodstuffs in Europe next year is distinctly unfavorable. France has been dependent upon intensive cultivation of land, which in turn has required an abundant use of fertilizers, but since the beginning of the war the available supply of fertilizers in Europe has dwindled, and the land of France has deteriorated until to-day it is incapable of large production. The 1917 cereal harvest in France was less than half that of a normal pre-war year. In Great Britain, much new land has been brought under cultivation by the aid of tractors, which have also been used to some extent in France, but there is little prospect of much improvement in production in Europe while the shipping shortage prevents the transportation from overseas of nitrates, phosphates and other fertilizing supplies. Indeed, the Allies must be prepared for even poorer crops in 1918 than those of the current year.

The Canadian food controller has pointed out that the Canadian people have refused nothing that was needed toward the successful prosecution of the war. When conservation of food became necessary, the people of this country commenced to make an effort to conserve food. It is difficult to change extravagant food habits but it is being gradually done. Wheat is being saved by the use of corn and other cereals. Pork and beef are being saved by the increased consumption of fish. Much has already been done and the effort is becoming more general and the results more gratifying. The call has now been sounded for increased production of food. The need is very great if the Allies are to be given the support from this country which they require. With all the accessible reserves of food now exhausted, and a grave shortage in the present supply to meet the demands before the next harvest, the situation calls for a tremendous effort.

FINANCING IN UNITED STATES

The prohibition of exports of gold by the United States a few weeks ago was an important matter to which little attention was given here, except by our bankers. For the first time, the automatic flow of funds between Canada and the United States then became hampered by the dollar exchange situation. New York is the international clearing house of Canada on this continent and the free movement of gold is therefore essential to stabilize exchange. When the prohibition became operative, a strong delegation of the Canadian Bankers' Association visited Washington, conferring with the United States government as to the awkward situation created by their action. Our bankers pointed out the disadvantages to free trading that would follow unless the condition was rectified. The result was a modification of the embargo on gold shipments in favor of Canada. Largely due to this action, exchange has since become normal, obviating the necessity of gold importations.

Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, in his masterly review of financial and commercial conditions at the annual meeting of that bank, referred to this matter. He also reminded us that the immediate need of the United States government for money to carry on the war now precludes Canadian borrowers from financing their requirements in that country. In the early part of the year it was otherwise. During the past twelve months, sales of Canadian securities in the United States were $152,000,000, compared with $153,000,000 for the previous year. The former amount includes the $100,000,000 Dominion government loan floated in July last on terms which then seemed high, but have at no time since been obtainable. Of this money $20,000,000 was required for refunding purposes. Sir Frederick drew special attention to a fact which has escaped general notice, namely, that our large loan in New York last summer is indicative of Canada's preferential standing in the American market, during the past six months no other foreign government having floated a public loan in the United States. This is something of which Canada may well feel proud.

OUR TRADE RECORDS

During November Canada shipped abroad a substantial volume of agricultural products and manufactures. In that month, exports of Canadian produce were valued at over $187,000,000 and the excess of exports over imports was $114,000,000. This is another new record in Canadian trade statistics, the best previous total being $177,000,000 of exports in July last, with an excess of $87,000,000 of shipments in our favor. While manufactures contributed much to the November total, the exports of agricultural produce were valued at $78,000,000, the largest total reported for any one month to date. Taking animal produce and agricultural products together, our exports of those items last month exceeded $101,000,000.

One of the pleasing features of the November trade statement was the decrease in imports; they were smaller in volume than in any month since February. This helped considerably to create a substantial and favorable balance of trade. Thrift and economy were not as important a factor in this result as was the increasing difficulty of

(Continued on page 11.)

HALIFAX INSURANCE LOSSES

The value of property burned in the Halifax disaster is estimated by Mr. J. B. Laidlaw, a well-known Toronto fire underwriter, who has just returned from the stricken city, at $2,000,000 with losses to the fire companies not exceeding $1,500,000. Estimates of total damage vary considerably, but Mr. Laidlaw puts the figure, including the burned property, at $5,000,000. Other underwriters, however, place the total destruction at a considerably higher amount.

The fire underwriters will treat their policyholders in the customary generous fashion. The fact that the disaster was primarily due to explosion and the consequent difficulty in determining liability in many cases, will not be allowed unduly to interfere with the payment of claims. Those who carry fire insurance in reputable Canadian, British and United States companies will have their claims met with a full measure of justice and promptitude.

The plate glass insurance companies will suffer heavily, their approximate losses being estimated at $150,000. This is relatively greater than the fire losses when one considers premium income. The twenty-two companies writing plate glass insurance in Canada last year, for example, received premiums in that year of $271,302, and their losses were $131,502. The Halifax loss alone is about $20,000 more than the total plate glass losses in 1916.

Insurance men are not inclined to quibble over technicalities in this time of disaster in Halifax. Naturally, they regard the loss of life as one of the most distressing features and also the loss of sight by several hundred people. They properly feel that the immediate attention should be given to those blinded and injured by the effects of the explosion.

NEED OF ECONOMY

When we put half a million soldiers in the field we withdraw those men from productive enterprises. They do not, while they are actually in training or in service, produce anything. They do, on the other hand, consume much. There is nothing more expensive than to support and maintain a great army in the field, especially if it is on the fighting line. The attrition of supplies and everything else is very great when we have a fighting army in the field.

The United States and Canada are the large remaining storehouses in the world of supplies and credit. We must maintain and make effective as possible our own soldiers and the soldiers of those nations who are fighting for us. We must therefore draw as little as possible upon our common store of supplies and money. The more we lessen our domestic demand the more we can contribute to the support and effectiveness of our allied armies.

Economy is a national duty, such a duty upon the people at home as fighting is upon those Canadians and Americans who are bravely offering their lives for the honor of Canada and the United States and the preservation of liberty and justice.

STOCK EXCHANGE OUTLOOK

Brokers Do Not Expect Any Sustained Bull Movement—Minimum Prices

The volume of business transacted on the Montreal and Toronto stock exchanges last year showed a great shrinkage in comparison with that of 1916. However, a period of activity such as was enjoyed for 18 months after the re-opening of our stock exchanges in 1915 could not be expected to last indefinitely and shrinkage in the volume of business last year was only to be expected. Business was much restricted by the scarcity of call money on the "street" in Montreal and Toronto.

Minimum Prices Again.

As a result of the situation brought about by the shortage of credit supplies for market purposes, the steady diversion of investment funds from the older securities into the Canadian war loans, and a sympathetic depreciation in values resulting from the protracted decline in the New York market, the Canadian stock exchanges, both Montreal and Toronto, decided on October 30th to adopt again a system of minimum prices. The necessity for protective measures had been felt for some days previously. Either a freer supply of credit was necessary or further depreciation was inevitable under forced liquidation of speculative accounts, with unsettling effects on the financial situation and to the detriment of the coming campaign for Canada's fourth war loan, which was about to be issued.

Reasons for Decision.

The decision to meet the situation by reverting to a plan of minimum prices, similar to that instituted when the markets reopened after the forced suspension in the autumn of 1914, met with the approval of the authorities in charge of the war loan campaign and of the banks.

The stabilizing of the market position while the Victory Loan campaign was in progress was considered of more importance than a temporary interruption to the ordinary course of business on the stock exchange. The arrangement of a minimum price basis, by solving the most pressing problem of the stock exchange, released from that body skilled workers whose efforts are required in selling the new war bonds.

With the banks, the demands of the moment in connection with the financing of Imperial government credits and the war loan were too important to make advisable any considerable diversion of funds to the stock exchange. Market values were considered low in relation to intrinsic values. With that as a sound basis to go on the plan of establishing a minimum level of prices was considered to meet the various problems of the situation satisfactorily.

The previous time the Canadian exchanges closed was at the end of July, 1914. They remained closed until the middle of October, when restricted trading on a cash basis was resumed through the stock exchange committees. A few days later the whole list of stocks was so allowed to be dealt in, and early in November more restrictions were removed. On March 27th, 1915, open trading in mine shares was resumed, and on April 6th open trading in all securities selling above the minimum was allowed. Minimum price restrictions were finally abolished at the end of June, 1916, and an open market had prevailed up to October 30th, 1917.

Stock Market Outlook.

With the steady demand from the government for the surplus money of the country stock brokers see little prospect of a sustained bull market. Their experience has been that clients whose money would ordinarily have been put into standard investment securities is being held for the purchase of government loans, which accounts for the lack of buying power in the market, at the present low levels. The country as a whole is prosperous, but the surplus money is largely in the hands of people of small means, including the farmers, who have not as yet been educated to purchase investments.

The method undertaken to float the Victory Loan, with the machinery provided for appealing to these small investors, should prove an educational campaign from which the stock market should profit in time, but immediate activity in the stock market, which can be obtained only by the initiation of a bull movement, is not at present in sight, although stocks are cheap and in many cases far below their actual intrinsic value.

WAR INSURANCE AND TAXATION

Something for Policyholders' Consideration — Financing the Farmer

Mr. George E. Ide, president of the Home Life of New York, in an address at the meeting of the Life Insurance Presidents' Association, in New York, on "Governmental War Insurance and Taxation," said, in part:—

"The question of taxation, as affecting life insurance companies, is one which has, in the past, been a source of great vexation to insurance managers. The great proportion of taxes paid, up to the present time, has been the result of legislation imposed by the various states. This taxation was, in the main, for the purpose of meeting state expenses of a general character, as very little of the amount collected was needed for the administration of the various insurance departments in the various states. The tax was an easy one for the states to levy and collect, and was, and is, very attractive to the states imposing the tax.

"The present war insurance tax is an entirely different matter. The idea of levying a national tax for war purposes from the life insurance companies is sensible, practical, and the tax is easy of collection, but the fundamental principle must be kept clearly in mind that this is a contribution from the individuals composing corporations and not a governmental levy upon some intangible body, loosely described as a 'corporation.'

To Educate Policyholders.

"Had the companies ten years ago started in by unanimous consent to educate their policyholders as to the application of taxes, state taxation by which each commonwealth has been trying to force these corporations to pay its local bills would by this time have been better understood and corrective measures would have doubtless been instituted. If the policyholders had been taught that ruthless attacks on railroads, on real estate, on all vested interests, were really attacks on the private property rights of every individual policyholder, then the millions of policyholders of this country —most of whom are voters—would have been by this time in a position to present an impregnable barrier against unfair legislative attack and confiscation. In other words, each policyholder would have been taught to realize that it was his duty to oppose every legislative act which was unfair to his vested interests, and these attacks could not have been successful, based as they were in many instances simply on the popular prejudice against corporations."

Financing the Farmer.

"Requirements of American Agriculture After the War," was the subject of an address by Mr. Herbert Quick, a member of the Federal Farm Loan Board, at Washington, D.C., at the same meeting. Mr. Quick commented upon the need of the farmers for adequate financial support in order to properly develop America's agricultural products. He said that the Farm Loan Bureau recognized that the farmer needed a different system of financing from that which has been built up for the merchant, manufacturer and city resident generally. He said, in part:—

"A careful survey of the farm loan field made in 1916 discloses the fact that life insurance companies have been constantly extending their operations in this field, have been entering new territory and have had an excellent effect in somewhat reducing interest rates and augmenting the supply of available funds for farmers. This, to my mind, is matter for congratulation. Where the farm loan business is done conservatively it is perhaps the safest of all investment fields. In entering this field the insurance companies have been true to the interests of their policyholders. I am of the opinion that more and more money of the life insurance companies ought to be loaned to the farmers in the interests of the companies themselves, of their policyholders and of the nation.

Agriculture after War.

"The requirements of American agriculture after the war would seem to call upon the management of the life insurance companies to study our system and to consider the extent to which these securities may be used for placing your funds at the service of the farmer. In making such a study you should, and will, ask yourselves whether or not our system is a good thing for American agriculture. Does it make for better farming? Is its face set in the right direction? Will it build up a better rural life? Will it so increase our supplies of food, shelter and clothing as to put our urban populations in an improved position for our competition with the world in manufacturing, transportation and finance? Can it be developed into a force for the preservation of the soil? Is it under safe, sound, conservative management? Are its securities good?"

TWO WESTERN INSURANCE SUPERINTENDENTS

Mr. A. E. Ham, superintendent of insurance for Manitoba, is the president of the recently formed Association of Provincial Superintendents of Insurance of the Dominion of Canada. Mr. A. E. Fisher, insurance superintendent for Saskatchewan, is secretary of the association. The holding of the important convention of provincial insurance superintendents at Winnipeg early this month was largely due to the efforts of Mr. Ham and Mr. Fisher. At this meeting, Hon. Edward Brown, provincial treasurer of Manitoba, paid a strong tribute to the ability of Mr. Ham, referring to his "great wealth of experience." He added that Mr. Ham had "the entire confidence of the administration."

(British and Colonial Press Photo)

Mr. A. E. Ham, Winnipeg, and Mr. A. E. Fisher, Regina.

Mr. Fisher is also recognized as one of the most capable provincial insurance officers in Canada. Both these officials, whose photograph reproduced here was taken at the national convention of the life underwriters of Canada at Winnipeg last summer, have the confidence of their governments, of insurance companies and of policyholders.

UNITED STATES FIRMS CONTROL FISHERIES

The greater portion of the Canadian lake-fishing business, states the Commission of Conservation in their report on "Birds, Fish and Game," is controlled by United States firms, and this is due to the fact that more than 90 per cent. of the total output finds its market in the United States.

On our Great Lakes, a very large fishing industry is carried on, not only during the summer and autumn months, but also in mid-winter, when the fish are taken through the ice, and, owing to climatic conditions, can be transported long distances without requiring expensive methods of refrigeration. They are frozen naturally as soon as taken from the water and are shipped to various centres in the United States, especially in the western states, although there is a growing demand for Canadian lake fish in Eastern markets also.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Ogilvie Flour Mills.—A dividend of 3 per cent. on the common stock, payable January 2nd to shareholders of record December 24, has been declared.

Kerr Lake Mining Company.—The company reported on December 10, 1917, that it produced 205,522 ounces of silver in November, against 213,802 in October and 210,388 in September.

Guarantee Company of North America.—A bonus of 2 per cent. for the year was declared by the directors at a meeting recently held in Montreal, payable January 15th, 1918, to stockholders on record December 31st, 1917, in addition to the regular quarterly dividend of 2 per cent.

Nova Scotia Steel and Coal Company.—A dividend of $2.50 has been declared on the common stock, payable January 15, to stock of record, December 31. The regular quarterly dividend of 2 per cent. on the preferred shares have also been declared, payable on the same dates.

Imperial Oil Company, Limited.—Notices have been sent to shareholders announcing that the company has decided to make a new issue of 50,000 shares of the unissued capital stock of the company, which will be issued at par, $100. Shareholders have the right to subscribe to the new stock pro rata for one share to every five shares now owned. No fractional shares will be issued in respect of any number of shares less than five now owned. Subscription is to be made on or before December 27th.

Canada Cement Company.—The company's financial statement for the year ending December 31st will be a satisfactory one, according to Mr. F. P. Jones, general manager and vice-president of the company, at Montreal. He also stated that they had sufficient munitions orders on the books to keep the plants busy until next May. The company recently was the recipient of an order for 6-inch shells. The demand for cement has been quite active, but at the moment is rather dull. This is of no significance, however, as it is usual at this time of year for the demand to decline.

Dominion Bridge Company.—The control of the International Engineering Works, Amherst, has been secured by this company by purchasing a block of 70 per cent. of the stock, which was controlled by Corporation Agencies, Limited. The new subsidiary will be used in connection with the development of the bridge company's new activities in the manufacture of marine engines. The International is now engaged on turning out stationary engines and boilers, as well as shells.

The board of directors of the new company, as now owned by the Dominion Bridge is composed of six of the directors of Bridge: Phelps Johnson, G. H. Duggan, F. L. Wanklyn, J. M. McIntyre, H. H. Vaughan and A. J. Brown, K.C.

Imperial Tobacco Company of Canada.—The operations of the company for the past three fiscal years ending September 30, are as follow:—

	1917.	1916.	1915.
Net profits	*$2,455,224	$2,756,619	$2,313,425
Preferred dividends	481,800	481,800	481,800
Ordinary dividends	1,620,150	1,620,150	1,350,125
Surplus	$ 353,274	$ 654,669	$ 481,500
Previous surplus	1,245,454	590,785	379,310
Total surplus	$1,598,728	$1,245,454	$ 860,810
Less dividend	†270,025	....	270,025
Profit and loss surplus	$1,328,703	$1,245,454	$ 590,785

*Net profits for the year after deducting all charges and expenses for management, etc., and providing for income war tax, 1917.

†Final dividend of 1 per cent. for year ended September 30, 1916, paid December 30, 1916.

The above figures do not include the company's proportion of undivided profits of the associated companies, and which they have not thought fit to declare as dividends.

Southern Canada Power Company.—For the year ended September 30th last the Southern Canada Power Company reports net profits from operation of [illegible], and with other income a total of [illegible]. From that was credited $15,000, the year's proportion of engineering, legal and other charges, [illegible], the year's proportion of bond and other interest, and $952 reserve for bad debts. There remained a balance of $44,482 to be added to profit and loss, bringing that account up to $94,851. A combined operating statement of the company and its subsidiaries shows that gross earnings have expanded from $104,442 in 1914 to $432,634 in 1917, and surplus earnings from $7,936 to $47,347. The balance sheet of the company shows current assets of $296,165, including $99,486 cash, against current liabilities of $103,922.

The chief features of the statement of assets and liabilities are as follow: Assets—Plant, etc., September, 1916, $4,130,985; additions, 1917, $871,077; current assets, $296,165; other assets, $68,400; total, $5,366,628.

Liabilities—Preferred stock, $240,000; common stock, $3,000,000; funded debt, $1,900,274; mortgages, $26,180; current liabilities, $103,922; reserve, $1,000; profit and loss account, $94,851; total, $5,366,628.

La Rose Consolidated.—The dissolution of this company has been authorized, as well as the distribution of the assets of that company to the shareholders, at a meeting of the shareholders of La Rose Consolidated held at Augusta, Maine. The assets of La Rose Consolidated consist of the La Rose Mines in Ontario, and the action taken at the recent meeting means that the Consolidated shareholders will receive one share of La Rose Mines, the Ontario company, for every share of the old stock. The change is brought about to avoid certain difficulties arising out of the United States income tax, which would double the company's expense in that connection.

The directors are taking steps to have capital stock of La Rose Mines, Limited, reduced from $6,000,000 par value to $1,500,000 par value, divided into 1,500,000 shares of $1 each. Since the company was incorporated more than $7,000,000 has been paid in dividends. This reduction of capital stock will facilitate the distribution of stock of the operating company amongst stockholders of this company by enabling the exchange to be made share for share without in any way affecting their intrinsic value. La Rose Consolidated Mines Company was incorporated on May 22, 1908, under the laws of Maine, owning the entire capital stock of La Rose Mines, Limited, which in turn owns 90 per cent. of the capital stock of University Mines, Limited. La Rose Consolidated also owned 7.3 per cent. of University Mines. The property aggregated 359 acres at Cobalt. The claims held by La Rose Mines, the Ontario corporation, consist of the following: La Rose, La Rose Extension, Princess, Lawson, Fisher Eplett, Silver Hill and Violet. The company has also undertaken some exploration work in the Porcupine district. The capital of the dissolved holding company was $7,493,135, par value of shares being $5. The current dividend rate is 20 cents per share per annum.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Amherstburg, Ont. December 12 Homes of Messrs. Man and McTaggart damaged.

Brantford, Ont.—December 18—Basement of Merchants Bank destroyed.

Brantford, Ont.—December 19 Westbrook's stationery store destroyed. Estimated loss, $2,000.

Brockville, Ont.—December 13 House of Mr. E. Seeley destroyed.

Brockville, Ont.—December 18—Anvern cheese factory destroyed.

Chatham, Ont. December 12—Park Brothers' factory damaged. Caused by backfire from one of the engines.

Chatham, Ont.—December 18—School near Plaincourt, in Dover township, destroyed

Edson, Alta.—December 11—The Edson Herald building and contents, including newspaper press, destroyed. Loss also includes the standing jobs.

Fort William, Ont.—December 17—Home of Mr. Robert Knox destroyed.

Cardston, Alta.—December 9—Cardston Creamery destroyed. Estimated loss, $4,000.

Halifax, N.S.—December 6—Large part of city destroyed. Cause, explosion of munition ship. Value of property burned estimated at $2,000,000 and fire insurance losses at $1,500,000.

Lindsay, Ont.—December 3—Post-office, hotel and several stores and dwellings destroyed. Fire started in Doherty Brothers' general store.

Medicine Hat, Alta.—December 14—Home of H. Borkett damaged. Caused by little child playing with matches. Estimated loss, $600.

Montreal, Que.—December 12—Restaurant of J. Liboiron destroyed.

Montreal, Que.—December 12—Garage of H. Menard and F. X. Brazeau destroyed.

Montreal, Que.—December 15—Stable and seven horses of Pierre Benard destroyed. Caused by lighted cigarette dropped into hay.

Montreal, Que.—December 19—St. Stanislas' Catholic church destroyed. Estimated loss, $500,000; insurance carried, $170,000.

Moose Jaw, Sask.—December 8—Chinese laundry damaged. Caused by an overheated stovepipe. Estimated loss, $300.

Niagara Falls, Ont.—December 15—Barn of Williams Commission Company and twenty-four cattle destroyed.

Ottawa, Ont.—December 13—Arcade building destroyed. Caused by overheated stovepipes. Estimated loss by occupants, $100,000; on building, $150,000. The merchants suffering loss of stock are: Powers Brothers, clothing; Wolfe Company, furriers; Campbell's Clothing Company, Scotland Woolen Mills and Ely Haberdashery.

Port Arthur, Ont.—December 12—Canadian Northern station building damaged. Estimated damage to building and contents, $15,000; to records, $50,000.

Port Stanley, Ont.—November 27—Two houses, property of T. Burch and A. A. Sutherland, destroyed.

Regina, Sask.—The Winter Fair building and contents destroyed. Caused by fire from cookstove. Estimated loss, $140,000; insurance carried, $99,500.

St. John, N.B.—December 12—House of Mrs. W. Miller damaged. Cause, defective flue. Insurance carried in the Scottish Union and National Insurance Company.

St. John, N.B.—December 13—St. David's Presbyterian church damaged

St. John, N.B.—December 14—No. 2 Barracks, Partridge Island, destroyed. Estimated loss, $20,000.

St. John's, Que. December 14—Hat factory of Eugene Normandin destroyed.

St. John's, Que. December 14 Dance's jewellery shop destroyed

St. John, N.B.—December 16—The National Clothing Manufacturing Company and the women's clothing store of Fred. A. Johnson, 2 to 8 Mill Street, corner of Union Street, was destroyed. The building, a four-story brick structure, was owned by a syndicate, of which Thomas Nagle is manager. The estimated loss is $125,000, and is covered by insurance. The losses are: National Cloak Company, $75,000; F. A. Johnson, $20,000; on building, $30,000.

St. John's, Que.—December 14—St. John's Straw Works Company destroyed. Cause, lighted match thrown on to bundle of straw.

St. Thomas, Ont.—December 17—Building of Max Kulman destroyed. Estimated damage, $3,000; insurance carried, $1,000.

Timmins, Ont.—December 10—Residence of Mr. Thompson destroyed.

Toronto, Ont.—December 15—Shoe store of Bachrack Brothers damaged. Estimated loss on stock, $12,000; on buildings, $1,500. Insurance carried on stock, $50,000.

Toronto, Ont.—December 19—Store and contents of B. Stein, tailor, damaged. Estimated loss on contents, $500; on building, $200.

Valleyfield, Que.—December 13—Power-house Montreal Cottons, Limited, plant destroyed.

Wabamun, Alta.—December 9—Home of Mr. Smith destroyed.

Welland, Ont.—December 11—House of Mr. Kimber damaged. Estimated loss, $200.

Winnipeg, Man.—December 9—Winnipeg Paper Company destroyed. Estimated loss, $8,000.

BANK CLEARINGS

The following are the bank clearings for the weeks of December 14th, 1916, and December 15th, 1917, respectively, with changes:—

Total	$248,176,616	$248,713,348	—	$ 536,732

The Toronto bank clearings for the current week are $61,295,067, compared with $61,595,950 for the same week in 1916, and $50,457,031 in 1915

A resolution to make it unlawful to buy or offer to buy any Federal bonds issued since April 6, 1917, for less than par and the accrued interest, was introduced recently by Representative Wood, of Indiana. The object is to prevent depreciation and speculation in government war-time securities. It was referred to the judiciary committee. Secretary McAdoo recently stated he was convinced "German selling" had quoted Liberty bonds below par.

OPERATION OF BRITISH COLUMBIA ELECTRIC

Jitney Has No Place in Transportation Service of Community, Says Commissioner Shortt

Dr. Adam Shortt was recently appointed as a commissioner to investigate the economic conditions and operations of the British Columbia Electric Railway Company and subsidiary companies and to decide definitely as to the possibility of street car service being maintained in competition with the jitneys. Dr. Shortt's recommendations in his report just published are briefly as follow:—

Electric railway system: (a) Complete elimination of jitney competition in Vancouver and between Vancouver and New Westminster.

(b) Retention of present fares and transfers within "city population area" to be agreed upon.

(c) Readjustment of fares and service on outside lines at a conference to take place between company and municipal representatives.

(d) Discontinuance of transfers from city to inter-urban lines and vice-versa.

(e) Fair trial of one-man car on certain lines.

(f) Increased speed; skip-stop plan of operation and special through cars to New Westminster.

Lighting system: (a) Reduction in lighting rates on January 1, 1918, to 8 cents net; on January 1, 1919, to 7½ cents net; on January 1, 1920, to 7 cents net.

(b) Discontinuance of meter rentals but minimum charge of 50 cents a month.

(c) If security deposits are retained, 6 per cent. interest to be paid; if not retained, a surcharge of 10 per cent. may be made on all accounts overdue for 20 days.

General: (a) That a public utilities commission be formed for the province.

Jitneys Must Go.

"Either the jitneys in competition with the street cars must be eliminated and until more prosperous conditions return, certain other changes and economies introduced, or the electric street cars must either go out of business, or, if forced to operate on a basis which will permit them to meet the competition of the jitneys, they must at least abandon the outlying and more unremunerative sections of their lines, reduce the frequency of the service on others, discontinue all transfers, and exact a five-cent minimum fare for all persons, including children under 12 years, school children, workmen, etc.

"The financial condition of the British Columbia Electric Railway Company as regards its street railway system is impossible of continuance on the basis of the past three years.

"The urban and inter-urban street railway business as proved by long and wide experience, cannot be conducted upon a basis of free competition.

"Jitney competition on a considerable scale . . . has destroyed the normal basis on which the street railway system was built up and can alone be maintained."

In such terms does Dr. Adam Shortt sum up his conclusions for the elimination of jitney competition from the territory served by the British Columbia Electric Railway Company in a report of 110 typewritten pages which has just been made public at Victoria. Dr. Shortt was appointed by the provincial government to investigate transportation conditions in Vancouver and Victoria following the strike on the British Columbia electric system last June. His investigations included not only the electric railway system, but was widened to cover the light and power system.

Inasmuch as the fate of the jitney was wrapped up in his report, because the company intimated at the time of the strike and contended during the investigation that its inability to pay the men's demands for increased wages was due in large measure to the depletion of its revenue by jitney competition. On economic grounds the issue was discussed before the commissioner, the company asserting that it could not continue in operation, paying the men their increased wages as long as jitneys took the cream of the business and as long as certain fares and transfer regulations were in force on some of their lines.

The commissioner finds that the jitney has no place in the transportation service of a community. Throughout his report on the jitney, which covers some 40 pages of the whole decision, he takes the view that it is the jitney or the street car; that one or the other of them must go; and finally that "an open-minded examination of the jitney service as it at present exists should convince anyone that, while it may be a useful supplement to an electric railway service, it cannot possibly take its place."

Dr. Shortt accepts the company's figures of its return on the capital investment and, with the elimination of $3,785,460 which was not used for plant and other public utility property, finds that its return for the last fiscal year was only 2 per cent. which was not enough to pay debenture interest.

In recommending the elimination of the jitney, he points out that the extra income of $245,000 on city lines would not convert the present deficit into a surplus, but would tend to bring the earnings of the company on its street railway business to the point of at least meeting its outlay.

He also recommends a conference between representatives of Point Grey, South Vancouver and Burnaby and the management of the company "with a view to the recognition of the city population area"—within which fares are to remain as at present—"and the consequent readjustment of fares, transfers and timetables and any other details which they may mutually agree upon. At such a conference there is no doubt that at least temporary arrangements might be made which would enable the company to continue a reasonable service on practically all of its outlying lines."

The tone of this paragraph would infer that the commissioner admits the possibility of reducing or discontinuing service on some outlying lines.

Should Revise Rates.

The intricate and voluminous tabulations placed before the commissioner on fares make it impossible, even in a report of 110 pages, that they should be dealt with in detail. Dr. Shortt admits this but suggests that the rates must be revised and simplified to make them uniform and equitable, referring evidently to the inter-urban fares. Beyond the limits of a city area to be defined, he states that the suburban areas should bear, not the full, but some approximate share of the cost of the service rendered. "In practically all cases," he adds, "this will involve the cancelling of transfers from urban or inter-urban lines to city lines—meaning, of course, by the city lines, those within the city population area already referred to."

The commissioner's recommendations as regards lighting rates are practically all detailed above. He suggests, however, the wider use of electric current as a means of bringing down its price. The rates charged by the company, for larger quantities of power, he finds are fair and reasonable and for street lighting exceptionally low. The minimum monthly charge, he recommends as reasonable.

As for lighting rates, he says that in comparison with United States cities, Vancouver does not fare badly, being fifty-second on a list of 105 cities. In comparing Vancouver rates with those of Seattle, he points out that it must be borne in mind that Vancouver is being compared, not with the average rates of the United States, but with the lowest of their city rates.

Interspersed among his conclusions as regards the jitney, fares and the conduct of the public utilities generally, Dr. Shortt declares that it took the people of America many years to be convinced that a number of public utilities were natural monopolies and that as long as competition was believed to be the only feasible regulator of trade, hundreds of millions of dollars were squandered.

After dealing exhaustively with the financial figures placed before him, Dr. Shortt goes on to refer to the figures for traffic on the street car lines and comments upon the effect of jitney competition upon it, showing that instead of the large increase in traffic in summer, there was a decline, due to the jitney. The experience of Winnipeg, he said, was similar.

He found it impossible to reconcile the apparent attempts to condemn the company for not meeting the expanding needs of Vancouver and Victoria and on the other hand for having extended its services too widely and rashly.

Position of Company and Investors.

"I feel convinced," he said, "that the great majority of the people of the chief cities of British Columbia do not endorse the bitter references to the company and its investors which are contained in some of the evidence and arguments of those supporting jitney interests. Least of all will they subscribe to the sentiment that it matters little what investors in Britain may think of our treatment of them, because hereafter, in consequence of the great war, supplies of capital are to be sought in the United States."

"When full allowance is made for all the extra traffic which the jitney creates itself," continues Dr. Shortt, "the

MONTREAL WINNIPEG

estimate of the company as to the amount of gross earnings of which the jitneys deprive it is probaby not far from the mark. On this basis for the city and suburbs of Vancouver, the aggregate amount lost to the company through the jitney competition for the year, 1916, is given as $261,278. The actual receipts of the company from this area during the year were $1,237,058. Without the jitney competition, therefore, the gross income would have been approximately $1,498,333; but if we allow for a proportionate increase in the car mileage required to accommodate the extra passengers, amounting to 107,479 car miles, which at an operating cost of 15 cents a car mile, would amount to $16,121, we have left a net increase of $245,157. Incidentally this shows how very far the jitney service is, even at its best, from meeting the transportation requirements of the city and district of Vancouver. The extent, however, to which it cuts in upon the income of the company is quite sufficient to make the difference between the possibility and impossibility of financial continuance on the part of the company.

Cannot Continue in Business.

"At any rate, it is plain from the economic situation which has developed in the centres of Vancouver and Victoria and the financial condition of the British Columbia Electric that it cannot continue in business under the combined influence of the unavoidable shrinkage of population, depressed economic conditions of recent years and the competition of the jitney cars."

Commenting upon the argument of the jitney interests that the jitney would develop into the motor bus, Dr. Shortt says:—

"That it is possible for a trackless motor bus system, installed and operated by a corporation with large capital and a highly organized and efficient staff, to take the place of the street cars on well paved streets, is quite admissible. But this is simply to change from one great public utility corporation to another, and the change might as easily be made by the present corporation, the British Columbia Electric Railway Company, as by any other company, in simply substituting motor buses for street cars, as in the case of the motor bus companies of New York and Chicago. This system, however, has nothing whatever in common with the existing jitney service except the one single feature that neither the jitneys nor the motor buses require tracks and trolleys. Whether the motive power should be in either or both cases electricity or gasoline is merely a matter of experiment and local cost."

UNITED STATES FARMERS TAKE CANADIAN LANDS

"In spite of war conditions," says Mr. R. C. W. Lett, tourist and colonization agent of the Grand Trunk Pacific Railway, of Winnipeg, "brisk settlement is taking place in the Nechako Valley of Central British Columbia. One organization, the Nechako Valley Lands and Development Company, with headquarters at Vanderhoof, B.C., has sold to bona-fide settlers three thousand two hundred acres of its holdings during the past few months. Farmers from the United States are travelling long distances to take these Canadian lands, which are available at from $15 to $25 per acre."

ENORMOUS FIRE WASTE

At a meeting of the Insurance Institute of Toronto, Mr. M. M. Hawkhurst, secretary of the Michigan State Fire Prevention Association, stated that nine schools, seven hotels, six hospitals and 1,600 dwellings on the continent of America are destroyed by fire every day of the year, with a daily loss of 15 lives. The annual fire loss is $230,000,000, that is $26,000 per day, or $400 per minute. In Michigan it has been found that 10 7-10 per cent. of fires are due to electric installations, 10 7-10 to exposure to other fires, and 6 1-10 per cent. to spontaneous combustion. Of all the fires in Michigan, 23 9-10 per cent. are preventable, 39 9-10 per cent. partly preventable, and 36½ per cent. are due to unknown causes. A large proportion of the latter are probably preventable. It is a well-known fact that fires in number are always in direct proportion to the amount of rubbish and dirt allowed to accumulate. Constantinople, which is generally regarded as the dirtiest city of the world, has been destroyed by fire ten times since 1792, which points out that if rubbish and dirt were not accumulated, fires could be prevented, and small fires could be stopped before they became serious.

ROCK ISLAND, QUEBEC, CLAIMS RECORD

The record made by Toronto in the recent Victory Loan issue is a bond to every 3¾ of the population. This record is claimed to have been beaten by the manufacturing town of Rock Island, Que., where an application was taken by one in every three of the population.

The total amount of bonds sold was $153,900, covering an area canvassed of one-half mile by one and a half miles. The employees of the different factories responded liberally, there being 186 men and 86 girls subscribing.

The canvassing was done entirely by Messrs. D. Neveu and J. F. Paquette, two prominent residents of the town, and due to delays the work was not undertaken until the last ten days of the campaign.

Messrs. Neveu and Paquette attribute the success attained to the co-operation of the manufacturers, merchants, bankers and all classes of the people.

UNION INSURANCE SOCIETY OF CANTON

A strong financial statement of the Union Insurance Society of Canton, was presented at the company's annual meeting last spring. This sound and enterprising corporation has established connections in Canada, with Mr. C. R. Drayton as manager here. Mr. Drayton, with headquarters in Toronto, is now organizing his staff throughout the Dominion.

Speaking at the latest annual meeting of the company's business in 1916, Hon. Mr. P. H. Holyoak, chairman, said: "The premium income is eight and a half million dollars which, in view of the exchange factor, indicates steady progress in our business, while the percentage of losses on the other side is no greater than that of the previous year. Out of the balance of $5,128,000 we recommend the payment of an interim dividend of $30 per share and a bonus of 20 per cent. to contributors of business on bonus terms. The directors are more than gratified in being able, taking exchange into account, to place before you accounts which not only show an increased premium, each year beating its predecessor which showed a record, but a satisfactory percentage of losses which in times like these it is impossible to attribute to anything but the most careful direction and the devoted attention of the whole of our staff, each individual member of which is bearing his share of the added strain consequent upon the character of the business which the society with its world-wide connections is at present conducting.

"Turning to the balance sheet, you will notice the increase in our subscribed capital, owing to the issue during the year of 3,038 shares in exchange for 'China Fire' shares, the premium on which has been divided between reinsurance fund and investment fluctuation account. These accounts now stand at £463,000 and $1,330,000 respectively. The former was first shown in our reports in 1901 since when it has been more than quadrupled; the latter has already borne the depreciation in our gold investments, as a result of their having been written down to market prices on December 31st, 1916, and is sufficient to meet any possible further shrinkage even if the war should continue for a longer period than the most pessimistic individual can anticipate. On the other side of the balance sheet are shown separately our investments in British securities—the total funds in gold now amounting to £1,408,000. Our silver securities are sufficient for our requirements. We have responded to the government's desire, both as regards the society and our allied companies, and sold the whole of our American dollar securities, thus assisting our country in the regulation of foreign exchange. We have also lent to the treasury for the same purpose the whole of the securities held by us which are acceptable to them. Since the accounts were closed we have been able to finance the investment of one million sterling in war loan, and we have in addition no inconsiderable sum invested in other war loans and colonial government war loans. As opportunity offers we will do more. I informed you last year that our fire department had been organized and this has since shown a steady growth, but the figures compared with the marine takings are at present too insignificant to be shown separately.

"You will be glad to hear that we have established cordial relations with the largest and most important insurance company in Japan—the Tokia Marine Insurance Company—and it is a pleasure to record that in all our operations with them we have experienced the highest standard of fair dealing."

EXPORT LICENSE SYSTEM

Control Over Canada's Food Surplus—Bureau Has Been Established

Among a number of important developments in the work of the food controller, the most far-reaching in its effects has been the passage of the order-in-council prohibiting the exportation, except under license, of food commodities, feeding stuffs, fats, oils, soap, fertilizers, etc., to other destinations abroad than the United Kingdom, British possessions and protectorates. Intimately connected therewith was the organization and manning by volunteer workers, in a remarkably short time, of the bureau of licenses of the food controller's office.

Canada and United States.

In order to obtain effective control over the exports of foodstuffs, Canada and the United States in co-operation have adopted an export license system, under which licenses are required for all foodstuffs and certain other enumerated commodities leaving either country. Licenses may be issued for exportation of the commodities named to specified destinations only and under certain conditions. Only in this way could effective control be exercised over all food supplies leaving the North American continent and the surplus food of the United States and Canada controlled in the best interests of the Allied nations. Obviously, an embargo by the United States against exportation of foodstuffs abroad would have been ineffective had it been possible for goods of Canadian origin, or those of United States origin passing through Canada, to be exported from this country without restriction. It was imperative, therefore, that Canada should establish similar control over food exports to that adopted in the United States.

The order-in-council was passed on Thursday, November 15th. Its operation required the organization of a bureau of licenses with a considerable staff. In order that this should be done, the food controller was obliged to secure increased office accommodation. Mr. Walter E. Ireland, of the T. Eaton Company, Toronto, whose services as traffic expert had been loaned by the company to the fish committee of the food controller's office, was asked to organize the bureau of licenses. Meanwhile, the assistance of the department of public works was secured to find more office accommodation.

Organization of Staff.

The T. Eaton Company volunteered to lend six men to assist in organizing the work and training a staff. These left Toronto on a Friday night. The Montreal office of the Canadian Northern Railway, the Cunard line and Canada Steamships, Limited, each sent a trained man to assist Mr. Ireland. With this nucleus, work of office organization was commenced on the next morning. The same day Mr. John McDougald, commissioner of customs, who co-operated thoroughly with the food controller's representatives in getting the new machinery into operation, had instructions prepared and printed for all the collectors of customs. Many of them were mailed on the same Saturday night. Mr. McDougald has been tireless in his efforts to assist, and has loaned experts from his office staff to help Mr. Ireland.

On Saturday afternoon, promptly at one o'clock, moving vans and a staff of men arrived at the Bank Street Chambers, where the offices of the food controller were located, and proceeded to move the equipment to offices which had been speedily prepared in the Victoria Memorial Museum. The new offices were ready for the food controller's staff to commence work at nine o'clock Monday morning. The telegraph companies had provided ten special wires directly into the museum and other telegraph facilities for the use of the food controller, and it was possible to deal with enquiries and applications for licenses without delay.

Thousands of Enquiries.

Several thousand enquiries and applications for licenses in connection with shipments to all parts of the world have been disposed of by the bureau of licenses during the past two weeks. They have come from all parts of the Dominion. The staff has been working practically night and day, and there has been prompt action in every case. The bureau has been in very frequent communication with Washington, and there is the most complete co-operation between the two countries.

Supplies of license application forms have been issued to all boards of trade in Canada and to all transportation agencies. Wherever action by telegraph has been necessary to release shipments at points of exit, telegrams have been despatched to the collectors of customs at such points, and these telegrams have been the collectors' authorization to allow shipments to be made.

FOREIGN BONDS IN NEW YORK

Anglo-French Loan, Issued at 96, is Down to 82—Wall Street's Logic

In the general decline of prices on the New York Stock Exchange last week, no movement attracted more attention than that in the short-term government and municipal bonds, placed in that market by the Allies in the earlier years of the war. The following table illustrates the movement, giving date of maturity, issue price, the closing two weeks ago, and last week's lowest, up to the close of December 14th:—

	Maturity.	Issue price.	Dec. 7.	Dec. 14.
Anglo-French 5s	1921	96	89¾	84⅞
American For. Sec. 5s ...	1919	98	93⅞	90⅛
United Kingdom 5s ...	1918	98	97¾	97¼
United Kingdom 5½s .	1918	99.52	99¾	99 11-16
United Kingdom 5½s .	1919	99¼	95	93⅜
United Kingdom 5½s	1921	98½	91¼	89
City of Paris 6s	1921	98¾	80	73½
City of Bordeaux 6s ..	1919	98	79⅞	74½
City of Lyons 6s	1919	98	79⅝	74¼
City of Marseilles 6s .	1919	98	80¼	74¾

Wall Street's Logic.

Wall Street ascribed last week's decline, says the New York Post, to the European military uncertainties resulting from the betrayal of the Allies by the Russian Bolsheviki and the renewal of the German offensive in the west. It is conceivable that some of last week's sellers had allowed their imagination to run wild with the idea of German conquest of Europe and a prodigious indemnity imposed on enemy governments and cities. If so the decline in these securities was merely one more reflection of the senseless hysteria which momentarily seized Wall Street.

It will be observed that (as was natural) the decline was smallest in bonds like the United Kingdom issues, which are secured by collateral. But it also appears that bonds with a new maturity were considerably less affected than securities with two to four years yet to run. This second fact is equally logical, if uncertainties of a longer future are the governing influence. But it hardly squares itself with theories of an immediate German victory.

Anglo-French Bonds, 10 per Cent.

Undoubtedly, the decline was largely a psychological matter; but the psychology was probably much less fear of a German victory than the instinct of hoarding capital for our own future war loans But for that instinct, an Anglo-French bond, yielding, at last week's price, 10 per cent. net per annum if held until maturity, and a city of Paris bond yielding 15 per cent., would be in such instantaneous demand as to drive up the prices with the greatest violence. Yet absence of "bargain-hunters" does not alter the fact of a bargain. In January, 1862, United States government 5 per cents, redeemable in 1865, sold at 85, which yielded more than 10 per cent. to the investor.

The Anglo-French 5s, due October 15, 1920, sold on Tuesday at a new low, 82, which is three points under the previous Saturday's closing prices. Bankers familiar with this issue attribute the recent decline to a combination of unfavorable war news, none of which in any way affect the investment value of the securities.

NEW BOND HOUSE

Mr. Hew R. Wood, who for some time past has been associated with Messrs. Nesbitt-Thomson and Company, of Montreal, has entered the bond business on his own account, under the name of Hew R. Wood and Company.

DIVIDEND NOTICE.

Notice is hereby given that a dividend for the three months ending December 31st, 1917, at the rate of

TEN PER CENT. PER ANNUM,

has been declared upon the Capital Stock of the Company, and that same will be payable on and after January 2nd next.

The Transfer Books will be closed from the 21st to the 31st of December, both inclusive.

By order of the Board.

W. E. RUNDLE,
General Manager

Toronto, December 5th, 1917.

HALIFAX INSURANCE LOSSES

Plate Glass Underwriting Companies are Badly Hit—Some Estimates

That the estimated value of property burned in the Halifax disaster is $2,000,000, with losses to the fire insurance companies not exceeding $1,500,000, was the statement to *The Monetary Times* by Mr. J. B. Laidlaw, manager for Canada of the Norwich Union Fire Insurance Company. Mr. Laidlaw recently returned from Halifax with other insurance managers after an inspection of the damage done. The losses include the mill of the Dominion Cotton Company, which was equipped with automatic sprinklers, but which was a total loss. The insurance on this was almost completely carried by the New England mutual companies.

The plate glass insurance companies losses will be about $150,000, which is relatively much greater than the fire insurance companies' losses, when premium income is taken into consideration.

The comparatively low fire insurance loss is due to the fact that the northern end of the town, the region principally affected, was occupied by small shops and dwellings, and also because the most serious damage done was caused by explosion.

Some of the Losses.

The majority of the sixty-eight fire companies doing business in the Halifax district are British or Canadian, but some of the large United States companies are represented. An estimate of probable liability has been given by a few companies as follows:—

Companies.	Gross.
British America	$63,000
Home, New York	50,000
Liverpool and London and Globe	40,000
National Union	32,000
Brittanic, London	30,000
Union, London	28,000
Aetna, Hartford	25,000
Employers' Liability	25,000
German American, New York	25,000
Yorkshire	16,000
Phœnix, Hartford	15,000
Western Assurance	13,000
North River, New York	12,966
North West, Winnipeg	11,000
British Northwestern	10,000
Connecticut Fire, Hartford	10,000
Liverpool, Manitoba	10,000
German Alliance, New York	2,000

Report on Area Destroyed.

Some information regarding the area destroyed at Halifax is contained in a report received by the Home Insurance Company, of New York, from a representative at Halifax:—

"Commencing at foot of North Street at harbor front, thence north, following the harbor to foot of Duffus Street, thence west on Duffus Street to Gottingen Street, thence south on Gottingen Street to Young Street, completely demolished; thence west on Young Street to Windsor Street, thence south on Windsor to North Street, thence east on North Street to harbor front wrecked, but raw sugar shed, sheet 89, block 300, Nos. 7 and 13, only had roof blown off by explosion; no fire, and contents appear to be little damaged. Outside sugar refinery itself, sheet 89, block 300, and shed No. 5, blocks 3 and 1, both completely demolished, and foundry, 313, Lynch bakery, block 298, Gunns' mill, block 299, and cotton mill, sheet 74, block 320, would estimate actual loss payable by fire offices for fire loss only not exceed $300,000, but the loss from explosion, where there has been no fire whatever, must amount to considerably over $2,000,000, and this, apart from Dominion and Imperial government and marine loss, which would run around $5,000,000 more.

Loss of Life.

"The loss of life is simply appalling. Soldiers say no scene of devastation in France equals. Thousand bodies already recovered and probably 2,000 in hospital, and at least 1,000 still missing. Exhibition building and car works badly damaged by explosion, and in the business district not a plate left and scarcely any other kind of window, but no fire. City under martial law and order good.

"Wrecked and Burned.—North Street, Gottingen Street, Duffus Street and harbor, except raw sugar sheds Nos. 7 and 13 of the Acadia Sugar Refinery Company, which had roof blown off. Sheets 84 to 91, inclusive.

"Wrecked, not Burned.—Windsor Street, North Street, Gottingen Street, Young Street."

EFFECTS OF THE HALIFAX EXPLOSION

An idea of the effects of the explosion of the French munitions ship Mont Blanc when rammed by the Belgian relief ship Imo, on December 6, in Halifax Harbor, causing an appalling loss of life and property, is gathered from the accompanying photo. It shows the complete demolition of the old Richmond refinery on the Halifax shore, of the Acadia Sugar Refining Company. This is typical of the destruction caused throughout the stricken area.

Photo taken for The Monetary Times by the British and Colonial Press

Old Richmond Refinery, Acadia Sugar Refining Company, destroyed in Halifax disaster.

This company's old plant has been out of commission ever since the new Woodside refinery was built on the opposite side of the harbor two miles below Dartmouth. The new plant escaped uninjured, so that the company's production will not be delayed. The resumption of activities at the Woodside plant is dependent only on the arrival of anticipated supplies of raw sugar. The Richmond refinery will represent an element of loss as it has been used for storage purposes, but it will not affect the manufacturing activities of the corporation.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 14th, 1917:—

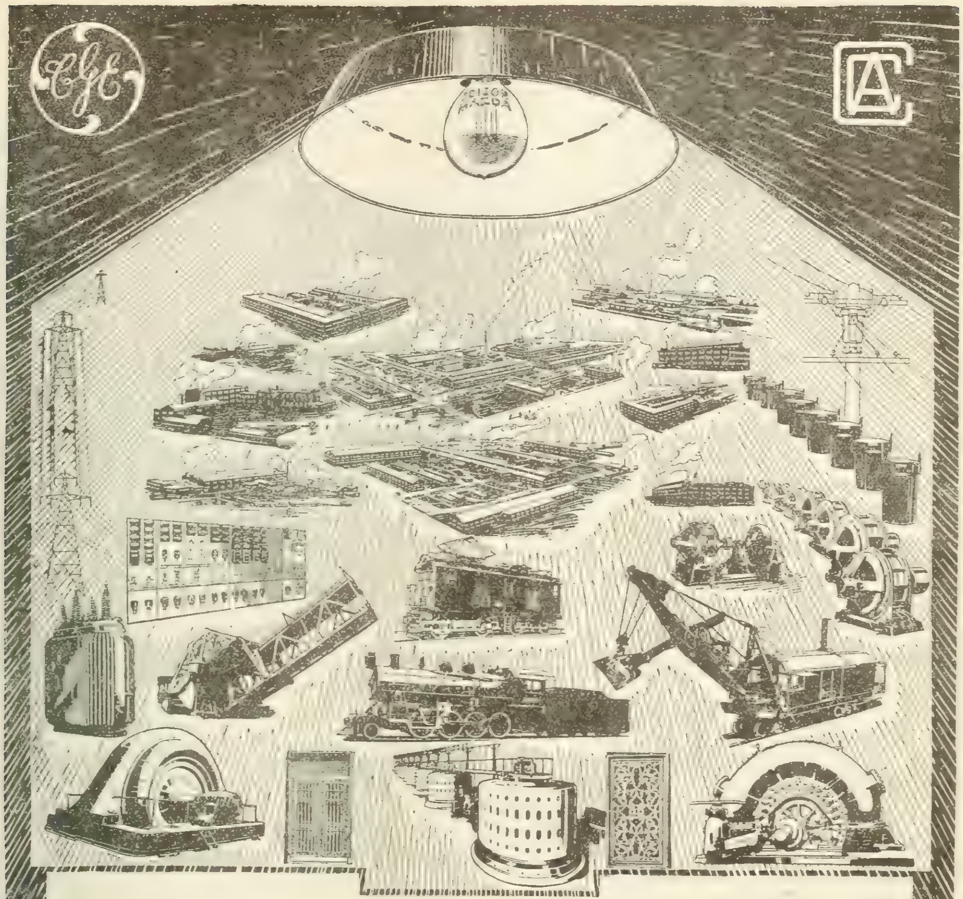
McKinley-Darragh-Savage Mines, 85,333; La Rose Mines, 82,144; Aladdin Cobalt Mine, 87,000; Buffalo Mines, 153,868; Dominion Reduction Company, 176,000; total, 584,345 pounds, or 292 tons.

The total shipments since January 1st, 1917, now amount to 26,245,959 pounds, or 13,122 tons.

KEENEST COMPETITION OVER INSPECTION

The annual inspection of track over the Grand Trunk Railway system has just been completed. This inspection has occupied six weeks and has included a thorough examination of rails, ties, etc., on the one thousand one hundred and forty-five miles of main line and on some thousands of miles of branch lines. The inspection party travelled over the system in a specially constructed car fitted with electrically controlled devices for registering the efficiency marks gained by the various sections for excellence of track maintenance. There was the keenest competition between the various section gangs, foremen and supervisors for the honors which are given to the section considered to represent the highest standard of maintenance work.

These inspection trips serve to increase the enthusiasm of the men engaged in this important branch of railroad work, and enable the officers to give the closest supervision to the maintenance of the track in a high state of efficiency



Quarter Century of Progress.

The Canadian General Electric Co., Limited, was organized in September, 1892—just a quarter of a century ago.

It had its origin in a syndicate of ten citizens of Toronto formed five years previously with a capital of $10,000 to inquire into the feasibility of establishing, in Toronto, electric light and power by means of underground wires.

The Company has now a paid-up capital of $10,000,000.00, a surplus of over $4,000,000.00, and assets over $25,000,000.00.

It owns 10 manufacturing establishments shown above, a large Head Office and 7 Branch Office buildings, and has 5,000 to 6,000 employees.

The Canadian General Electric Co., Limited, manufactures Electrical Apparatus and Supplies for Railway, Light and Power purposes.

The Canadian Allis-Chalmers, Limited, a subsidiary company, manufactures Locomotives, Structural Steel, Cast-Iron Pipe and Power Plant Equipment, Mining, Crushing, Hydraulic and Milling Machinery.

By reason of its numerous factories and great manufacturing facilities, the company was able to take an early and leading part in the manufacture of Munitions of War, and recently obtained from the British Government an order for 4 Steel Steamships of 3,500 tons each.

This, briefly, is the record of a Quarter Century of Progress.

CANADIAN GENERAL ELECTRIC CO. LIMITED
CANADIAN ALLIS-CHALMERS LIMITED

CANADA IS THIRD SILVER PRODUCER

Cobalt Camp has Contributed Over Two Hundred and Fifty-four Million Ounces Silver Since 1904

The high prices for silver this year are of special interest to Canada, which is the third large producer of silver in the world. Prior to 1914, Mexico produced more silver than did the United States, but at present their production of the white metal is double that of Mexico, and much greater than that of any other country.

A compilation by the National City Bank of New York shows that the silver production of the United States is now double that of Mexico and three times that of Canada, although we still hold third rank among the silver producing countries of the world. Of the 172,383,000 ounces of silver produced in the world in 1916, the United States produced 72,833,000 ounces or 42 per cent. of the world's total, while 20 years ago, in 1896, it produced but 37 per cent. of the world's production, which in that year was 157,061,000 ounces. In that 20-year period, 1896 to 1916, the production of the United States has increased about 14,000,000 ounces, while that of other parts of the world has increased but about 1,000,000 ounces.

Canada is Third.

The world's chief producers of silver are the United States, Mexico, Canada, Peru, Japan, Spain, Australia and Chile, in the order named, the United States having produced in 1915, for which figures of all countries are available, 74,961,000 ounces, Mexico 39,570,000, Canada 28,401,000, Peru 9,420,000, Japan 5,080,000, Spain 4,565,000, Australia 3,327,000; world's total 179,574,000. In 1916, for which returns are not yet available for many of the smaller countries, the production of the United States was 72,884,000 ounces, Mexico 35,000,000, Canada 25,500,000, and the world's total 172,384,000 ounces.

World-production of silver has materially declined since the beginning of the war. The total output in 1913, the year immediately preceding the war, was 223,900,000 ounces, but dropped to 160,626,000 in 1914, 179,574,000 in 1915 and 172,384,000 in 1916, the decline occurring in countries other than the United States, the United States production having been in 1913 66,802,000 ounces, in 1914 72,455,000, in 1915 74,961,000, and in 1916 72,884,000 ounces.

Nearly one-half of the world's production of silver prior to the war was used in the arts and industries, the United States director of the mint having estimated the consumption for arts and industries in 1912 97,000,000 ounces, out of a total production in that year of 224,000,000 ounces. At present, according to current reports, the countries at war are increasing materially their coinage of silver, partly to take the place of gold being withdrawn from circulation for other purposes, and in part to accompany the issues of non-metallic currency which have been made necessary by the demands of the war.

The production of silver in Canada in 1916 was 25,669,172 fine ounces valued at $16,854,635, as against 26,625,960 fine ounces valued at $13,228,842 in 1915, a decrease of 3.6 per cent. in quantity, but an increase of 27 per cent. in value. The output this year will probably be 30,000,000 ounces. The production in Ontario in 1916 amounted to 21,975,942 ounces valued at $14,429,623, or 85.6 per cent. of the total production for Canada.

Cobalt's Record.

The Cobalt camp, Ontario, is the principal silver producer in Canada and its record in recent years has been as follows:—

Year.	Ounces.	Value.
1904	206,875	$ 111,887
1905	2,451,356	1,360,503
1906	5,401,766	3,667,551
1907	10,023,311	6,155,391
1908	19,437,875	9,133,378
1909	25,897,825	12,461,576
1910	30,645,181	15,478,047
1911	31,507,791	15,953,847
1912	30,243,859	17,408,935
1913	29,681,975	16,553,981
1914	25,162,841	12,765,461
1915	23,730,839	11,742,463
1916	[illegible]	[illegible]
	254,301,404	$135,603,020

The production of silver in Ontario (chiefly the Cobalt camp), for the nine months to September 30, 1917, was 15,236,002 ounces, valued at $12,001,875.

VICTORY LOAN ISSUE

How the Press Campaign Helped to Increase Number of Government Bondholders

The latest returns in the Victory Loan campaign show a total of 802,000 subscribers, or one subscriber for every ten people in Canada. This stablishes a new record with respect to the proportion of the population of a country subscribing to its war loans. The previous record was held in Great Britain, where one person out of every twenty-three subscribed to the last war loan. In the Liberty Loan campaign in United States, bonds were sold to one person out of every twenty-seven of the population.

In many cities, towns and districts in Canada the proportion of the population buying Victory bonds was even higher than one in ten. In a number of cases it was as high as one in four

The achievement in connection with Canada's Victory Loan, while primarily due to the splendid spirit of patriotism that pervades the country, is another evidence of what may be accomplished through press advertising, backed by an adequate selling organization.

Few Bond Buyers.

Prior to the Victory Loan campaign there were comparatively few bond buyers in Canada. The third Canadian war loan of last spring, which was the most widely distributed bond issue in Canada up to that time, had only 41,000 subscribers. The finance minister deemed it essential that many times that number should subscribe to the Victory Loan. He assigned to the press the task of educating with respect to the loan the great masses of the people who were not bond buyers, and in most cases had only a very vague idea of the meaning of the term "bond" as applied to securities.

For several weeks before the sale of Victory bonds commenced Canada's need for money to carry on the war and to maintain her agricultural and industrial prosperity was presented to the people of Canada in display advertisements in the press. Emphasis was placed in those advertisements on the privilege and duty of every Canadian to assist in the war financing of his or her country, and upon the fact that if Canada's financial needs were to be met the great masses of the people would have to buy Victory bonds. The meaning of a "bond" and the security behind Canada's Victory bonds were explained in simple, everyday language. Similar educational work was done voluntarily by almost all newspapers and other publications through their news and editorial columns

Education of People.

By November 12th, when the sale of Victory bonds commenced, the people had been educated very largely to the need for the money, the security behind the loan and the reasons why every person who could possibly do so should buy one or more bonds. The preparatory educational work in the press was followed up by personal solicitation by a most efficient Dominion-wide organization of personal workers. Concurrently with that personal solicitation there appeared in the press a series of "selling" advertisements emphasizing the immediate privilege of every Canadian to buy Victory bonds, and many editorials and news articles along the same line were published in every newspaper.

Without Personal Solicitation.

The press publicity created an atmosphere and a knowledge of the situation that, in addition to securing large numbers of subscribers without personal solicitation, made it possible for the personal workers to do their work quickly and effectively and with infinitely greater results than could have been obtained without the educational, inspirational and selling advertisements in the press.

At the conclusion of the campaign Sir Thomas White, in a telegram to J. H. Woods, president of Canadian Press Association, Inc., expressed his sincere thanks for the fine spirit and splendid energy shown by the press, and his opinion that the press had every reason to congratulate itself upon the character and effectiveness of the advertising propaganda.

BRITISH SAVE TO PAY WAR COSTS

People Convinced Non-essentials Must Give Place to War Necessities

England's efforts to pay for the war out of savings were the subject of a recent address before the Academy of Political Science at New York, by Mr. Basil P. Blackett, C.B., of the British Treasury. He said in part:—

"When the war began the British were in the habit of thinking by departments. Her first big task was to recruit millions of men and to furnish an adequate supply of munitions. Finance was following its own course. The task of raising a war loan of $1,750,000,000 at a time when all the stock exchanges of the world were closed was no small feat. When the stock exchange was reopened in January, 1915, strict limitations on all dealings in capital were imposed to protect the London market against enemy dealings in securities. But the prevention of new issues of capital without treasury approval and the prohibition of sale of securities not in physical possession in the United Kingdom were a first attempt to discourage business not essential for the prosecution of the war. Gradually people came to understand that by refraining from using money for capital expenditures they left a free field to the government for the labor and materials which the government desired for war. They gradually realized that men, munitions, supplies and savings were all parts of a single economic task essential to victory.

War Savings Campaign.

"The success of the war savings campaign has been due to the atmosphere which it created. The committees emphasized the importance of savings and left the question of investment in government securities in the second place. It directed thought toward the one object of victory and made people understand that saving meant the placing of goods and services in increasing volume at the disposal of the government, and it also meant increased production and avoidance of waste, as well as refraining from unnecessary expenditure. Articles produced by voluntary labor increased the goods available for war. The whole nation is thus organized for war, and organized by its own voluntary effort in a democratic war and not by force imposed from above.

"An organization has been built up covering the whole country. There are 1,500 war savings committees and more than 40,000 war savings associations, which latter are clubs for co-operative saving by instalment. The Briton refused to be organized from above, but he quickly understood what was meant by the organizing for war of the people, by the people for the people. The final consequences have been extraordinary. From the victory loan of January and February, 1917, the financiers hope for a total of, perhaps, $3,000,000,000. The war savings organizations have brought in a total of over $5,000,000,000. The number of holders of war savings certificates is not less than 12,000,000 and it may be as large as 15,000,000. More than a quarter of the population has a direct interest in government securities.

Increase of Taxation.

"Taxation was sharply increased. In the year 1913-14 Great Britain's revenue was $1,000,000,000; in 1916-17 it was $2,870,000,000; in 1917-18 it will be nearly $3,500,000,000.

"The war must now be paid for entirely out of the annual savings of the nations at war. It is, therefore, important that new savings should be effected. Especially in the case of Great Britain, which in the six months ending September 30, 1917, has loaned $1,450,000,000 to her Allies.

"How could Great Britain induce her people to save? Experience shows that it is essential to a successful war savings campaign to translate money in terms of goods and services—the things that money can be put in.

"The National War Savings Committee in the beginning of 1916 set to work to explain that there was an absolute shortage of goods and services available for war; that energy must be transferred from the production of non-essentials to that of essentials; that consumption of non-essentials must cease in order that their production might cease. The campaign succeeded largely because of the invention of the war savings certificate, which has served as a model for the American certificate. Local war savings committees and war savings associations were organized throughout the country to persuade the public to buy bonds.

"The most remarkable result, however, is the immense widening of our outlook and broadening of our vision. The world has been made one in suffering. Everywhere men and women formulate projects implying that never again will the conscience of humanity permit individuals, or classes, or even individual nations to claim in the exercise of their sovereign powers, the right to ride roughshod over the interests of humanity as a whole. All the resources of the British nation are brought to bear on the achievement of this purpose. Thinking in terms of money becomes impossible. This lesson must be learned for peace times as well as war times. Democracy must learn to organize itself for the good of the world. In the dim distance, discerned as yet by faith, the student sees a vision of a new organization of society, where individual and national expenditure, the duty and pleasure of right spending will be known and enjoyed."

CANADA AND GERMAN METAL CONTROL

Statements in British House of Commons as to Canadian Nickel

"Canada's entanglement in German metal control was forcibly illustrated in the House of Commons debate on the Nonferrous Metal Bill, which is part of the government policy of cutting the German cancer from the British trade," says a "Windermere" cable message to the Montreal Star. "The bill, which was read for the second time, passed by a large majority.

"The bill provides for the establishment of a system of licenses for British metal traders, and gives the government the power to refuse licenses to alien dealers or dealers in any way connected with the enemy.

German Control, Canadian Metals.

"During the debate U. B. Broughton, the Unionist member for Preston-Lancashire, insisted upon German control of essential Canadian metals. He said that about half of the United States copper was controlled by concerns which were dominated by people of German birth or German parentage. The principal concerns mentioned were the American Smelting and Refining Company, American Melting Company, L. Vogelstein Company and Beer Sonderheimer Company.

"The American Smelting and Refining Company is presided over by the Messrs. Guggerheimer; L. Vogelstein and Company is the American branch of Halberstadt, and the American Metal Company, which to-day is the dominant interest in Granby Consolidated, by far the largest copper producing mine in Canada, is interwoven with Metallgesellschaft, of Frankfort, and Merton Company, of England.

"How intimate their relations are may be judged from the fact that on many occasions I have sold large quantities to one of these two companies and afterwards been instructed to deliver it to another.

"It was also alleged by Sir Charles Henry and other members during the debate that Germans had also obtained control over nickel

Canadian Nickel Supplies.

"Important statements affecting Canadian nickel were made during the debate in the Commons on the Nonferrous Metal Industry bill by Hon. Walter Runciman, ex-president of the board of trade, who declared that the Canadian government, with the assistance of the British government, had brought Canadian nickel entirely under their control, though he did not know whether by advances or by government holdings in the companies.

"Right Hon. Sir John Brunner, member of the famous English chemical manufacturing concern, asked whether the governments of the British Empire were creating a British Metalgeselschaft to rival the formidable Frankfort concern, and asked whether it was not a fact that the governments had spent seven and a half millions in Canada purchasing mines. He said some friends of his were offered one of these mines and turned it down, but it subsequently sold to the government at a higher price.

"George Wardle, parliamentary secretary of the board of trade, answering the whole debate, said that he could not find that the British government had had anything to do with the purchase of any mines in Canada."

EDMONTON'S FINANCIAL POSITION

Comparison of Expenditures for Past Four Years Shows Substantial Reductions

An interesting comparison is given in the report just submitted by Mayor Henry to the annual meetings of the ratepayers of Edmonton of the expenditures for the last four years, showing substantial reductions in each year: of 36.42 per cent. in 1915, 20.17 per cent. in 1916, and 14.19 per cent. during the present year. It is remarked that only about one-fifth of the total civic expenditure is controllable. It is further remarked that "it is not pretended that the city has necessarily touched bottom in the matter of low cost of administration, but it will be reasonably conceded that it is much more difficult to effect reductions in expenditures which are already on a restricted basis as compared with the earlier stages of retrenchment when larger showings were possible. There is the added factor of the increasing rate of wages and salaries, as well as the higher cost of material to be taken into account."

	1914. $	1915. $	1916. $	1917. $
Departmental expenditures	883,580.68	572,551.67	458,147.67	408,301.57
Miscellaneous ...	51,722.50	31,045.59	16,270.48	18,454.64
Grants	117,140.57	65,475.80	59,714.28	31,579.90
Total	1,052,443.75	669,073.06	534,132.43	458,336.11

Assessment of Buildings and Lands.

The figures shown of the net assessment for municipal purposes only for years 1914 to 1917, inclusive, are as follow: 1914, $190,669,410; 1915, $168,973,190; 1916, $130,916,285; 1917, $100,213,850, representing reductions over each previous year of 11.38 per cent., 22.52 per cent. and 23.45 per cent.

"It is fairly well recognized that substantial reductions in the assessment of land values within the city were due to be made, and from the figures quoted have been effected to a considerable extent. It is probable that further reductions will have to be made in this respect, but it should be clearly understood that the alternative (under present conditions) to reduced real estate assessment is a proportionately higher mill rate. Legislative authority was obtained at the last session of the provincial assembly for the purpose of providing for the assessment of buildings and lands not exceeding 25 per cent. of the value of same, and also for imposing a business tax, based upon the full annual rental value of the premises utilized by various trades, manufacturers, financial and commercial institutions and professions, and all classes of business. These provisions of the charter are, however, only operative after receiving the endorsement of the burgesses and electors, respectively, which will form the subject of a plebiscite at the forthcoming municipal election.

Collection of Taxes Levied.

"Of equal importance to the ratepayers is that of improved method for obtaining prompt collection of taxes levied. Like many other cities, Edmonton is faced with a very large amount of arrears of taxes outstanding, and although, as has already been mentioned, the recent tax sale yielded certain results, it cannot be denied that more stringent measures of collection of current taxes will be necessary. The only source of revenue practically which any municipality has is from taxes, and it becomes absolutely necessary that the collection of taxes each year should at least approximate the actual outgoings within that year. This fact, while admitted, is somewhat difficult of being carried out to the letter in these abnormal times, and on this account, as a means at least of affording temporary relief, recourse may have to be made to additional forms of taxation other than those now in force.

"In order to promote the co-operation of delinquent taxpayers in the matter of paying off their arrears of taxes owing to the city, the city council recently authorized an arrangement under which those parties in arrear, subject to the payment of all current taxes due by them, may liquidate these arrears by entering into a specific contract with the city, providing that these will be paid off in either eight quarterly or twenty-four monthly instalments extending over a period not exceeding two years, with interest at 8 per cent. per annum. It is anticipated that a large number of ratepayers will avail themselves of this arrangement, and that the tax arrears may be substantially reduced by this means of collection. It is further proposed that certain changes in the city charter in regard to the recovery of taxes should be obtained at the next session of the legislature which will empower the city council to deal with delinquents more effectually in the future, and thus ensure more prompt payment of taxes.

Comparison of Employees' Payrolls.

"In connection with the city employees, a comparison is made of the employees on the payrolls during the last five years as follows:—

	1913.	1914.	1915.	1916.	1917.
Central administration..	449	459	355	281	243
Day laborers	422	388	246	137	79
Utility departments ...	1,083	737	560	419	399
	1,954	1,584	1,161	837	701

"For the year ending November 16th, $17,198.81 has been contributed by the various department staffs towards Patriotic and Red Cross funds

Operation of City Utilities.

"The net results of operation of the various city utilities for the period under review have been fairly satisfactory, showing net surpluses amounting to $102,936.94 as against $69,175.34 for the previous year for three of the departments (electric light and power, telephone and waterworks departments), while the net deficit on the street railway department is $129,521.05 as compared with $83,659.84 for 1916. The net deficit, therefore, for 1917 on all utilities is $26,584.11 as against $14,484.50 for last year. In connection with the report submitted by the street railway department, the following useful particulars are given in regard to the success of the economy service on one-man cars:—

"On November 17th, seventeen one-man cars were placed in operation, and up to the present time the result has been satisfactory and gratifying; in fact, in the opinion of the superintendent, it would have been an impossibility for the department to have maintained so close a service on some of the routes without the adoption of the one-man cars. It is pointed out that the former schedule operated 590 car hours daily with a total mileage of 5,500. With our present economy service the department is operating 594 car hours daily with a total mileage of 5,346, or at an average speed of nine miles per day. Furthermore, the city is operating practically the same number of car hours and car miles with the present schedule as the former schedule operated with two men. Also, motormen and conductors' wages, when the previous schedule was in force, amounted to $440 as against $350 for the present schedule, a saving of 1¾ cents per car mile, or approximately $32,850 per year."

Success After Financial Crisis.

In conclusion, it was said that the future of the city was assured, and that the city would come through the financial crisis satisfactorily. The fact that the Victory bond committee was successful in placing $1,250,000 up to date was evidence that there was still some money left in the country. Business conditions, which have vastly improved, are approaching pre-war days, and the rents are increasing and general economic conditions are assuming a stable and sound basis. If the citizens co-operated and showed their civic patriotism by paying up all arrears of taxes to the fullest extent of their ability, it would enable the future administration to discharge all duties, financial and otherwise, which would devolve upon them

CANADA WITHDRAWS FROM TREATY

The adhesion of the Canadian government to the Anglo-Portuguese treaty of 1914 has been withdrawn, owing to the failure of the Portuguese government to concur in the conditions under which adhesion to the treaty was given.

The provisions of the French treaty of 1907, including the privilege of certain intermediate and special rates for importation into Canada, do not now apply to the natural and manufactured products of Portugal and the adjacent islands, Madeira, Porto Santo and Azores. The withdrawal took effect on December 1, 1917.

Intermediate and special rates of duty for articles specified in the Franco-Canadian treaty of 1907 are granted only in the case of French products shipped direct from France or from a United Kingdom port. The same condition would have to govern the granting of similar rates to Portuguese products. It is assumed that the Portuguese government failed to concur in this condition.

Why Burden Your Wife?

If you wish to appoint your wife as executrix or trustee under your will, why not assist her to carry the heavy burden by appointing this Corporation as co-executor?

Your estate will thus have the advantage of the personal direction which she can give, and she will be relieved of the burdensome details necessarily involved in the management of any estate. Also she will receive invaluable assistance in regard to investments.

Our officers will be glad to confer with you in regard to the making of your will or any trust business you may have in mind.

A Newspaper Devoted to Municipal Bonds

There is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

RATES OF ALLIED LOANS VARY

United States is Lending at Higher Rate Than is Paid to American People

Of the $3,[illegible]24,129,750 credits [illegible] to the Allies by the United States government, says Wall Street Journal, out of a total of $3,883,900,000 credits extended, approximately $1,100,000,000 has been loaned at the rate of 4¼ per cent. per annum. About $2,200,000,000 was loaned at rates varying from 3 to 3½ per cent. per annum. It is not generally known that the United States government is now lending money to the Allies at a higher rate of interest than it is paying for money borrowed from the American people. It was supposed that the Allied governments were obtaining accommodation at the same rate of interest.

This was the case in the first few months following the United States entrance into the war. The Bond Issue Act of April 24th, providing for the first Liberty Loan, expressly stipulated that the loans made to Allies should bear the same rate as the public issues. Under the terms of the act of September 24th, the second bond issue measure, the loans made to the Allies were "to bear such rate or rates of interest as might from time to time be determined by the secretary of the treasury."

From 3 to 3½ Per Cent.

Before September 24th the government had been putting out obligations at rates varying from 3 to 3½ per cent. The first issue of certificates of indebtedness issued after the declaration of war bore interest at the rate of 3 per cent. This was followed by issues at 3¼ per cent. and 3½ per cent., and finally by the first Liberty Loan of 3½ per cent. These were the rates which had consequently been charged the borrowing governments from time to time, when, on September 24th, an aggregate of approximately $2,200,000,000 had been loaned by the government. Notwithstanding that the second Liberty Loan and certificates of indebtedness issued since the act of September 24th bore interest at the rate of 4 per cent., about $1,100,000,000 loaned to the Allies since that date cost therein 4¾ per cent.

The reason for purchasing the obligations of foreign governments at a quarter of one per cent. above the rate at which the United States government was borrowing is the fact that Congress had made the bonds and obligations issued under the second War Revenue Act exempt from certain classifications of taxes, thus increasing the cost to the government by diminishing the amount which it would otherwise have received in taxes. The government is, therefore, reimbursing itself in some measure for the concessions made in the matter of taxation through a higher interest received from the borrowing governments. The matter is explained by the secretary of the treasury in his annual report as follows:—

Exempt from Certain Classifications.

"By the terms of this act (September 24th, 1917), the normal rate of interest to be borne by the obligations of the United States issued thereunder could not exceed 4 per cent. per annum. At the same time it rendered the bonds thus issuable exempt from certain classifications of taxes, thereby substantially increasing the cost to the government of the money received from the sale of its obligations by diminishing the amount which it might in turn takes from its citizens in taxes. The rate of interest to be charged on the loans to foreign governments under the terms of the act was not definitely fixed, but was left in the discretion of the secretary, though a minimum was fixed. In the exercise of that discretion it was determined to fix the rate at 4¾ per cent. per annum, the additional ¼ per cent. being added to compensate, in part at least, the loss to the government due to the tax exemption features on its own obligations above referred to and the cost incurred by the United States of issuing its own bonds. This rate in turn will be further increased in case there should be higher rates of interest paid by the United States during the continuance of the war for the moneys that it may invest in the purchase of foreign obligations."

Mr. Joseph Rowat, assistant manager of the Continental Insurance Company, of New York, has been appointed general agent in Quebec, for the Union Insurance Society of Canton, China, the Canadian manager of which is Mr. C. R. Drayton.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines for the first two weeks of December:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
December 7	$3,139,000	$3,289,000	+ $150,000
December 14	3,106,000	2,908,000	— 198,000

Grand Trunk Railway.

	1916.	1917.	Inc. or dec.
December 7	$1,151,306	$1,218,138	+ $ 66,832
December 14	1,203,868	1,040,349	— 163,519

Canadian Northern Railway.

	1916.	1917.	Inc. or dec.
December 7	$ 917,900	$ 916,000	— $ 1,900
December 14	892,600	753,800	— 138,800

Mr. C. B. Thorne, manager of the Hawkesbury Mill, has been elected a member of the board of the Riordon Pulp and Paper Company.

Lieutenant Russell D. Bell, U.S.R.A., left Montreal last week for Fort Meade to join his battery there. Lieutenant Bell, who is a partner in Greenshields and Company, has been in Montreal on a short leave, following the completion of his training course at Plattsburg. He contributed many valuable articles to various issues of *The Monetary Times* Annual.

Mr. James Carruthers, ex-president of the Montreal Board of Trade and president of the Canada Steamships Lines, has offered to the British government, through Lieutenant-Colonel W. Grant Morden, the gift of four battleplanes for use on the western front. Mr. Carruthers has already presented three aeroplanes to the Canadian authorities, and has given upwards of $250,000 to Canadian patriotic funds.

All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

HAIL AGENCY WANTED.—Responsible firm at Regina open to take Saskatchewan Agency for reliable Company. For firm name apply Box 131, *The Monetary Times*, Toronto.

FINANCIAL COMPANY requires a general agency for Toronto, for a strong tariff Fire Insurance Company, writing fairly large lines. Can give from $10,000 to $15,000 per year in premiums; first-class business. No objection to one other agent representing same company. Box 133, *The Monetary Times*, Toronto.

SASKATCHEWAN Agent wants General Agency of Hail Insurance Company for Saskatchewan. Has experience in this line, good agency connections and can assure substantial premium income. Address Box 135, *The Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

AUDITORS' CERTIFICATE

We report to the Shareholders of The Royal Bank of Canada:—

That in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank.

That we have checked the cash and verified the securities of the Bank at the Chief Office at 30th November, 1917, as well as at another time, as required by Section 56 of the Bank Act, and that we found they agreed with the entries in the books in regard thereto. We also during the year checked the cash and verified the securities at the principal branches.

That the above Balance Sheet has been compared by us with the books at the Chief Office and with the certified returns from the Branches, and in our opinion is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

That we have obtained all the information and explanations required by us.

JAMES MARWICK, C.A.,
S. ROGER MITCHELL, C.A. } Auditors.
of Marwick, Mitchell, Peat and Co.

Montreal, Canada, 18th December, 1917.

Montreal, 18th December, 1917.

REFUNDING TRANSACTIONS STOPPED IN 1917

Entrance of United States Into the War Removed Chief Cause

Since the outbreak of war, a large amount of American securities have been repurchased from European holders. Up to the beginning of last year, it is estimated that not less than $50,000,000 par value of Canadian bonds have been repurchased, of which probably $30,000,000 remained in Canada. These purchases assisted in regulating sterling exchange. The entrance of the United States into the war last year removed the chief cause for these refunding operations and immediately stopped their continuance. Just as the United States entered the war arena, a number of Canadian borrowers were arranging for the transfer of their debts in London, or a part of them, to Canada and New York. The largest of these included the Ontario and Nova Scotia governments and the cities of Toronto and Montreal. The refunding operations then proposed involved the transfer of over $100,000,000 of Canadian indebtedness from London to New York. This included $33,000,000 by the city of Montreal, $32,000,000 by the city of Toronto and $17,000,000 by the province of Ontario. A bill was introduced in the Nova Scotia legislature for the refunding of sterling loans amounting to $10,000,000. Messrs. J. P. Morgan and Company, then representing the British government, were to handle the operation.

As noted above, the participation of the United States in the war stopped all these negotiations. How the operations were undertaken is outlined in the proposed Montreal transaction described in the following resolution of the city authorities:—

"That the Bank of Montreal be requested and authorized to agree on behalf of the city to the following conditions proposed by Messrs. J. P. Morgan & Company, New York, for the purchase of civic issues in England, at prices not exceeding the following, namely: £600,000 4 per cent. loans of 1948-50, at 80 per cent. plus ⅛ commission, £1,000,000 4½ per cent. loans of 1951-2-3, at 87½ per cent. plus ⅛ commission, with accrued interest in both cases, or any portion of the above amounts that may be obtainable.

Paid by Issue in New York.

"The purchase price of securities to be paid by the issue of bonds by the city of Montreal, dated 1st November, 1916, and maturing on the 1st November, 1926, and bearing 5 per cent. interest, payable semi-annually at the agency of the Bank of Montreal, New York.

"The bonds to be delivered to Messrs. Morgan & Company, from time to time, through the Bank of Montreal, in amounts sufficient to yield the cost of securities cancelled in the London Register at the office of the Bank of Montreal, London; the proceeds of the sale of bonds to be estimated on a basis of 98.07 per cent., less 2 per cent. commission, and adding accrued interest.

"The bonds to be negotiated by Messrs. Morgan & Company, by private sale, and any excess in proceeds over the basis of 98.07 per cent. shall be equally divided between the city of Montreal and Messrs. Morgan.

"Messrs. Morgan & Company to guarantee that the cost of sterling exchange for the transference of the purchase money to London shall not exceed $4.76½ per pound sterling and any lower rate than the above shall be for their own profit and benefit.

"The whole operation to be opened for a period of three months from the 1st February, 1917.

"In view of the uncertainty of the political situation, both Messrs. Morgan & Company and the city of Montreal will have the right to cancel the present arrangement in face of adverse circumstances beyond their control."

This deal fell through when the United States came into the war.

To Our Own People.

As pointed out in *The Monetary Times* Annual last year by Mr. E. R. Wood, payment to our own people of the interest on the amount of the securities repurchased and remaining here, means an increased investment power for our country as a whole, and in view of the war financing which confronts us this is an important factor to consider, while a substantial appreciation in the price of such securities is almost sure to occur after the end of the war. A considerable volume of Canadian stocks has also been repurchased, but it is impossible to estimate the total amount. The outflow of our capital represented by these purchases for our own account is more than offset by the enormous expansion in our trade, and our increasingly favorable trade balances. There is, however, little likelihood of a resumption of these refunding operations, in the near future, at least.

REPORT ON HALIFAX DISASTER

Mr. J. B. Laidlaw Says Damage Not as Great as First Reported

Mr. J. B Laidlaw, manager for Canada of the Norwich Union Fire Insurance Society, has issued a statement in connection with the Halifax disaster. After describing the movements in the harbor of the munitions steamer and the Belgian relief steamer, and the explosion following the collision, he says:—

Those on the docks or on the shore or in buildings near by, and those on the deck of the Imo across the channel, were instantly killed, and on the sloping ground of Halifax, which rises from the shore to a height of about 300 ft., covered with detached dwellings, occupied principally by a good class of working people, the buildings were demolished, most of them being laid flat on the ground, with the wood frequently broken into fragments. The force of the explosion was so intense that a wave, which in the Narrows was said to be 30 ft. high, swept the docks and the shore, a number of people losing their lives or being washed into the sea by this wave.

Debris Caught Fire.

The debris of many of the dwellings which were shattered, caught fire from the stoves or furnaces overturned, but very fortunately most of these dwellings were detached, and there was no wind, so that a number of individual fires gradually burned themselves out, without the usual features of a conflagration with a hot blast carrying the flames to other sections. It was only by the greatest good luck that the whole city of Halifax was saved from destruction.

Beyond the top of the hill the shattering of buildings was much less, in some cases only the roof and chimneys being knocked off; others with bay windows blown in, and occasionally a building would be moved a few inches on its foundations. Practically all the buildings in that portion of Halifax were of wooden construction, and, indeed, the whole city is built of wood, with the exception of the business centre, where nearly all the buildings are of brick or stone. In the section nearest to that which was quite annihilated, an occasional dwelling was burned. To the south, towards the centre of the city the effects of the explosion were almost entirely confined to the breaking of glass and occasional overturning of a projecting chimney; in a few instances, the roof of a church standing above the other buildings being destroyed.

Plate Class Broken.

In the business centre, and, indeed, throughout the city, all the glass, including plate glass in shop windows, was destroyed, and the same was the case on the Dartmouth side of the harbor. In some cases of factories having very large windows, not only was the glass destroyed, but the framework of the window holding the glass was shattered. The glass in houses several miles away, around Bedford Basin, was destroyed, and windows were broken in a hotel at Truro, 60 miles distant, the upper part of which rose above the surrounding buildings, while the concussion was said to have been felt at Charlottetown, P.E.I., over 200 miles away. * * *

Throughout the city the collision and fire on the Mont Blanc, followed by the fire reels through the streets, caused those who had windows overlooking the harbor, to watch the developments. Those whose attention had not previously been attracted, were startled by the first explosion and instinctively turned to the window, so that when the great explosion followed within a few seconds, shattering the glass to fragments and driving it in some cases with such force as to have pieces of glass stick firmly into furniture and into plastered walls across the room, the flying glass caused many flesh wounds, more or less severe, and also entered into many eyes, with the result that over two hundred persons have lost their eyesight, while a larger number are under treatment with the hope that their sight may be saved. The loss of life definitely ascertained is upwards of 1,500 and there is hardly a family in Halifax which is not mourning someone.

The explosion overturned the gasometer of the gas works, two miles away, cutting off the supply of gas. The poles carrying the electric wires were snapped off at the ground like pipe stems, disorganizing the telephone and electric light service and that of the street cars, so that the ordinary means of communication were destroyed, and the greatest confusion prevailed throughout the city. * * *

The damage to property is not as great as at first reported, and will probably not exceed $5,000,000. The value of property burned would not exceed $2,000,000, including a cotton mill which was equipped with automatic sprinklers. The great tragedy of the Halifax disaster is the loss of life, the number of widows and orphans who have been left, and particularly the large number of those who have been blinded, and for them and their maintenance a large endowment fund should be provided. The tragedy is a direct result of Canada's participation in the war, and the assistance and maintenance of the survivors should be recognized as a liability of the people of Canada to those stricken in Halifax.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Brantford, Ont.—Local improvement 20-year debentures of $40,000, bearing interest at 5½ per cent. per annum, will be authorized.

Chatham, N.B.—J. A. Fowlie, town treasurer, reports the town's assessed value of real estate and personal property as follows: Real estate, $1,044,900; personal property, $240,300

Charlotte, N.B.—H. F. Grimmer, secretary-treasurer, reports the county's assessed value of real estate and personal property as follows: Real estate, $2,000,939; personal property, $341,302.

Bromhead, Sask.—The village intends to borrow by way of debenture of $1,000 for the purpose of drilling a well. Debenture repayable in ten equal consecutive annual instalments of principal, with interest not exceeding 8 per cent. per annum. Secretary-treasurer, P. H. Rockstad.

Hawarden, Sask.—The village intends to borrow by way of debenture $3,000 for the purpose of drilling a well and acquiring nuisance ground. Debenture to be repayable in fifteen equal consecutive annual instalments of principal, with interest not exceeding 8 per cent. Secretary-treasurer, C. C. Stevens.

Quebec, Que.—As a result of the discussion of the budget for 1917-1918 at the meeting of the Catholic School Commissioners recently it was announced that the Quebec legislature would be requested to increase the school tax from four mills to six mills, and also to authorize the commissioners to float a loan of $3,000,000.

Kincardine, N.B.—A by-law to raise by an issue of debentures $17,000 to cover the work of repairs to bridges received its first and second readings at the monthly meeting of the town council, held recently. It will be submitted to the ratepayers at the municipal elections, in January, and a grant of $75 to the fire department will be authorized.

Coteau St. Pierre, Que.—Tenders will be received up to January 8th, 1918, for the purchase of $210,000 debentures in denominations of $1,000 or $500, and will be considered by the board at their meeting same day at 8 p.m. in their office, 56 Westminster Avenue, Montreal West. The lowest or any tender not necessarily accepted. G. F. Paterson, secretary-treasurer.

Windsor, Ont.—Mr. M. A. Dickinson, acting clerk, informs *The Monetary Times* that no tenders were received for $255,834 local improvement debentures, and that the following blocks are still on the market: $46,024.95, 5 per cent., local improvement, 20-years, annual instalment, semi-annual interest coupons; $80,439.18, 5 per cent., local improvement, 10-years, annual instalment, semi-annual interest coupons; $97,193.81, 5 per cent., local improvement, 10-years, annual instalment, semi-annual interest coupons; $32,178, School, 5½ per cent., 30-years, annual instalment, semi-annual interest coupons.

Three Rivers, Que.—An issue of $765,000 6 per cent bonds has been sold to Messrs. Hew R. Wood and Company, Montreal. The bonds are partly those of the city itself and part of those of the school commissioners, the respective amounts being $280,000 and $485,000. The sale was the result of private negotiations, no tenders having been called, but it has been known for some months that the issue was in prospect. Bond dealers note a fair inquiry for bonds of Quebec municipalities. The purchasers of the $200,000 Montreal East issue sold recently are said to have been meeting success in their sale. On the theory that the bond-buying power of the investors in many parts of the province was by no means exhausted by the Victory Loan, it is believed that some activity may be looked for in Quebec municipals after the turn of the year.

ROYAL BANK OF CANADA

Ranking among the world's great financial institutions, the Royal Bank of Canada has just presented an exceptionally strong report for the fiscal year ended November 30th. The bank's liquid assets on November 30th were $165,836,706, compared with $121,127,663 a year ago. There was a substantial increase of $52,000,000 in deposits. Over four-fifths of this gain was in savings deposits. The Royal Bank did yeoman service during the past year in placing large amounts at the disposal of the Imperial and Dominion governments. In addition, it afforded Canadian commerce, industry and agriculture substantial support in current loans and discounts. They totalled $102,358,027, compared with $93,000,000 a year ago.

The net profits for the year amounted to $2,327,979, an increase of $216,000 over the previous year. These profits are equal to 18 per cent. on the capital as compared with 17.59 per cent. last year. With the balance carried forward a year ago, the bank had $3,180,325, which was distributed as follows: Dividends, $1,549,404; pension fund, $100,000; bank premises, $250,000; war tax, $128,357; Patriotic Fund, $60,000; reserve fund $528,300; balance carried forward, $564,264.

A full analysis of the Royal Bank's statement will be printed in *The Monetary Times* next week. In the meantime, the management and directorate may be congratulated upon the excellent results of the past year's operations.

OUR TRADE RECORDS

(Continued from page 9.)

manufacturers and traders in obtaining raw materials from the United States. This is rapidly becoming a problem for serious consideration. As the war proceeds, we will have to depend more upon the development of our own resources.

The November figures make it possible to compute the value of our trade for eleven months of the current calendar year. At the end of last month, our exports totalled $1,399,000,000, which gives an excess of exports over imports of $455,000,000, compared with a favorable balance of $263,000,000 a year ago and an adverse balance of $233,000,000 for the eleven months period of 1913.

We had a favorable balance at the end of every month this year, with the one exception of April. If the present volume of trade is maintained, the balance in our favor at the end of the current fiscal year in March next should be not less than $500,000,000. High prices for commodities have contributed largely to the record value of Canada's trade as well as increased exports. The figures are cause for much satisfaction but they again bring to mind the problems which must be met after the war in regard to our export trade. Then we will meet keen competition in all our business dealings abroad.

Mr. Holland, managing director of the Dominion Permanent Loan Company, Toronto, who has been seriously ill with pneumonia for the past two weeks, is reported as having made considerable improvement during the past day or two, although it is hardly probable that he will be able to be at his office for some time to come.

FIRE DANGERS IN PICTURE THEATRES

Over 29 Per Cent. of the Buildings are of Frame Construction

During the last five years, the moving picture theatre has become one of the leading sources of amusement. It is estimated that more than 500,000 people attend such theatres every day, and it is important, therefore, that every possible precaution be taken to ensure their safety. As a rule, women and children largely predominate in the audiences, and, in the event of panic, the danger is, therefore, at a maximum.

Over 29 per cent. of the existing moving picture theatres in Canada are of frame construction. In 92 cases families are living above theatres with stairways as the only means of escape in the event of fire. The actual figures are given in the following table:—

Cities and towns (population).	Brick theatres.	Frame theatres.	Dwellings over theatres.
Exceeding 10,000	338	27	26
5,000 to 10,000	59	31	15
1,000 to 5,000	115	109	27
Under 1,000	28	57	24
Total	540	224	92

Conditions are Being Bettered.

The existence of so large a percentage of frame buildings is startling when the hazards connected with moving picture theatres are considered, but the fact is capable of simple explanation. While the moving picture business was still in the experimental stage, promoters were uncertain as to the profits that might be expected, and hence they were unwilling to risk large sums of money in sound construction. Many theatres were erected hastily and cheaply, and, in some cases, with little consideration for the question of safety. At the present time, statutes regulating the construction of theatres and providing for the safety of the patrons are in effect in all the provinces in Canada, and these are supplemented by municipal ordinances.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

Demand	$4.76.75	$4.77	$4.70
Cable transfers	$4.78	$4.78.25	$4.80

Rate in New York, sterling demand, $4.75 3-16.
Bank of England rate, 5 per cent.

NEW PULP & PAPER INDUSTRY

The Ontario government, in carrying out its soldier-settlement plan for Northern Ontario, has provided for the building of a big pulp and paper industry in the Kapuskasing district, in the townships being opened for the soldiers. Hon. G. Howard Ferguson has awarded to Messrs. Munday and Stewart, of Toronto, who are understood to be representing United States interests, the right to cut pulpwood and timber upon the Kapuskasing pulp and paper limit. The company to be formed will be required to erect at Kapuskasing a pulp mill costing, with machinery and equipment, not less than $1,000,000; to operate it so that the daily output shall be not less than 100 tons of pulp, and to employ an average of 200 hands for ten months of the year. The company will also be required to erect a paper mill with a daily capacity of 75 tons a day whenever directed by the government. A flat rate of 75 cents per cord for all pulpwood and $15 a thousand for pine will be paid to the Ontario government.

Mr. F. Whittet, secretary-treasurer of the Riordon Pulp and Paper Company, has been elected a member of the board.

COST OF A BUSHEL OF WHEAT

It Varies According to Yield Per Acre—One Estimate is 74 3/5 Cents

How much does a bushel of wheat cost to produce in Western Canada? The Canadian Credit Men's Journal gives the following estimated cost of a bushel of wheat delivered at Fort William based on the following assumations:—

At 7 per cent. rate of interest. Land valued at $30 per acre, including buildings, fences and all implements. That all feed is raised on the farm. That all horses are raised on the farm after the first purchase of 8. That implements, harness and tools last an average of 7 years. A 12 cent rate per bushel to Fort William. That on a half-section (320 acres) the crop will be about as follows: 150 acres hay and pasture. That an allowance of $480 be made to the farmer (based on laborers' wages less what he would have to pay for rent).

Farmer's wages per year	$ 480.00	
One man and his board for 7 months	280.00	
Annual charge to replace implements, harness, etc., value $1,200	215.00	
Sharpening shares, shoeing horses and repairs to implements, harness, etc.	50.00	
Interest on 95 acres used for growing oats, hay and pasture	199.50	
Taxes on 95 acres used for growing oats, hay and pasture, 12c. per acre	11.40	
Cost of thrashing oats and twine	144.00	
Interest on first cost of 8 horses at $1,600	112.00	
Total cost for labor and implements on 150 acres	$1,491.90	
Total cost for labor and implements on 1 acre		$ 9.95
Interest on 225 acres wheat and fallow charged to 150 acres wheat, per acre		3.15
Taxes on 225 acres wheat and fallow charged to 150 acres wheat, per acre		.18
Total cost per acre for labor, implements, interest, taxes and seed		$14.28

Cost per bushel for various yields based on cost of $14.28 per acre:—

Bushels per acre	25	20	15	10	17½
Total cost per bushel for labor, implements, interest, taxes and seed	57 3/25	71 2/5	95 1/5	1 42 4/5	81 3/10
Thrashing 8 cents, boarding gang and teams 2 cents, twine 1 cent=11 cents Elevator charges; commission, inspection, etc.=3 cents Freight to Fort William=12 cents	26	26	26	26	26
	83 3/25	97 2/5	1.21 1/5	1 68 4/5	1.07 3/10
Leaving out interest on land $3.15 per acre Leaving out farmer's wages 480/150 $3.20 per acre, $6.35 per acre or per bu	25 2/5	31 3/4	42 1/3	63 1/2	36 2/7
The cost at Fort William would be	57 18/25	65 13/20	78 13/15	1 05 3/10	71 1/10

Here is Mr. Norman Lambert's estimate after a general inquiry in different parts of the West as to the various items entering into the production of a bushel of wheat. The figures which follow represent the costs of production from summer fallow or the best cultivated areas, and they are based on the experience, not of one isolated farm, but of a series of farms distributed throughout the three prairie provinces. These figures are calculated on a basis of an acre. The estimated yield of wheat per acre is then taken and the cost per bushel easily follows:—

	Per acre.
Ploughing	$ 2.50
Two diskings at 25c. each	.50
Seed drilling	.65
Seed at $2 per bushel, and 1½ bushels per acre	3.00
Harrowing after seeding	.25
Cutting with binder	1.00
Stooking (including harvesters' wages and board)	.50
Binder twine (2½ lbs. per acre)	.50
Thrashing (15c. per bushel)	3.75
Hauling to elevators or train (10c. per mile per bush.)	2.50
Interest at 7 per cent. on value of land at $50 per acre	3.50
Total cost	$18.65

Average cost per bushel (at 25 bushels per acre), 74.3-5 cents.

Cost of Production According to Yield.

It may easily be seen that the cost of production per bushel will vary according to the average yield per acre. The summer fallow areas in the west this year promise to average about 25 bushels of wheat per acre. Therefore, the costs are lower on summer fallow than they would be on first breaking, which will produce probably from 12 to 15 bushels per acre. It would cost the farmer who has 15 bushels per acre at least $1.25 per bushel to produce his wheat. There is also another variable quantity that must be considered—namely, the value of land. Fifty dollars per acre is not too high a price for good summer fallow land within ten miles of a railway; but there is much land in the west that is not cultivated so well, and it would average about $25 per acre. The cost of ploughing new land, however, is just double that of ploughing summer fallow, and harrowing is also more expensive on the newer areas. Rates of interest and haulage charges are also higher where the land is cheaper, and the security not so good as in the more productive districts.

Therefore, it is fair to say that the average cost of producing a bushel of wheat in the west in 1917 would range between seventy-five cents and $1.25, according to the yield. Any farmer working for himself would be able to keep well within those amounts. Two years ago the range was from sixty-five cents to ninety cents per bushel.

LARGE BRITISH BANK MERGER

An amalgamation has been arranged between two of the oldest and largest British banks, the National Provincial Bank of England and the Union of London and Smith's Bank. The fusion will be effected on the basis of an issue by the National Provincial Bank to shareholders of the Union of London of nine £60 shares, £12 paid, of National Provincial Bank for every ten £100 shares, £15 10s. paid, of Union of London and Smith's Bank.

The name of the amalgamated bank will be National Provincial and Union Bank of England. The business of both banks will continue as at present. Directors of the Union will join the board of the National Provincial and Union Bank. The management and staffs of both banks will be retained. The amalgamation will take effect January 1st next.

The National Provincial Bank on June 30 had deposits of £97,365,600. The Union of London and Smith's Bank, of which Sir Felix Schuster is governor, on June 30, had deposits of £51,527,372. The amalgamation will be one of the largest banks in the country.

Financial editors of the London papers describe the amalgamation as a development of exceptional importance, and the greatest event of its kind in the history of banking in Great Britain, both in point of size and consequence.

The National Provincial Bank was established in 1833, and on January 1, 1917, its subscribed capital was £15,900,000, paid-up capital £3,000,000 and reserve £2,000,000. The Union of London and Smith's Bank was established in 1839. At the beginning of the year its subscribed capital was £22,034,000, paid-up capital £3,554,785 and reserve fund £1,150,000.

The Royal Bank of Canada has opened a branch at Charlestown, Nevis, British West Indies.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

Brockville, Ont. November 27—Engine-house of the Grand Trunk Railway system damaged. Estimated loss on building, $5,800; on contents, $850.

Chaumox, B.C.—October 28—Dwelling of J. S. Washtok. Loss on building, $3,200; on contents, $3,500. Cause, overheated chimney. Insurance on building $2,300, on contents $3,000, Palatine Insurance Company, Limited.

Glen Valley, B.C.—September 23—Dwelling of Thos. Sullivan. Loss on building, $475; on contents, $350. Cause, overheated stovepipe. Insurance on building, Royal Insurance Company, Limited, $500.

Huntington, B.C.—October 29—Dwelling of F. J. Chappaz, furnished but not occupied. Loss on building, $1,200; on contents, $300. Cause, incendiary. Insurance on building $900, on contents $400, Commercial Union.

Mission, B.C.—November 1—Estate of W. R. Bryant, Bellevue Hotel. Loss on building, $1,400; on contents, $550. Cause, cigarette stub. Insurance, Guardian Fire Insurance Company, of Utah, on building $1,000, on contents $500; British Crown Assurance Company, on building $2,000, on contents $1,000.

St. Catharines, Ont.—December 10—The fire chief reports to *The Monetary Times* the following fires for the year ended December 10th: During the year the department responded to 77 alarms of fire as follows: Regular box alarms, 32; telephone, 38; still, 7. The total value of property endangered by fire during the year was: Buildings, $343,950; on contents of buildings, $274,750; insurance on contents $228,500; insurance on buildings, $164,800; loss on buildings, $11,479; loss on contents, $16,411; loss on contents on which no insurance was held, $400; loss on buildings on which no insurance was held, $1,300; loss on buildings with no insurance, $900; loss on contents with no insurance, $200. Cause of fires: Hot ashes 1, spark from stove 2, high tension wire 1, defective chimney 3, gas stove 3, unknown 33, lime stacking 1, hanging cloths over electric light lamp 1, explosion in stove 1, soot in fireplace which had been boarded up and papered over 1, boys with match 1, lamp explosion 1, lightning 2, chimney fires 4, drying clothes by stove 1, match dropped on clothes basket after lighting gas stove 1, looking for clothes with match 1, cigar stub 1, electric heater 1, electric iron 1, gas flaring over kettle, setting fire to lard 1, grass fires 4, smoking 2. Three calls were for fires outside of the city limits, one at Orchard Park and two on Carlton Street. The department used during the year 15,350 feet of hose, 570 feet of ladders, 93 gallons of chemicals, and worked on fires 37 hours.

Toronto, Ont.—December 6—Part of Polson's Iron Works destroyed. Estimated loss, $70,000. The insurance amounts to $223,000, in addition to the $14,000 which was carried on the two aeroplanes destroyed. Some loss was occasioned through the destruction of hulls in the course of construction, which was practically covered by marine insurance. The insurance is distributed among forty-one companies as follows, and is payable pro rata, except as to the aeroplanes, which were specifically insured: Insurance Company of North America, $10,000; Palatine, $10,000; Royal, $10,000; Generale of Paris, $5,000; North-West, $10,000; Providence and Washington, $10,000; British and Canadian, $10,000; Montreal Underwriters, $5,000; Northern, $10,000; Scottish Union and National, $5,000; Sun, $10,000; Minnesota Underwriters, $5,000; State of Pennsylvania, $8,000; Globe and Rutgers, $2,500; Western, $7,500; Hartford, $5,000; Royal Exchange, $5,000; National Union, $5,000; London Guarantee and Accident, $5,000; Caledonian, $5,000; Glens Galls, $5,000; Canadian, $5,000; Rochester Underwriters, $2,500; Phœnix of Paris, $2,500; Royal, $5,000; British-America, $5,000; Employers' Liability, $5,000; Canada National, $5,000; Mount Royal, $10,000; Dominion $10,000; Northwestern National, $10,000; National Ben Franklin, $5,000; National of Paris, $3,500; Perth, $2,500; Wellington, $2,000; Monarch, $2,000; total, $223,000. Aeroplanes—Century, $2,000; Pacific Coast, $2,000; British Dominions, $5,000; British Empire, $5,000; total, $14,000.

Vancouver, B.C.—Jas. S. Rankin, adjuster, reports the following fire losses to *The Monetary Times*:—

Vancouver, B.C.—September 18—Dwelling of Mabel G. Houlgate. Loss on contents, $25. Cause, alcohol lamp upset. Insurance, Guardian, $1,500; Canada National, $1,500.

October 5—Dwelling of John LeMoyne. Loss on building, $125. Cause, wood-box too near kitchen stove. Insurance, Commercial Union, $3,500; Queen, $2,000; Law Union and Rock, $1,500.

November 8—Chinese laundry and apartments of C. T. Lam and David Bun. Loss on building, $150. Cause, overheated chimney. Insurance, General Fire Insurance Company of Paris, $2,500.

PUBLICATIONS RECEIVED

Calendars, 1918.—North American Life Assurance Company, Toronto; Mutual Life Assurance of Canada, Waterloo, Ontario.

Banking.—The Home Bank Monthly, December, 1917. An attractive little publication issued from the head office of the Home Bank of Canada, Toronto.

Insurance.—The Life Underwriters' Magazine, issued by the Life Underwriters' Association of Canada, of which Mr. J. T. Wilson is president, deals with the opinions of five hundred men who attended the Winnipeg Convention of the Association, besides some very valuable information and advice on life insurance.

CANADIAN INDUSTRIAL CONDITIONS

The removal of any uncertainty as to the continued financing of orders for munitions from our allies, and from the British government, by the unexpectedly large response to the Victory Loan appeal, cannot fail to establish confidence in the industrial outlook, says the monthly letter of the Canadian Bank of Commerce. In all classes of industry there appears to be an abundance of orders, a condition which will continue for some time. The extension of the output is still limited by lack of labor and material, but there appears to be a substantial gain in volume. The home demand is being met by domestic products to a greater extent than formerly.

The Postal Census of Manufacturers in 1915, a summary of which was made public earlier in the year, has just been issued and shows that the increase in the value of manufactured products between 1905 and 1915 was 18.58 per cent., or from $1,165,000,000 to $1,381,000,000. In the earlier part of 1915, however, there was a falling off, followed later on in the year by a decided increase in activity due to the placing of war orders. From the closing months of 1915 to the present time there has been no cessation of this activity, nor has there been any check to the advance in prices and in wages. Meanwhile many new plants have been built and existing plants extended, in order to meet the extraordinary demand, with the result that the output to-day must be very greatly in excess of that of previous years. In the fiscal year ending March last, the exports of manufactures were valued at $477,399,676 as compared with $85,539,501 in 1915. For the seven months ending October last, the value was $420,380,372, or only $50,000,000 less than for the whole of the previous twelve months.

A decided increase in the output of pig iron has taken place during the year, but the supply still falls short of the demand. For the first nine months of the current year 895,307 tons were produced, as against 844,717 tons last year. It is interesting to note that this year 9,983 tons were produced in electric furnaces. The total production of steel ingots and direct castings during the first nine months of the year was 1,265,183 tons, as against 911,054 tons last year. The steel produced in electric furnaces during the same period was 30,960 tons, as compared with 19,639 tons during the whole of 1916. By September the production of the electric furnaces had risen to 5,000 tons per month, or at the rate of 60,000 tons per annum. The war demands, to which this increase is due, show no signs of diminishing, and are given precedence over commercial demands, which are also steadily becoming more pressing.

In the lumbering business there is not much activity, although in several districts efforts are being made to get out as much lumber as the unusual conditions will permit. On the Atlantic seaboard there is a good demand from the United States, which is expected to increase. There must also, sooner or later, be a heavy demand from Europe, which market is at present cut off because of the lack of available tonnage. There is also a dearth of railway cars for transporting lumber, which has proved a serious interruption to business.

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

CHRISTMAS, 1917

It is a time when all men rest awhile a time of family reunion a time to consider matters requiring "setting right."

To the man having the real well-being of his family at heart, what could be more appropriate at this season than the timely consideration of protecting their continued welfare and happiness by LIFE INSURANCE!

In the contracts of The Great-West Life Assurance Company all this is provided and more. A man does not necessarily have to "die to win," but may be reassured of comfort in his old age at the same time. Rates are low and the profit returns being paid to policyholders are the highest.

Assistant General Manager

Great Banking Expansion This Year

TOTALS *in 1917 Have Made New Records—Course of Banking Totals After Next Month Will Depend Largely on War Developments—Another Year of War Means Another Period of Canadian Production at High Pressure — Outlook For the Coming Year.*

THE three years of war have certainly seen a most remarkable growth of Canadian banking assets. At the end of 1914 the total assets of the banks stood at $1,555,000,000, practically the same level as at the end of 1913. The increase effected during 1915 was $182,000,000; and that increase was followed by another, of $210,000,000, in 1916. For the nine months of 1917, up to September 30th, the increase was $178,000,000; and, as the last quarter of the year saw large credit transactions in connection with the movement of the crops and the flotation of the fourth war loan, it is inevitable that when the December return is published, towards the end of this month, it will show another great gain as compared with the same date of the preceding year. The credits placed at disposal of the British government in connection with its purchases of Canadian grain and packing house products operated importantly to swell the bank figures; and the activity of the munition industry, though on a smaller scale than in the latter part of 1916, tended in the same direction.

In view of the phenomenal progress made in the three years under review, it is interesting to speculate on the conditions that will be reflected by the successive monthly bank returns in 1918. Will the totals continue to soar to new high records—new $100,000,000 mile-posts being passed in rapid succession—or is it the case that we have now reached the top and that 1918 will witness movement in the opposite direction?

These questions cannot be answered until the new year unfolds itself. In the opening month doubtless we shall see the contraction characteristic of January. Considering the great expansion of the bank note issues throughout 1917, it would seem that an unusually heavy contraction of circulation would be in order; and unless the normal January shrinkage of the current account or demand deposits is offset by some new special credit transaction, perhaps that department of the deposits will show a substantial decrease for the first month of 1918. These decreases would be normal—war or no war, it would be strange if they did not occur. No one should be surprised or dismayed if the contraction next month is greater than in preceding years. An unusually heavy contraction would be a healthy sign, since it would imply that the banks were in position to expand again if Canada's trade and industrial situation called for expansion. So far as the currency contraction is concerned, that, under existing circumstances, would have a tendency to ease the monetary situation. It should be remembered that when $60,000,000 or $70,000,000 of bank notes in circulation are covered, dollar for dollar, by gold or legals in the central reserves, the return of that gold-covered circulation to the banks, in the form of new deposits or payments on loans, etc., sets free a corresponding amount of the pledged gold or legals, which thereupon are added to the general cash reserves, and part of the released cash is available for new credit operations.

The course of the banking totals subsequent to January will depend to a large extent on the war developments. Should the war end early next year, there would presumably be a marked decrease in some lines of industrial and mercantile activity, and perhaps the government's pressing need or new credits would be diminished But, in view of the situation created by the Teutonic campaign against Italy, few persons among the Allies look for peace in 1918. The general belief is that unless the Anglo-French and American forces on the western front win early and decisive success, the war is likely to last throughout a great part of 1918. At any rate, bankers and financiers are obliged to proceed with their preparations and carry on their affairs on that assumption.

This implies more or less continual heavy borrowing by the governments of the United Kingdom, the United States and Canada. Our own government will be obliged to float further domestic war loans, and, if possible, further loans abroad, in order to provide for its own war outlay and for lending money to Great Britain to facilitate the British purchases of Canadian products. These government loans will have a tendency to keep the bank figures swollen far beyond the pre-war records—and swollen they will remain until the abnormal holdings of government securities are materially reduced. Owing to the vigor and aggressiveness of the campaign for the fourth domestic loan, the borrowing by subscribers to that loan is understood to be heavier than in case of the preceding domestic flotations. It is but reasonable to expect that when the fifth loan is launched next year, further strong efforts will be required to ensure successful flotation. Large borrowing by subscribers will doubtless again be in evidence.

Then another year of war implies another year of Canadian production at high pressure all round. Some part of the vast expenditures of the United States government must necessarily come to Canada, helping to keep Canadian industries busy. We may be sure that all departments of agricultural life in Eastern Canada will be working at pressure, and, with reasonably favorable climatic conditions, the output, at prevailing prices, will have a great value. Similarly, the high price of wheat and other grains will cause the farmers of the west to make another grand effort to smash all records in the matter of 1918 production. After the two comparatively short yields in 1916 and 1917, there may be a chance of a great harvest next fall. The extensive preparations in the way of breaking and fall ploughing will likely lead to the planting of an enlarged acreage at any rate—if the climate during the seeding season does not prove to be entirely unfavorable.

Considering the great expansion that resulted in the latter part of 1917 from a western wheat crop of, say, 225,000,000 bushels at $2.21 per bushel, it should be clear that a crop of 300,000,000 bushels or more next year, providing the West is fortunate enough to take off that much, sold at around $2 per bushel, as it probably will be, would be a potent factor in ensuring continued prosperity and in swelling the resources of the Canadian banks. These considerations show that if the war is prolonged there will be numerous factors working in 1918 with tendency to further expand the bank position. Whether these factors will be counteracted by others is another question.

GEORGIAN BAY CANAL

It Offers Best Solution of Transportation Problem, Says Port Arthur Man

That a Georgian Bay Canal offers the only national, economic and patriotic solution of our transportation problem is the opinion of Mr. Joseph Redden, vice-president of the Port Arthur, Ont., board of trade, in a lengthy statement on the subject just issued. He points out that the returns recently published by the grain commissioners of Canada of the amount of grain handled at our great inland lake ports of Port Arthur and Fort William for the crop year period ended August 31st, 1916, indicate to what large proportions the flow of grain through these ports has reached. The report shows that approximately 370,000,000 bushels of wheat, oats, barley and flax were shipped, 40,000,000 bushels by the all-rail routes and 330,000,000 bushels by vessel. "But although the total figures are very gratifying, and illustrate the wonderful development of Canada's western provinces," says Mr. Redden, "there are features in the report which are far from gratifying, and which cause great disappointment and uneasiness as to the future of Canada's transportation interests to all who have the interests of Canada at heart.

Through United States Channels.

"It shows that, while able to produce this great volume of grain that sought its exit through the terminals of Port Arthur and Fort William, Canada lost the control of its transportation to the seaboard after leaving these ports, for out of the 330,000,000 bushels shipped by vessel 193,000,000 bushels, practically 60 per cent., were carried to United States lake ports, thence by United States railroads to United States seaports.

"Of this vast amount sent to United States lake ports, 21,000,000 bushels were carried by Canadian vessels, showing that it was not on account of an inadequacy of Canadian vessels that prevented more of the grain being sent to Canadian ports, but that the present Canadian route to the sea is outclassed by the United States route."

Mr. Redden then asserts that Toronto and the other cities on Lake Ontario were fully aware of the inferiority of the Welland-St. Lawrence route, "but were willing to jeopardize Canada's prosperity in her shipping and transportation interests for a highly improbable local aggrandisement." He adds that Canada gives to the United States, free of cost, the key to our water transportation system, and that we have at present no permanent coasting trade for our vessels.

Montreal and Buffalo.

"The development of the Georgian Bay Canal," says Mr. Redden, "places Montreal in direct competition with Buffalo, making possible from the Canadian head of the Great Lakes a water route of 934 miles to Montreal, against the approximately 850 miles to Buffalo, with direct connections in Montreal during the summer with ocean shipping, and with a rail haul to Atlantic seaports for winter delivery for storage grain equal or less than that from Buffalo."

The statement concludes: "The solution of the freight problem of the west will not be the Panama Canal, of which so much is expected by some, but of which route Mr. Lanigan, traffic manager of the Canadian Pacific Railway, in an examination before the railway board at Ottawa four years ago, said: 'If it (the grain) was carried free to Vancouver for export, it would not result in a trade being developed under present conditions, owing to the high cost of sea carriage and insurance.'

"There are other factors in the handling of grain that will be against the routing of grain to Europe via the Panama route which are not necessary to enumerate, Mr. Lanigan's evidence being all-sufficient.

Hudson Bay Route.

"The Hudson Bay route also will, in the minds of many who are thoroughly conversant with the grain trade in its many phases of handling, be always handicapped by the climatic conditions existing on that route, conditions which will prevent the certainty of delivery in Europe of grain shipped from the west in all but a few months in each year. There are some who talk of all-the-year navigation by the Hudson Bay route, but those who know the hardships and dangers of December navigation on Lake Superior realize that winter navigation on the Hudson Bay route, the channels leading to which are over 1,000 miles further north than the Great Lakes, is a dream.

"The great solution of the western freight problem will be simply adequate rail connections with the twin ports, Port Arthur and Fort William, on Lake Superior, to all intents and purposes, the final market to the western farmer for the selling of his grain, there to connect with a deep waterway, practically an ocean highway, which, for nearly eight months of each year will carry cheaply the millions of tons of European-bound freight of western Canada and the United States.

Is Only Remedy.

"Is it not, therefore, imperative for the government of Canada to be up and doing, securing the world's best advice as to which route should be developed and not go on blindly in the greater development of the Welland-St. Lawrence route, a route that is equal to and developed sufficiently for all local demands and requirements, but which has proven in its long years of existence a dismal failure in the holding to Canada of the handling of the European-bound freight of the Great Lakes, and the further development of which, in the minds of many, including the vast majority of the commanders of Canadian upper lakes vessels, is a frightful blunder, they fully believing that the development of the Georgian Bay Canal is the one and only remedy to regain our trade, now fast disappearing through United States channels, to develop our shipping and industrial life, to develop our mineral resources, making possible to central Canada supplies of coal from Canadian mines brought through Canadian channels; not allowing that great section of Canada to be at the mercy for her coal supply on United States interests, supplies which may be and can be stopped at any moment through industrial or political strife in the United States.

"Is the ocean-bound commerce of western Canada to be handled for all time by Canadian or United States interests? That is the great question, and it will be answered by the development of one or the other of the two great canal routes from the head of the Great Lakes to the sea. So let the government of Canada be guided in the choosing of the route to be developed, not from the necessity of political expediency or sectional pressure, but only on national grounds, and on the advice of the world's best experts on transportation, for tremendous issues are at stake.

National Transcontinental Railway.

"Another transportation problem that deserves attention and the closest scrutiny by the government of Canada is that peculiar feature in the National Transcontinental Railway, brought about by that road only having connections by a spur from its main line with the Great Lakes ports of Fort William and Port Arthur, which necessitates all grain or other freight when shipped east from the Grand Trunk terminals at the head of the Great Lakes having to be sent back approximately one-third of the distance to Winnipeg before striking the main line and starting on its eastward route, on which it will have to travel an equal distance before getting abreast of the Great Lakes ports from which it was consigned. This feature in the connections of the Transcontinental with the Great Lakes ports is practically prohibitory against any great storage of grain at the terminal there, the real market, to all intents and purposes, of the western farmer. With a rise in price in the grain markets of the east or Europe during the winter months, making it profitable to sell, the grain dealer or farmer is just as well off if he had never moved his grain out of the west, for, on account of the routing necessary for grain to take when routed east for winter delivery to the seaboard from the great storage terminals at the head of the Great Lakes, Winnipeg is almost just as near the eastern seaports as the lake ports, although actually over 400 miles further away. The management of the Transcontinental Railway, under such conditions, are undoubtedly not sympathetic to the making of Fort William a storage port, as it necessitates a long, profitless haul for any storage grain ordered to the seaboard during the winter months.

"This may account, no doubt, for the small amount of storage space for grain that is in existence on the terminals of the Transcontinental at Fort William, 6,500,000 bushels against the approximately 40,000,000 bushels on the terminals of the Canadian Pacific Railway and Canadian Northern Railway.

"The remedy to this great drawback to the greater efficiency of the government road and to the betterment of the service of that railway to the twin ports is for the government to have immediately built the connecting link which is necessary to join with the Canadian Northern Railway at Long Lake, 125 miles east of Port Arthur, a mere matter of approximately 30 miles, and allow the Transcontinental running rights over that road into the twin ports. This connection, which would practically form the base of a triangle formed by the Transcontinental spur line out of Fort William and its main line east to its connection with the Canadian Northern Railway, would give great economical results in the handling of grain ordered east during the winter months from the great storage elevators of the lake ports, allowing the Transcontinental to run its passenger trains via the twin ports, east and west, giving Port Arthur and Fort William direct connections; also allowing the Grand Trunk Pacific and government railways to be in direct touch with the magnificent industrial sites in Fort William and Port Arthur, and share to the utmost in the great industrial and transportation developments of those great lake ports of Canada."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Fort William, Ont.—A by-law to raise $225,000 by 20-year 5 per cent. debentures, to take care of the city's street railway deficits will be voted on.

Anderdon, Ont.—A by-law to raise $13,000 for re-building two bridges over the Canard River will probably be authorized.

Dalhousie, N.B.—Alex. J. LeBlung, clerk and treasurer, reports the town's assessed value of real estate and personal property as follows: Real estate. $352,525; personal property, $131,300.

Port Elgin, N.B.—Arthur S. Robinson, chairman of commissioners, reports the town's assessed value of real estate and personal property as follows: Real estate, $210,900; personal property, $22,500.

Brantford, Ont.—No debentures have been sold for local improvements, but funds have been provided by short date borrowings, by way of treasury certificates, and these will, when due, be taken up and the debentures used for sinking fund purposes. The expenditure on current account for the year will exceed the estimate by $6,000, revenues will be $5,000 ahead of the estimate, so that the net deficit will be only $1,000.

Quebec, Que.—Practically the only municipal bond sales in November and December have been those made in Quebec province as follows:

Municipality.	Amount.	Rate %	Term (years).
Montreal East	$250,000	6	5
Town of Drummondville	100,000	6	5
City of Hull	179,000	6	5
Town of Victoriaville	50,000	6	5
City of Three Rivers	280 000	6	5
City of Three Rivers Catholic School Commissioners	485,000	6	10
City of Levis	164,000	6	5

Saskatchewan.—The following is a list of authorizations granted by the local government board during the week, December 10th, to 14th, 1917:

School Districts.—Earl Grey, $1,500 10-years 7 per cent. instalment; S. J. Morrison, Earl Grey. Beaver Valley, $1,200 10-years not ex. 8 per cent. annuity; J. Stoen, Cadillac. Orilia, $2,400 10-years not ex. 8 per cent. annuity; P. W. Hickling, Cantaur.

Rural Telephone Companies.—South Marengo, $11,000 15-years not ex. 8 per cent. annuity; T. F. Campbell, Marengo. Tribune West, $4,000 15-years not ex. 8 per cent. annuity; F. W. Johnson, Tribune. Eastern Star, $600 15-years 7½ per cent. annuity; C. Williams, Webb. Aneroid North, $1,500 15-years not ex. 8 per cent. annuity; Geo. Middlemiss, Aneroid. Currie, $4,700 15-years not ex. 8 per cent. annuity; T. L. Berry, Tompkins. Sylburn, $9,400 15-years not ex. 8 per cent. annuity; Wm. Ratcliffe, Tisdale.

The following is a list of debentures reported sold from December 10th to 14th, 1917:—

School Districts.—St. Jean Baptiste R.C.P., $1,000; John Weber, Titanic. Armstrong, $1,400; Regina Public School Sinking Fund. Lens, $1,865, Hill and Hollow, $2,000; Goldman and Company, Regina.

Rural Telephone Companies.—River Park, $3,500; W. J. Sparling. Tadmore, $11,400, Elfros, $24,500; W. L. McKinnon and Company, Regina. Cabri South Eastern, $8,100; L. P. Simard. Wurtzburg, $2,000; Wood, Gundy and Company, Saskatoon.

City.—Saskatoon, $7,700; City of Saskatoon Sinking Fund.

Town.—Grenfell, $7,000; Mrs. Ada H. Fitzgerald.

Saskatchewan.—"To any one engaged in Saskatchewan's municipal activities," says Mr. Geo. Langley, minister of municipal affairs in his annual report for year ended April 30, "it is easily apparent that the duties being performed by the clerks and secretary-treasurers are reaching a high order of efficiency. A very marked improvement is noticeable within the last few years. Many competent men are specializing in municipal accounting and devoting their whole time to the advancement of their respective offices. Inspectors (as explained in previous reports) call at each municipal office to report on its general conduct and condition. In very few cases indeed is the work of the clerk or secretary-treasurer found to be lagging, but on the other hand it is generally found that the local official takes pride in keeping his books neat and up-to-date, ready at any time for examination. As a rule all correspondence is answered within 24 hours after its receipt. The number of municipal officials now failing to conduct their offices on business lines, is, fortunately, very small, and these are showing evidences of improvement.

"To mayors, aldermen, reeves, overseers and councillors, the importance of carefully administering the measure of local self-government secured by each community is being regarded more and more as a national duty. Saskatchewan's municipal institutions will be obliged to face many troubles arising out of the present world war, but the initiative which they have already shown in meeting and overcoming difficulties will stand them in good stead and will enable them to solve the problems which at this period of rapid world changes are sure to be confronted. It may be safely assumed that after the close of the war emigration will be heavy to this new province with its free land and golden opportunities for development. The many newcomers will have an effect on our municipal life. Our councils will do well to continue to use that vigilance in the administration of local affairs which will make for true economy, sane development and sound government, to maintain the substantial characteristics of Saskatchewan's municipal institutions."

The tax assessment and levies compared by cities are as follow:—

Name.	Population.	Assessment.	Taxes levied.	Debenture debt.
Moose Jaw	16,880	$31,871,492	$ 867,805	$ 5,326,047
Regina	40,000	50,960,645	1,143,471	10,566,520
Saskatoon	35,000	37,677,800	860,376	8,203,818
Weyburn	4,000	7,247,341	163,830	863,463
North Battleford	4,500	7,267,401	167,000	1,052,154
Prince Albert	7,000	16,680,186	401,010	3,326,147
Swift Current	5,000	8,071,827	161,493	1,227,743

Mr. Lamb, who has, for nearly three years past, held the position of superintendent of branches, and previously that of Western superintendent, has been appointed assistant general manager of the Bank of Toronto. He is a capable banker. His promoton to this important appointment is well deserved and pleasing to his many banking colleagues and friends.

The Manufacturers' Life Assurance Company, Toronto, reports new business written during November at $1,248,915, which is a little less than the large total of $1,297,031 written a year ago. This result is regarded as exceptionally good in view of the fact that a large part of the company's field force was occupied during the greater part of the month in soliciting subscriptions to the Victory Loan. New business written during the eleven months ended November 30th totalled $15,155,892, a increase of $3,132,423, or nearly 26 per cent. Total business in force at the end of November amounted to $98,608,199, compared with $89,053,863 at corresponding period last year.

LIFE INSURANCE AND THE WAR

Large Amount of Insurance on Lives Subject to Military or Naval Service

"At the end of 1916," said Mr. William A. Hutcheson, second vice-president and actuary of the Mutual Life, at the eleventh annual meeting of the Association of Life Insurance Presidents held at New York recently, "there was $16,800,000,000 of ordinary business in force in companies reporting to the New York Insurance Department, and no less than $1,680,000,000 was on lives subject to military or naval service. There was also about $4,400,000,000 industrial insurance and about $90,000,000 fraternal insurance in force as reported to the New York Department, and taking the British and Canadian experiences as a criterion and applying the percentages of casualties to normal American death claims, it would show a death loss to American life companies of at least $30,000,000 per annum. If the war death claims should amount at any time to any appreciable part of the assumed 10 per cent. of the normal death claims it would be necessary to call upon either the contingency reserves or the dividends, or both, for in very few cases can the companies charge any extra premiums to offset such war claims."

Life Companies and Investments.

In referring to the part the life companies took in floating the two Liberty Loans, Mr. Hutcheson said that he had been able to get information from 182 companies, and he found that these applied for about $61,500,000 of the First Liberty Bonds and $109,500,000 of the second. The companies had been allotted $21,500,000 of the first loan and they applied for $109,500,000 of the second issue, so that they were prepared, within a period of less than six months, to purchase over $131,000,000 of bonds. This amount was nearly 80 per cent. of the increase in the invested funds of the companies within the period of six months during which these issues of bonds were made. In addition to this, the agents throughout the country placed somewhere about $38,000,000 of the first issue and about $100,000,000 of the second, giving much of their time to the work. Many of the employees also subscribed liberally and many of the companies furnished employees to assist in the clerical work. The companies have also loaned their aid to the army and navy insurance scheme, recruiting, Red Cross work, military census, food conservation, etc. He said that the war would affect the mortality of the companies, the value of their investments and expenses and probably their insurance in force.

War and Future Dividends.

"Whether the war lasts one year or five," said Mr. Hutcheson, "the question which all of us must meet ere long is that of dividends to policyholders. A company is able to pay dividends principally.

"(1) Because its expenses are lower than the provision therefor contained in the premium,

"(2) Because its death losses are lower than provided for,

"(3) Because it earns a higher rate of interest than that at which the reserves accumulate, and

"(4) Because it does not make losses on its investments.

"It is the aggregate surplus, of course, arising from these various sources which enables dividends to be paid. If the aggregate surplus increases, the dividends may be increased without affecting the contingency reserve, and vice versa. Expenses and death losses will increase during the war. At the same time, there has been a very substantial drop in the value of many securities, and there is little prospect of a return to the old values for years to come.

"Everything, in fact, seems to point to lower surplus earnings, which means either lower dividends or a lower contingency reserve, or both. The principle on which we should all act is 'safety first, and dividends second,' and any company which thinks it better in these war times to reduce its dividend scale will receive nothing but commendation from the public and from all wise and thoughtful policyholders."

British Companies and Dividends.

In conclusion Mr. Hutcheson said that "the British companies there do not, as a rule, make annual valuations and distribution of surplus. Some few do, but the rule there is to value and distribute surplus once in five years. Only some of the British companies, therefore, have had to meet the question of dividends since the war commenced three years ago, but in the case of those companies which have had to meet it, the following are the facts:—

"15 companies 'passed' their dividends.
"13 companies cut down their scale of annual dividends.
"9 companies made no change in their dividend scales.
"1 company increased its dividend scale.

"The conditions in Great Britain and the United States are, of course, very different, but these facts should be of interest to us all for this question must be met by all if the war lasts for even another year, as most of us think it must. The companies have contributed many men to the front and the depletion which may come to their staffs is one of the questions which must be met." An extract from a letter of a mother who expressed her willingness to sacrifice her son was read, and Mr. Hutcheson added that "the spirit of sacrifice displayed by her is the spirit which will win the war. Business cannot go on 'as usual' if we are to win the war, but a choice must be made between 'business as usual' and 'victory.' This is the nation's and the life insurance companies' problem now."

RAILROAD RATES INCREASED

An important judgment was handed down on Wednesday by the Board of Railway Commissioners, Ottawa, providing for a 15 per cent. increase in passenger rates in all parts of Canada, with the exception of British Columbia, where the maximum rate is now 3 cents per mile. The judgment also permits, subject to the limitations of the Crow's Nest agreement and certain specific limitations, an increase in freight rates of approximately 10 per cent. in the West and 15 per cent in the East. The Crow's Nest agreement was made by the Canadian Pacific Railway with the government, and by its provisions rates on a large number of commodities are reduced.

The judgment points out that "there can be no question, in view of actual results, that the railways require greater revenues, and must have them if proper efficiency is to be maintained and the demands of the country for transportation at all adequately met." Costs of labor, coal and materials have been increasing, with the result that the expenses of the Canadian roads are mounting at a much swifter rate than earnings. The increased rates allowed, states the judgment, will certainly not equal the increase in costs to which the railways are subject, and which are not in any way attributable to the railway management.

No mention is made in the judgment of the date on which the increased rates will come into effect. This is because the railways will have to file new tariffs based upon the judgment, and these must receive the approval of the board. It is quite probable that several weeks will elapse before the higher scale of freight and passenger rates comes into force.

With regard to the increase in passenger rates, the judgment states: "It is in the public interest, with a view to conserving coal, railway facilities and man-power, that passenger travel should be as light as possible, so as to facilitate efficient freight movement."

NEW YORK BANKER SAYS LONG WAR

Mr. Thos. W. Lamont, of J. P. Morgan and Company, who has just returned to New York from a trip to England and France, has issued the following statement:—

"On the other side there is great satisfaction at the vigor with which America has taken hold. But even so some doubt is expressed whether we yet fully realize the gigantic nature of the task ahead of us. Many here seem to have had the impression that by the mere fact of our coming into the war the early defeat of Germany became assured. One does not have to cross the ocean to realize that that is a delusion. No one can maintain that victory is close at hand. But it will soon be in sight if we realize that now we must prepare, not only for 1918, but for the campaigns of 1919 and 1920. Great Britain and France have had three-and-a-half years of cruel, grinding war. They have welcomed America's entry, not simply because of her great resources in men, food and munitions, but also because of the fresh viewpoint she is likely to bring to bear in the whole continuance of the war."

REGULATING NEW ISSUES

New securities issues here in future can be made or sold only with the approval of the minister of finance. This ruling has been passed under the authority of the War Measures Act. It affects new issues in Canada of bonds, debentures or other securities of any provincial, colonial or foreign government, municipality, commission, local government, institution, corporation or incorporated company. It applies also to any issues or offerings of shares whether preferred or common of any incorporated company. This is an unmistakable sign that war loans have the right-of-way in Canada just as they have in the United Kingdom and the United States.

The Imperial Treasury has for a long time, during the war period, required its consent to be obtained for new securities issues. Consequently, few issues other than war loans have been made. This year, for example, war loans in the United Kingdom will total approximately £1,339,516,000 and ordinary issues only £26,436,000 Prior to the war, Canada was a heavy borrower in the London market. Since 1914, owing to the British treasury restrictions, we have borrowed there only £8,230,000 or approximately $40,000,000. More than half of this was represented by a Dominion government loan of £5,000,000. The remaining sum was made up of four issues, the war conditions governing which brought the necessary consent of the Imperial Treasury.

The bond houses were probably not unprepared for the new ruling at Ottawa. They have accepted the fact that war loans will practically monopolize the market so long as the war continues. New issues in any event would have had a difficult route to a successful sale. Their regulation by the minister of finance may make it a little easier for the admittedly necessary issues. Canadian investors must devote their surplus funds to subscribing war loans and loans necessary to finance expenditures which cannot be postponed.

HALIFAX

That it is a national duty to provide a large endowment fund for those who have suffered in the Halifax disaster is the opinion of Mr. J. B. Laidlaw, of Toronto, who has strongly advocated this policy since his visit to the distressed city. A large number of people have been blinded by the explosion. The families of the blinded have also suffered pecuniary loss, many wage-earners no longer being able to fill that rôle owing to the loss of sight. In addition, there are a number of widows and orphans. Canada has not failed to do its duty in any particular during these troublous days of war. The government, on behalf of the nation, will do what is right and generous for the people of Halifax.

ENCOURAGEMENT OF CAPITAL

The Canadian government will not antagonize the means necessary to the development of natural resources in Canada. This is very important as chiefly by the active development of our resources will we be enabled to pay the heavy interest charges on the rapidly increasing national debt. Just before the recent Dominion election, Premier Borden in a public statement said that capital in the Dominion will not be taxed at any higher rate than is imposed by the United States government as the war progresses. The tax on incomes will be increased at the next session of parliament so as to coincide with the last income tax amendment of the United States government.

The levy upon business profits, which now takes a portion of net profits above 7 per cent. until three-quarters of all above 20 per cent. is absorbed by the public treasury will be re-enacted at the first session after the Union Government meets. There was on this point some doubt in the utterances of the finance minister, many corporations retaining the impression that the tax on war-time profits might not be carried beyond 1917. The prime minister has stated definitely that it will.

The packing houses will not be allowed to retain a profit in excess of 2 per cent. upon the annual turnover. In the United States this is 2½ per cent. The packers may retain only 7 per cent. on their invested capital free from tax. Between 7 and 15 per cent. the State takes one-half, and in addition to that a 1 per cent. extra tax is pared off the company's residue of 11 per cent., reducing any packer's profits to a maximum of 10 per cent. Over and above 15 per cent. all packing house profits are absorbed by the State.

The finance minister has made reassuring statements regarding taxation, on behalf of the government. In July last, he stated that any taxation to which it might be necessary for the government to resort from time to time would be in accordance with legitimate and established forms of taxation sanctioned by the tradition and experience of British self-governing communities. In February, 1916, Sir Thomas said, during the course of his budget speech: "Canada is a country inviting immigration, and we must be careful not to create the impression that it is likely to become a country of heavy individual taxation. In this connection, I think it opportune to state on behalf of the government and as enunciating its settled policy, that in providing our war expenditure, resort will not be had to taxation upon the farms, personal effects or incomes of those engaged in our great basic industry of agriculture."

PROSPERITY OF WAR

War, as we have seen, has promoted increased activities in the Dominion, but, as recently pointed out by Mr. C. W. Barron, the well-known Boston publicist, wealth is not made by prices or wages. The wealth of a nation is from its production in quantity. The farmer is rich with well-tilled lands, strong cattle and well-filled barns. He is no richer when we double the price for his lands, his cattle or his products, because in the end he has to pay double prices for his labor and everything he consumes or uses. "The great danger in Canada and the United States to-day and one militating against our prosperity, is that the war in Europe has been marking up prices for labor and commodities in America and we have been thinking ourselves rich. To make an analysis of the prosperity that is to come to Canada during and after the war we have got first to ascertain the amount of energy Canadians are going to put into this war in the way of production, in the way of labor, in the way of sacrifice, in the way of savings. The fictitious prosperity of the present is high wages, increasing consumption rather than high wages adding to savings and increasing the national wealth. Next after the energization of the people as a basis for war prosperity comes the savings. "A nation that earns and spends is not going ahead; a nation that earns and saves can own the earth," said Mr. Barron, adding: "The third fundamental for prosperity from the war is in the one word 'organization.' This must comprise union and efficiency. If we become a nation of spendthrifts, eating more, wearing more, and playing more because our neighbors are in distress and we get more for what we have to sell them, we shall be laying the foundation of a tremendous smash when we meet the stern reality of competition after the war, when the 30,000,000 men now at war become competitive producers with us, and we have become soft and luxurious."

COST OF THE WAR

If the war came to an end this winter its cost would have reached $145,000,000,000. This is the estimate of Mr. F. W. Hirst, a well-known English economist. He places the cost of the war to date to Great Britain and the Dominions at $30,000,000,000, and a similar amount for Germany. Russia's war costs are put at $27,500,000,000 and those of France at $25,000,000,000. His opinion is that the portent of the war expenditure figures is still concealed by "curtains woven out of war loans and embroidered with high wages, huge profits, fine words and all the paraphernalia of fictitious prosperity," and he predicts a greater social and economic revolution, a more sweeping change of properties than has been witnessed in Great Britain since the Norman Conquest.

One of the most pleasing features of war finance is that the method of paying for the war by printing paper money has been adopted in Great Britain only to a small extent. Enumerating the methods of paying for war, namely: (1) Out of income by taxation; (2) by loans on which posterity pays the interest; (3) by issues of paper money; or (4) by forced labor or conscription, Mr. Hirst says that every student of finance is puzzled to understand how, after three years of war, the British are able to spend £8,000,000 a day, the Germans £6,000,000 and the French £4,000,000 or £5,000,000. He thinks it is a case of "vanishing assets"—the gradual consumption of stocks accumulated before the war. He quoted a government official to the effect that after the war every worker will have to put in about a quarter of the working day in helping to wipe off the cost of the war.

NEW INCORPORATIONS

Imperial Oil Company Reorganizes With New Charter—Several Large Companies in the List

The largest companies incorporated last week were British American Timber Company, Limited, Victoria, B.C., $1,200,000; Beaver Trading and Transportation Company, Limited, Toronto, Ont., $3,000,000; Imperial Oil, Limited, Toronto, Ont., $50,000,000; Bellerose Securities Company, Limited, Toronto, $2,500,000; Howrey Creek Mining Corporation (no personal liability), Toronto, $1,000,000; Bond and Share Company, Limited, Montreal, $2,000,000.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of the paragraph. The amount named is the authorized capital, and the persons named are provisional directors:—

Fernie, B.C.—Northern Club and Cafe Company, Limited, $10,000.

Milton, Ont.—The Milton Shoes, Limited, $40,000; J. W. Bicknell, A. T. Maher, W. B. Sturrup.

Toronto, Ont.—Regal Cutlery Company, Limited, $50,000; E. Moir, J. Campbell, J. H. Greenberg.

Brantford, Ont.—Electric Smelting Company, of Brantford, Limited, $45,000; A. Goodwin, H. M. McIntyre, J. Ker.

Stratford, Ont.—Perth Printing and Publishing Company, Limited, $80,000; W. W. Schmidt, G. F. Schmidt, J. P. Rankin.

Vancouver, B.C. — Mitchell-Foley, Limited, $15,000; British Columbia Woolen Mills, Limited, $100,000; Standard Engineering Company, Limited, $10,000.

Victoria, B.C.—The Victoria Business Institute, Limited, $25,000; United Financial Brokers, Limited, $10,000; British American Timber Company, Limited, $1,200,000.

Ottawa, Ont.—British Explosives, Limited, $50,000; D. M. McLean, F. W. Westergaard, A. C. E. Owen. Dominion Loose Leaf Company, Limited, $500,000; S. G. Metcalfe, S. M. Clark, P. H. Murphy.

Winnipeg, Man.—Bell Novelty and Fancy Goods Company, Limited, $50,000; W. L. Bell, W. A. Mitchell, A. E. Hiller. Standard Shipping Company, Limited, $50,000; R. M. Wolvin, J. W. Norcross, L. H. Wolvin.

Montreal, Que.—O'Connors, Limited, $100,000; W. P. O'Connor, A. P. O'Connor, E. A. Morgan. R. W. Marshall's, Limited, $40,000; G. V. Cousins, S. Vineberg, R. W. Marshall. Bond and Share Company, Limited, $2,000,000; W. R. Shanks, F. G. Bush, G. R. Drennan. Douglas Bremner and Company, Limited, $50,000; W. S. Johnson, W. S. Wilson, S. M. Coates.

Toronto, Ont.—The Maestrolian Company, Limited, $100,000; L. C. Fauver, D. W. Markham, J. A. Ryan. Howrey Creek Mining Corporation, Limited (no personal liability), $1,000,000; S. A. Erwin, M. D. Gardiner, A. L. Kemp. Ontario Hardwoods, Limited, $40,000; D. I. Grant, G. Grant, H. MacDonald. Bellerose Securities Company, Limited, $2,500,000; W. K. McKeown, L. C. Herdman, G. E. Chart. Imperial Oil, Limited, $50,000,000; W. C. Teagle, C. O. Stillman, G. W. Mayer. Beaver Trading and Transportation Company, Limited, $3,000,000; W. W. Skinner, W. G. Pugsley, G. G. Hyde

Mr. F. W. Renworth, of the Great-West Life Assurance Company, has been appointed provincial manager for British Columbia of the Manufacturers' Life Insurance Company, with headquarters in Vancouver. Mr. Renworth was recently made inspector for British Columbia agencies of the Great-West under supervision of Mr. J. A. Johnson, the company's manager for British Columbia.

BANK OF MONTREAL

THE BANK OF TORONTO

HEAD OFFICE, TORONTO, CANADA

Capital	$ 5,000,000
Assets	$84,000,000
Reserved Funds	$ 6,555,306

PRODUCTION

INCREASED effort and efficiency in labor, more economy and less waste in living, building up capital by harder work and greater savings, will enrich you and your country. The men and women at home must produce more to cover war's waste.

It is easier to *make* money than to *save* it. A Savings Account at The Bank of Toronto will help save what your increased effort provides.

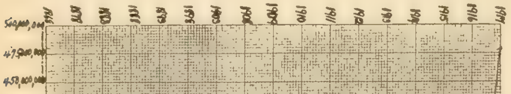
CANADA'S EXPORTS SINCE CONFEDERATION

Rapid Growth of Canadian Trade During Past Fifty Years

The following table shows the distribution of Canadian exports of manufactured goods from 1868 to 1908, and from the latter year to 1917 annually.

	To Great Britain.	To United States.	Other countries.	Totals.
1868 .	$ 1,107,408	$ 682,851	$ 310,152	$ 2,100,411
1873 . .	1,428,748	1,541,689	639,457	3,609,903
1878 .	2,224,373	983,027	920,335	4,127,755
1883	1,211,189	1,603,274	688,757	3,503,220
1888 . . .	1,762,894	1,632,025	766,363	4,161,282
1893 . .	2,454,000	3,563,827	1,676,123	7,693,950
1898 .	4,900,806	2,829,510	2,948,000	10,678,316
1903 . .	6,728,298	8,236,129	5,660,540	20,624,967
1908 . . .	7,472,357	12,427,258	8,607,509	28,507,124
1909	8,024,308	11,828,241	9,104,501	28,957,050
1910 . . .	6,610,756	15,350,280	9,533,880	31,494,916
1911 . . .	6,973,820	16,524,005	11,785,293	35,283,118
1912	6,852,710	16,312,751	12,670,823	35,836,284
1913 . . .	7,158,746	21,321,458	15,212,504	43,692,708
1914 . . .	8,583,540	30,391,764	18,468,148	57,443,425
1915 . . .	24,848,359	42,164,753	18,526,389	85,539,501
1916 . . .	148,477,303	58,202,141	35,355,554	242,034,998
1917 .	339,013,448	91,990,586	46,305,642	477,309,676

The accompanying chart shows the growth of our total exports since 1867.



Mr. E. Bradshaw, formerly member of the Saskatchewan Executive Assembly for Prince Albert, dropped dead in a store in that city this week. He had been in the mercantile business, but for the past ten years he had been head of the Bradshaw Agencies, an insurance and loan firm with a wide connection in Saskatchewan.

Mr. George O. Gray, who was for several years connected with the Mainland Board of Fire Underwriters and for the past two years has been manager of the insurance department of the Royal Financial Corporation, Vancouver, has joined the staff of the insurance department of Pemberton and Son, Vancouver, as special agent.

IMPORTANCE OF LIFE INSURANCE

Amount in Force in Canada Equals Total Value of Our Trade

In order that we may gain some idea of the relative importance of the business of life insurance, it may be well to compare it with other aspects of our country's trade, using figures relating to Dominion licensees only, as it is difficult to obtain authentic records of provincial licensees for any but the most recent years.

The amount of level premium life insurance in force in Canada for the year ending December 31st, 1916, amounted to $1,312,152,421. The total exports from Canada for the fiscal year ending March 31st, 1916, amounted to $882,872,502; the total imports for the same year, $564,505,796, the total exports and imports amounting to $1,447,378,298.

Importance of Life Insurance.

It will, therefore, help to fix in our minds, said Mr. G. D. Finlayson, Dominion insurance superintendent, in an address given to the Montreal Life Underwriters' Association at Montreal recently, the relative importance of the business of life insurance if we say that the total amount of life insurance in force in Canada is almost exactly the same as the total value of the exports from and imports into Canada, and somewhat in excess of the total bank deposits in Canada.

Progress During Last Fifty Years.

"If we wish to gain an idea as to the progress made during the last fifty years in each of these departments of the nation's activity, we shall have to content ourselves with the figures for the year 1869 in the realm of life insurance, for the reason that figures for the year 1867 or 1868 are not available. Taking the year 1869, therefore, for the three items, we find that the total amount of life insurance in force in that year was $35,680,082. The total bank deposits were $33,654,000, while the total imports and exports were $130,889,946, and in order that we may not be discouraged at what we sometimes think is the slow progress of life insurance, we may note that during the period covered the amount of insurance in force has increased approximately forty-fold, the amount of deposits have increased approximately thirty-nine-fold, while the total exports and imports have increased approximately eleven-fold. If other indexes of the country's development were taken it would probably be found that the business of life insurance is able, from the standpoint of progress made, to hold its own with any other aspect of our national growth."

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental lines for the first three weeks of December:—

Canadian Pacific Railway.

	1916.	1917.	Inc. or dec.
December 7	$3,130,000	$3,280,000	+ $150,000
December 14	3,106,000	2,908,000	— 198,000
December 21	2,979,000	3,051,000	+ 72,000

Grand Trunk Railway.

December 7	$1,151,306	$1,218,138	+ $ 66,832
December 14 .	1,203,868	1,040,349	— 163,519
December 21	1,164,062	1,355,165	+ 191,103

Canadian Northern Railway.

December 7 . . .	$ 917,000	$ 916,000	— $ 1,900
December 14 .	892,600	753,800	— 138,800
December 21	805,700	738,300	— 67,400

The following is the Canadian Northern Railway statement of earnings and expenses for the month of November:—

	1917.	1916.	Inc. or dec.
Total gross earnings.	$ 4,050,200	$ 3,722,300	+ $ 327,900
Operating expenses . .	3,295,500	2,472,300	+ 823,200
Net earnings	754,700	1,250,000	— 495,300
Aggregate gross earnings from July 1st	18,583,600	18,146,100	+ 437,500
Aggregate net earnings from July 1st	5,269,800	5,472,300	— 202,500

INSURANCE AGENTS' COMMISSIONS

Ontario Investigation Probes the Matter—Higher Agents' License Fee Suggested

The question of the possible reduction of commissions paid to insurance agents was discussed at a special hearing of the Ontario Insurance Commission last week. Justice Masten, chairman of the commission, stated that, in the course of the enquiry, representations had been made that one phase of insurance operations in respect to which a lessening of expenses might be accomplished was in the commission paid to its agents. Amongst the testimony given was that of one witness, who is an insurer in a large way, who claimed that if he transferred his policy of insurance from the regular agents in Toronto to Johnson and Higgins, of New York, that he was bearing an expense of only 10 per cent. commission instead of the 25 per cent. paid in Canada. "I mention that as one instance brought to my mind that this branch of the enquiry is a proper one for fuller consideration, and before attempting to make any report on such a question, I thought it only right to hear from the agents. The idea is that not only can the business be done at a less cost, but also, in many instances, the services rendered by the agents to the insured are nil. They consist, in some cases, of receiving from the insurer a cheque for the premiums, passing it on to the company and collecting 25 per cent. of it in the process. That applies more particularly to house property in cities. From my own experience, that seems to be what it comes to. I do not know of any benefit I receive, and if an agent gets 25 per cent. of my premium, why cannot I go to the insurance company and get my insurance at 25 per cent. less?"

Commissions Hitherto Unlimited.

Col. Le Grand Reed, of Messrs. Reed, Shaw and McNaught, insurance managers, brokers and agents, Toronto, appeared on behalf of the chief agents of Toronto. Hitherto, he said, the commissions in Toronto had been unlimited. From that has arisen the excessive commissions paid to canvassing agents. As a result of that they were all conscious that something should be done, and, prior to their being informed of this session, at the last meeting of the Canadian Fire Underwriters' Association new commission rules, to take effect on February, 1918, were proposed by the Toronto committee and were adopted. Under these rules the commission paid to canvassing agents of the Canadian Fire Underwriters' Association companies were limited to 15 to 17½ per cent. These were the rates obtaining in Toronto five years ago, and are equal to those in other large cities. Under these rates and with protection against indiscriminate agency appointments, the soliciting agent would doubtless make as much or more in the future as he did under the unregulated conditions. These new rates do not touch the non-tariff companies. They were adopted by the Canadian Fire Underwriters' Association at its Montreal meeting on the 5th inst., and embrace seventy-nine companies.

Agents Control Business?

Mr. Masten then asked Col. Reed his opinion of this point of view, that the agents really control the business for the most part throughout Ontario. "It is imperative," he said, "for the companies to go to the agents as customers seeking their assistance, they being in practical control. Just as you go to a grocer to buy sugar, the companies go to an insurance agent to get risks. That is a crude way, perhaps, but it is a broad way of looking at the matter. How far is that the situation, do you say?"

Col. Reed replied: "It is not altogether so. It is a broad point, and I should be glad to have a little while to think it over. There is considerable misapprehension as to the profits of an insurance agent. Because the commission paid is 15, 20 or 25 per cent., it leaves in the mind of the public that it is an immense profit on any turnover. That is a fallacy. The expenses of an agency are entirely lost from view. The net profit of an agency office is an exceedingly small percentage. That is because of the commissions which are paid for obtaining the business and the office operating and supervision expenses, the cost of expert service to the insurer. We maintain our own inspectors, who are underwriting inspectors in addition to inspectors for field development, etc."

Col. Reed later alluded to Justice Masten's surprise at the high rate of commissions. "After February 1st, 1918," he said, "it will be cut to 17½ per cent. I do not wonder that you were surprised at 25 per cent. But the soliciting agent had one item on his side. He had to leave his house and tramp long distances after premiums of small amounts, pay perhaps two to three visits to the man, go in the evening maybe, and be asked to 'see him again' before securing authority to write the policy. Then he has as many trips to collect the premiums. I do think, therefore, that there is a distinct value in the soliciting agent, not maybe to the intelligent insurer, but more particularly to the unintelligent insurer, because on the average he does not understand insurance or the law in the simplest form. Agents give very valuable information to insurers on these subjects. If your agent gets 25 per cent. on your premiums for merly mailing a renewal notice to you and you send him your cheque right away, that is one great big red-letter day for him. These new rules cover the commission to agents, who are entitled to nominal profit for services and their liability by law."

Justice Masten wondered whether it would be a wise recommendation to make that the cost of an agent's license should be greatly increased. "It was difficult," he said, "to examine a man and ascertain whether he has the brain power and moral qualifications to endure the strain of being a proper insurance agent, but at least," he added, "we could require a bigger fee than $3."

Col. Reed replied: "The Toronto Insurance Conference, now being formed and organized, of Toronto insurance men, starting with the commission paid Canadian Fire Underwriters' Association representatives, and to embrace all companies' officers, for the regulation and enforcement of the new rules and for improvement of the character of the transactions, recommend to the Ontario government that separate licenses should be issued for life, fire and casualty business. There is a wide demarcation between the fire, life and casualty agents, and yet, when a life insurance agent secures a $3 license, he can act as an agent for fire and casualty insurance, and through that abuses have arisen. The present method of licensing has resulted in the payment of commission indiscriminately, and really in breaches of the anti-rebating law. The result of this is to unnecessarily increase the acquisition cost. In that respect I do not see why it is not feasible in Ontario to examine a man as to his qualifications as is done in other parts of this continent."

ADJUSTMENT OF HALIFAX FIRE LOSSES

The fire insurance companies concerned in the Halifax disaster appointed a committee of seven Halifax agents to take charge of the business in connection with the insurance. These agents were given powers to appoint adjusters and to obtain necessary legal advice. They, in turn, appointed the following three adjusters to act for all the companies interested: Mr. F. S. Whittaker, of St. John, N.B.; Mr. George Cheese, of the firm of Cheese and Debbage, adjusters, Montreal; and Mr. W. H. Adamson, Toronto. The adjusters have visited the city and made a preliminary inspection. They will commence adjusting the losses early next month.

CANADA'S NEWSPRINT INDUSTRY

We Are Supplying About 80 Per Cent. of United States Requirements

Canada has taken an important place in the newsprint paper trade of the American continent. In 1901 the United States imported less than a thousand dollars worth of newsprint. In the fiscal year 1906 such imports amounted to only $64,382. Since that year the increase has been rapid and uninterrupted. In the fiscal year 1910 the quantity imported was 25 times what it had been in 1906. In the calendar year 1916 the output of United States mills supplied only about 70 per cent. of the total consumption, practically all the remainder being imported from Canada.

The steadily increasing dependence of the United States on Canada for supplies of newsprint is shown by the following table:

Imports into the United States of Printing Paper Valued at not Above 2.5 Cents* per Pound, 1911-1916.

	Canada.		Total.	
Fiscal year ending June 30—	Quantity. Tons.	Value.†	Quantity. Tons.	Value.†
1911	53,118	$ 1,968,385	54,022	$ 2,010,502

Dec., 1916	36,446	1,604,304	36,480	1,607,126

*Since September 8, 1916, 5 cents per pound.

†These figures do not represent accurately the cost of this newsprint to the United States publisher as most of the paper is entered at an officially established valuation of $38 per ton.

Fiscal year imports by the United States increased from 54,022 tons in 1911 to 438,746 tons in 1916. Since 1912 the annual increase has not fallen below 50,000 tons, and in two years it has exceeded 100,000 tons. In the fiscal year 1916 these imports were over eight times as large as in 1911. They increased from 368,409 tons in the calendar year 1915 to 468,230 tons in 1916.

Canada as a Factor.

In the report, published this year, of the Federal Trade Commission of the United States, it is noted that Canada's rapid progress as a factor in the situation is illustrated by the increase in the proportion of the total supply of the United States imported from that country. Ten years ago Canada furnished but a fraction of 1 per cent. of the newsprint used in the United States; in 1909, less than 4 per cent.; in 1916, about 30 per cent. The imports from Canada amounted to about 75 per cent. of the total Canadian production in the calendar year 1915 and about 78 per cent. in 1916. In the latter year Canada's oversea exports amounted to about 53,000 tons, or 9 per cent. of the total output, leaving about 81,800 tons or 13 per cent. for home consumption.

A very large part of the imports by the United States from Canada come in over the northern border, but since 1913 entries at Pacific ports have usually run from one to one-and-a-half million dollars annually. These figures, of course, take no account of the exchange arrangement between a United States and Canadian company referred to later.

For 124 years prior to 1913 duties were imposed upon the importation of newsprint paper into the United States. The United States tariff law passed in 1909 reduced the duty to three-sixteenths of a cent per pound, equivalent to $3.75 a ton, upon newsprint valued at not above 2¼ cents per pound, and the Canadian reciprocity law passed in 1911, removed the duty entirely on imports of newsprint paper and pulp from Canada, except where the Canadian government imposed an export duty. The United States tariff act of 1913 put newsprint paper from all countries valued at not above 2½ cents per pound upon the free list. If valued at above 2½ per pound a duty of 12 per cent. was imposed. About 60 per cent. of the Canadian paper went into the United States free in 1912. In 1913 over $1,000,000 worth of the Canadian paper was still paying duty, but since October 3, 1913, no duty has been paid on printing paper value at not over 2½ cents per pound in the country whence exported. The rise in price in 1916 led to the enactment of a provision in the United States revenue law approved September 8, 1916, raising the minimum of 2½ cents per pound to 5 cents. This was done in anticipation of the market price in Canada going above 2½ cents, which would cause the 12 per cent. duty to be imposed upon imports into the United States.

As to Exports.

Prior to 1911 export figures were not shown separately in the United States foreign-trade statistics. Since 1911 they have run as the following table indicates:—

Exports of Newsprint Paper from the United States, 1911-1916.

Periods. Fiscal year ending June 30—	Quantity. Tons.	Total value.	Value per ton.
1911	49,755	$2,434,964	$48.92
1912	51,787	2,501,529	48.30
1913	50,213	2,450,520	48.80
1914	44,483	2,177,483	48.94
1915	62,841	3,079,137	48.98
1916	63,634	3,119,364	49.02
Six months ending—			
June 30, 1915	25,752	1,307,732	50.78
Dec. 31, 1915	29,409	1,399,894	47.60
Twelve months, 1915	55,161	$2,707,626	$49.09
Six months ending—			
June 30, 1916	34,212	1,715,917	50.16
Dec. 31, 1916	42,115	2,378,858	56.48
Twelve months, 1916	76,327	$4,094,775	$53.64
Months:			
July, 1916	7,454	422,486	56.68
Aug., 1916	11,636	599,354	51.51
Sept., 1916	6,597	370,704	56.19
Oct., 1916	4,941	316,061	63.97
Nov., 1916	5,618	311,183	55.39
Dec., 1916	5,870	359,070	61.17

The smallest quantity exported during the last six fiscal years was 44,483 tons in 1914 immediately preceding the outbreak of the European war. In the calendar year 1916 exports had increased to 76,327 tons, which was 5.6 per cent. of the domestic production for the same period.

The increase in exports in 1916 was in considerable degree due to shipments to various countries such as France, Portugal, Greece, China, etc., which prior to the year 1916 imported little or no newsprint from the United States.

The only United States manufacturer that has developed an export trade of considerable importance is the International Paper Company. That company supplies foreign publishers under contracts similar to those used in the domestic trade. Aside from the International's business, newsprint exports are apparently made up of odd lots handled by trading companies. That there was a considerable increase in this odd lot business during 1916 is indicated by the fact that the International Paper Company's proportion of total exports fell from 85.6 per cent. in the first half of 1915 to 61 per cent. in the first half of 1916. Prior to 1915, so far as information is available, that company's proportion of the total had never fallen below 75 per cent.

PULP AND PAPER INDUSTRY

It is Making Rapid Progress in British Columbia—Better Ocean Transportation Looked For

(Staff Correspondence.)

Vancouver, December 21st.

Pulp and paper manufacture has rapidly advanced into the forefront of British Columbia's big industries. It was only a few years ago that a couple of pulp plants were built and closed down, but of late these idle plants have resumed operation. Plants are in operation on Howe Sound, close to Vancouver; at Powell River, about 60 miles up the coast; at Swanson Bay, 300 miles north; at Ocean Falls, 400 miles north; while at Quatsino, west coast of Vancouver Island, a large plant is building.

Whalen Company is Largest.

The Whalen Pulp & Paper Company is the largest operator. It started with a chemical pulp plant at Mill Bay, at the head of Howe Sound, not far from the Britannia Mines. This plant was increased to double its capacity. Some months ago, the company acquired the plant at Swanson Bay, where there is a good sawmill and also a sulphite pulp plant; and also the Davidson-Ward shingle plant with about twenty machines at Loughborough Inlet. Now it is constructing a large pulp mill, saw mill, etc., at Quatsino, having acquired the interests of the Colonial Pulp & Paper Company. This company will also build its own ships at Quatsino.

The Powell River Company supplies news print paper to about all the newspapers on the Pacific coast, as well as for big directory publications, and ships to Australia and the Orient in large quantities. It has a very large plant at Powell River, where a model town is also operated.

Factor of Ocean Transportation.

The Empire Pulp & Paper Mills has started its paper mill at Ocean Falls. It has a large property there, and in addition to newsprint will manufacture manila wrapping as well as kraft.

The Rainy River Pulp & Paper Company took over the plant at Port Mellon, Howe Sound, where the manufacture of wrapping paper was started some years ago, but discontinued.

Circumstances demand that a pulp and paper plant shall be large, and the operations of each of these companies means a small town. The payroll of these places is much larger than the payrolls of ordinary towns, for at least every male of the population is employed at good wages. At Britannia and Anyox are also two more towns created entirely by reason of the industrial activity, so that north of Vancouver are several centres more active than many cities double the size. No one looks more confidently to the future than the pulp and paper manufacturer, and bigger business is looked for in those days when ocean transportation facilities are better.—R. B. Bennett.

BANK OF TORONTO

The report of the Bank of Toronto for the year ended November 30th shows that earnings increased in the past year by $72,000, a gain over the 1915 period of $200,000. The profits for the period were $802,920, being equal to 16.05 per cent. on the capital and 7.27 per cent. on the combined capital and reserve. From the previous year's accounts $507,989 was carried forward to the credit of profit and loss, and this, combined with the profits of the year, make a total of $1,310,010, which was distributed as follows: Dividends, $550,000; circulation tax, $49,403; pension fund, $25,000; patriotic and war subscriptions, $29,200; Toronto General Hospital, $2,000; written off premises, $100,000. This left $555,306 to be carried forward as compared with $507,989 in the previous year. The statement is a very satisfactory one.

The Royal Bank of Canada has opend a branch at Florida, Cuba.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Saskatchewan.—"As the necessity for curtailing expenditure is forced upon the attention of municipal councils, and as changed conditions must be squarely faced, the assessment values, as already intimated, have been materially reduced in many urban municipalities." This statement is made in the annual report of the Department of Municipal Affairs of Saskatchewan for the financial year ended April 30th, 1917. "In the rural communities," it continues, "there has not been the necessity of reducing values, as practically no rural municipality had its farm lands assessed at an unreasonably high figure. In days when real values must be considered, the good agricultural lands of our province come in for proper recognition. The unoccupied lands on the outskirts of our cities, towns and villages can be valued no longer on a basis similar to that which existed, for example, in the year 1912. They are a genuine asset to the community, but can scarcely be expected to bear the burden of taxation to the same extent as the revenue producing property nearer to the business centre of the community concerned. 'Ability to pay taxes' deserves recognition in the arranging of any assessment roll.

"It is sometimes stated that taxation in Saskatchewan is high. The last report issued by this department dealt with this matter in detail, so far as rural municipalities are concerned, and by actual examples demonstrated that our cultivated farms are asked to pay a comparatively small levy, whereas those who hold property for speculation and neglect it to the extent of allowing weeds and gophers to thrive thereon, are required to pay some additional amounts for their neglect. With reference to the assertion sometimes made that taxes in towns and villages are somewhat high, the average rate of taxation for municipal purposes for 1916 was, in towns, 14.95 mills; in villages where buildings and improvements are assessed as well as land, 16.25 mills; in villages where land only is assessed, 35.25 mills.

"In Saskatchewan's two hundred and ninety-eight rural municipalities the average rate of taxation for municipal purposes in the year 1916 was 5.7 mills. The surtax is a tax on uncultivated lands, which are so often held by speculators (the man who farms his property has no surtax to pay). It is levied at a rate of six and one-quarter cents per acre where the land on which it is imposed is not under cultivation on the first day of August of the year in which the surtax is to be paid.

"The following statement of surtax payable to the municipalities since it was first provided for gives interesting information: 1914, $755,916.10; 1915, $718,683.78; 1916, $654,403.85.

BRITISH COLUMBIA MUNICIPALITIES

Statistics of Assessment and Bonded Indebtedness—Comparison of Assessed Values

The total assessed values of property in the 35 city and 28 rural municipalities of British Columbia this year is $579,726,111, not including exempted values aggregating $37,612,256.04, according to the annual returns just compiled by Municipal Inspector Robert Baird. These totals compare with an assessment of $610,240,473.72 in 1916, exclusive of exempted values of $43,261,416.91, and with $682,886,942.65, exclusive of $38,451,309.58 exemptions in 1915.

These figures indicate that yearly municipalities are gradually reducing assessments, which, in the time of the boom, were increased to a very high level, and that the process of squeezing the "water" out of assessed values is proceeding apace. In the past four years about $100,000,000 has been lopped off municipal assessed values.

Comparison of Assessed Values.

How the assessed values in the past three years compare is indicated by the following figures:—

1917.	Land.	Improvements.	Total.
City	$266,843,693	$133,030,242	$399,873,935
Rural	130,694,853	49,157,823	179,852,176
Total	$397,538,546	$182,187,565	$579,726,111
1916—			
City	275,556,707	134,956,016	410,512,724
Rural	151,057,926	48,669,822	199,727,749
Total	$426,614,633	$183,625,838	$610,240,473
1915—			
City	315,807,719	144,827,161	460,724,880
Rural	170,642,916	51,519,145	222,162,061
Total	$486,540,635	$196,346,306	$682,886,942

The bonded indebtedness of the municipalities of the province on December 31, 1916, compared with the two previous years, are as follow:—

	City.	Rural.	Total.
1917	$73,676,039	$21,623,064	$95,299,103
1916	73,676,039	21,623,064	95,299,103
1915	72,525,180	22,548,394	95,073,574

These figures indicate that municipalities have been financing their needs from current revenue, and that the necessity of economy in expenditures on new undertakings has been the unanimous practice. In fact, during the past year no new municipal issues have been floated, and in the two years the net increase in bonded debt has been but $225,529 and that increase was made in 1916.

As to Exemptions.

Assessment exemptions, that is, assessed values exempt from taxation, totalled $31,380,435 for city and $6,231,820 for rural municipalities in 1917, compared with $38,206,881 and $5,054,535 respectively in 1916 and with $32,365,678 and $6,085,631 in 1915.

In 1915 Victoria's aggregate exemptions was $18,510,415, compared with $15,513,870 in 1916 and with $12,893,720 this year.

Debenture debts were incurred for the following purposes:—

	City.	Rural.
Schools	$ 7,064,624	$ 2,036,782
Streets	6,698,058	8,645,774
Other non-revenue producing	21,092,307	4,282,074
Waterworks	13,274,279	3,690,675
Electric light	2,346,645	118,800
Sewers	475,500	110,000
Other revenue producing	311,000	110,000
Local improvements	22,413,626	1,913,058
Total	$73,676,039	$21,623,064

Victoria's debenture debt is $18,767,792; Vancouver, $35,584,434; New Westminster, $5,905,825; North Vancouver, $3,031,147; Prince Rupert, $1,834,668; Nanaimo, $1,032,024; Kamloops, $1,245,373; Vernon, $887,463; Nelson, $847,960; Revelstoke, $731,002; Ladysmith, $103,000; Duncan, $99,500; Alberni, $70,130; Port Alberni, $236,500. For rural municipalities, the largest debenture debts are. South Vancouver, $6,686,165; Point Grey, $5,552,524; Burnaby, $2,287,150; North Vancouver, $1,274,070; Oak Bay, $1,273,224; Saanich, $991,768; Esquimalt, $427,500; North Cowichan, $50,000.

PEAT MAY HELP SOLVE FUEL PROBLEM

Cheap and Satisfactory Substitute for Coal Can Be Taken from Canadian Bogs

"The people of Canada," said Mr. F. B. Haanel, chief of the division of fuels and fuel-testing, department of mines, Ottawa, at a meeting of the Montreal branch of the Society of Chemical Industry, held recently at Montreal, "and especially those living in Manitoba, Ontario ad Quebec, must realize how dependent they are upon the supply of coal from the United States. This coal supply, so necessary for sustaining life and industry, does not come from an inexhaustible source; even in our lifetime we may see this supply suddenly cut off.

"Canada, however, has an enormous reserve of fuel lying undeveloped in her peat bogs, which are situated mainly in Ontario and Quebec. The mention in the past of peat fuel to people of Canada or the United States recalled to their minds the story of the financial failure of company after company which promised great things at the start, but which, in turn, ended in the same way, the money spent and no cheap fuel supplied. To-day the story is different. The federal department of mines has demonstrated that a cheap and satisfactory fuel for all domestic purposes, as well as for many metallurgical operations, can be manufactured from the peat bogs of the country.

Successful Industry.

"The success of the peat fuel industry in this country, or in any country, depends upon the employment of known and tried methods of manufacture by qualified engineers, specially trained in this particular line of work. The manufacture of peat fuel is a successful industry in many European countries, where they employ but one method, namely, the 'wet process.' The 'wet process' is the one recommended by the department of mines, and is the only one in successful operation to-day.

"Peat fuel, as it occurs in nature," said Mr. Haanel, "contains 80 to 90 per cent. of water. This water content must be reduced to between 25 and 35 per cent. before the peat can be placed on the market as a commercial fuel. The use of pressure or artificial heat, or both together, has always proved a failure for reasons both physical and financial. The 'wet process' employs the sun and wind to dry the wet peat as received from the bog; both these agents are ever ready and cost not a cent for their use.

Other Valuable Purposes.

"Peat fuel, besides being a substitute for coal for domestic and industrial uses, is a valuable source of nitrogen for the manufacture of ammonia and other nitrogen compounds, such as are used in fertilizer."

In conclusion, Mr. Haanel said that "the people of Canada should be educated to realize the necessity of utilizing their own resources, even at some sacrifice in the beginning, instead of those obtained from some foreign source. In fact, this idea of peat fuel appears so important that government legislation might even be advocated, which would assist towards the utilization of our own natural resources."

The court of directors of the Bank of British North America has authorized a subscription in Canada of $10,000 to the fund for the relief of the sufferers through the recent disaster in Halifax, in addition to which the bank has also made a contribution to the Mansion House fund, raised for the same purpose in London.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 21st, 1917:

McKinley Darragh Savage Mines, 85,110; La Rose Mines, [illegible]; Coniagas Mines, 154,298; Dominion Reduction Company, 149,500. Total, 474,078 pounds, or 237 tons.

The total shipments since January 1st, 1917, now amount to 13,360 tons.

COST OF LIVING CONTINUES TO INCREASE

A further increase in the cost of living is shown in the November monthly report of the labor department. During the month the cost of the weekly budget of staple foods was $12.10 as compared with $11.81 in the previous month, and with $9.81 in November, 1916. Potatoes contributed more to the increased cost of living than any other commodity, rising in price in all the provinces but British Columbia, where a decrease was recorded. Increased prices obtained also for eggs, milk, butter, sugar and bread, while decreases were recorded in flour and beans. The prices of meats showed but little differences on the whole from the previous month.

Wholesale prices also showed some advance for the month. The chief increases were in textiles, grains, meats and miscellaneous foods, while the most important decreases occurred in the prices of hides, metals and implements.

VICTORY LOAN AND LIFE INSURANCE

"The Victory Loan was a grand success," says the "Life Underwriters' News," the organ of the Life Underwriters' Association of Canada. "Four hundred and twenty-five million dollars from a population of approximately eight millions, or fifty dollars for every man, woman and child in the entire country. It was just like the people getting together and taking our group insurance, or better still, national insurance.

"Too great emphasis cannot be placed on this. But now that this has been made secure for at least another year, let us turn our attention to the providing of life insurance for the families of our Dominion, ever bearing in mind that the family is the basis of the nation. There is a great appeal here to the man or woman with family obligations to discharge. Life insurance guarantees that the thing you are working and striving to do by faithful toil every day will be done. It gives you backbone to fight on while you live, and thus enable you to see the accomplishment of it yourself, and if you should give out before your plans are consummated life insurance will 'carry on.'

"The Victory Loan will foster the habit of saving and will promote thrift. Life insurance is the very best form of saving known, as it saves your money even from yourself. It is also the greatest thrift agent in the world. Life insurance savings have enabled our companies to play no small part in the carrying on of this great world struggle. The life insurance agent should see that the people who saved for Victory War Loan should not cease when their bonds are paid for, but should continue to save and invest their money in life insurance, which forms one of the best investments on the market and affords protection at the same time.

"A Victory Loan investor will have a considerable amount of interest coming due on the first of June and the first of December of each year. If he holds a few hundred dollars worth of the bonds, the interest alone would carry considerable life insurance. This should form a good entering wedge in approaching this class of prospect. Furthermore, if you are selling participating insurance and you advise your prospect to use his dividends to reduce the premium, you can print a very rosy picture. Victory Loan subscribers are a mighty good class of prospects and should not be overlooked."

The Monarch Life Assurance Company, Winnipeg, did very satisfactory business for the first eleven months of 1917. The company's new business for that period shows an increase of 63 per cent. in volume and 72 per cent. in premiums over the corresponding period of 1916. The premium collections in respect of both first year and renewal premiums are also gratifying, over [illegible] per cent. of the premiums on 1917 new business being paid in cash at the end of November.

The Hamilton Provident and Loan Society

DIVIDEND No. 93

Notice is hereby given that a Dividend at the rate of Eight per cent. per annum has been declared for the half year ending December 31st, 1917, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Wednesday, the 2nd day of January, 1918.

The Transfer Books will be closed from the 15th to the 31st of December, both days inclusive.

By order of the Board.
D. M. CAMERON, Treasurer.
Hamilton, November 24th, 1917.

"INVESTMENTS"

A MUCH MISUSED TERM

Many who should be, and think they are laying up money for their old age, are misled into so-called "investments," where their hard-earned money is jeopardized, and frequently lost, though it is of the utmost importance to them and to those who may be dependent upon them that its absolute safety should be beyond peradventure.

To those who should invest safely and with caution, not speculate, the bonds of the Canada Permanent Mortgage Corporation can be confidently recommended. This Corporation is most conservative in the investment of the funds entrusted to it. For more than sixty years it has held a leading position among Canada's financial institutions, and its bonds are a LEGAL INVESTMENT FOR TRUST FUNDS. They are issued for one hundred dollars and upwards. Write for full particulars.

Canada Permanent Mortgage Corporation

Toronto Street - - Toronto

Charts, Curves and Diagrams

An unusually large number of charts and diagrams of great interest will be printed in The Monetary Times Annual. Among them are:

Six pages of curves and statistics illustrating Canada's development.
Compositplot of Canadian conditions for a series of years to December, 1917, compiled for *The Monetary Times* by Babson's Statistical Organization, Wellesley Hills, Mass.
Chart showing fluctuation in the Bank of England rate for a series of years.
Curves illustrating fluctuations in the price of silver.
Diagram showing the course of international exchange.
Bourne's insurance and brokers' calculation table.

Prosperity and War Orders

A story of facts and figures gathered from official sources, and showing that the war orders placed in Canada to date have a value of over $1,812,000,000. The subject is discussed from many instructive viewpoints.

Statistics, Illuminative and in Simple Form

Another attractive feature of The Monetary Times Annual is the series of important statistical tables in simple form. They constitute a reliable barometer of conditions. Among other tables are the following:

Stock Exchange Transactions
Bank Clearing House Returns
Fire Losses
Municipal Bond Sales
Canada's Trade
Wheat Production
Railroad Earnings
Building Permits
Canadian Flotations in London
Stock Issues in Canada
Corporation Bond Issues in Canada
International Exchange
Banking Position
Bank Profits and Dividends
Bank Branches
Bank of England Rate
Price of Silver
British Consols
Mineral Production
Immigration
Cash Wheat Fluctuations

Trade After the War

This subject is dealt with in several special articles. Senator Nicholls, chairman of the Senate Committee which is inquiring into this matter, contributes a notable analysis of the situation. Mr. R. J. Younge, general manager of the Export Association of Canada, discusses other aspects of the same problem. Mr. W. L. Edmunds, a commercial writer of repute, answers the question "How can we maintain trade after the war?" Senator Curry also contributes an article as to the position of Canadian manufacturers when peace comes.

THE MONETARY TIMES ANNUAL

OUT NEXT WEEK—NEARLY 300 PAGES

Every Section is Replete with Interest

The Monetary Times Annual will be classified in the following sections:

Banking

- Forgeries in Canada.
- Crop Financing on Fixed Prices.
- Proposed Canadian Bankruptcy Act.
- Insatiable Demand for Currency.
- Banking Expansion Last Year.
- How Interest Rates Have Risen.

Industrial

- Primary Production Last Year.
- Canadian Manufacturers After the War.
- Three Periods of Railroad Development.
- Mineral Output Last Year.
- Warning to Credit Men.
- Shipbuilding in Canada.

Investment

- What it Costs to Loan Mortgage Money.
- Proposed Land Surtax.
- Growth of the Trust Company Business.
- Rural Credits in the West.
- Six Per Cent. Municipals.
- Our Increasing Investment Power.

Insurance

- Unpreparedness of Corporate Insurance.
- Causes of Death by Occupation.
- Fundamentals of Suretyship Bonds.
- Miscellaneous and Casualty Insurance.
- Workmen's Compensation in Canada.
- Diagnosis of Fire Waste.

Study of War Finance

Special articles deal with many phases of war finance, including Britain's vast war credits to date, German war loans, loans to the Allies by Britain and the United States, effect of war on national debts, and Canadian war loans. One of the most interesting articles in this section discusses the advances made by Canada to Great Britain in respect of its purchases here. The amount of these advances is surprisingly large.

Some of the Many Special Features

War finance and the Allies' economy is discussed in a special article by Mr. John Stuart Thomson, the notable publicist. Professor W. W. Swanson, of the University of Saskatchewan, contributes a thoughtful article on prices during and after the war. Mr. Arthur V. White, a consulting engineer who has made the problem a special study, discusses the Canadian coal situation in a valuable article. The cost of the war to date is a subject dealt with in a symposium of estimates made during the past year.

Some of the Other Features

Every Province is Represented in *The Monetary Times Annual* as usual by a contribution specially penned by its Premier. These articles include one each from the pen of the new Premiers of New Brunswick and Prince Edward Island. "What of the outlook?" The question is answered by the Premiers of Canada's nine provinces.

Retrospect and Prospect. Editorial review of the year—its good things and its drawbacks. The outlook for nineteen-eighteen.

Selling Canadian Bonds. The sales of Canadian securities during the past year are thoroughly dealt with in the form of articles, charts and statistics. The statistics of bond sales for 1917, with comparisons, will be the most complete published to date.

Life Insurance. How much new business should a life insurance company write? This question is answered in an exhaustive article by Mr. M. P. Langstaff, a well-known actuary. Mr. J. P. Moore, another notable actuary, contributes an interesting article on the causes of death by occupation. Farmers and life insurance is the topic chosen by Mr. P. A. Wintemute, of Calgary. The benefits of government annuities are described by Mr. S. T. Bastedo, superintendent of the Dominion government's annuity department.

Sidelights on Canadian Business. Among other instructive articles is one describing our fifth industry, the tourist traffic. Another advocates the adoption of the metric system. The United States' ban on gold exports is also discussed as well as the great value of the pulp and paper industries of Canada. There is an exhaustive review of the mortgage loan situation and many articles on our natural resources.

TORONTO CITY'S BUDGET

Where the Money Comes From and How It is Spent—Net Expenditure Estimated at $15,155,610

The Bureau of Municipal Research, in an interesting analysis of Toronto's budget for the year 1917, finds that, due largely to the war and past methods of financing, the cost per family for running the city has increased from $190 to $213 per annum.

By the use of graphs and charts, rather than through tabulated statements, the report impresses the taxpayer with the necessity of choosing carefully the men who will levy and expend the taxes of the city.

The heaviest expense upon the citizen is that of education. A chart headed, "Where Each Dollar Goes," shows the proportion of a dollar that goes to the various departments as follows:—

Education	27.
General government	10.7
Protection	10.8
Health	12.5
Highways	9.2
Charities and corrections	5.7
Recreation	4.
War tax	3.9
Public service enterprises	1.2
Total	$1.00

In Debt Charges.

The analysis shows that no less than 36.3 per cent. of the total civic revenue is absorbed by debt charges. This is well illustrated in a chart, "How It Goes." For personal services, presumably civic employees, the city this year spent 35.6 per cent. of its revenue. The remaining 28.1 per cent. was expended as follows:—

	Per cent.
Materials and supplies	9.7
Services other than personal	5.6
Contributions	4.1
Other charges	4.1
Capital outlay	1.7
Equipment	1.6
Rent, insurance and taxes	1.
Pensions	.3
Total	28.1

Where Money Comes From.

In another chart, headed "Where It Comes From," the ratepayer is shown where the bulk of the city's $19,242,583 income is obtained. This shows that more than three-quarters of the total comes from the taxpayers' pockets.

The percentages are as follows:—

General taxation	76.5
Waterworks revenue	10.2
Street railway franchise	5.2
Balance on hand January 1st, 1917	5.2
Civic car line revenue	1.3
City property rental	1.2
Unclassified	1.1
Civic abattoir, educational and license fees	2.2

According to another chart, the board of education has the spending of more money than any other department, 20.3 per cent. of the total civic expenditure. The waterworks comes next with 19.1 per cent while 17.4 per cent. of the expenditures are unclassified, largely including the debt charges.

Dealing with the figures themselves, the report compliments Finance Commissioner Bradshaw with presenting to the citizens for the first time a consolidated balance sheet showing what the city owns and what it owes.

Net Expenditure.

The net expenditures during the year were estimated at $15,155,610, of which $14,407,572 came from taxation. The heaviest expenditure was in the department of education, which had a net expenditure of $4,098,438. General government expenses were $4,313,109, which were partially offset by revenue amounting to $1,325,762 from that source, leaving the net expenditure $2,987,347. Police protection cost $2,550,704; health and sanitation, [illegible], and highways, $1,392,000.

The per capita debt charges have increased between 1908 and 1917 from $5 to $14.75, and in the same period the proportion of each $100 revenue taken for debt charges has increased from $26 to $36

PLANS FOR NEXT LIBERTY LOAN

National Selling Organization is Being Perfected—Problem in Rural Districts

Plans for making future Liberty Loan campaigns so intensive that every individual in all parts of the United States and its territories shall be reached were perfected at the final meeting in Washington of representatives of Liberty Loan committees from throughout the country. From every section of the nation came reports of unbounded enthusiasm on behalf of the loans among persons who had been reached by its message, but coincidently it was agreed that more far-reaching organization was needed to carry the message farther.

Rural communities and small towns and cities particularly will feel the effects of the new campaigning plans adopted. The campaign will be carried to them by every possible means to be conceived by the many minds that worked on the problem at the meeting here, which began Monday, and will continue to work on it with the aid of others in all sections of the country after the delegates have returned home.

Careful consideration of the selling problem in the rural districts resulted in the general agreement that there is no lack of patriotism among them and that under properly conducted intensive drives and educational campaigns, they will respond readily to future loans.

Many Minds at Work.

Every agency from national speakers to the silent appeal of signs on roadside fences will be used to give vim to the rural campaigns. Help will be given them by the sales, speakers, publicity and other bureaus. Good talkers, men who are qualified to speak on the loan, will be sent into every community. Publicity men will give a local touch to the campaign that heretofore has been lacking and some sort of an arrangement for keeping the smallest local committees in touch daily with interesting angles of the campaign and the war, will be worked out. Sales organizations will have rural representation on them. Briefly, every assistance that the city forces have had in previous campaigns, will be supplied, in so far as possible, to the smaller communities, and their residents will be made a real active part of the national Liberty loan machine.

Closer Co-operation Planned.

Aside from this special attention to the smaller communities, plans were perfected for closer co-ordination and co-operation of all Liberty Loan agencies. Many of the sub-committee meetings were devoted to general discussions and exchange of experiences. Reports of these meetings will be assembled later and distributed to every part of the country, so that the plans and experiences of every committee will be transmitted to all other committees for their use.

Members of various women's Liberty Loan organizations were in attendance at every meeting. Hearty co-operation between the men's and women's organizations in future campaigns is assured. Plans for arousing greater enthusiasm through educational work in the schools were received enthusiastically. A suggestion that school authorities be urged to include a course in current war problems in their curriculums was received with applause.

Thrift Educational Campaigns.

Recommendation that general thrift educational campaigns, to be carried on in and out of Liberty Loan campaigns, be inaugurated in all parts of the country was strongly indorsed. Much time also was given to the discussion of technical problems arising out of actual bond transactions. These will be given consideration by various treasury department agencies, including Lewis B. Franklin, director of the war loan organization, who presided at the conference.

JAY COOKE'S POPULAR LOAN

Victory Bond Issue Recalls Interesting Transaction—How $3,000,000 Bonds Were Sold

"The United States," says the Home Bank Monthly, in the December issue, "adopted wrong methods of finance in the early days of the Civil War. In February, 1862, congress authorized the issue of $150,000,000 legal tender notes, 'greenbacks,' to replace coin that was to be withdrawn from circulation to meet current war debts. This method was continued until the currency system became deranged, the price of paper money fell and the buying power of a dollar so decreased that hardship and an unfair proportion of the cost of the war was inflicted on the working class.

"After a few months, the greenbacks fell below par, and their value in gold became a barometer of Union hopes and fears. At their lowest, in the summer of 1864, they dropped to 39 cents on the dollar, but generally they were worth from 60 to 80 cents in gold. Their fluctuations, however, served to raise prices, and to increase a burden upon wage or salary earners which traders and speculators could avoid. Their necessity will always be debatable; a more honest course would have been for the treasury to shoulder the loss, and raise public money by selling United States bonds at their market price.

Satisfactory Method Introduced.

"After other methods had proved unsatisfactory the United States government began selling bonds direct to the public, appointing scores of salesmen throughout the country to help dispose of them. Among these salesmen was Jay Cooke, a young banker of Philadelphia, who introduced advertising in the daily papers as a selling factor. He was the originator of the methods which finally secured for the Federal States the funds necessary to prosecute the war to a complete victory.

"Jay Cooke rose to fame by selling at par $3,000,000 of Pennsylvania bonds that conservative authorities had declared unsaleable. Unlimited enthusiasm, coupled with a shrewd regard for the value of printers' ink, helped Cooke in his task. He knew that, over all the country, large sums of coin were in seclusion, in old stockings or strong boxes, waiting to be coaxed out by the person who could convince the owners that the United States was safe. He sent his agents everywhere, advertised in the local journals, and appealed to the loyalty and interest of the small investor. He pledged his faith that the government was good. His biographer tells of farmers coming down to Philadelphia to pay their gold to him in person. As often as other brokers tried to place the bonds, Cooke overbid them, and made better bargains for the government. Without his zeal in popularizing investment in government funds, it is hard to see how the loans of the Civil War could have been placed.

Issued Popular Loan.

"The reason United States bonds commanded a better price, after Jay Cooke began to market them, is plain. It was a popular loan and the people had entire confidence in their investments. His methods of publicity had attracted popular attention and people readily exchanged their hoardings for the bonds when they realized that a bond was gold plus interest. It was advertising that carried this conviction to the mind of the public of the Northern States during the Civil War. The Canadian government is following a beaten trail."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the month ended November 30th, 1917:—

Kerr Lake Mining Company, 61,960; Beaver Mines, 66,064; National Mines, 63,955; O'Brien Mine, 64,940; Nipissing Mining Company, 87,635; Hudson Bay, 65,680; Buffalo Mine, 1,456,250; Dominion Reduction Company, 350,600; Mining Corporation of Canada, 773,794; Tretheway Silver Mines, 144,410; McKinley-Darragh-Savage Mines, 328,375; Coniagas Mines, 237,[illegible]; La Rose Mine, 2[illegible]8,221; Aladdin Cobalt, 128,728. Total, 4,067,941 pounds, or 2,033½ tons.

PRICES IN CANADA IN 1916

Department of Labor Reviews Upward Trend of Food Commodities

The situation as to prices, wholesale and retail during 1916, with a supplementary statement bringing the information down to August, 1917, is discussed in the report issued by the department of labor entitled "Wholesale Prices in Canada, 1916," which also contains information as to retail prices, and prices in other countries. The following table of index numbers shows the more significant changes in prices:—

Wholesale Prices.

	Canada.	Great Britain.	United States.	France.
1913	135.5	85	81	115.6
1916	182.0	137	100	217.6
Jan.	172.1	123.6	89	205.1
July	180.9	130.5	97	210.6
Dec.	207.4	154.3	118	235.3
1917, Aug.	245.0	175.7	150	....

Retail Food Prices.

	Canada.	Great Britain.	United States.	France.
1913	$ 7.33	102	98	....
1916	8.79	160	112	....
Jan.	8.28	145	106	1439
July	8.46	161	109	1387
Dec.	10.11	184	125	1491
1917, Aug.	11.68	202	147	....

The marked rise in prices toward the end of 1916 was not only the continuation of a steeply upward general movement, beginning in August, 1914, from a level already high, but involved a much steeper rise in food prices as a result of short crops throughout the world, while the demand and the problem of distribution were intensified by war conditions.

War Conditions Affected Prices.

The upward movement in prices therefore appears to have been affected by both factors, supply and demand, the increase in the latter due to war conditions and made effective by practically unlimited government expenditure, while the decrease in the supply of most commodities was also due to war conditions, reduction in the labor force, destruction of supplies, increase loss and waste in transportation, handling, etc., and, notably in 1916, by unfavorable weather for crops. The increased money distributed among people from government war expenditure further tended to create a greater demand for the decreased supply of goods, becoming a factor in raising prices.

At the beginning of the year trade and industry had recovered from the depression experienced during 1914 and the part of 1915, the large crops of that year having made possible still greater exports of grain and other foodstuffs, while providing farmers, both in the west and the east, with the means of paying off much accumulated indebtedness and extending their operations for the future with better facilities and under more favorable conditions. The demand for machinery, livestock, fencing, building materials, household goods, clothing, etc., was greatly improved and caused greater demand for the products of manufacturing industries, for transportation, etc., in addition to the demand due to the manufacture of munitions and other war supplies.

High Rise in Potatoes.

The cost of foods increased by a greater amount during 1916 than during the ten years 1900-1909, or from that date to 1915, the rise occurring chiefly from August to the end of the year, and being much steeper than during the same period in 1914 and 1915, when substantial advances had occurred. The great rise in the prices of potatoes was the chief factor in this result, but eggs, butter, cheese, milk, bread and flour were also rising considerably. In the season 1914-1915, however, potatoes had been cheaper than for years. Coal also advanced steeply during this period, while rent began to recover from the steep decline during 1914-1915, which was prevalent in the western provinces, but was substantial in Ontario also.

WILL REGULATE NEW SECURITIES ISSUES

To Reserve Canadian Market for War Purposes—Finance Minister's Consent Must Be Obtained

An order-in-council has been passed under the authority of the War Measures Act upon the recommendation of the minister of finance by which new issues in Canada of bonds, debentures or other securities of any provincial, colonial or foreign government, municipality, commission, local government, institution, corporation or incorporated company can only be made or sold with the approval of the minister of finance by his certificate in writing.

The regulation also applies to any new issues or offerings of shares, whether preferred or common, of any incorporated company.

Applies to Future Issues.

It is expressly provided that nothing in the order-in-council shall affect the trading in any bonds, debentures, securities or shares of capital stock heretofore issued and placed upon the market. The order applies only to issues made from this time forward. Provision is made whereby any issue or sale in contravention of the prohibition of the order may be restrained, and heavy penalties are provided for violation of the regulation.

Conserve Canadian Market.

The object of the order is to conserve the Canadian financial market for the war issues of the Dominion government, and to prevent issues being made for purposes which may well be deferred until the end of the war. Issues which are absolutely necessary may be made with the consent of the minister of finance, who will probably appoint a commissioner or a priority board to advise him as to the necessity for new issues and the time when they should be made. The regulation is similar to that which has been long in force in Great Britain for the same object of conserving the financial resources of the country for war purposes and preventing waste in public expenditures upon works and undertakings not absolutely needed at this time.

Owing to the need of establishing credits for the Imperial government in order that Canada's manuactured and agricultural products may find a market, the financial opinion of the country is that there must be regulation and control of all new issues of securities in order that the war loan of the Dominion may have the full benefit of the Canadian market.

WATER POWERS OF CANADA

With coal at a high price and the prospect that we shall soon have to depend largely on our water-powers for heating our houses and running our railways, a reliable estimate of what our water-power resources are is of great value, says the Commission of Conservation. The first estimate of this kind was published in 1911 by the commission. Since then, it has conducted water-power surveys of British Columbia, Alberta, Saskatchewan and Manitoba, and has secured additional data on the powers in other provinces. It now submits the figures below as being the latest available:—

Province.	*Total possible h.p.	Developed h.p.
Ontario	5,800,000	760,000
Quebec	6,000,000	640,000
Nova Scotia	100,000	20,000
New Brunswick	300,000	15,000
Prince Edward Island	3,000	500
Manitoba	3,500,000	76,000
Saskatchewan		10
Alberta		33,000
Northwest Territories		Nil
British Columbia	3,000,000	250,000
Yukon	100,000	12,700
Total for Canada	18,803,000	1,813,210

---

*The figures in this column are given with much reserve since it is practically impossible to arrive at exact amounts for any country. In addition to detailed surveys and flow records, such factors as artificial storage, economic head to be developed and kind of industry to be established all vary the estimates for each individual site.

ROYAL BANK'S STATEMENT

As briefly noted in *The Monetary Times* last week, an excellent financial statement has been presented by the directors of the Royal Bank of Canada. Examining the liquid assets, the total on November 30th, 1917, was $165,836,706, as against $121,127,663 on the corresponding date last year. A comparison of three of the important liquid assets and of the deposits, note circulation and stockholders' funds, compared also with the figures of 1916, is given in the following table:—

Quick assets.	1916.	1917.
British securities, etc.	$ 14,012,089	$ 21,586,545
Call loans:		
In Canada	11,076,005	12,040,687
Abroad	21,372,026	14,574,136
Deposits:		
Not at interest	59,365,396	70,498,667
At interest	140,862,199	182,488,715
Circulation, etc.	27,226,874	54,716,412
Shareholders	25,806,958	27,870,390
	$253,261,427	$335,574,186

The increase of $52,000,000 in the Royal Bank's deposits reflects a gratifying growth in the financial strength of the institution. More than four-fifths of the gain was in the interest-bearing deposits.

The large loans to the Imperial Munitions Board and in connection with other special credits to the British government are partly shown in the increase of $7,500,000 in the British securities, and the heavy special short-date advances to the Dominion government at the same time caused the bank's holdings of Dominion and provincial securities to rise from $1,029,374 to $22,322,197, an increase of $21,300,000 for the year.

The current loans and discounts in Canada total $102,358,027, as compared with $93,000,000, shown by the Royal and Quebec combined in November a year ago. Therefore, notwithstanding the large amounts placed by the bank at the disposal of the Dominion and British governments for war purposes, it has given still stronger support to commercial, industrial and agricultural clients. The increasing importance of the Royal Bank's branch system in Newfoundland, the West Indies, Central and South America is shown by the increase of deposits elsewhere than in Canada and by the external loans and discounts.

Apart from its absorption of the Quebec Bank, the fiscal year just closed by the Royal Bank of Canada was one of considerable progress. With the Quebec Bank the Royal secured assets of $21,000,000; the total increase of its resources during the year was $82,000,000, which is a new high record. The total assets on November 30th last, the end of the bank's fiscal year, were $335,000,000.

After making the usual deductions and providing for the dividends to stockholders there was a balance of $240,218, as compared with $225,874 in 1916 and $62,410 in 1915. The issue of new stock to Quebec Bank shareholders resulted in a premium of $911,700. This was credited to the reserve funds, together with $528,300 taken from the profit and loss balance, making the total addition to reserve $1,440,000, and bringing the balance of that account up to $14,000,000. This is about 109 per cent. of the paid-up capital. The appropriations for the year included a contribution of $60,000 to the Canadian Patriotic fund, and the war tax on bank note circulation absorbed $128,357.

The net profits for the year, $2,327,970, are $216,000 larger than last year and $185,000 larger than the results for 1913, which had previously been the best year. These profits represent 18 per cent. on capital, as against 17.59 per cent. in 1916 and 16.44 per cent. in 1915.

The Royal Bank, in comparatively few years, has become one of the strongest financial institutions in the Dominion and holds a high position in the list of the world's great banks. The bank's operations are controlled by an active and influential directorate, headed by Sir Herbert Holt as president and Mr. E. L. Pease as vice-president and managing director. Mr. C. E. Neill is the capable general manager, and has an able assistant in Mr. F. J. Sherman.

Individual vs. Corporation Management

INTEGRITY, responsibility, good judgment regarding investments, knowledge of the law respecting trusteeship, executive ability—and these sustained without interruption — are necessary under modern conditions before a trustee can be considered wholly competent.

All of these qualifications can be rarely found in a friend or individual.

THE STERLING TRUSTS CORPORATION possesses all of these essential qualifications of a competent trustee, including assured existence throughout generations of beneficiaries.

The Company will afford complete protection to your estate if appointed executor and trustee under your will.

Our officers will be glad to confer with you in regard to the making of your will or the management of your estate.

INSURANCE AGENCY PROBLEMS

Many Caused by War—Investments in War Bonds—Supervision After the War

"Agency and Allied Problems After the War" was the title of an address by Henry L. Rosenfeld, fourth vice-president of the Equitable Life of New York, at the recent annual meeting of the Association of Life Presidents, in that city. He touched upon some of the general economic and social problems that will confront America after the war, such as labor conditions, unemployment, and the financing of reconstruction both here and abroad. He said, in part:—

"Let us see what has been the result of over three years of warfare of the first magnitude upon life insurance companies of the principal countries of Europe. The problems which have been developed are:—

"1. Heavy death claims due to the war, with its toll in human life both among military and civilian population.

"2. Depreciation in investments due to the necessities for readjustment of values with respect to the highest interest rate engendered by the war, and the instability of prices generally on the stock exchanges of the world.

Change in Assets.

"3. Change in the character of the companies' assets due to the largely increased percentage of investments in governmental securities.

"4. Increase of taxation and other expenses on account of the vast expenditure by the nations and the constantly increasing rise in the cost of living.

"5. Difficulties of administration due to the withdrawal of men from civilian life to the needs of military life, with consequent disorganization and the necessity for readjustment of available labor.

"Agents of life insurance are apostles of economy. War's wastage enforces economy. May we not hope that after the war there will ensue in the United States, the spendthrift of the nations, habits of economy and thrift which will prevent a recurrence of the wastage of peace so long a prevalent characteristic of our people.

New Opportunities.

"In this country the opportunity lies ahead of the life insurance companies to meet these national needs. Extraordinary problems call for extraordinary performances. Old landmarks are fast disappearing. The whole life of the nation has undergone radical change during the current year. Life insurance must not be satisfied to emerge from this great world war with merely the satisfaction of having performed its obvious and perfunctory duties. New opportunities must be sought to support the nation and the government in this time of peril. If it should require the invasion, or the creation, of a field of patriotic educational work there the life insurance companies should be found. The power and influence of great field forces throughout the country should be used to sustain the government in every conceivable way. If life insurance gives proper account of its stewardship with respect to public needs, there need be no fear that the national government will encroach upon the field of life insurance. If life insurance shows exceptional co-operation with the government in meeting the many complex and after-the-war problems, it will be freely and generously accorded recognition as public service. With large financial resources touching every artery of American life, with bodies of membership numbering millions, reaching into countless homes, with executives and field representatives of the highest character and efficiency, American life insurance is admirably adapted to meet every present and after-war requirement."

Supervision After the War.

Mr. Emory H. English, president of the National Convention of Insurance Commissioners, at the same meeting, commented upon the life insurance situation as developed by the war. He said that the life companies had already invested over three and two-thirds per cent of their accumulated reserves in United States Liberty Bonds. This sort of investment is one that is bound to affect insurance, because of the interest return that is derived from it. Mr. English pointed out that insurance is bound to be materially affected by the war and that it must be safeguarded. He said, in part:—

"Supervision, to be worthy of the name, must not only keep pace with the swift strides of the insurance business, but also intelligently minister to the increasing needs and demands of a developing citizenship in its relation to the gigantic insurance institutions which have been reared in the American financial world the past quarter of a century. The chief purpose and aim should be to safeguard the public interests, protect the integrity of the organizations supervised, maintain a wholesome relationship between these, thereby affording the greatest degree of security and allowing substantial extension of legitimate operations.

Last Institution to Succumb.

"Insurance as an institution has been considered impregnable; and so it is under all reasonable conditions. It would be the last institution to succumb to insolvency in any whirlwind of panic and disaster that might sweep the world growing out of the war or other unforeseen and unpreventable calamity.

"Every precaution must be taken to prevent the slightest degree of discredit falling upon insurance institutions. The outbreak of the war was the signal for the revival of the military restriction clause, and much thought has been devoted since that time to the preparation of the provisions of a 'permit' to engage in military or naval service. Companies have taken account of the amount of insurance they are carrying on lives subject to the selective conscription and have endeavored to determine what their losses would be if the war continues one, two or three years. Mortality ratios in excess of the average will be experienced; this must be expected. War taxation will be borne with patriotic fortitude; this is only a reasonable share in the general burden. Dividends to stockholders and policyholders may need to be reduced. This will not shake public confidence in the integrity of insurance management. There will be loyal acquiescence in the sacrifices required.

Work of Supervising Officials.

"When war has ceased, when the clash of arms is no longer heard, when guns have been stacked or sunk to the bottom of the seas, unusual responsibilities will confront both company and supervising officials in the period of industrial reconstruction to follow.

"The world trade which the United States will project must be organized and sustained through adequate insurance facilities. An enlarged field of commercial activity will be opened and developed by American enterprise. The commercial supremacy of the world may easily be attained if a consistent, intelligent course of action is formulated and determinedly pressed to successful conclusion. Not only have we abundance in grain, produce, ore, raw materials and manufactured articles to ship to other nations, but no other nation will have such a wonderful business energy to throw immediately into commercial activities when released from the leash of war."

B. E. WALKER, President.

JOHN AIRD, General Manager.

Report of the Auditors to the Shareholders of the Canadian Bank of Commerce.

In accordance with the provisions of subsections 19 and 20 of Section 56 of the Bank Act, 1913, we report as follows:

We have audited the above Balance Sheet and compared it with the books and vouchers at Head Office and with the certified returns from the branches. We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

We have checked the cash and verified the securities representing the investments of the Bank at its chief office and principal branches at a date other than and in addition to the verification at 30th November, 1917, and found that they were in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank according to the best of our information and the explanations given to us and as shown by the books of the Bank.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over $5,000.00, and he has built up a future income of over $3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

SASKATCHEWAN Agent wants General Agency of Hail Insurance Company for Saskatchewan. Has experience in this line, good agency connections and can assure substantial premium income. Address Box 135, *The Monetary Times*, Toronto.

LIFE INSURANCE IN CANADA

Review of Legislation Since the Time of Confederation—Measure of Disability Insurance Extended

The first insurance act in Canada was assented to on May 22, 1868. This was a brief act consisting of 25 sections and contained very little of what is now included in the insurance act. It is concerned mainly with the licensing of companies failing to comply therewith. We must remember that at the time of Confederation there was only one Canadian life company, 12 British and two United States, while we have now 26 Canadian, eight British and ten United States companies transacting new business. Mr. Finlayson, Dominion insurance superintendent, in an address to the Insurance Underwriters' Association at Montreal, recently reviewed the course of life insurance legislation in Canada. He pointed out that two slight amendments to the 1868 act were made in the years 1871 and 1874. A further amendment was made in 1875, and in that year also all the previous acts were consolidated. The authority for the creation of the department of insurance is to be found in this act.

Important Amendment in 1877.

In 1877 a further consolidation and amendment was effected in which the most important change was the requirement that British and foreign companies transacting business in Canada should thereafter maintain assets in Canada equal to their liabilities in Canada. Permission was given, however, to companies then licensed to continue transacting the business necessary in connection with their existing policies without making a deposit sufficient to cover all liabilities thereunder. Such companies, however, were not permitted to continue to write new business and we therefore at the present time have in Canada eight British and United States life companies commonly known as retired companies which are running off their Canadian business under the provisions of this section. The companies which desired to continue to write new insurance were permitted to retain specially for the protection of existing policies, the deposit then maintained but were required to provide for the protection of insurance subsequently written a deposit equal to the reserve and all other liabilities. This legislation has been responsible for the very large deposits made by British and foreign life insurance companies in Canada amounting at the present time to over $80,000,000.

Act of 1885.

The next legislation was in the year 1885 by which the application of the act of 1877 was modified so far as assessment companies were concerned. This act permitted these companies to operate under registration from the department without being required to maintain an actuarial reserve in the same manner as ordinary life insurance companies. They were required, however, to print in every application, policy and certificate the words "This association is not required by law to maintain the reserve which is required of ordinary life insurance companies."

The next amendment to the act was made in 1886 and in this we see much that is familiar to us from our knowledge of the present insurance legislation. This act remained with slight amendments in 1887 and 1888, until 1894 when an amending act making substantial changes was passed.

The next amendment was made in 1899 and is notable chiefly for the change made by it in the basis of reserve to be maintained by life insurance companies. The interest basis existing prior to that time was 4½ per cent. and provision was then made for the gradual reduction of the rate of interest over a period of 15 years, so that in the year 1915 the basis for all policies became 3½ per cent.

Insurance Act of 1910.

Seven years later the Royal Commission on Insurance investigated Canadian life insurance companies, and as a result of this investigation, legislation was introduced in the session of 1907-1908 which, after three years' consideration, became law in 1910 as the Insurance Act, 1910. The act of 1910 has remained without amendment until the present year, when it was repealed and replaced by the Insurance Act, 1917.

The most important changes so far as field men are concerned in the recent act, are the amendment to section 8, by which life companies are permitted to greatly extend the measure of disability insurance, which may be combined with a life policy and the inclusion of the rebating section of the act in an amendment to the criminal code. These sections will, therefore, now apply to all classes of companies, provincial licensees as well as Dominion licensees, and will, it is believed, be more effective with all classes of companies than the previously existing legislation.

CANADIAN BANK OF COMMERCE

The financial statement of the Canadian Bank of Commerce, just issued, shows net profits for the year of $2,637,555. This is a gain of almost $200,000 over 1916, and of $285,000 over 1915. The chief items of the balance sheet for the past two years compare as follow:—

	1916.	1917.
Balance brought forward	$ 461,892	$ 802,318
Net profits	2,439,415	2,637,555
	$2,901,307	$3,439,874
Deductions:—		
Dividends	$1,800,000	$1,800,000
Tax on circulation	147,288	150,000
Pension Fund	80,000	85,000
Patriotic fund donations	50,000	50,000
Other contributions	21,700	22,800
Balance carried forward	802,319	1,332,074
	$2,901,307	$3,439,874

The bank's fiscal year ended on November 30th last, on which date the assets were $344,000,000 greater than in any previous year. The large total of this account is a reflection of the extension of accommodation by the bank to the Imperial and Dominion governments, and to the business community of Canada.

An examination of the financial statement shows an increase in all important accounts and a considerable strengthening of an already strong financial position. The Canadian Bank of Commerce celebrated its fiftieth anniversary this year, having commenced business in 1867, the year of Confederation. In that period, the institution has become one of the most firmly established banks of this continent, with an enviable reputation for its pioneer work, for its excellent banking service at home and abroad, and for the high standard of the efficiency of its directors, officers, and staff.

SIR CHARLES GORDON'S IMPORTANT POST

Sir Charles Gordon, the well-known Montreal manufacturer, has been appointed vice-chairman of the British Mission in the United States, and will take up Lord Northcliffe's duties there until the latter's return early next year. Sir Charles is president of the Dominion Textile Company of Canada, president of the Hillcrest Collieries, vice-president of Penmans, Limited, vice-president of C. Meredith and Company, Limited, a director of the Bank of Montreal, a director of numerous other companies, and a governor of McGill University, Montreal. He was born in Montreal in 1868, a son of the late John Gordon, a prominent merchant of Montreal.

SILVER CONTRACT PRICE

Negotiations under way between the United States government and Western silver interests in connection with fixing the price of silver under contract for next year's smelting output are about to be consummated. The price is understood to be between 94 cents and 97 cents per ounce.

When the arrangements were entered into between the United States government and British representatives to acquire 100,000,000 ounces of next year's smelting output between them, the price was tentatively fixed at 86 cents. The Western mining interests raised a strong opposition to this, contending that the price should be at or near $1 an ounce. Under the arrangements between the two governments, England is to take 60,000,000 ounces and the United States 40,000,000 ounces.

INVESTMENT YIELDS

The following table of investment yields of stocks and bonds has been compiled by Messrs. Morrow and Jellett, members of the Toronto Stock Exchange, 103 Bay Street, Toronto:—

	Dividend rate.	Price about.	Yield about.

VICTORY LOAN

Payments due on January the 2nd may be made at any time to and including January the 11th. Scrip Certificates will be delivered in exchange for payments then due. Payments due January the 2nd must be made at the Bank branch mentioned in the application.

The extension of time to January the 11th is given for the convenience of subscribers and Banks so that subscribers will not be unduly detained waiting their turn at a Receiving Teller's wicket, as would most likely be the case if all payments had to be made on one day only. Subscribers should not wait until January the 11th, or a day or so before, and thus create the situation sought to be avoided. In every case, interest at the rate of five and one-half per cent. per annum from January the 2nd must be paid if payment is not made on or before the 11th.

For the convenience of subscribers, by arrangement of the Canadian Bankers' Association, Banks will remain open on the evenings of Thursday and Friday, January 3rd and 4th, and on the afternoon of Saturday, January the 5th. Evening hours, 7.30 to 9.30. Saturday afternoon, from 2 until 6 o'clock.

It has been brought to the attention of the Finance Department that a considerable number of subscribers, who have deposits with Banks, are under the impression that their Banks will take care of their January payments by automatically debiting their accounts with the necessary payments. This is incorrect. Each and every subscriber must personally arrange for these payments.

T. C. BOVILLE,
Deputy Minister of Finance.

DEPARTMENT OF FINANCE,
Ottawa, Dec. 24th, 1917.

ANGLO-FRENCH BONDS BETTER

Rally in New York Market — Our Victory Bond Market Will Be Protected

Continuing their rapid decline, bonds of foreign governments on the New York Stock Exchange fell, about the middle of last week, to the lowest level they had ever touched; then followed an equally violent recovery. The Anglo-French issue, due in 1921, declined to 81⅞ on Tuesday and advanced to 87⅛ on Friday; the French Republic 5½ per cents., maturing in 1919, went from 91½ to 94⅝; while in various British short-term issues there were recoveries from the lowest figures of as much as 4½ per cent.

In some sort, the advance, according to the New York Post, seemed to be associated, in the Wall Street discussion, with the approaching redemption, upon maturity, next February 1st, of $100,000,000 of United Kingdom 5½ per cent. notes, which Wall Street suddenly remembered carried the right of conversion into twenty-year 5½ per cent. bonds of the United Kingdom, which are to be exempt from all British taxes, and to be payable in gold either in London or New York. The British Government had not offered its own people during the war a bond bearing more than 5 per cent., and that 5 per cent. issue was not exempt from the present heavy taxation.

United Kingdom Issue.

Knowledge that this $100,000,000 issue would be paid off (if some of it has not already been retired through sale of the collateral) furnished at least a partial answer to those people who, seeing the recent severe break in prices, had shaken their heads and again raised the bogey of "default" and "repudiation."

This was not the principal cause for last week's recovery in foreign bonds, however. There was the other consideration, which was possibly effective to a degree, that the United States Treasury proposes to permit security dealers to deduct depreciation in making their income-tax returns, without actually selling their holdings in order to "record" their losses. That doubtless removed some incentive to sell. But the fact remained, that some investors had found a definite incentive to buy, in spite of the general feeling of discouragement and hysteria, bonds of the British and French governments yielding as high as 10 per cent.

In view of the violent market fluctuations in first-class United Kingdom and other bonds in New York during the past few weeks, it is gratifying to know that arrangements are well in hand for legitimate and adequate protection of the market here for Canada's Victory bonds, which will probably be called on the Montreal and Toronto stock exchanges early next month.

BANK CLEARINGS

The following are the bank clearings for the weeks of December 21st, 1916, and December 22nd, 1917, respectively, with changes:—

	Week ended Dec. 22, '17.	Week ended Dec. 21, '16.		Changes.
Montreal	$ 69,707,527	$ 90,337,611	—	$20,630,084

Analysis of Canada's External Trade

Per Capita It Already Largely Exceeds That of the United States—Our Trade With the United Kingdom and United States—Canadian Business With the Other Dominions of the British Empire

CANADA is materially interested in the extension of its export trade. Some interesting figures, showing our position in that regard compared with other dominions, the United Kingdom, and the United States were issued this year in the fifth interim report of the Dominions Royal Commission, which visited this country during its tour of the British Empire. The following table shows for the latest completed year before the outbreak of war, the external trade per head of population of the various self-governing dominions. Added for purposes of comparison are similar figures in regard to the United Kingdom and the United States:—

	Imports.*		**Exports.***		**Aggregate external trade.**	
	Total Million $	Per head. $	Total. Million $	Per head $	Total. Million $	Per head $
New Zealand (1913)...	107	98	110	100	217	198
Australia (1913)	383	78	377	77	760	155
Canada (1913-14)	651	80	479	59	1,130	139
Newfoundland (1913-14)	15	63	15	63	30	126
Union of South Africa (1913)	205	34	320	51	525	85
United Kingdom (1913).	4,045	88	3,346	73	7,391	161
United States (1913-14).	1,991	20	2,531	26	4,522	46

---

*Including bullion and specie.

The figures show that Canada has not yet developed so intense an activity in external trade as have New Zealand and Australia. But the external trade of Canada during the past decade has been increasing at an extremely rapid rate. We may, therefore, anticipate that before long the external exchanges of Canada will equal those of the southern dominions as measured by the amount per inhabitant. Already Canadian external trade computed on this basis far exceeds that of the United States.

The figures below show the share of the United Kingdom in the external trade of the various self-governing Dominions in 1913. For the purpose of comparison similar figures have been added for the United States:—

	Imports* from the United Kingdom.		**Exports* to the United Kingdom.**		**Total trade with the United Kingdom.**	
	Million $	Per cent. of total imports.	Million $	Per cent. of total exports.	Million $	Per cent. of total. trade.
Union of South Africa (1913)	115	55.8	283	88.6	398	75.8
New Zealand (1913) .	64	50.7	87	78.9	151	69.4
Australia (1913) ...	108	51.8	167	44.3	305	48.1
Canada (1913-14)	133	20.4	222	46.4	355	31.4
Newfoundland (1913-14)	4	25.2	3	21.5	7	23.3
United States (1913-14)	293	14.9	623	25.0	916	25.0

---

*Including bullion and specie.

Commenting on these figures, the report of the Dominions Royal Commission says:—"It is at once apparent from the preceding table that the share of the United Kingdow in the imports and exports of Canada is much less than its share in the overseas trade of Australia, New Zealand, and the Union of South Africa. The causes of this are not far to seek. Canada is a much larger producer of manufactured articles than are the other dominions, and consequently calls for comparatively less of these commodities from the mother land; for her industries she has to draw from other countries raw materials not obtainable in Great Britain, e.g., cotton, anthracite coal, and mineral oils. On the other hand she is not, as yet, a prolific producer of wool, hides, and meat, which the United Kingdom so largely requires. Further, similarity of conditions renders many industrial products of the United States especially suitable to Canadian requirements, and the short time required for delivery of original orders and of repair parts, facilitates purchases therefrom, whilst, on the other hand, Canadian raw materials, such as mineral and forest products, are required in constantly increasing quantity by her southern neighbor. It must be remembered, too, that the frontiers of the two countries march side by side for more than three thousand miles, and are crossed by railway lines at many different points, whilst common to both countries are vast navigable lakes and waterways, on the shores of which numerous towns and cities form convenient points for the interchange of commodities. These factors have brought about, within the past 30 or 40 years, a great increase in the United States' trade with Canada; and for some 30 years imports from the United States into the Dominion have exceeded those from the United Kingdom. The most rapid movement in this direction took place between 1880 and 1900, but even since the beginning of the present century the proportion of United States' imports has been increasing generally while that of British imports has declined. In the export trade of Canada the United Kingdom still holds first place." The following figures show the relative shares of the United Kingdom and the United States in the external trade of Canada during the last fifteen years, namely:—

Imports into Canada.

	From the **United Kingdom.**		From the **United States** (including Alaska)	
	Amount Million $.	Per cent. of total Canadian imports.	Amount. Million $.	Per cent. of total Canadian imports.
5 years ended June 30, 1906 (average)	60	23.6	156	61.4
5 years ended March 31, 1912 (average)	98	23.2	263	62.5
Year ended March 31, 1913	140	20.2	455	65.8
Year ended March 31, 1914	133	20.4	426	65.5

Exports from Canada.

	To the **United Kingdom.**		To the **United States** (including Alaska)	
	Amount. Million $.	Per cent of total Canadian imports.	Amount. Million $.	Per cent of total Canadian imports
5 years ended June 30, 1906 (average)	120	54.4	78	35.3
5 years ended March 31, 1912 (average)	141	48.8	112	38.7
Year ended March 31, 1913	178	45.3	167	42.0
Year ended March 31, 1914	222	46.4	208	41.9

The imports from the United States include a certain proportion of natural products and other articles in which the United Kingdom cannot hope to compete. The British trade commissioner for Canada in his report on the trade of Canada for 1913, has calculated that out of the total imports into Canada of merchandise in which British manufacturers are in a position to compete, the imports from the United Kingdom amounted to 33 per cent., and those from the United States 57 per cent. But even on this showing the position of the United Kingdom manufacturer in the Canadian market compares unfavorably with his position in the markets of the great dominions in the southern hemisphere. It has been calculated that of competitive imports into South Africa the United Kingdom supplied in 1912 about 67 per cent.; the corresponding figure for Australia was about 63 per cent., and that for New Zealand about 73 per cent.

"The United Kingdom," says the report, "maintains its prominent position in the export trade of Canada. The United Kingdom and the United States between them receive about seven-eighths of the Canadian exports, but the Canadian export trade to the United States differs greatly in kind from that to the mother country. Of the products of Canadian agriculture the United Kingdom receives a far larger share than the United States, but the shipments of minerals and of forestry produce from Canada to the United States are much greater than to the United Kingdom. Whilst it is gratifying to observe that Canada sends so large a proportion of its surplus production of foodstuffs to the mother country, it is not satisfactory to find that the output of Canadian mineral ores and of timber is largely sent to a foreign country for manufacture. Signs are not wanting, however, that this position is realized in the Dominion. Already there is a strong movement in favor of local refining of ores, and better local utilization of the lumber and pulp-wood resources of Canada."

Trade With Other Dominions.

Canadian trade with the other self-governing dominions has kept pace with the general development of the external trade of Canada. A large part of this trade is carried with our neighbor, Newfoundland, which sends the products of its fisheries to Canada in exchange for coal, flour, and manufactured goods. In recent years also there has been a large export of iron ore from Newfoundland to Nova Scotia for smelting. This exchange between the neighboring dominions is naturally distinct in character from the trade which Canada carries on with other dominions, from which it is separated by long sea distances. In the following statement showing the progress of the trade of Canada with the self-governing dominions, trade with Newfoundland is therefore distinguished from that with the more distant dominions.

	Imports into Canada			Exports from Canada		
	Newfoundland.	**Other Dominions.**	Total.	**Newfoundland.**	**Other Dominions.**	Total.
	Million $	Million $	Million $	Million $	Million $	Million $
Average of 5 years, ended June 30, 1906	1.2	0.3	1.5	2.9	5.4	8.3
Average of 5 years, ended March 31, 1912	1.7	1.6	3.3	3.8	6.6	10.4
Year ended March 31, 1913	2.0	3.8	5.8	4.7	9.0	13.7
Year ended March 31, 1914	1.8	4.6	6.4	4.8	10.4	15.2

The trade carried on between Canada and the dominions in the southern hemisphere partakes generally of the same characteristics. Amongst the exports from Canada to these Dominions, agricultural implements and machinery play an important part, so much so, indeed, that Australia is at the present time one of the largest markets for Canadian agricultural implements. Motor vehicles have also been shipped in recent years in increasing quantities; in 1913-14, out of the total Canadian export of these goods valued at $4,320,000, the shipments to South Africa, New Zealand and Australia represented a value of $2,577,000. Canada also sends wheat and flour to South Africa. In exchange, Canada receives meat, wool, butter, hides and skins, etc.

A special feature of Canadian trade with the other dominions has been the large development of trade with New Zealand. The aggregate of this trade represented an average value of $620,000 in each of the five years 1902-1906; in the succeeding five years this figure increased to $1,740,000, and in the year 1913-14 the total trade was $5,240,000. This increase of trade has been considerably assisted by the action of the New Zealand government in contributing to a subsidized steamship service across the Pacific and by the enterprise of the Union Steamship Company of New Zealand in constructing fast vessels for this service.

CANADA FOUNDRIES AND FORCINCS COMPANY

Canada Foundries and Forgings Company is understood to have had a prosperous year. The company is still operating all its Welland plants to capacity, and operation at this rate has been kept up throughout the year. The Delaney plant recently purchased by the company in Buffalo, has received additional orders for ship forgings, and the earnings have permitted the retirement already of $100,000 bonds, reducing the outstanding issue to $130,000.

LATE FIRE REPORTS

Montreal, Que.—December 24—Premises of Montreal Light, Heat and Power Company damaged.

Edmonton, Alta.—December 20—The stock and buildings of the Cockshutt Plow Company and Moses Lyons, dealers in provisions, destroyed. Estimated loss, $40,000.

Quebec, Que.—December 22—Home and furniture of Bien Leclerc damaged. Estimated loss on building, $200; on furniture, $600.

Fingal, Ont.—December 11—School house destroyed. Caused by overheated furnace. Estimated loss on building, $13,000; on contents, $2,000. Insurance carried, $11,000. Carried in Merchants Fire Insurance Company.

HIDES FROM INDIA FOR INSPECTION OF TANNERS

India is said to be the largest and most important producer of hides within the British Empire, the quantity of raw Indian cowhides (kips) available annually being about 11,000,000, of which about 3,000,000 are tanned in the country. Prior to the war about 5,000,000 hides were annually exported to Germany and Austria. The German market being cut off, the British government desires to secure a market within the British Empire for these hides, and it is hoped that even after the war is over Germany will no longer have the profit of treating these hides and selling the products to the world at large.

The Department of Trade and Commerce at Ottawa, by arrangement with the Hides and Tanning Materials Committee of the Imperial Institute has secured a large number of samples of the Indian cowhides for exhibition in different centres where tanners may inspect them. These hides are now on exhibition in Toronto and will remain there until January 25th. The tanners of Ontario may inspect them on application to Mr. W. Canham, of Wilson and Canham, Limited, 36 Wellington Street East, Toronto, who will have charge of them while they remain in Toronto. They will be afterwards exhibited in Quebec city and other centres.

Full particulars regarding these hides may be obtained from the Commercial Intelligence Branch of the Department of Trade and Commerce. (Refer File No. 18459.)

MONEY MARKETS

Messrs. Glazebrook & Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:

	Buyers.	Sellers.	Counter.
N.Y. funds	25-64 pm	27-64 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling, demand	4.7690	4.7710	4.79
Cable transfers	4.7825	4.7850	4.80½

Rates in New York—Sterling, demand, 4.75 3-16. Bank of England rate, 5 per cent.

The Alberta Foundry and Machine Company, and the Medicine Hat Pump and Brass Company, of Medicine Hat, have received munition orders that will keep their plants running with a double shift of men from now until the end of March. The other munition plants of the city have United States orders that will keep them busy for a similar length of time. The two companies which have received the new orders, and their employees, subscribed over $100,000 to the Victory Loan. Several of the employees subscribed $1,000 and over.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Angus, Ont. December 24 Many stores owned by W. S. Lee, including his grocery store, destroyed. Estimated loss, $8,000.

SIMPLICITY FIRST

is about as important in your life assurance as "Safety First," because a contract that is not simple to understand may not be safe for your particular purpose.

The life assurance policy of the future must be an attractive and exactly worded contract, but above all CLEAR and SIMPLE — the new policy standard as set by

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Granby Copper Company.—The regular quarterly dividend has been declared by the company at the rate of $10 per annum. The company has 150,000 shares of issued capital and $2,514,400 bonds due in 1928. Its quick assets on June 30th were $5,219,000. At $66 per share, the present market for the stock and par for the bonds—less the above quick assets, the whole Granby mine, smelter, converting and power plants are given a valuation of but $7,500,000, or less by $1,500,000, than the combined profits of the fiscal years of 1916 and 1917.

Based on the output for the year ended June 30th, 1917, it had 278 pounds of production per share of stock. Carrying the same sort of calculation a little further the Wall Street Journal figures that its annual output is selling in the stock market for but 18 cents per pound. As well regarded copper flotations have been offered to the public on the basis of capitalizing annual output at $1 per pound, the figures stand out in striking contrast.

The company has for years been handicapped by high cost of coke and irregular deliveries. To obviate these difficulties it has acquired a high grade coal property, one seam of which shows 20,000,000 tons of high grade coking coal. Between $1,200,000 and $1,500,000 will be spent in developing and bringing the new property to a productive stage, all of which will be taken from earnings.

The following are the operating figures for a series of years ended June 30th:—

	1917.	1916.	1915.	1914.
Ore treated, tons	1,558,345	1,929,205	1,098,020	1,289,000
Copper produced, lbs.	41,878,568	42,198,083	26,638,912	23,320,097
Silver, ounces ..	599,349	487,845	377,881	435,275
Gold, ounces ...	29,821	44,848	31,388	43,882
Cost per pound, (cents) ...	13.94	12.30	10.66	11.50
Average price received (cents)	27.4	22.98	15.87	14.58

For the ten years 1908-1917, the company's aggregate net profits were $12,915,537, or $88.04 per share. Dividends paid were but $34 per share. The record of earnings, dividends, working capital, etc., are as follow:—

	Operating profits.	Earn per share.	Dividends.	Working capital.
1917	$5,256,100	$34.82	$9.00	$5,219,007
1916	4,107,621	25.46	6.00	3,748,025
1915	1,340,557	6.19	....	1,677,520
1914	622,071	2.93	6.00	843,595
1913	1,214,599	7.99	3.00	2,075,234
1912	583,379	*....	....	934,837
1911	217,416	1.46	1.00	958,600

*The sum of $600,562 was charged out of earnings and surplus for depreciation, leaving no net profits for the year 1912.

At $66 per share, its present quotation, Granby is selling at a discount of $54 from its best price last year. In fact it is $13 per share under the low of 1916, and only $8 above the low of 1915. The $10 dividend calls for but $1,500,000 per annum. A profit of only 4 cents per pound on 40,000,000 pounds of annual output will cover this dividend. It is clearly to be seen that the present disbursements to shareholders are amply protected unless unlooked for cash necessities should arise. At its present price the investment nets a return of over 14 per cent.

Dominion Bridge Company.—"The profits for the year ended October 31st last," said President Phelps Johnson, "show a contraction, the net available for distribution amounting to $1,186,436, against $2,762,280 in 1916, a decrease of $1,575,844. The percentage earned on capital stock was 18.2 against 42.5.

The result is described in the directors' report as "disappointing," with the disappointment due "very largely to unremunerative contracts for shells and other munition work." But it is well to note in this connection that, while the profits are smaller than in either of the two years immediately preceding, they are larger than in any year prior to 1914-15, and a showing of more than 18 per cent. earned for shareholders, after depreciation, would be considered exceptionally good, if judged by any other than the inflated standards of the past two or three years of war profits.

"The only deductions from net earnings, apart from dividends, are $300,000 transferred to special reserve against inventories and $82,620 transferred to investment reserve. The form in which the year's results are presented is slightly changed, details being given as to depreciation allowance, for instance. Such comparisons as may be made with previous years follow:—

	1917	1916	1915.
Profits	$1,360,533	$2,776,390	$1,344,347
Less:—			
Directors	14,110	14,100	13,910
Interest, etc.	30,330	*	*
Bad debts reserve........	6,555	*	*
Depreciation	123,101	*	*
Total deductions	$ 174,097	$ 14,110	$ 13,910
Net earnings	1,186,436	2,762,280	1,330,437
Dividends	747,500	1,300,000	568,750
Balance	$ 438,936	$1,462,280	$ 761,687
Reserves	382,620	588,107	204,282
Balance	$ 56,316	$ 874,073	$ 557,404
Written off	.....	.	174,586
Balance	$ 56,316	$ 874,073	$ 382,817
Previous balance	1,623,274	740,100	366,283
Total profit and loss....	$1,679,590	$1,623,274	$ 749,100

*Provided for before showing profits.

"Contracts have been secured for marine engines and boilers, totalling in value about $1,170,000.

"The balance sheet shows that plant additions made during the year cost $534,667, while investments in other companies increased $183,718. This, with an increase of nearly $700,000 in the net amount expended on uncompleted contracts and an increase in accounts receivable, explains an increase of upwards of a million dollars in current liabilities. Temporary loans of $1,150,000 have been contracted.

"Notwithstanding the foregoing, the margin of working capital remains substantial at $1,797,449. That is $461,000 less than a year ago, but the showing is arrived at after deducting from inventories the special reserve of $300,000 established to provide against any sudden drop in the prices of materials. These, it is stated, had previously to the reserve position been inventoried at well below cost or current market prices. The further precaution of the reserve provision therefore materially strengthens the company's position against any sudden adjustment in the steel market.

The main features of the balance sheets of 1917 and 1916 compare as follows:—

Liabilities.

	1917.	1916.
Capital stock	$ 6,500,000	$ 6,500,000
Reserves—		
Depreciation	386,704	386,704
Accidents	181,358	181,358
Insurance ..	56,786	69,287

Living Under The Shadow of War

In these dark and uncertain days, only the very best judgment should be employed in selecting investments. Sobered by the lessons of the war, sensible men and women have relinquished schemes to get rich quick by means of speculative securities and they now prefer safe investments yielding moderate interest to questionable ones with high rates. Beneficiaries under insurance policies are often perplexed as to how to invest their moneys safely and profitably, but the continuous monthly income policy, payable in monthly instalments throughout life, and for twenty years certain, solves the problem completely. It constitutes an automatic safe investment and is issued by

A REMINDER

There is no one time of the year better than another for arranging Life Insurance but the NEW YEAR means new resolutions—a "FRESH START"—and when could the question of Life Insurance be more appropriately considered than at the NEW YAER? No man can count his affairs in order until he has assured, so far as human foresight can assure, the continued welfare of those dependent on him.

The Great-West Life Assurance Company in its wide range of Policies, provides for every need and circumstance,—the Farmer, the Merchant—the professional man, and the wage earner—may all find Policies peculiarly adapted to their needs. Premium rates are low, and the profit returns to Policyholder are remarkably high.

Full information of the Company's many attractive plans will be gladly given on request.
